

TO: SOUTHERN NEVADA DISTRICT BOARD OF HEALTH DATE: February 23, 2017

RE: Approval of Revision to Southern Nevada Health District Environmental Health Fee Schedule

PETITION #04-17

That the Southern Nevada District Board of Health adopt the attached Environmental Health Fee Schedule effective July 1, 2017.

PETITIONERS:

Sharon L. McCoy-Huber, Financial Services Manager Jacqueline Reszetar, Director of Environmental Health Andrew J. Glass, FACHE, MS, Director of Administration Joseph P. Iser, MD, DrPH, MSc, Chief Health Officer

DISCUSSION:

The Southern Nevada Health District uses a cost allocation methodology in determining fees for services. The Health District includes costs for staff (salaries and benefits), costs for supplies, costs for product, and overhead in the calculation. Proposed additions and changes to the Southern Nevada Health District's Environmental Health fee schedule reflect these costs, which is an accurate reflection of the costs to deliver the services, and are indicative of price increases from vendors. These changes will be effective July 1, 2017.

FUNDING:

No funds are required in approving the above requested action.

Memorandum

Date:

February 14, 2017

To:

Southern Nevada Health District Board of Health

Via:

Joseph P. Iser, MD, DrPH, MSc, Chief Health Officer

From:

Sharon McCoy-Huber, Financial Services Manager

CC:

Jacqueline Reszetar, Director of Environmental Health Andrew J. Glass, FACHE, MS, Director of Administration

RE:

Fee Increase for Food Establishments

The Board of Health approved a fee change June 24, 2010. At that time the fee was calculated based total expenditures of the Environmental Health Division (EH). The total was then divided by the approximate man-hours spent doing various jobs throughout EH. An hourly rate of \$118 was established. That rate was then multiplied by the estimated man-hours it took to do an inspection. Inspections were classified by size, categories and sub-categories within each category.

Since that time, EH has developed guidelines based on the Food and Drug Administration's Risk Categories and is working towards inspections following these guidelines. Finance began working with EH in August 2016 on revising the fee structure to charge establishments based on the risk category and size. Two attachments, Risk Category Descriptions and Risk Category with Examples, help to define the basis behind the revised fee structure.

Also, included in the calculation is the size of the establishment, the larger the size of the establishment, more time and effort is needed. The categories for size are characterized as they were previously, but previously the size was not considered when looking at the fees.

Lastly, EH provided Finance with the number of food establishment permits that are issued annually. EH has placed each establishment within a risk category by size grouping and the results follow:

			Risk	Catego	ry		
		1	2	3	4	Total	
	A	8,224	3,355	1,325	138	13,042	
2 0	В	1,733	1,436	1,070	61	4,300	
Size	C	485	75	67	22	649	
on G	D	162	19	40	6	227	
	E	316	10	8	9	343	
Tota	ıl	10,920	4,895	2,510	236	18,561	

Finance, used a Cost Allocation Methodology to detail the expenditures that needed to be recovered from the fees for food establishments. Cost Allocation Methodology first takes all costs of the Food area within EH. EH has a total overall budget of \$21,762,115. Staff wanted to only focus on the Food area within EH.

Category	Amount
Personnel costs (69 staff)	\$ 8,658,441
Operating supplies	18,300
Charges & other services	50,715
Staff training	489,851
Indirect cost	3,105,310
Total Expenditures	\$ 12,322,617

This budget included new staff to address inspections following the EPA guidelines as outlined above.

Using the number of permits to be charged and the revenues that need to be collected from the Food area of EH, Finance created a fee structure as follows:

Propo	sed	Risk Category							
Avg R	ate	1	2	3	4				
	A	\$ 253	\$ 596	\$ 969	\$ 1,565				
a di	В	\$ 596	\$ 969	\$1,565	\$ 2,235				
Size	C	\$ 969	\$ 1,565	\$ 2,235	\$ 3,278				
on 5	D	\$ 1,565	\$ 2,235	\$3,278	\$ 4,321				
	E	\$ 2,235	\$ 3,278	\$ 4,321	\$ 5,364				

The food establishment fees will be based on the size and risk category of the establishment. The proposed fee structure should leave approximately 44% of the permits at the same rate. Please see the attached revised fee schedule.

Currently fees for Food Establishments bring in total revenues of \$9,994,644. With the proposed increase the fees would bring in approximately \$12,150,623. Resulting in the EH fees for food establishments funding approximately 100% of expenditures for that area.

