

FREE!

FREE TDAP SHOTS

Tetanus, Diphtheria and Pertussis (Whooping Cough)

FOR QUALIFYING ADULTS

To qualify for *free* vaccine, you must be an uninsured or underinsured adult who cares for a child up to 1 year of age.

Present this flyer for a free Tdap vaccination while supplies last. **\$20 administration fee may apply.**

Facts about Pertussis

- Pertussis, more commonly known as whooping cough, is a highly contagious disease spread through the air by coughing.
- Babies are especially vulnerable to whooping cough. They often catch it from the people who love them most: parents and family.
- Unvaccinated adults can get and spread the disease.

To find an immunization clinic near you, call 759-0850 or go to www.snhd.info

Getting vaccinated is the best way to protect the wee ones in your care.
