Subject: Public Hearing to Consider/Adopt Proposed Fee Schedule for the Office of EMS & Trauma System for July 1, 2014 – June 30, 2017

I. RECOMMENDATION:

Staff recommends the Board of Health consider adoption of the proposed fee schedule for the Office of Emergency Medical Services & Trauma System (OEMSTS) for July 1, 2014 through June 30, 2017.

II. BACKGROUND:

On April 19, 2014, a Public Hearing was scheduled for today related to proposed revisions to the District OEMSTS Fee Schedule over a three year period from July 1, 2014 through June 30, 2017. In general, the OEMSTS has not increased fees for the basic services provided for more than ten years. There was a cost increase to individuals seeking initial certification as an emergency medical technician in 2006 when the OEMSTS outsourced certification testing to the National Registry of Emergency Medical Technicians (NREMT). At that time, the OEMSTS charged \$10 to administer the test and NREMT charges up to \$110 for paramedic candidates. Those fees are paid directly to NREMT. In subsequent years, District leadership did not pursue fee increases because the majority of the entities regulated by the District were facing significant economic challenges.

III. DISCUSSION:

The recommended revisions to the OEMSTS proposed fee schedule are *italicized and underscored*.

A recent cost analysis of the services performed by OEMSTS staff revealed the need to increase fees to cover the related expenses for providing services. Further, new services have been added that are not addressed in the current fee schedule. The proposed fee schedule increases fees incrementally over a three year period. In FY 2015, new fees were created for re-inspection of EMS vehicles, training center authorization, trauma center authorization, endorsements to provide immunizations or dispense medications, special event medical plan approval, and

special event site inspections. Current fees were increased for ambulance service permitting, renewal of an expired Nevada certificate, provisional licensing of out-of-state candidates, licensure testing, initial endorsements for EMS instructors/critical care paramedics/EMS registered nurses, proctoring fees for NREMT psychomotor testing, and costs for providing copies of regulations/protocols/procedures. To reduce the impact on existing permitted agencies, fees were not increased in FY 15 for certification and licensure of EMS personnel and for renewal of instructor or critical care paramedic endorsements. Fees were increased incrementally in FY 16 and FY 17 to achieve the goal of covering the expenses of OEMSTS staff providing necessary services.

The supporting documentation for the proposed fee schedule revisions is attached for your reference. These documents include the cost analysis for services provided by OEMSTS staff; a projection of costs for certification, licensure, and vehicle inspections for each permitted agency in Clark County over the three year period; and a comparison of fees for certification, licensure, permitting, and vehicle inspections charged by other western states.

The OEMSTS has been operating in a deficit and it is necessary to address the situation. The process began with a thorough review of current expenditures which resulted in reductions in the budget where possible. The cost analysis of business activities performed by staff demonstrated the gap between our current fees and the cost involved in providing the services. A comparison with other western states showed wide variation in the fees charged for basic services. The states with the lowest fees generally have other dedicated funding sources to support their activities. The funding is often derived from fees on vehicle registrations or fines on traffic violations. The OEMSTS is exploring these options as potential sustainable funding sources for the Emergency Medical Services and Trauma System, but they do not currently exist.

The proposed fee schedule reflects the costs of providing the necessary services for our clients and supports our efforts to assure the highest standards of prehospital emergency medical care for our residents and visitors.

Staff conducted three public workshops on May 1, May 5, and May 7, 2014 for interested persons to present their views on the proposed fee schedule. The EMS Medical Advisory Board reviewed the proposed amendments and recommended the proposed fee schedule be forwarded to the Board of Health for adoption.
