Drug Overdose in Clark Co

A RISING TREND

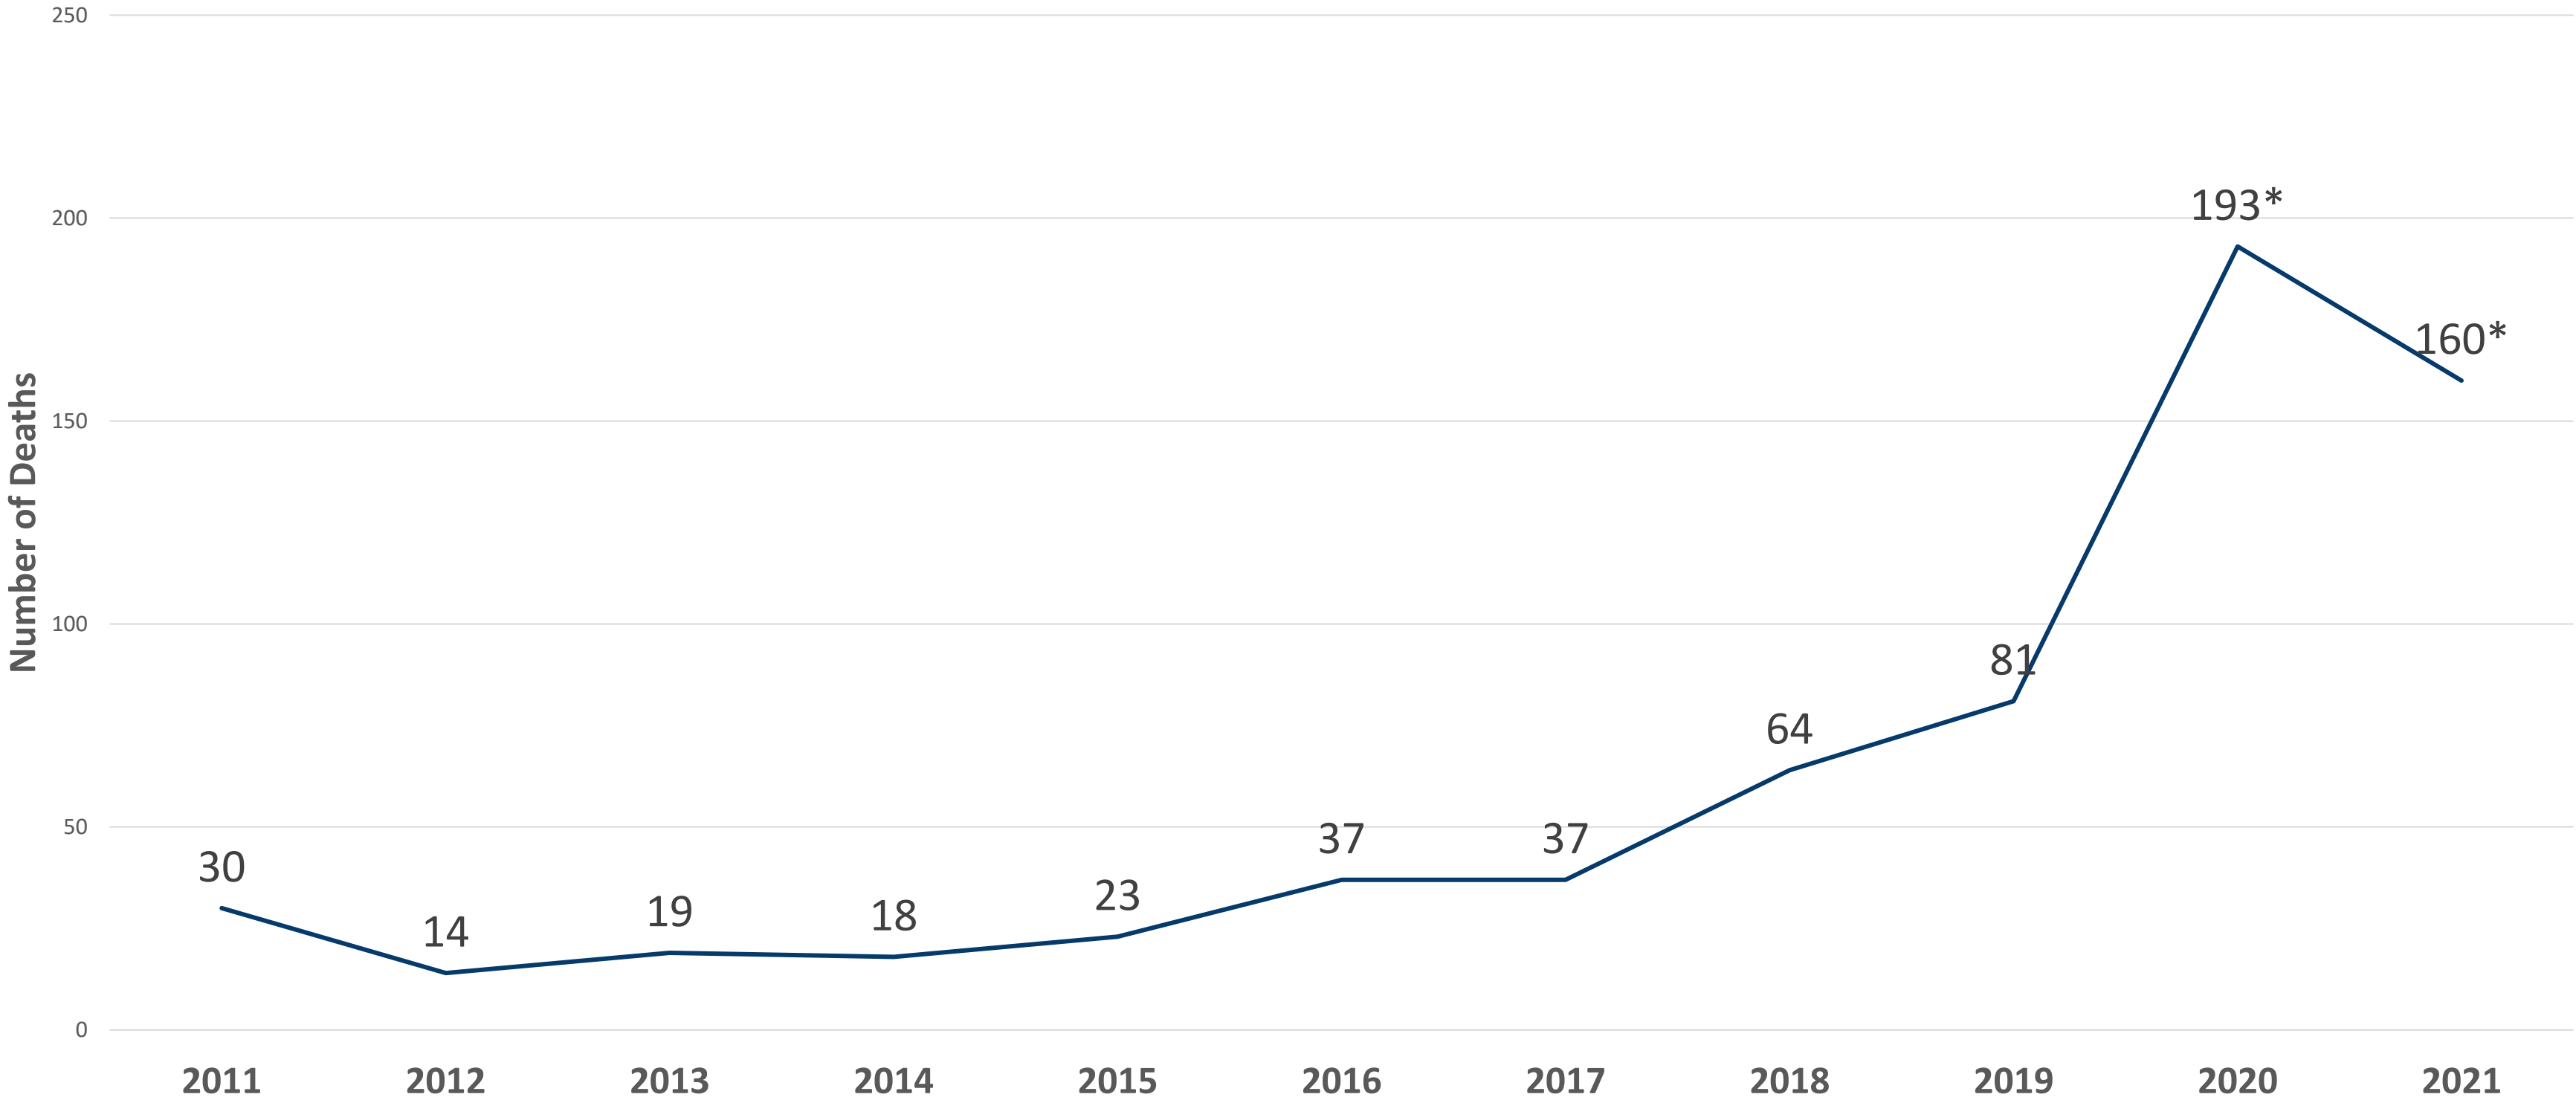

Number of Overdose Deaths by Any Drug in Clark County, 2019 - 2021

Statewide: "Overdoses among those younger than 25 years nearly tripled from 2019 to 2020."

Drug Overdose in Clark County – Fentanyl Deaths

Number of Fentanyl Overdose Deaths among Clark County Residents, 2011–2021

Data Sources:
1. 2011-2019 data: Centers for Disease Control and Prevention, National Center for Health Statistics. Multiple Cause of Death 1999-2019 on CDC WONDER Online Database released in 2020. Data are from the Multiple Cause of Death Files, 1999-2019, as compiled from data provided by the 57 vital statistics jurisdictions through the Vital Statistics Cooperative Program. Accessed at <http://wonder.cdc.gov/mcd-icd10.html> on Nov 2, 2021 5:37:27 PM 2. 