

Get the lead out

Call **759-1283**
for information

In Clark County, **one in four** kids 6 years or younger is exposed to lead.

Your child may be exposed to lead from many sources:

- imported products such as candy, jewelry and toys
- some imported pots, dishes and ceramics
- home remedies used to treat upset stomach or empacho
- soil
- chipped or peeling paint from homes built before 1978
- dust created from remodeling homes built before 1978

Ask your doctor to test your child at 12 and 24 months or before the age of 6 years if he/she has never been tested.
