Health District reminds everyone to ‘set your clocks, check your stocks’

LAS VEGAS – The Southern Nevada Health District reminds Las Vegas Valley residents to check their preparedness kits when they move the clocks back this Sunday to ensure their emergency stockpiles are not missing any items and that food hasn’t expired. The switch to Standard Time is another opportunity to rotate items in preparedness kits, change batteries in radios, update family information or review communication plans. For more information about emergency preparedness or how to develop an emergency preparedness kit, visit www.SNHD.info.

Family emergency supplies can be contained in a large trashcan, a backpack or a suitcase and can be assembled over several months by adding just one or two items to a grocery list. A kit should include food, water, a first aid kit, tools, copies of important documents, clothing and bedding, medications, and pet supplies. A household preparedness kit should include enough supplies to sustain everyone in the household for up to three weeks.

The health district’s recommendations for a family emergency preparedness kit include:

- Prescription and over-the-counter medications
- Toiletries, including soap
- First-aid kit
- Baby formula and diapers
- Extra eyeglasses
- Pet food/medications/leashes/collars/ID tags
- Extra batteries for flashlight(s) and radio(s)
- Garbage bags
- Cash
- Non-perishable food (*ready-to-eat canned meats, soups, fruits, vegetables, peanut butter, protein bars*), utensils, can openers, sterno heating
- One gallon of water per person per day and fluids with electrolytes that will last for up to two weeks
