

#### **MINUTES**

#### SOUTHERN NEVADA DISTRICT BOARD OF HEALTH PUBLIC HEALTH ADVISORY BOARD MEETING October 3, 2022 – 8:30 A.M. Meeting was conducted via Webex Event

MEMBERS PRESENT:	Kenneth Osgood – Chair, Physician (in-person) Ronald Kline – Member, City of North Las Vegas ( <i>via WebEx</i> ) Paul Klouse – Member, City of Boulder City ( <i>via WebEx</i> ) Holly Lyman – Member, City of Henderson ( <i>via WebEx</i> ) Reimund Serafica – Member, Nurse ( <i>via WebEx</i> ) Francisco Sy – Member, Environmental Health ( <i>via WebEx</i> ) Jennifer Young – Member, City of Las Vegas ( <i>via WebEx</i> )
ABSENT:	Dick Tomasso – Member, City of Mesquite
ALSO PRESENT: (In Audience)	Linda Anderson, Dawn Christensen, Stacie Sasso, Brisa Stephani, Virginia Valentine
LEGAL COUNSEL:	Edward Wynder, Associate General Counsel
EXECUTIVE SECRETARY:	Fermin Leguen, MD, MPH, District Health Officer
STAFF:	Heather Anderson-Fintak, Maria Azzarelli, Tawana Bellamy, Nicole Bungum, Andria Cordovez Mulet, Aaron DelCotto, Heather Hanoff, Josie Llorico, Cassius Lockett, Cort Lohff, Kimberly Monahan, Laura Plascencia, Larry Rogers, Chris Saxton, Karla Shoup, Candice Sims, Randy Smith, Daniele Staple, Mackenzie Sullivan, Will Thompson, DJ Whitaker

#### I. CALL TO ORDER AND ROLL CALL Chair Osgood called the Public Health Advisory Board meeting to order at 8:36 a.m. Andria Cordovez Mulet, Executive Assistant, administered the roll call and confirmed a guorum was present.

#### II. PLEDGE OF ALLEGIANCE

Member Serafica joined the meeting at 8:37 a.m.

III. FIRST PUBLIC COMMENT: A period devoted to comments by the general public about those items appearing on the agenda. Comments will be limited to five (5) minutes per speaker. Please clearly state your name and address and spell your last name for the record. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chair or the Board by majority vote.

Seeing no one, the Chair closed this portion of the meeting.

#### IV. ADOPTION OF THE OCTOBER 3, 2022 MEETING AGENDA (for possible action)

A motion was made by Member Klouse, seconded by Vice-Chair Kline and carried unanimously to approve the October 3, 2022 Agenda, as presented.

1. APPROVE MINUTES/PUBLIC HEALTH ADVISORY BOARD MEETING: August 8, 2022 (for possible action)

A motion was made by Vice-Chair Kline, seconded by Member Klouse and carried unanimously to approve the October 3, 2022 Consent Agenda, as presented.

#### VI. REPORT / DISCUSSION / ACTION

1. Receive and Discuss the Business Impact Statement and Proposed Food Regulations; direct staff accordingly or take other action as deemed necessary (for possible action)

Candice Sims, Environmental Health Supervisor, presented the Business Impact Statement on the Proposed Food Regulations. Larry Rogers, Environmental Health Manager, was also present. Ms. Sims outlined the process taken by staff in reviewing the regulations and how comments were collected from the industry. The Business Impact Survey was emailed to 12,269 recipients and posted on the Health District's website; 22 surveys were returned. Ms. Sims proceeded with a summary of the major changes in the proposed regulation.

Further to an inquiry from Member Young, Ms. Sims explained the priority and priority foundation designations indicating that the Food Code dictated an increase in some of the demerit values for some violations that the Health District currently did not assign such a high demerit value.

#### Member Sy joined the meeting at 8:49 a.m.

Further to an inquiry from Chair Osgood, Ms. Sims advised that street vendors, if they were not working with a special event, would need a health permit. Ms. Sims advised that individuals could not walk around with their cart. There is only a permit category that allows for proper equipment to sell their food at one location. Further to an inquiry from Chair Osgood, Ms. Sims advised that the next step for individuals with a cart for street vending would be to revise the fee schedule as there is no permit category that would cover that activity. Chair Osgood requested that staff work on the permit category for cart street vending.

Mr. Rogers provided an update on the efforts to address unpermitted vending.

A motion was made by Member Klouse, seconded by Member Sy and carried unanimously to accept the Business Impact Statement and Proposed Food Regulations, as presented and recommend approval to the Southern Nevada District Board of Health.

2. Receive and Discuss a Presentation on the Increasing Incidence of Obesity in Children and Adults in Clark County; direct staff accordingly or take other action as deemed necessary (for possible action)

Nicole Bungum, Health Education Supervisor, Office of Chronic Disease and Public Health Promotion (OCDPHP), presented on the increasing incidence of obesity in children and adults in Clark County. Chair Osgood requested that a copy of the presentation be sent to the members.

Further to an inquiry from Member Sy regarding social media targeting the Native Hawaiian and Filipino population, which appeared to have a higher rate of obesity in Clark County, Ms. Bungum advised that OCDPHP has a program directed towards Native Hawaiian, called Island Envy, that includes topics such as physical activity, nutrition, and obesity.

Further to an inquiry from Member Young regarding the Veggie Buck Truck, Ms. Bungum advised that it was piloted in September 2021. Due to the response and the need, the Health District partnered with the Regional Transportation Commission and hosted a Veggie Buck Truck at the Bonneville Transit Center in the Spring, with a second location at the Health District's Decatur location. Ms. Bungum advised that there have been two markets a month from April to June 2022, and then again in September through November 2022.

Further an inquiry from Member Serafica regarding the 5-2-1-0 initiative, Ms. Bungum advised of the partnership with 100 Black Men of Las Vegas on a virtual cooking class that is promoted for families to have the opportunity to cook together. Ms. Bungum further advised that if children had the opportunity to cook or grow something, they are more likely to try it.

Member Sy shared information on the following initiatives: PILI Ohana, a Community-Based Participatory Research Program (CBPR) project by Dr. Kaholukula at the University of Hawaii Manoa and SNAX, a CBPR project in Los Angeles by the National Institutes of Health (NIH).

3. Receive, Discuss and Accept the 2023 Meeting Schedule; direct staff accordingly or take other action as deemed necessary (for possible action)

The Advisory Board reviewed the proposed 2023 Meeting Schedule. There were no questions or conflicts raised.

A motion was made by Member Klouse, seconded by Member Sy and carried unanimously to approve the 2023 Meeting Schedule, as presented.

VII. BOARD RECORDS: The Southern Nevada District Board of Health Public Health Advisory Board members may identify and comment on Health District related issues. Comments made by individual Board members during this portion of the agenda will not be acted upon by the Southern Nevada District Board of Health Public Health Advisory Board unless that subject is on the agenda and scheduled for action. (Information Only)

There were no items raised.

#### VIII. HEALTH OFFICER & STAFF REPORTS (Information Only)

DHO Comments

Dr. Leguen advised of the opening, a few days ago, of the new Fremont Public Health Center for the Southern Nevada Community Health Center (FQHC), that would start offering primary care services to the community in that area, which was an area of need. Dr. Leguen advised that the Health District looked forward to partnering with Clark County and community-based organizations to enhance our services in that area.

• COVID-19 Surveillance and Contact Tracing Update

Dr. Cassius Lockett, Director of Disease Surveillance and Control, advised that the COVID-19 Positive Test Rate was currently around 10%, which was substantial transmission, and that the hope was for it to be under 5%. Dr. Lockett advised that true case counts were under reported due to the availability of at-home test kits. Dr. Lockett advised that COVID-19 cases continued to decline, with the 7-day moving average, from September 15-28<sup>th</sup>, being 55 cases. Dr. Lockett advised that hospitalizations and deaths during the same timeframe, also continued to decline. However, the U.S. continued to see approximately 400 days per day, which made COVID-19 a top 10 cause of death. Dr. Lockett advised that the test positivity rate remained steady at 10-11%. Dr. Lockett advised that

his team currently has 36 internal contact tracers and 100 on contract. Staff continued to conduct testing at the METS clinic and the three CSN testing site locations.

Member Sy raised a concern that individuals believed that the pandemic was over and that a potential surge may occur in the winter. Dr. Lockett agreed and stated that only 4% of individuals that were eligible, had received the bivalent booster and encouraged anyone that was eligible, especially with those with comorbidities, receive the bivalent booster.

• Monkeypox Update

Dr. Cort Lohff, Chief Medical Officer, advised there have been 250 probable and confirmed cases of Monkeypox in Southern Nevada, with the peak in late July and early August. The Health District continued to receive 1-2 cases reported daily, which indicated that there was continued transmission in the community. Dr. Lohff advised that all cases continued to occur among men who have sex with men, among all age groups, with two-thirds of cases occurring predominantly between aged 25-44, and mainly among Black and Hispanic persons. Dr. Lohff advised that there was a two dose vaccination series available. Dr. Lohff stated that the CDC reported, last week, that among males 18-49 years, that were eligible for the vaccine, the incidents of monkeypox was 14 times higher than those that received the first dose, which shows that the vaccine was effective. Dr. Lohff advised that the Health District had administered over 6,300 doses of the vaccine and the eligibility criteria had been expanded twice to include more groups. Dr. Lohff advised that two additional vaccination clinics were recently added, at two of the CSN locations that provided the COVID-19 vaccine and was working with community partners to provide the vaccine at Gay Pride events on the weekend.

IX. <u>SECOND PUBLIC COMMENT</u>: A period devoted to comments by the general public, if any, and discussion of those comments, about matters relevant to the Board's jurisdiction will be held. Comments will be limited to five (5) minutes per speaker. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chair or the Board by majority vote.

Seeing no one, the Chair closed this portion of the meeting.

#### X. ADJOURNMENT

The Chair adjourned the meeting at 10:04 a.m.

