

Southern Nevada Weekly Influenza Surveillance Snapshot CDC Week 13, March 25, 2018 to March 31, 2018

Summary:

Influenza surveillance for Clark County, Nevada includes data collected from 16 local hospital emergency rooms and 70 healthcare providers. During week 13, the influenza activity decreased in the United States and remained at the minimal level in the state of Nevada. In Clark County, as of 3/31/2018, the total number of confirmed cases of influenza during the season was 1264 with 50% being age 65 and older, and the proportion of emergency room (ER) visits for Influenza-like Illness (ILI) decreased from 4% in week 12 to 3.2% in week 13. Approximately 48% of area ER visits for ILI were children under 18 years of age. Influenza B was the dominant type circulating in Week 13. Twenty-six influenza-associated deaths, including 3 deaths of children under age 18, occurred this season in Clark County. Southern Nevada Health District will continue to update the public on the progression of the season and encourage influenza vaccination for all persons 6 months of age and older.

Table 1: Influenza Report by Age Group, Clark County, NV (CDC Week 40, 2017 to Week 13, 2018)

Age Group	Deaths	Hospitalized	Confirmed Cases*
0-4	1	43	74
05-17	2	29	99
18-24	1	29	34
25-49	1	113	181
50-64	6	172	240
65+	15	539	636
Total Confirmed Cases	26	925	1264