Food Establishment Risk Category Descriptions

RISK CATEGORY	DESCRIPTION
1	Packaged Food and Minimal Food Preparation 1-1 Establishments that serve or sell only pre-packaged foods. 1-2 Establishments that handle open non-TCS foods. Warewashing. Food courts. 1-3 Establishments with RTE TCS foods and /or that heat only commercially processed TCS foods for hot holding. Butcher shops. No cooking of raw animal product, nor cooling of TCS foods.
2	 Most products are prepared/cooked and served immediately (cook and serve) May involve hot and cold holding of TCS foods after preparation or cooking for same day service. Complex preparation (including cooling) of TCS foods for subsequent day use is limited to only a few (3 or less) foods (all food products are counted individually). Cooling of limited quantities of food for next day service. Sushi operations with service of raw animal product.
3	 Complex Food Operations (extensive menu and handling of raw ingredients/full service facilities with all 5 risk factors) Variety of processes require hot and cold holding of TCS food. Complex preparation including cooking, cooling, and reheating for hot holding involves many TCS foods. Preparation of food for subsequent day use.
4	Special Process and Susceptible Populations (higher degree of regulation due to increase risk of FBI) 4-1 Establishments serving highly susceptible populations. 4-2 Establishments conducting processing. 4-3 Establishments that conduct specialize processes.

Food Establishment Risk Categories With Examples

RISK	EXAMPLES
1-1	Packaged Food and Minimal Food Preparation. Establishments that serve or sell only pre-packaged foods. Packaged food stores/markets, convenience store market, gift shop, liquor stores, packaged warehouse for dry goods, storage areas for packaged food, ice cream trucks
1-2	Packaged Food and Minimal Food Preparation. Establishments that handle open non-TCS foods. Warewashing. Food courts. Candy stores, popcorn stores, liquor/soda pump rooms, ice machine rooms, dishrooms, food courts (seating and/or warewashing only), donut shop (retail only), golf cart
1-3	Packaged Food and Minimal Food Preparation. Establishments with RTE TCS foods and /or that heat only commercially processed TCS foods for hot holding. No cooking of raw animal product, nor cooling of TCS foods. • Coffee shops (Starbuck-like), convenience store deli, bars (including banquet/portable bars), garde manger (most), snack bars/arena concessions, sandwich shops/delis, ice cream shops, smoothie shops, support area/kitchens (salad prep, dessert prep, "pantry", staging areas, wait stations), buffet (salad, dessert), butcher shops, warehouse with refrigerated storage, storage areas with refrigerated storage, portable units for the service of food (hot dog & coffee carts), seasonal/annual low risk, school ISMs kitchens
2	Limited Menu Operations. Most products are prepared/cooked and served immediately (cook and serve). May involve hot and cold holding of TCS foods after preparation or cooking for same day service. • Fast food (most), snack bars, barbeque, support area/kitchen (reheating/cooking, hot holding, remote storage), bakery (low risk products with eggs), buffet stations (American, Italian, Chinese, etc.), portable units for the service of food (food service trailers), seasonal/annual high risk, full service coach (mobile vending), school dish-up kitchens Complex preparation (including cooling) of TCS foods for subsequent day use is limited to only a few (3 or less) foods (all food products are counted individually). Cooling of limited quantities of food for next day service. Sushi operations with service of raw animal product. • Fast food/quick service (w/cooling like Wendy's, Wienerschnitzel, Taco Bell), grocery store deli (that cools chicken), sushi bars, oyster bars, bakeries (Crème Brulee, cheesecake), support area/kitchens (minimal cooling)
3	Complex Food Operations (extensive menu and handling of raw ingredients). Variety of processes require hot and cold holding of TCS food. Complex preparation including cooking, cooling, and reheating for hot holding involves many TCS foods. Preparation of food for subsequent day use. • Full service restaurants, main kitchens, buffet kitchens, banquet kitchens, support area/kitchens (complex preparation), garde manger (complex prep/cooling), complex bakeries (Asian/meat products)
4-1	Special Process and Susceptible Populations • Establishments serving highly susceptible populations. Childcare kitchens (less than school age), senior centers, senior apartment food service
4-2	Special Process and Susceptible Populations • Establishments conducting processing. Facilities FDA or USDA inspected, processors who wholesale their products, processors who retail their products
4-3	 Special Process and Susceptible Populations Establishments that conduct specialized processes, e.g., smoking and curing; reduced oxygen packaging for extended shelf-life. Facilities with required HACCP plans/waivers (produce/package food using ROP 2 barrier or cook chill, smoking, curing, using food additives, molluscan shellstock life-support system, sprouting seeds or beans, juice processing)

Southern Nevada Health District Environmental Health Division

Permit and Plan Review Fee Schedule

Southern Nevada Health District Division of Environmental Health (EH) incurs both direct and indirect costs associated with its operation. In addition to those costs which are directly attributable to Plan Reviews and Permits, EH is supported by Administration, IT, Human Resources, Finance, Facilities Management, and Public Information. This indirect cost is allocated to EH based on statistics indicative of the services provided to the division. Rate increases in the future will be based on operating cost increases incurred in the course of business and to maintain an appropriate level of service.