Fermin Leguen, MD, MPH District Health Officer/Executive Secretary

/acm

#### AGENDA

#### SOUTHERN NEVADA DISTRICT BOARD OF HEALTH PUBLIC HEALTH ADVISORY BOARD MEETING October 3, 2022 – 8:30 a.m. Meeting will be conducted via Webex Event

#### <u>NOTICE</u>

WebEx Event address for attendees: https://snhd.webex.com/snhd/onstage/g.php?MTID=e483f7add84bac5ff4a62885df8f14fd5

To call into the meeting, dial (415) 655-0001 and enter Access Code: 2559 106 9224

For other governmental agencies using video conferencing capability, the Video Address is: 25591069224@snhd.webex.com

#### NOTE:

- > Agenda items may be taken out of order at the discretion of the Chair.
- ▶ The Board may combine two or more agenda items for consideration.
- The Board may remove an item from the agenda or delay discussion relating to an item on the agenda at any time.
  - I. CALL TO ORDER AND ROLL CALL
  - II. PLEDGE OF ALLEGIANCE
- **III. FIRST PUBLIC COMMENT:** A period devoted to comments by the general public about those items appearing on the agenda. Comments will be limited to five (5) minutes per speaker. Please clearly state your name and spell your last name for the record. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chairman or the Board by majority vote.

There will be two public comment periods. To submit public comment on either public comment period on individual agenda items or for general public comments:

- By Webex: Use the Webex link above. You will be able to provide real-time chat-room messaging, which can be read into the record by a Southern Nevada Health District employee or by raising your hand during the public comment period and a Southern Nevada Health District employee will unmute your connection. Additional Instructions will be provided at the time of public comment.
- By email: <a href="multi-comment@snhd.org">public-comment@snhd.org</a>. For comments submitted prior to and during the live meeting, include your name, zip code, the agenda item number on which you are commenting, and your comment. Please indicate whether you wish your email comment to be read into the record during the meeting or added to the backup materials for the record. If not specified, comments will be added to the backup materials.
- IV. ADOPTION OF THE OCTOBER 3, 2022 AGENDA (for possible action)

- V. CONSENT AGENDA: Items for action to be considered by the Southern Nevada District Board of Health which may be enacted by one motion. Any item may be discussed separately per Board Member request before action. Any exceptions to the Consent Agenda must be stated prior to approval.
  - 1. APPROVE MINUTES/PUBLIC HEALTH ADVISORY BOARD MEETING: August 8, 2022 (for possible action)

#### VI. REPORT / DISCUSSION / ACTION

- 1. Receive and Discuss the Business Impact Statement and Proposed Food Regulations; direct staff accordingly or take other action as deemed necessary *(for possible action)*
- 2. Received and Discuss a Presentation on the Increasing Incidence of Obesity in Children and Adults in Clark County; direct staff accordingly or take other action as deemed necessary (for possible action)
- 3. Receive, Discuss and Accept 2023 Meeting Schedule; direct staff accordingly or take other action as deemed necessary (for possible action)
- VII. **BOARD REPORTS**: The Southern Nevada District Board of Health members may identify and comment on Health District related issues. Comments made by individual Board members during this portion of the agenda will not be acted upon by the Southern Nevada District Board of Health unless that subject is on the agenda and scheduled for action. *(Information Only)*

#### VIII. HEALTH OFFICER & STAFF REPORTS (Information Only)

- DHO Comments
- COVID-19 Pandemic Update
- Monkeypox Update
- IX. SECOND PUBLIC COMMENT: A period devoted to comments by the general public, if any, and discussion of those comments, about matters relevant to the Board's jurisdiction will be held. Comments will be limited to five (5) minutes per speaker. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chairman or the Board by majority vote. See above for instructions for submitting public comment.

#### X. ADJOURNMENT

NOTE: Disabled members of the public who require special accommodations or assistance at the meeting are requested to notify Andria Cordovez Mulet in Administration at the Southern Nevada Health District by calling (702) 759-1201.

THIS AGENDA HAS BEEN PUBLICLY NOTICED on the Southern Nevada Health District's Website at <u>https://snhd.info/meetings</u>, the Nevada Public Notice website at <u>https://notice.nv.gov</u>, and a copy will be provided to any person who has requested one via U.S mail or electronic mail. All meeting notices include the time of the meeting, access instructions, and the meeting agenda. For copies of agenda backup material, please contact Andria Cordovez Mulet at 280 S. Decatur Blvd., Las Vegas, NV 89107 or (702) 759-1201.

#### **MINUTES**

#### SOUTHERN NEVADA DISTRICT BOARD OF HEALTH PUBLIC HEALTH ADVISORY BOARD MEETING August 8, 2022 – 9:00 A.M. Meeting was conducted via Webex Event

MEMBERS PRESENT:	Kenneth Osgood – Chair, Physician Ronald Kline – Member, City of North Las Vegas Paul Klouse – Member, City of Boulder City Holly Lyman – Member, City of Henderson Reimund Serafica – Member, Nurse Francisco Sy – Member, Environmental Health Jennifer Young – Member, City of Las Vegas
ABSENT:	Dick Tomasso – Member, City of Mesquite
ALSO PRESENT: (In Audience)	Linda Anderson
LEGAL COUNSEL:	Heather Anderson-Fintak, General Counsel
EXECUTIVE SECRETARY:	Fermin Leguen, MD, MPH, District Health Officer
STAFF:	Andria Cordovez Mulet, Rebecca Cruz-Nanez, Jason Frame, Jacques Graham, John Hammond, Carmen Hua, Jessica Johnson, Michael Johnson, David Kahananui, Josie Llorico, Cassius Lockett, Cort Lohff, Sarah Lugo, Chris Saxton, Daniele Staple, Tamera Travis

#### I. CALL TO ORDER AND ROLL CALL

Chair Osgood called the Public Health Advisory Board meeting to order at 9:01 a.m. Andria Cordovez Mulet, Executive Assistant, administered the roll call and confirmed a quorum was present.

#### II. PLEDGE OF ALLEGIANCE

#### III. OATH OF OFFICE

- At-Large Members Kenneth Osgood, Reimund Serafica, Francisco Sy
- Officers Kenneth Osgood (Chair), Ronald Kline (Vice-Chair)

The Oath of Office was administered to members Kenneth Osgood and Francisco Sy and to officers Kenneth Osgood and Ronald Kline by Andria Cordovez Mulet, Executive Assistant. The Oath of Office would be administered to Member Serafica once he joined the meeting.

IV. FIRST PUBLIC COMMENT: A period devoted to comments by the general public about those items appearing on the agenda. Comments will be limited to five (5) minutes per speaker. Please clearly state your name and address and spell your last name for the record. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chair or the Board by majority vote.

Seeing no one, the Chair closed this portion of the meeting.

#### V. ADOPTION OF THE AUGUST 8, 2022 MEETING AGENDA (for possible action)

A motion was made by Member Klouse, seconded by Vice-Chair Kline and carried unanimously to approve the August 8, 2022 Agenda, as presented.

- VI. CONSENT AGENDA: Items for action to be considered by the Southern Nevada District Board of Health Public Health Advisory Board which may be enacted by one motion. Any item may be discussed separately per Board Member request before action. Any exceptions to the Consent Agenda must be stated prior to approval.
  - 1. APPROVE MINUTES/PUBLIC HEALTH ADVISORY BOARD MEETING: April 11, 2022 (for possible action)

A motion was made by Member Klouse, seconded by Member Sy and carried unanimously to approve the August 8, 2022 Consent Agenda, as presented.

#### VII. REPORT / DISCUSSION / ACTION

1. Receive and Discuss a Report on Trauma System Information related to Trauma Centers; direct staff accordingly or take other action as deemed necessary (for possible action)

John Hammond, EMS & Trauma System Manager, provided an overview of the different Trauma Center Levels (Level I, II, and III), which are determined by the American College of Surgeons and are defined by state law. Mr. Hammond outlined the Trauma Center locations in Clark County and their location on a map. Mr. Hammond outlined the four steps (physiological criteria, anatomic criteria, mechanism of injury and special considerations) that patients are categorized into using the Trauma Field Triage Criteria, which was based on ACS and CDC triage guidelines. Mr. Hammond concluded by providing map graphic representation of the patient distribution in all Steps for 2021, along with the individuals Steps.

Member Serafica joined the meeting at 9:23 a.m.

There was no action taken.

Chair Osgood welcomed Member Serafica to the meeting, who proceeded to briefly outline his background experience. The Oath of Office was administered to Member Serafica by Ms. Cordovez Mulet, Executive Assistant.

2. Receive and Discuss an Update on Teen Mental Health and Suicide Prevention – Clark County; direct staff accordingly or take other action as deemed necessary (for possible action)

Rebecca Cruz-Nañez, Health Educator in the Office of Disease Surveillance, provided an update on teen mental health and suicide prevention in Clark County. This was an update from her presentations in January 2020 on teen suicide data and January 2021 on suicide prevention. Ms. Cruz-Nañez outlined that suicide was a major health problem and leading cause of death worldwide, even prior to the COVID-19 pandemic. Ms. Cruz-Nañez outlined the identifying warning signs and risk factors. Following an overview of some statistics, Ms. Cruz-Nañez outlined the Health District's current efforts in suicide prevention and collaborations with community partners. Ms. Cruz-Nañez provided information on the 988 Suicide & Crisis Lifeline which is available nation-wide. Ms. Cruz-Nañez concluded with the next steps.

VIII. <u>BOARD RECORDS:</u> The Southern Nevada District Board of Health Public Health Advisory Board members may identify and comment on Health District related issues. Comments made by individual Board members during this portion of the agenda will not be acted upon by the Southern Nevada District Board of Health Public Health Advisory Board unless that subject is on the agenda and scheduled for action. (Information Only)

Member Sy requested an update on Monkeypox at the next meeting.

