

**A PROCLAMATION DECLARING JANUARY 2021 AS “NATIONAL RADON ACTION MONTH IN SOUTHERN NEVADA”**

**WHEREAS**, many Southern Nevada residents don’t know about radon, yet need to know for the safety and health of their families, as radon is a colorless, odorless, naturally occurring radioactive gas that is the primary cause of lung cancer among nonsmokers and the second leading cause of lung cancer for smokers; and

**WHEREAS**, the U.S. Environmental Protection Agency (EPA) estimates 21,000 people in the U.S. die each year from lung cancer caused by indoor radon exposure, and lung and bronchus cancer kills more people in a year than any other cancer; and

**WHEREAS**, radon kills more people than secondhand smoke, drunk driving and home fires combined; and

**WHEREAS**, any home in Southern Nevada may have elevated levels of radon, even if neighboring homes do not, and living in a home with an average radon level of 4 picocuries per liter of air poses a similar risk of developing lung cancer as smoking half a pack of cigarettes a day; and

**WHEREAS**, testing is the only way to know if a home has an elevated radon level, and testing is easy and inexpensive, and when identified, homes can be fixed; and

**WHEREAS**, University of Nevada, Reno Extension’s Nevada Radon Education Program, the Nevada Division of Public and Behavioral Health, and the EPA support efforts to encourage all residents in Southern Nevada to test their homes for radon, mitigate elevated levels of radon, and have new homes built with radon-reducing materials and features.

**THEREFORE**, We, the Southern Nevada District Board of Health, do hereby proclaim January 2021 as

**“NATIONAL RADON ACTION MONTH”  
In Southern Nevada**

I HEREBY CERTIFY that the foregoing Proclamation was passed, adopted, and approved this 28<sup>th</sup> day of January 2021 by the Southern Nevada District Board of Health.

Southern Nevada District Board of Health
