

# Aquatic Facility Regulations

# Process Since August 2017

- Business Impact Study/Survey
  - Completed 2017
  - Results presented and approved by BOH January 2018
- Held 3 Public Workshops in November 2017
- Participated in separate industry workgroups
  - Resort Association
  - HOA and Apartment Complexes

# Changes made since August 2017

- Revised Responsible Person definition and responsibilities
- Removed requirement for existing facilities to install horizontal deck markings
- Added in alternatives for monitoring and controlling of pool chemicals on newly constructed facilities

# Changes made since August 2017

- Returned requirement for chlorine generating capacity of equipment to that of NAC
- Returned the acceptable concentration of Cyanuric Acid to 100 ppm
- Returned the HOA exemption for lifeguard staff

# Changes made since August 2017

- Added in a 30 day review requirement for Waivers
- Reworded sections to better clarify intent
  - Responsible Person
  - Waiver Section
- Development of Appendix A

# Purpose of Appendix A

- Empower HOA's and Apartment Complexes to self manage pools and spas
- Allows for a decrease in routine inspections
- Allows SNHD resources to be redirected to aquatic facilities with broader usage

# Implementation

- BOH Approval
- State Approval
  - Effective date on new construction
- One year orientation
  - Effective start date 2019 TBD
  - Trainings will be held during the 1 year orientation

# In Conclusion

- Since 2015 Industry has played a significant role in shaping today's final proposal..
  - Workshops
  - Industry feedback
  - Business Impact Survey
- Industry provided constant feedback that was incorporated into the proposed regulations
- Thank you to all who participated in the process.