#### IX. HEALTH OFFICER & STAFF REPORTS (Information Only)

DHO Comments

Dr. Leguen outlined that this week was National Health Center Week to recognize and raise awareness of federally qualified health centers (FQHCs). The Health District had an FQHC, the Southern Nevada Community Health Center, which was approved by HRSA almost 3 years ago. Our FQHC currently provides services out of the Health District's main location but will be opening a new facility at the end of August.

Dr. Leguen advised that the 2022 Southern Nevada Substance Misuse and Overdose Prevention Summit was scheduled for this week and requested that Ms. Cordovez Mulet share the information on the summit with the members.

Dr. Leguen concluded that the Health District worked on an application for the CDC's Strengthening Public Health Infrastructure, Workforce, and Data Systems grant, which was a 5-year grant for almost \$28M. It is anticipated that we would receive funds in November 2022.

#### • COVID-19 Surveillance and Contact Tracing Update

Dr. Lockett advised that, last week, the CDC updated their website and Clark County had dropped from high to medium community level. Dr. Lockett encouraged everyone to remain up to date with the COVID-19 boosters and to be kind to individuals who continue to wear masks. Dr. Lockett advised that COVID-19 cases continue to decline, with the 7-day moving average, as of August 3<sup>rd</sup>, being 259 cases. Dr. Lockett advised that true case counts were under reported due to the availability of athome test kits. Lockett advised that hospitalizations and deaths, as of August 7<sup>th</sup>, continue to decline. Dr. Lockett advised that the test positivity rate was 18.6%. Dr. Lockett advised that his team currently has 36 internal contact tracers and 100 on contract. Contact tracers are staffing the three CSN testing site locations, assisting CCSD, including providing technical assistance to parents, and investigating individuals that are in high-risk settings, children and those over the age of 65 years.

Further to a request, Dr. Lockett provided a brief update on Monkeypox, outlining that the primary mode of transmission is prolonged skin to skin and bedding contact. There was no evidence of respiratory transmission. Dr. Lockett advised that there was concentration in wastewater in various locations.

#### • Community Health Center Update

David Kahananui, FQHC Manager, provided an updated on the Southern Nevada Community Health Center (SNCHC). Mr. Kahananui advised that the SNCHC's served 2,764 unique patients through the end of June 2022, with 6,032 patient visit encounters. Mr. Kahananui outlined new workflows and protocols related to the Call Center, Eligibility Workers, Monkeypox and the Refugee Clinic. Mr. Kahananui advised that the new Fremont location was scheduled to open on August 30<sup>th</sup>, which will operate Tuesday to Friday from 8 a.m.-6:00 p.m., and initially include Family Planning and Primary Care providers, with Behavioral Health, Ryan White and Dental services to follow. Mr. Kahananui advised that a HRSA Operational Site Visit was conducted the end of June 2022, with 87 out of 93 program requirement elements met and six areas of non-compliance. Mr. Kahananui advised that, of the six areas of non-compliance, either were corrected or action plans were provided. The Final OSV report was pending. Any non-compliance items will be documented as findings on the Final OSV report with additional opportunities to fix the compliance finding and clear the grant condition.

Member Serafica left the meeting at 10:43 a.m. and did not return.

X. <u>SECOND PUBLIC COMMENT</u>: A period devoted to comments by the general public, if any, and discussion of those comments, about matters relevant to the Board's jurisdiction will be held. Comments will be limited to five (5) minutes per speaker. If any member of the Board wishes to extend the length of a presentation, this may be done by the Chair or the Board by majority vote.

Seeing no one, the Chair closed this portion of the meeting.

#### XI. ADJOURNMENT

The Chair adjourned the meeting at 10:48 a.m.

Fermin Leguen, MD, MPH District Health Officer/Executive Secretary

/acm

#### NRS 237 BUSINESS IMPACT STATEMENT PROPOSED 2023 FOOD REGULATIONS

#### SECTION A - A DESCRIPTION OF THE MANNER IN WHICH COMMENT WAS SOLICITED FROM AFFECTED BUSINESSES, A SUMMARY OF THEIR RESPONSE, AND AN EXPLANATION OF THE MANNER IN WHICH OTHER INTERESTED PERSONS MAY OBTAIN A COPY OF THE SUMMARY

Comment was solicited in the following ways:

- 1. The Business Impact Survey notification was emailed to 12,269 Environmental Health food establishment permit contacts.
- 2. The Business Impact Survey notification was faxed and/or emailed to the following jurisdictions for posting at their offices: Henderson City Hall, Boulder City's City Hall, Mesquite City Hall, North Las Vegas City Hall, Las Vegas City Hall, Clark County Manager's Office, and Laughlin Community Resource Center.
- 3. The Business Impact Survey notification was mailed or emailed to the following associations: Korean American Chamber of Commerce LV, Las Vegas Asian Chamber of Commerce, Boulder City Chamber of Commerce, Henderson Chamber of Commerce, Las Vegas Metro Chamber of Commerce, Las Vegas Wedding Chamber of Commerce, Latin Chamber of Commerce, Laughlin Chamber of Commerce, Spring Valley Chamber of Commerce, Urban Chamber of Commerce, Women's Chamber of Commerce, Dairy Council of Nevada, Nevada Food Safety Task Force, Nevada Hotel and Lodging Association, Nevada Mobile Vendors Association, Nevada Restaurant Association, Nevada Resort Association, and the Retail Association of Nevada.
- 4. The Business Impact Survey notification was emailed to individuals that have previously expressed interest in Environmental Health notifications.
- 5. SNHD held three Listening Sessions, in-person and via WebEx, on September 9 and September 15, 2022, to gather data and comments from the public.

During the comment period ending on September 16, 2022, the Health District received 22 survey responses. Ten respondents said that the proposed 2023 Food Regulations would have no impact on their business.

Questions	Yes Responses	No Responses
Will the proposed 2023 Food Regulations		
impose a direct and significant economic	8	14
burden upon your business?		
Do you anticipate any indirect economic effects		
to your business as a result of the 2023 Food	8	14
Regulations?		
Will the proposed 2023 Food Regulations have		
an estimated beneficial economic effect on your	2	20
business?		
Will the proposed 2023 Food Regulations		
directly restrict the formation, operation, or	6	16
expansion of your business?		

See Exhibit A for a summary of business impact statement responses.

The Business Impact Statement and Summary is available at 280 South Decatur Boulevard, Las Vegas, Nevada, or a copy may be viewed online at: <u>www.snhd.info/public-notices</u>.

#### SECTION B – THE ESTIMATED ECONOMIC EFFECT OF THE PROPOSED RULE ON THE BUSINESSES WHICH IT IS TO REGULATE, INCLUDING, WITHOUT LIMITATION:

#### **Adverse Effects:**

- There is a size limitation proposed for food vendors of 100 square feet. Current regulation has no size limit. Food vendors larger than the allowable size will have the option to pull additional permits which will come with an additional cost.
- Current regulation allows time/temperature control for safety (TCS) food to be held at 45°F for up to 72 hours. The proposed regulation requires all TCS food to be held at 41°F or below. The economic impact will be in the form of discarded food and the cost of downgrade fees if food is found in the temperature danger zone. To be compliant, an operator may utilize Time as a Public Health Control which incurs a cost for labeling materials and labor.
- Each food establishment is required to have a person in charge (PIC) that is a Certified Food Protection Manager (CFPM) unless the health authority determines that the operation poses a minimal risk of causing, or contributing to, foodborne illness based on the nature of the operation and extent of food preparation. This requirement was added to the Nevada Administrative Code (NAC) 446.052 in 2013. It could potentially impact food establishment operators who choose to cover the cost of testing and training, which is approximately \$180

online.

- The assignment of "Priority" and "Priority Foundation" designations to specific violations in the regulations may lead to increased downgrades/closures.
- Annual itinerant and farmer's market operators will be required to utilize hand sinks that meet the American National Standards Institute (ANSI) sanitation standard.

#### **Beneficial Effects:**

- Under the new regulations, a Change of Permit Holder (CPH) inspection may pass with 15 demerits or less whereas currently, they must pass with 10 demerits or less. This will result in a beneficial impact due to fewer failed inspection fees and less downtime for businesses. The closure fee is \$909.
- Fewer waivers related to ventilation hoods, restrooms, portable units, grease interceptors, and lift stations will be required under the revised regulations. Each waiver application is subject to a \$150 processing fee and may incur additional per hour charges depending on the complexity. Based on the average submission rate of 16 new plan review waivers per month over the last five years, the expected savings to businesses over the next five years is \$147,000.
- By expanding the type of foods allowed to be sold by open-air vendors, some permit holders will be able to convert their Annual Itinerant health permits to the less expensive permit type of Portable Unit saving between \$286-\$617 per permit depending on the menu.
- Satellite areas will no longer require installation of a three-compartment sink if one is located within 600 feet of the use area, subject to certain conditions. Three-compartments sinks cost approximately \$700, which does not include installation costs.

#### **Direct Effects:**

- The regulation does not impose new fees on businesses.
- The passing of the regulations may have additional direct effects; however, those effects cannot be quantified at this time.

#### Indirect Effects:

- If a food establishment has an identical repeat critical or major violation on consecutive unannounced inspections, they are automatically downgraded under the current regulation. Under the proposed regulation, a facility will be downgraded if there are repeat critical/priority violations on consecutive unannounced inspections. This will result in fewer low-demerit downgrades which can negatively impact business reputations.
- Certain individuals, such as registered environmental health specialists (REHSs), are no longer required to obtain Food Handler Safety Training

cards.

• The passing of the regulations may have additional indirect effects; however, those effects cannot be quantified at this time.

