however, given new medical information C. Shearer states there is need for updating and modernization of laws.

Reynolds states that being no legal, female sex worker has acquired HIV in the state of Nevada while working in a brothel, this fact provides significant backing for legalizing prostitution; he states that if Nye County decides to criminalize prostitution then it will have a direct impact on HIV rates given that over 800 individuals have reported participating in illegal sex work and have tested positive.

Chair C. Radeloff states the need to hear from individuals that belong to the sex work community, including those that work in licensed brothels but also those who do not work in licensed brothels.
