

Southern Nevada Weekly Influenza Surveillance Snapshot CDC Week 43, Oct 21, 2018 to Oct 27, 2018

Summary:

Influenza surveillance for Clark County, Nevada includes data collected from local acute care hospitals and other healthcare providers. During week 43, influenza activity remained low locally and nationally. In the state of Nevada, the geographic spread of influenza was sporadic, and the ILI activity level was minimal. In Clark County, as of 10/27/2018, Eight influenza-associated hospitalizations and zero influenza-associated deaths were reported. The proportion of emergency room (ER) visits for Influenza-Like Illness (ILI) was 2.2% in week 43 which was the same as week 42 (2.2%). Approximately 57% of area ER visits for ILI were children under 18 years of age. Southern Nevada Health District will continue to update the public on the progression of the season and encourage influenza vaccination for all persons 6 months of age and older.

Table 1: Influenza Report by Age Group, Clark County, NV (CDC Week 40, 2018 to Week 43, 2018)

Age Group	Deaths	Hospitalized	Confirmed Cases*
0-4	0	2	2
05-17	0	0	0
18-24	0	0	0
25-49	0	0	0
50-64	0	2	2
65+	0	4	4
Total Confirmed Cases	0	8	8