#### SECTION C - A DESCRIPTION OF THE METHODS THAT THE GOVERNING BODY OF THE LOCAL GOVERNMENT OR ITS DESIGNEE CONSIDERED TO REDUCE THE IMPACT OF THE PROPOSED RULE ON BUSINESSES AND A STATEMENT REGARDING WHETHER THE GOVERNING BODY OR ITS DESIGNEE ACTUALLY USED ANY OF THOSE METHODS

- Due to the impact on businesses based on the 100 square feet size limitation on temporary food establishment permits, SNHD has agreed to increase the limitation to 200 square feet for food vendors and 400 square feet for vendors who sell only beverages.
- Due to the impact on annual itinerant, farmer's market, seasonal, and portable units for the service of food (PUSF) operators based on the 100 square feet size limitation, the size limitation has been increased to 200 square feet.
- Industry expressed concerns regarding the requirement that TCS foods be held at 41°F or less per the FDA Model Food Code. Since the current regulation allows TCS food to be held at 45°F for up to 72 hours, SNHD has agreed to compromise and allow TCS food to be held at 45°F for up to 24 hours.
- Each food establishment is required to have a PIC that is a CFPM unless the health authority determines that the operation poses a minimal risk of causing or contributing to foodborne illness based on the nature of the operation and extent of food preparation. SNHD has agreed not to require a CFPM for low-risk food establishments or temporary food establishments.
- SNHD has agreed to remove the designation "Priority" and "Priority Foundation" for specific violations.

### SECTION D – THE ESTIMATED COST TO THE LOCAL GOVERNMENT FOR ENFORCEMENT OF THE PROPOSED RULE

There will be no additional enforcement costs based on the proposed regulation.

#### SECTION E – IF THE PROPOSED RULE PROVIDES A NEW FEE OR INCREASES IN EXISTING FEE, THE TOTAL ANNUAL AMOUNT THE LOCAL GOVERNMENT EXPECTS TO COLLECT AND THE MANNER IN WHICH THE MONEY WILL BE USED

There are no new fees or fee increases with the proposed regulation. The proposed regulation will have no effect on EH division revenue.

#### SECTION F - IF THE PROPOSED RULE INCLUDES PROVISIONS WHICH DUPLICATE OR ARE MORE STRINGENT THAN FEDERAL, STATE, OR LOCAL STANDARDS REGULATING THE SAME ACTIVITY, AN EXPLANATION OF WHY SUCH DUPLICATIVE OR MORE STRINGENT PROVISIONS ARE NECESSARY

Not applicable.

### SECTION G - THE REASONS FOR THE CONCLUSIONS REGARDING THE IMPACT OF THE PROPOSED RULE ON BUSINESSES

SNHD has concluded that approval of the proposed 2023 Food Regulations is not likely to impose a direct and significant economic burden upon businesses or directly restrict the formation, operation, or expansion of businesses because there are few substantive changes that would impose additional costs. Additionally, some changes will actually result in cost savings to businesses. Burdens on industry have been reduced with the mitigation measures SNHD has implemented that are described in Section C. The proposed regulations do not create new fees or increase existing fees for Environmental Health services.

Pursuant to NRS 237.090, the Board of Health (BOH) will hold a PUBLIC HEARING considering this Business Impact Statement in-person at 280 South Decatur Boulevard and/or virtually on Thursday, October 27, 2022, at 9:00 a.m. The BOH will review and consider approval of the proposed 2023 Food Regulations at a PUBLIC HEARING on Thursday, November 17, 2022, at 11:00 a.m. in-person at 280 South Decatur Boulevard and/or virtually.

I, Christopher Saxton, certify that, to the best of my knowledge or belief, the information contained in the statement was prepared properly and is accurate:

Christopher Saxton, MPH-EH, REHS Director of Environmental Health Exhibit A

#### Summary of Business Impact Statement Surveys/Comments Proposed 2023 Food Regulations

Comment Period: August 12, 2022, through September 16, 2022 Number of Surveys = 22

### Will the proposed 2023 Food Regulations impose a direct and significant economic burden upon your business?

Yes = 8 Respondents No = 14 Respondents Estimated Monetary Impact = \$200 - \$1,000 Per Food Establishment

- One respondent estimated an impact of \$20,000 due to being unable to keep food at 41°F or lower and needing a ServSafe or equivalent person in charge onsite for each shift. This is a reasonable estimate based on 60 locations.
- One respondent estimated an impact of \$35,000 due to variables in regulation interpretation and changes in procedures to be compliant with the regulations. SNHD is unable to evaluate the response due to lack of details provided by the respondent.
- One respondent estimated an impact of \$20,000 without specific reasons. SNHD is unable to evaluate the response due to lack of details provided by the respondent.
- One respondent estimated an impact of \$150,000 due to upgrades required by new regulations. SNHD is unable to evaluate the response due to lack of details provided by the respondent.
- One respondent estimated an impact of \$10,000 due to Covid-19 and inflation. Covid-19 and inflation have no bearing on the proposed 2023 Food Regulations.

### Will the proposed 2023 Food Regulations directly restrict the formation, operation, or expansion of your business?

Yes = 6 Respondents No = 16 Respondents Will the proposed 2023 Food Regulations have an estimated beneficial economic effect on your business?

Yes = 2 Respondents No = 20 Respondents Estimated Monetary Impact = \$150 - \$5,000

### *Do you anticipate any indirect economic effects to your business as a result of the proposed 2023 Food Regulations?*

Yes = 8 No = 14 Estimated Monetary Impact = \$0 - \$3,000

- One respondent estimated an impact of \$12,000 due to replacing out of temperature food. If the food cannot be replaced due to supply issues, then the business may lose customers. Current regulations require replacement of out of temperature food and SNHD cannot evaluate supply chain issues.
- One respondent estimated an impact of \$35,000 due to an increase in water use and water rates. SNHD is not aware of any updates to the regulations that would require an increase in water usage.
- One respondent estimated an impact of \$150,000 due to upgrades required by the new regulations. SNHD is unable to evaluate the response due to lack of details provided by the respondent.
- One respondent estimated an impact of \$100,000 without specific reasons. SNHD is unable to evaluate the response due to lack of details provided by respondent.
- One respondent estimated an impact of \$20,000 due to Covid-19 and inflation. Covid-19 and inflation have no bearing on the proposed 2023 Food Regulations.

#### Summarized Main Comments:

- Several people said that industry has a good relationship with SNHD and is thankful for staff's work on this process.
- Several people want priority and priority foundation items removed.
- A few people want utensil storage in water allowed.
- A few people want an exemption from waivers and Hazard and Critical Control Point (HACCP) plans for sushi rice acidification.

- A few people want the process for HACCP plans revised to include a process in between no HACCP plan and full HACCP plan.
- Several people want cold holding to remain at 45°F or less.
- Several people want the size of temporary food establishments and portable unit permits increased to more than the proposed 100 square feet due to an increased cost in permitting.
- A few people want more details on par cooking.
- Several people asked for one year of education and training before implementing demerits on inspections.
- Several people were concerned about having a person in charge (PIC) who is a certified food protection manager (CFPM) during all hours of operation.
- A few people were concerned about enforcement of chemical sanitization and if industry would be required to check water temperature, pH, and water hardness.
- Several people want operators to be able to self-open after self-closing.
- A few people want clarification on when an Event Coordinator permit is required.
- Several people requested that the owner or a designee be allowed to sign paperwork.
- Several people want the plus or minus 2°F for thermometers to still apply.
- A few people want the section on temporary food establishment (TFE) permits to say, "may be denied with less than 24 hours notice."
- A few people want more clarity on temporary food establishment exemptions.
- A few people want more clarity on approved sinks for temporary food establishments.
- It will take substantial time to review the regulations, regulations can be confusing, and more meetings would be helpful.
- Employee compliance with food handler cards is the responsibility of the employee. If removed from in-house training, this may lead to failures to comply.
- New regulations requiring upgrades put small businesses in jeopardy of closing. Several people were concerned that upgrades would be required retroactively.
- Customers don't want to pay more, and it is too expensive to do anything with increases in materials, labor, food, etc.

• Facilities can't sustain any more financial burdens at this time due to Covid-19 and inflation.

# Proposed 2023 Food Regulations

### PUBLIC HEALTH ADVISORY BOARD PRESENTATION OCTOBER 3, 2022

### Purpose of the Food Regulations

Provide sanitation guidelines for food establishments

Reduce foodborne illness outbreaks

Help protect the community and tourists

Regulated Food Establishments:

Establishment Type

- Restaurants and Snack Bars
- Food Processing
- Grocery and Warehouses
- ► Open-Air Vendors
- Mobile Vendors
- ► Commissaries
- Annual Itinerants and Farmer's Markets
- Special Events
- School and Childcare Kitchens

# Why do the Food Regulations need to be updated?

The last update to the regulations was in 2010.

To Align regulations with the 2017 Model Food Code to reflect advances in food safety science

To address frequently waived regulations and concerns from industry

### Ways Comments Were Collected

- Business Impact Statement Surveys
- Three Listening Sessions
- ► Emails
- Phone Calls
- Meetings with interested members of industry

Comments were accepted from August 12, 2022, through 4:30 p.m. on September 16, 2022.

## Business Impact Survey Results

Question	Yes Responses	No Responses
Will the proposed EH Fee Schedule adjustments impose a direct and significant economic burden upon your business?	8	14
Will the proposed EH Fee Schedule adjustments directly restrict the formation, operation, or expansion of your business?	6	16
Will the proposed EH Fee Schedule adjustments have an estimated beneficial economic effect on your business?	2	20
Do you anticipate any indirect economic effects to your business as a result of the proposed EH Fee Schedule adjustments?	8	14

The Business Impact Survey Notification was emailed to 12,269 recipients and posted on the SNHD website. Twenty-two surveys were returned.

