

Public Health Update – 2009 H1N1 Influenza

January 13, 2010

The Southern Nevada Health District reports the following information for the week ending Saturday, January 9, 2010. The report includes cumulative case counts for the 2009-2010 influenza season beginning August 31, 2009.

Week Ending	Confirmed	Cumulative Cases*
January 9	10	3431
January 2	20	3421
December 26	19	3401
December 19	40	3384
December 12	109	3343
December 5	101	3228
November 28	62	3127
November 21	172	3065
November 14	318	2890
November 7	623	2567
October 31	416	1940
October 24	854	1524
October 17	361	670

Clark County 2009 H1N1-related deaths since spring 2009: 36**

The health district is not reporting any additional deaths for the week ending January 9.

The comprehensive weekly surveillance report is posted at:

<http://www.southernnevadahealthdistrict.org/download/epi/flu-surveillance-update-010910.pdf>

To date, the health district has received 157,100 doses of the 2009 H1N1 influenza vaccine, some of which has been distributed to private providers. Approximately 369,000 doses have been delivered to private providers in Clark County by the Nevada State Health Division. The Southern Nevada Health District has administered more than 106,000 doses since October.

**Cumulative totals may not add up to the current week total plus the cumulative total from the previous week, as cases from previous weeks can be reclassified from influenza to novel H1N1 based on new lab results, and duplicates are identified and removed.*

***This number represents Clark County residents only and is cumulative since 2009 H1N1 influenza was identified in the spring. In early June, the health district reported the death of a hospitalized patient who was a resident of another state.*
