

Health cards are so last year.

■ If you are a food handler, you are now required to get a **food handler safety training card**, as well as online food safety training.

■ If you are employed in the body art industry, you are now required to get a **body art card**, take disease transmission training and pass a certification test.

■ If you are employed in any other field that used to require a health card, you are officially **off the hook**.
(Note: TB screening is still required for adult group care, barbers and child care workers. Additionally, child care employees working in the kitchen of a child care facility still need a food handler safety training card.)

Refer to this chart to see which requirements still apply to your profession.

Occupation	Training	Card	Screening
Adult group care employees			X
Aestheticians			
Barbers			X
Body piercing technicians	X	Body Art	
Child care employees*			X
Food handlers	X	Food Handlers	
Health club attendants			
Massage therapists			
Permanent make-up artists	X	Body Art	
Reflexologists			
Tattoo operators	X	Body Art	

*Child care employees who work in the kitchen of a child care facility need a food handler safety training card.