# Summary of Major Changes

Requirement Proposed	Compromise/Concession
Certified Food Protection Manager	Does not include low-risk or temporary food establishments
Food in cold holding must be held at 41 °F	Added allowance to keep food at 45 °F for up to 24 hours
Food Vendors limited to 100 sq ft	Updated to allow up to 200 sq ft Temporary booths 200-400 sq ft
HACCP Plan and waiver required for food with vinegar added to render non-TCS	Updated to allow an exemption for certain items such as salsa, sushi rice, and kimchi
Temperature logs required for food vendors and mobile units	Removed requirement for temperature logs
Priority and Priority Foundation designations added throughout	Removed all Priority and Priority Foundation designations
Procedure required for clean-up of vomiting and diarrhea	SNHD will provide a guidance document
Corrections required to be submitted within 3 days, 10 calendar days, or 90 calendar days based on risk	Violations must be corrected, but do not require submission to SNHD

## Changes Cont.

Repeat violations on unannounced inspections will not receive an automatic downgrade if they are priority foundation

Annual Itinerant regulations incorporated

Whole muscle meat steaks will not require consumer advisory

All Open-Air vendors may serve low-risk food

Administrative and Appeal processes

Added : Temporary food and food handler safety training card exemptions Commissary manager responsibilities

# Changes Cont.

Satellite areas within 600 sq. ft not required to install three-compartment sink

Handwashing sign required at each hand sink

Hoods, grease interceptors, sump pumps, lift stations, and number of restrooms will be regulated by the agency of jurisdiction to reduce overlap

Increased number of demerits allowed to pass change of permit holder permitting inspection

Dogs allowed on outdoor patio with signed agreement

# Benefits to Industry

Consolidation

- Reduced Waivers
- Gives businesses a better chance to thrive
- Fewer automatic downgrades for repeat violations
- SNHD has considered all industry feedback which has resulted in additional benefits to industry.

### Staff Recommendations for PHAB:

Accept the Business Impact Statement

Allow staff to request Board of Health approval for the proposed 2023 Food Regulations at the November 17, 2022, Board of Health meeting

# Questions

#### SOUTHERN NEVADA HEALTH DISTRICT (SNHD) 2023 FOOD REGULATIONS

WHEREAS, the Southern Nevada Health District (SNHD) is a public Health Authority organized pursuant to Nevada Revised Statutes Chapter 439 with jurisdiction over all public health matters within Clark County Nevada; and

WHEREAS, the Southern Nevada District Board of Health (Board) is the Southern Nevada Health District governing body, and is authorized to adopt regulations to protect and promote the public health and safety in the geographical area subject to its jurisdiction; and

WHEREAS, in accordance with the authority granted pursuant to Nevada Revised Statutes Chapter 439 and Chapter 446, the Board hereby adopts regulations to establish uniform, minimum standards for the operation of food establishments in Clark County, Nevada;

WHEREAS, these regulations in no way preclude a food establishment from establishing additional rules and operating procedures as long as they do not contradict those established herein.

WHEREAS, the Board deems the following regulations are necessary to protect and promote the public health and safety, it does therefore publish, promulgate, and order compliance within Clark County, Nevada with the substantive and procedural requirements hereinafter set forth.

Appendix C	Dogs in Outdoor Dining Areas Agreement	202

### **Chapter 1 Purpose and Definitions**

Parts 1-1 1-2	Title, Intent, Scope Definitions	
1-1	Title, Intent, Scope	
Subparts		
1-101	Title	
1-102	Intent	
1-103	Scope	

#### 1-101 Title

These provisions must be known as the Southern Nevada Health District (SNHD) 2023 Food Regulations, hereinafter referred to as "these regulations."

#### 1-102 Intent

The purpose of these regulations is to safeguard public health and provide to consumers food that is safe, unadulterated, and honestly presented.

#### 1-103 Scope

These regulations establish definitions; set standards for management and personnel, food operations, and equipment and facilities; and provide for food establishment plan review, permit issuance, inspection, employee restriction, and permit suspension.

1-2	Definitions
Subpart 1-201	Applicability and Terms Defined

#### 1-201 Applicability and Terms Defined

The following definitions apply in the interpretation and application of these regulations. As used in these regulations, each of the terms listed have the meaning stated below:

#### Accessible

(A) When applied to equipment other than plumbing equipment, accessible means exposed for cleaning and inspection using simple tools, including, without limitation, handheld screwdrivers, pliers and open-ended wrenches.

- (B) When applied to plumbing fixtures, plumbing connections, plumbing appliances or plumbing equipment, accessible means:
  - (1) Having access to, but may require removal of an access panel, door, or similar obstruction, and
  - (2) Not blocked by fixed equipment or other barriers.

#### **Accredited Program**

- (A) Accredited Program means a program that certifies an individual to be a food protection manager and which:
  - (1) Has been evaluated and listed by an American National Standards Institute accredited agency as conforming to national standards for organizations that certify individuals as food protection managers, or
  - (2) Provides to such individuals other training acceptable to the health authority.
- (B) Accredited Program refers to the certification process and is a designation based upon an independent evaluation of factors such as the sponsor's mission; organizational structure; staff resources; revenue sources; policies; public information regarding program scope, eligibility requirements, re-certification, discipline and grievance procedures; and test development and administration.

#### Adulterated

Has the meaning stated in the 21 USC 342 Adulterated Food.

#### **Annual Event Venue**

An area approved to host special events which are coordinated by a person responsible for ensuring the necessary infrastructure and support services are available for food vendors.

#### Annual itinerant

An annual permit for a food establishment designed to operate in conjunction with a special event, swap meet, farmers market, or other approved venue.

#### Approved

Acceptable to the Health Authority based on a determination of conformity with principles, practices, and generally recognized standards that protect public health.

#### **Approved Source**

Any grower, supplier, manufacturer, processor or any entity that is acceptable to the Health Authority, based on a determination of conformity with principles, practices and generally recognized standards that protest public health.

#### Asymptomatic

- (A) Without obvious symptoms; not showing or producing indications of a disease or other medical condition, such as an individual infected with a pathogen but not exhibiting or producing any signs or symptoms of vomiting, diarrhea, or jaundice.
- (B) Asymptomatic includes not showing symptoms because symptoms have resolved or subsided, or because symptoms never manifested.

 $\mathsf{a}_\mathsf{w}$ 

Water activity which is a measure of the free moisture in a food, is the quotient of the water vapor pressure of the substance divided by the vapor pressure of pure water at the same temperature and is indicated by the symbol a<sub>w</sub>.

#### Balut

An embryo inside a fertile egg that has been incubated for a period sufficient for the embryo to reach a specific stage of development after which it is removed from incubation before hatching.

#### **Bottled Drinking Water**

Water that is sealed in bottles, packages, or other containers and served or offered for sale, including bottled mineral water, distilled water, natural water, purified water and spring water.

#### **Catering Food Establishment**

- (A) A food establishment where a pre-arranged number of meals and/or food products are prepared and transported for service and consumption at an off-premises event location.
- (B) Catering food establishment does not include food that is prepared and packaged for pickup by the consumer, or delivery to the consumer, unless it is served off-site by the caterer.

#### **Certification number**

A unique combination of letters and numbers assigned by a Shellfish Control Authority to a molluscan shellfish dealer according to the provisions of the National Shellfish Sanitation Program.

#### **Certified Food Protection Manager**

An individual that passes a food protection manager certification examination, proctored by an accredited program, which certifies they have the knowledge, skills, and abilities required to protect the public from foodborne illness.

#### Change of Permit Holder (CPH)

The process by which a person takes ownership of an existing establishment that has had an active health permit in the last three years and has not done any remodeling that impacts the layout or function of the facility or converted from one occupancy type to another.

Change of Permit Holder does not apply to portable food establishments such as mobile vendors, openair vendors, annual itinerants, or farmers markets unless otherwise approved.

#### Cleaned in place (CIP)

- (A) Method for cleaning equipment with a detergent solution, water rinse, and sanitizing solution by circulating the detergent solution, water rinse, and sanitizing solution through a piping system onto or over equipment surfaces that require cleaning.
- (B) CIP does not include the cleaning of equipment such as band saws, slicers, or mixers that are subject to in-place manual cleaning without the use of a CIP system.

#### **Color Additive**

Color Additive has the meaning stated in the 21 USC 321(t) and 21 CFR 70.3(f).

#### Commingle

- (A) To combine shellstock harvested on different days or from different growing areas as identified on the tag or label, or
- (B) To combine shucked shellfish from containers with different container codes or different shucking dates.

#### Comminuted

- (A) Reduced in size by methods including chopping, flaking, grinding, or mincing.
- (B) Food remains comminuted even when it is restructured or reformulated, such as gefilte fish, gyros, ground beef, and sausage, or combined, such as sausages made from two or more meats.

#### Commissary

A permanent food establishment that serves to provide support for or is shared by three or more permit holders that prepare, store, or sell food from the same site address. **Confirmed Disease Outbreak** 

A foodborne illness outbreak in which laboratory analysis of appropriate specimens identifies a causative agent and epidemiological analysis implicates the food as the source of the illness.

#### Consumer

An individual who is a member of the public, takes possession of food, is not functioning in the capacity of an operator of a food establishment and does not offer the food for resale.

#### **Core Item**

- (A) A provision in these regulations that is not designated as a priority item or a priority foundation item.
- (B) Core item includes an item that usually relates to general sanitation, operational controls, sanitation standard operating procedures (SSOP), facilities, structures, equipment design, or general maintenance.

#### **Corrosion-Resistant Material**

A material that maintains acceptable surface cleanability characteristics under prolonged contact with food or during the normal use of cleaning compounds and sanitizing solutions, and other conditions of use.

#### **Counter-Mounted Equipment**

Equipment that is not portable and is designed to be mounted off the floor on a table, counter, or shelf.

#### **Critical Control Point**

A point or procedure in a specific food system where loss of control may result in an unacceptable health risk.

#### **Critical Limit**

The maximum or minimum value to which a physical, biological, or chemical parameter must be controlled at a critical control point to minimize the risk that an identified food safety hazard may occur.

#### **Cut Leafy Greens**

Fresh leafy greens whose leaves have been cut, shredded, sliced, chopped, or torn. The term leafy greens include iceberg lettuce, romaine lettuce, leaf lettuce, butter lettuce, baby leaf lettuce (i.e., immature lettuce or leafy greens), escarole, endive, spring mix, spinach, cabbage, kale, arugula and chard. The term leafy greens does not include herbs such as cilantro or parsley.

#### Downgrade

Violations reported on an inspection resulting in any grade other than an 'A' letter grade at a permitted food establishment.