2020-2021 data: SNHD Death Certificate Data. 2021 data are current through August 2021. *Data are subject to change Note: Data are Suppressed when the data meet the criteria for confidentiality constraints. Fentanyl overdoses were classified as “T40.4 - Poisoning by, adverse effect of and underdosing of other synthetic narcotics (e.g., Fentanyl, Tramadol)”.

**INFECTIOUS
DISEASE**

Clark County

2020

10,694 persons living with HIV or AIDS

325 persons newly diagnosed with HIV

Sharing injection drug equipment can lead to the spread of bloodborne diseases,
like HIV and hepatitis C

Current Harm Reduction Services Offered

Naloxone Pick Up

Community members can receive a brief training and pick up 2 doses of naloxone (brand name Narcan) at SNHD Pharmacy

Linkage to Action Team

SNHD's L2A team meets clients who use substances where they are to connect to services and additional care

Risk Reduction Counseling

Clients served through ODS and Ryan White Services are offered counseling to reduce risk

Community Trainings

ODS Staff offer free trainings to staff, stakeholders, providers, and community members on harm reduction and drug-related stigma.

STATEMENT OF NEED

Currently, SNHD has no mechanism to directly provide comprehensive harm reduction supplies, which can prevent drug overdose, HIV and hepatitis C.

Harm Reduction Program Benefits

Prevent transmission of blood-borne infections
Associated with a 50% reduction in HIV and HCV incidence.

Stop substance use
Prevent overdose deaths by teaching people who inject drugs how to prevent overdose.

Support public safety
Provide safe needle disposal to reduce the presence of discarded needles in the community and needle stick injuries among first responders

Cost effective interventions
Reduce health care costs by preventing HIV, viral hepatitis, and other infections

Public Health Vending Machine

LOCATIONS

Eight current vending machine locations in Nevada