#### **Drinking Water**

Water that meets criteria as specified in 40 CFR 141 *National Primary Drinking Water Regulations* and is traditionally known as potable water.

Drinking water includes the term water except where the term used connotes that the water is not potable, such as boiler water, mop water, rainwater, wastewater, and nondrinking water.

#### Dry Storage Area

A room or area designated for the storage of packaged or containerized bulk food that is not TCS food and dry goods such as single-service items.

#### **Easily Cleanable**

- (A) A characteristic of a surface that:
  - (1) Allows effective removal of soil by normal cleaning methods,
  - (2) Is dependent on the material, design, construction, and installation of the surface, and
  - (3) Varies with the likelihood of the surface's role in introducing pathogenic or toxigenic agents or other contaminants into food based on the surface's approved placement, purpose, and use.
- (B) Easily cleanable includes a tiered application of the criteria that qualify the surface as easily cleanable as specified in subparagraph (A) of this definition to different situations in which varying degrees of cleanability are required such as:
  - (1) The appropriateness of stainless steel for a food preparation surface as opposed to the lack of need for stainless steel to be used for floors or tables used for consumer dining, or
  - (2) The need for a different degree of cleanability for a utilitarian attachment or accessory in the kitchen as opposed to a decorative attachment or accessory in the consumer dining area.

#### **Easily Movable**

- (A) Portable; mounted on casters, gliders, or rollers; or provided with a mechanical means to safely tilt a unit of equipment for cleaning, and
- (B) Having no utility connection, a utility connection that disconnects quickly, or a flexible utility connection line of sufficient length to allow the equipment to be moved for cleaning of the equipment and adjacent area.

#### Egg

The shell egg of avian species such as chicken, duck, goose, guinea, quail, ratites or turkey.

Egg does not include:

- (A) A balut,
- (B) The egg of reptile species such as alligator, or
- (C) An egg product.

#### **Egg Product**

All, or a portion of, the contents found inside eggs separated from the shell and pasteurized in a food processing plant, with or without added ingredients, intended for human consumption, such as dried, frozen or liquid eggs.

Egg product does not include food which contains eggs only in a relatively small proportion such as cake mixes.

#### Employee

An individual who is a permit holder, PIC, food handler, individual having supervisory or management duties, individual on the payroll, family member, volunteer, individual performing work under contractual agreement, or other individual working in a food establishment.

#### Equipment

An article that is used in the operation of a food establishment such as a freezer, grinder, hood, ice maker, meat block, mixer, oven, reach-in refrigerator, scale, sink, slicer, stove, table, temperature measuring device for ambient air, vending machine, or warewashing machine.

Equipment does not include apparatuses used for handling or storing large quantities of packaged foods that are received from a supplier in a cased or overwrapped lot, such as hand trucks, forklifts, dollies, pallets, racks, and skids.

#### **Event Coordinator**

A designated individual responsible for the coordination of temporary food establishments, food vendors, and associated support services and permits for a special event.

#### Exclude

To prevent an individual from working as an employee in a food establishment or entering a food establishment as an employee.

#### Facilities

The structure and interior surfaces of a food establishment including accessories such as soap and towel dispensers and attachments such as light fixtures and heating or air conditioning system vents.

#### Farmer

Any person who operates a farm in the United States as any of the following: an owner, part owner, tenant, or sharecropper.

#### Farmers' Market

A place of business where a farmer, or a representative designated by the farmer, and possessing the producer certificate of farm products, can bring their products for direct sale to the consumer. A minimum of one farmer, or designated representative, must be present and offering at least one farm product for sale for the venue to be operated as a farmers' market.

#### **Farm Products**

All agricultural, horticultural, viticultural and vegetable products of the soil. The term does not include livestock and livestock products, poultry and poultry products, uncertified non-graded whole shell eggs, fish and fish products, shellstock and shellstock products, crustacean and crustacean products, honey, hay and timber products, or milk and milk products.

#### Fish

Fresh or saltwater finfish, crustaceans and other forms of aquatic life (including alligator, frog, aquatic turtle, jellyfish, sea cucumber, and sea urchin and the roe of such animals) other than birds or mammals, and all mollusks, if such animal life is intended for human consumption.

Fish includes an edible human food product derived in whole or in part from fish, including fish that have been processed in any manner.

#### Food

A raw, cooked, or processed edible substance, ice, water, beverage, or ingredient used or intended for use or for sale in whole or in part for human consumption or chewing gum.

#### **Food Additive**

Food Additive has the meaning stated in the 21 USC 321(s) and 21 CFR 170.3(e)(1).

#### Foodborne Disease Outbreak

The occurrence of two or more cases of a similar illness resulting from the ingestion of a common food.

#### **Food-Contact Surface**

- (A) A surface of equipment or a utensil with which food normally comes into contact, or
- (B) A surface of equipment or a utensil from which food may drain, drip, or splash:
  - (1) Into a food, or
  - (2) Onto a surface normally in contact with food.

#### **Food Establishment**

Any place, structure, premises, vehicle or vessel, or any part thereof, in which any food intended for ultimate human consumption is manufactured or prepared by any manner or means whatever, or in which any food is stored, sold, offered or displayed for sale, or served.

Food Establishment does not include:

- (A) Private homes, unless the food prepared or manufactured in the home is sold, or offered or displayed for sale or for compensation or contractual consideration of any kind,
- (B) Fraternal or social clubhouses that have a status as a 501 (c)(7) or (8), and which attendance is limited to members of the club,
- (C) Vehicles operated by common carriers engaged in interstate commerce, or any third-party delivery service that delivers food from a food establishment does not directly handle unpackaged food.
- (D) Any establishment in which religious, charitable and other 501(c)(3) nonprofit organizations sell food occasionally (no more than three occurrences in a 90-day period), on the premises of their organization, to raise money or in which charitable organizations receive salvaged food in bulk quantities for free distribution, unless the establishment is open on a regular basis to sell food to members of the general public,
- (E) Any establishment where animals, including, without limitation, mammals, fish and poultry, are slaughtered which is regulated pursuant to NRS 583,
- (F) Dairy farms and plants which process milk and products of milk or frozen desserts which are regulated under NRS 584,
- (G) The premises of a wholesale dealer of alcoholic beverages licensed under NRS 369 who handles only alcoholic beverages which are in sealed containers,
- (H) A facility that produces eggs which is regulated pursuant to NRS 583,
- (I) A cottage food operation that meets the requirements of NRS 446.866 with respect to food items as defined in that section,
- (J) A craft food operation that meets the requirements of NRS 587.6945 with respect to food items as defined in that section,
- (K) A farm for purposes of holding a farm-to-fork event,
- (L) A kitchen in a private home,

- (M) A bed-and- breakfast operation that is owner occupied, the number of available guest bedrooms does not exceed six, breakfast is the only meal offered, the number of guests served does not exceed 18, and the consumer is informed by statements contained in published advertisements, mailed brochures, and placards posted at the registration area that the food is prepared in a kitchen that is not regulated and inspected by the Health Authority,
- (N) A permitted family or group care home.
- (O) A permitted childcare center that serves only a limited menu as described in NRS 446.941,
- (P) A demonstration kitchen or cooking class that does not store food or sell food to the public, or
- (Q) An establishment that meets the exemption criteria pursuant to NRS 446.870 and NAC 446.042.

#### **Food Handler**

An individual who works, or is contracted to work, with unpackaged food, food equipment or utensils, or food-contact surfaces.

#### **Food Processing Plant**

A commercial operation that manufactures, packages, labels, or stores food for human consumption, and provides food for sale or distribution to other business entities such as food processing plants or food establishments.

#### **Food Vendor**

Any non-permanent food establishment in which TCS food, or open food intended for ultimate human consumption, is stored, prepared, or served and does not exceed 100 square feet in size. Food vendor includes Temporary Food Establishments, Open-Air Vendors, Tasting Booths, Seasonal and Annual Itinerant permit holders.

#### **Game Animal**

An animal, the products of which are food, that is not classified as livestock, sheep, swine, goat, horse, mule, or other equine in 9 CFR 301.2, or as poultry, or fish.

- (A) Game Animal includes mammals such as reindeer, elk, deer, antelope, water buffalo, bison, rabbit, squirrel, opossum, raccoon, nutria, or muskrat, and nonaquatic reptiles such as land snakes.
- (B) Game animal does not include ratites.

#### Grade A Standards

The requirements of the United States Public Health Service/FDA Grade A Pasteurized Milk Ordinance with which certain fluid and dry milk and milk products comply.

#### Handwashing Sink

- (A) A lavatory, a basin or vessel for washing, a wash basin, or a plumbing fixture especially placed for use in personal hygiene and designed for the washing of the hands.
- (B) Unless specified otherwise, a handwashing sink is a permanently plumbed fixture.
- (C) Handwashing sink includes an automatic handwashing facility.

#### Hazard Analysis and Critical Control Point (HACCP) Plan

A written document that delineates the formal procedures for following the hazard analysis and critical control point principles developed by The National Advisory Committee on Microbiological Criteria for Foods.

#### **Health Authority**

The officers and agents of the Southern Nevada Health District.

#### **Hermetically Sealed Container**

A container that is designed and intended to be secure against the entry of microorganisms and, in the case of low acid canned foods, to maintain the commercial sterility of its contents after processing.

#### **High-Risk Food Establishment**

A permitted food establishment that presents a high relative risk of causing foodborne illness and is limited to food establishments that:

- (A) Conduct complex food preparation steps including thawing, cooking, cooling, cold holding, reheating and hot holding for TCS food,
- (B) Perform extensive handling of large volumes of raw TCS food ingredients,
- (C) Operate extended hours of food preparation activities,
- (D) Perform advanced preparation of TCS food for next day service,
- (E) Primarily serve highly susceptible populations and any other high-risk and most medium-risk activities,
- (F) Conduct specialized processes such as smoking, curing, and reduced oxygen packaging or modified atmospheric packaging for extended shelf life,
- (G) Process/manufacture TCS food,

- (H) Prepare TCS food for off-premise serving, for which time and temperature requirements during transportation, holding, and service are relevant, or
- (I) Have a history of repeated critical violations, repeat violations, or enforcement issues.

Examples of high-risk food establishments may include full-service restaurants, continuous operation casino/resort kitchens, processors/manufacturers of TCS food, caterers serving TCS food, a central kitchen that transports food to satellite locations, and establishments conducting specialized processing at retail.

#### **Highly Susceptible Population**

Individuals who are more likely than other individuals in the general population to experience foodborne illness because they are:

- (A) Immunocompromised, preschool age children, or older adults and
- (B) Obtaining food at a facility that provides services such as custodial care, health care, or assisted living, such as a child or adult day care center, kidney dialysis center, hospital or nursing home, or nutritional or socialization services such as a senior center.

#### **Imminent Health Hazard**

A significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on:

- (A) The number of potential injuries, and
- (B) The nature, severity, and duration of the anticipated injury.

#### Injected

Manipulating meat to which a solution has been introduced into its interior by processes that are referred to as injecting, pump marinating, or stitch pumping.

#### Intact Meat

A cut of whole muscle(s) meat that has not undergone comminution, injection, mechanical tenderization, vacuum tumbling with solutions, or reconstruction.

#### Juice

The aqueous liquid expressed or extracted from one or more fruits or vegetables, purées of the edible portions of one or more fruits or vegetables, or any concentrates of such liquid or purée. Juice does not include, for purposes of HACCP, liquids, purées, or concentrates that are not used as beverages or ingredients of beverages.

#### Kitchenware

Food preparation and storage utensils

#### Like-for-like

The replacement of equipment with equipment that is similar in design, function, use and maintenance, maintains the same location as the replaced equipment, and requires no additional alteration or modification of existing finishes or fixtures as part of the installation.

#### Linens

Fabric items such as cloth hampers, cloth napkins, tablecloths, wiping cloths, and work garments including cloth gloves.

#### Low-Risk Food Establishment

A permitted food establishment that presents a low relative risk of causing foodborne illness and is limited to food establishments that:

- (A) Serve or sell only prepackaged non-TCS food,
- (B) Conduct limited food preparation steps of non-TCS food such as slicing bagels, buttering toast, or opening prepackaged baked goods for individual sale,
- (C) Serve only beverages and ice, such as espresso, mixed and blended drinks,
- (D) Rethermalize only commercially processed, TCS food such as hot dogs for hot holding and where cooling or reheating of food items is prohibited, or
- (E) Conduct cold holding of commercially prepackaged, ready-to-eat, TCS food such as sandwiches and frozen foods, without opening of the package.

Examples of low-risk food establishments may include convenience stores, site specific open-air vendors, concession stands, bars/lounges, coffee shops, warehouses, and mobile units for service of food frozen foods. Low-risk foods may include food which is treated to reduce pathogens in a food processing plant and is served within four hours after opening. Such foods include but are not limited to canned legumes, vegetables, chili, cheese sauces, and processed meats such as canned luncheon meat and hot dogs.

#### **Major Food Allergen**

- (A) Milk, egg, fish (such as bass, flounder, cod, and including crustacean shellfish such as crab, lobster, or shrimp), tree nuts (such as almonds, pecans, or walnuts), wheat, peanuts, soybeans, and sesame, or
- (B) A food ingredient that contains protein derived from a food, as specified in paragraph (A) of this definition.

Major Food Allergen does not include:

- (A) Any highly refined oil derived from a food specified in paragraph (A) of this definition and any ingredient derived from such highly refined oil, or
- (B) Any ingredient that is exempt under the 21 USC 321 (qq).

#### Meat

The flesh of animals used as food including the dressed flesh of cattle, swine, sheep, or goats and other edible animals, except fish, poultry, and wild game animals as specified under subparagraphs 3-201.7 (A)(3) and (4).

#### Mechanically Tenderized

Manipulating meat by piercing with a set of needles, pins, blades or any mechanical device, which breaks up muscle fiber and tough connective tissue, to increase tenderness. This includes injection, scoring, and processes which may be referred to as blade tenderizing, jaccarding, pinning, or needling.

#### Medium-Risk Food Establishment

A permitted food establishment that presents a medium relative risk of causing foodborne illness and is limited to food establishments that:

- (A) Prepare, cook, and serve most foods immediately,
- (B) Limit the complex preparation of TCS food including cooking, cooling, and reheating for hot holding to extra or left-over foods from same day service. This excludes foods prepared in advance for future service,
- (C) Limit cold or hot holding to a single meal service, or
- (D) Use minimal preparation and assembly steps to prepare foods from raw ingredients.

Examples of medium-risk food establishments may include fast food restaurants, bakeries, sandwich shops, childcare facilities, elementary and middle schools with minimal food preparation, and processors/manufacturers of non-TCS food.

#### mg/L

Milligrams per Liter, which is the metric equivalent of parts per million (ppm)

#### Misbranded

The presence of any written, printed, or graphic matter, upon or accompanying food, or containers of food which is false or misleading.

#### **Mobile Unit**

A fully enclosed DMV registered truck or trailer in which food or beverages are prepared, processed, or served to customers. A mobile unit does not include equipment located outside the truck or trailer.

#### **Molluscan Shellfish**

Any edible species of fresh or frozen oysters, clams, mussels, and scallops or edible portions thereof, except when the scallop product consists only of the shucked adductor muscle.

#### **Molluscan Shellfish Dealer**

A person who is authorized by a Shellfish Control Authority for the activities of shellstock shipper, shucker-packer, re-packer, re-shipper, or depuration processor of molluscan shellfish according to the provisions of the National Shellfish Sanitation Program.

#### Natural and Unprocessed State

A farm product that has not been cut, sliced, shelled, canned, cooked, pickled, packaged, dried, milled, ground, or otherwise altered from its original state following harvest.

#### **Non-Continuous Cooking**

- (A) The cooking of food in a food establishment using a process in which the initial heating of the food is intentionally halted so that it may be cooled and held for complete cooking at a later time prior to sale or service.
- (B) Non-continuous cooking does not include cooking procedures that only involve temporarily interrupting or slowing an otherwise continuous cooking process.

#### Occasional

Occurring on an infrequent basis of no greater than three occurrences in a 90-day period.

#### **Open-Air Vendor**

A food vendor that is permitted to operate at a site-specific location.

#### Packaged

- (A) Bottled, canned, cartoned, bagged, or wrapped, whether packaged in a food establishment or a food processing plant.
- (B) Packaged does not include wrapped or placed in a carry-out container to protect the food during service or delivery to the consumer, by a food handler, upon consumer request.

#### Permit

The document issued by the Health Authority that authorizes a person to operate a food establishment.

#### Permit Holder

The person that is legally responsible for and possesses a valid health permit to operate the food establishment.

#### Person

An association, corporation, partnership, legal entity, government, or governmental subdivision or agency.

#### Person-in-Charge (PIC)

The individual present at a food establishment who is responsible for the operation at the time of inspection.

#### **Personal Care Items**

- (A) Items or substances that may be poisonous, toxic, or a source of contamination and are used to maintain or enhance a person's health, hygiene, or appearance.
- (B) Personal Care Items include items such as medicines; first aid supplies; and other items such as cosmetics, and toiletries such as toothpaste and mouthwash.

#### рΗ

The symbol for the negative logarithm of the hydrogen ion concentration, which is a measure of the degree of acidity or alkalinity of a solution. Values between zero and seven indicate acidity and values between seven and 14 indicate alkalinity. The value for pure distilled water is seven, which is considered neutral.

#### **Plumbing Fixture**

A receptacle or device that:

- (A) Is connected to the water distribution system of the premises and demands a supply of water from the system, or
- (B) Discharges used water, waste materials, or sewage directly or indirectly to the drainage system of the premises.

#### **Plumbing System**

The water supply and distribution pipes; plumbing fixtures and traps; soil, waste, and vent pipes; sanitary and storm sewers and building drains, including their respective connections, devices, and appurtenances within the premises; and water-treating equipment.

#### **Poisonous or Toxic Materials**

Substances that are not intended for ingestion and are included in 4 categories:

- (A) Cleaners and sanitizers, which include cleaning and sanitizing agents and agents such as caustics, acids, drying agents, polishes, and other chemicals,
- (B) Pesticides, except sanitizers, which include substances such as insecticides and rodenticides,
- (C) Substances necessary for the operation and maintenance of the establishment such as nonfood grade lubricants and personal care items that may be deleterious to health, and
- (D) Substances that are not necessary for the operation and maintenance of the establishment and are on the premises for retail sale, such as petroleum products and paints.

#### Poultry

Any domesticated bird, (chickens, turkeys, ducks, geese, guineas, ratites, or squabs), migratory waterfowl, or game bird, pheasant, partridge, quail, grouse, or pigeon, whether live or dead.

#### Premises

- (A) The facilities, contents, and the contiguous land or property under the control of the permit holder; or
- (B) The facilities, contents, and the land or property not described in subparagraph (A) of this definition if its facilities and contents are under the control of the permit holder and may impact food establishment personnel, facilities, or operations, and a food establishment is only one component of a larger operation such as a resort, public accommodation, arena, school, institution, or recreational camp.

#### **Priority item**

- (A) A provision in these regulations that, when applied, contributes directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury and there is no other provision that more directly controls the hazard.
- (B) Priority item includes items with a quantifiable measure to show control of hazards such as cooking, reheating, cooling, handwashing; and
- (C) Priority item is an item that is denoted in these regulations with a superscript P-<sup>P</sup>.

#### **Priority Foundation Item**

(A) A provision in these regulations that, when applied, facilitates or enables one or more priority items,

- (B) Priority foundation item includes an item that requires the purposeful incorporation of specific actions, equipment or procedures by industry management to attain control of risk factors that contribute to foodborne illness or injury such as personnel training, infrastructure or necessary equipment, HACCP plans, documentation or record keeping, and labeling, and
- (C) Priority foundation item is an item that is denoted in these regulations with a superscript Pf -Pf.

#### **Public Water System**

Has the meaning stated in 40 CFR 141 National Primary Drinking Water regulations.

#### Ratite

A flightless bird such as an emu, ostrich, or rhea.

#### **Ready-to-Eat Food**

#### Food that:

- (A) Is in a form that is edible without additional preparation to achieve food safety, as specified under one of the following: ¶ 3-401.1(A) or (B), § 3-401. 2, or § 3-402.1, or as specified in ¶ 3-401.1(C), or
- (B) Is a raw or partially cooked animal food and the consumer is advised as specified in Subparagraphs 3-401.1(D)(1) and (3), and
- (C) May receive additional preparation for palatability or aesthetic, epicurean, gastronomic, or culinary purposes.

Ready-to-Eat Food includes:

- (A) Raw animal food that is cooked as specified under § 3-401.1 or 3-401. 2, or frozen as specified under § 3-402.1,
- (B) Raw fruits and vegetables that are washed as specified under § 3-302.5,
- (C) Fruits and vegetables that are cooked for hot holding, as specified under § 3-401.3,
- (D) All TCS food that is cooked to the temperature and time required for the specific food under subpart 3-401 and cooled as specified under § 3- 501.4,
- (E) Plant food for which further washing, cooking, or other processing is not required for food safety, and from which rinds, peels, husks, or shells, if naturally present are removed,
- (F) Substances derived from plants such as spices, seasonings, and sugar,
- (G) A bakery item such as bread, cakes, pies, fillings, or icing for which further cooking is not required for food safety,

- (H) The following products that are produced in accordance with USDA guidelines and that have received a lethality treatment for pathogens: dry, fermented sausages, such as dry salami or pepperoni; salt-cured meat and poultry products, such as prosciutto ham, country cured ham, and Parma ham; and dried meat and poultry products, such as jerky or beef sticks, and
- (I) Foods manufactured as specified in 21 CFR part 113, *Thermally processed low-acid foods* packaged in hermetically sealed containers.

#### **Reduced Oxygen Packaging**

- (A) The reduction of the amount of oxygen in a package by removing oxygen; displacing oxygen and replacing it with another gas or combination of gases; or otherwise controlling the oxygen content to a level below that normally found in the atmosphere (approximately 21% at sea level).
- (B) A process as specified in paragraph (A) of this definition that involves a food for which the hazards *Clostridium botulinum* or *Listeria monocytogenes* require control in the final packaged form.

Reduced Oxygen Packaging includes:

- (A) Vacuum packaging, in which air is removed from a package of food and the package is hermetically sealed so that a vacuum remains inside the package,
- (B) Modified atmosphere packaging, in which the atmosphere of a package of food is modified so that its composition is different from air but the atmosphere may change over time due to the permeability of the packaging material or the respiration of the food. Modified atmosphere packaging includes reduction in the proportion of oxygen, total replacement of oxygen, or an increase in the proportion of other gases such as carbon dioxide or nitrogen,
- (C) Controlled atmosphere packaging, in which the atmosphere of a package of food is modified so that until the package is opened, its composition is different from air, and continuous control of that atmosphere is maintained, such as by using oxygen scavengers or a combination of total replacement of oxygen, nonrespiring food, and impermeable packaging material,
- (D) Cook chill packaging, in which cooked food is hot filled into impermeable bags which have the air expelled and are then sealed or crimped closed. The bagged food is rapidly chilled and refrigerated at temperatures that inhibit the growth of psychrotrophic pathogens, or
- (E) Sous vide packaging, in which raw or partially cooked food is vacuum packaged in an impermeable bag, cooked in the bag, rapidly chilled, and refrigerated at temperatures that inhibit the growth of psychrotrophic pathogens.

#### Refuse

Solid waste not carried by water through the sewage system.

#### **Regulatory Authority**

The local, state or federal enforcement body or authorized representative having jurisdiction over a food establishment.

#### Reminder

A written statement concerning the health risk of consuming animal foods raw, undercooked, or without otherwise being processed to eliminate pathogens.

#### Remodel

- (A) Changes in the floor plan layout,
- (B) The alteration or installation of additional equipment,
- (C) The conversion of a space not previously used for food handling activities, or
- (D) Major changes to finishes requiring partial or complete closure of the establishment during demolition or installation.
- (E) Remodel does not include:
  - (1) Routine maintenance,
  - (2) Like-for-Like equipment exchanges, or
  - (3) Addition of plug-in equipment that does not require a ventilation hood, plumbing, gas, upgraded electrical circuitry, or a change in the facility layout.

#### **Re-Service**

The transfer of food that is unused and returned by a consumer after being served or sold and in the possession of the consumer, to another person.

#### Restrict

To limit the activities of a food handler so that there is no risk of transmitting a disease that is transmissible through food and the food handler does not work with exposed food, clean equipment, utensils, linens, or unwrapped single-service or single-use articles.

#### **Restricted-Use Pesticide**

A pesticide product that contains the active ingredients specified in 40 CFR 152.175, and that is limited to use by or under the direct supervision of a certified applicator.

Risk

The likelihood that an adverse health effect will occur within a population as a result of a hazard in a food.

#### Sanitization

The application of cumulative heat or chemicals on cleaned food-contact surfaces that, when evaluated for efficacy, is sufficient to yield a reduction of 5 logs, which is equal to a 99.999% reduction of representative disease microorganisms of public health importance.

#### Sealed

Free of cracks or other openings that allow the entry or passage of moisture, debris, or pests.

#### **Service Animal**

A dog or a miniature horse that has been trained to do work or perform tasks for the benefit of a person with a disability. NRS 426.097 and 28 CFR §36.104

#### Sewage

Wastewater consisting of liquid waste and water-carried solids, including effluent from commercial, industrial, and domestic sources and toilets.

#### **Shellfish Control Authority**

A state, federal, foreign, tribal, or other government entity legally responsible for administering a program that includes certification of molluscan shellfish harvesters and dealers for interstate commerce.

#### Shellstock

Raw, in-shell molluscan shellfish

#### Shiga toxin-producing Escherichia coli (STEC)

Any *E. Coli* capable of producing Shiga toxins (also called verocytotoxins). STEC infections can be asymptomatic or may result in a spectrum of illness ranging from mild non-bloody diarrhea to hemorrhagic colitis (i.e., bloody diarrhea), to hemolytic uremic syndrome (HUS—a type of kidney failure). Examples of serotypes of STEC include: *E. Coli* O157:H7; *E. Coli* O157:NM; *E. Coli* O26:H11; *E. Coli* O145:NM; *E. Coli* O103:H2; and *E. Coli* O111:NM. STEC are sometimes referred to as VTEC (verocytotoxigenic *E. Coli*) or as EHEC (Enterohemorrhagic *E. Coli*). EHEC are a subset of STEC which can cause hemorrhagic colitis or HUS.

#### **Shucked Shellfish**

Molluscan shellfish that have one or both shells removed.

#### **Single-Service Articles**

Tableware, carry-out utensils, and other items such as bags, containers, placemats, stirrers, straws, toothpicks, and wrappers that are designed and constructed for one time, one person use after which they are intended for discard.

#### Single-Use Articles

- (A) Utensils and bulk food containers designed and constructed to be used once and discarded.
- (B) Single-use articles include items such as wax paper, butcher paper, plastic wrap, formed aluminum food containers, jars, plastic tubs or buckets, bread wrappers, pickle barrels, ketchup bottles, and number 10 cans which do not meet the materials, durability, strength, and cleanability specifications under §§ 4-101.11, 4-201.11, and 4-202.11 for multiuse utensils.

#### Site-Specific

A designated address or location that is clearly defined in the permit application for a food establishment.

#### Slacking

The process of moderating the temperature of a food such as allowing a food to gradually increase from a temperature of  $-23^{\circ}$ C ( $-10^{\circ}$ F) to  $-4^{\circ}$ C ( $25^{\circ}$ F) in preparation for deep-fat frying or to facilitate even heat penetration during the cooking of previously block- frozen food such as shrimp.

#### Smooth

- (A) A food-contact surface having a surface free of pits and inclusions with a cleanability equal to or exceeding that of (100 grit) number 3 stainless steel,
- (B) A non-food-contact surface of equipment having a surface equal to that of commercial grade hot-rolled steel free of visible scale, and
- (C) A floor, wall, or ceiling having an even or level surface with no roughness or projections that render it difficult to clean.

#### **Special Event**

A temporary public gathering for a specific purpose that includes at least one temporary food establishment or food vendor as part of the event. The event has a defined start and stop date that does not exceed 14 calendar days.

#### **Support Kitchen**

A food establishment owned by another person that serves as a support area for a Temporary food establishment to prepare and store food, clean and sanitize equipment, acquire potable water and empty wastewater tanks of 15 gallons or less.

#### Tableware

Eating, drinking, and serving utensils for table use such as flatware including forks, knives, and spoons; hollowware including bowls, cups, serving dishes, and tumblers; and plates.

#### **Tasting Event**

A special event such as a sampling event, wine tasting, trade shows, and chili cook-offs, in which an entrance fee entitles attendees to food service in conjunction with the event without a point of sale at the individual food vendor spaces.

#### **Temperature Measuring Device**

A thermometer, thermocouple, thermistor, or other device that indicates the temperature of food, air, or water.

#### **Temporary Food Establishment**

A food establishment that operates for a period of no more than 14 consecutive days in conjunction with a single event or celebration.

#### Time/Temperature Control for Safety Food

- (A) A food that requires Time/Temperature Control for Safety (TCS) to limit pathogenic microorganism growth or toxin formation.
- (B) TCS food includes:
  - (1) An animal food that is raw or heat-treated; a plant food that is heat- treated or consists of raw seed sprouts, cut melons, cut leafy greens, cut tomatoes or mixtures of cut tomatoes that are not modified in a way so that they are unable to support pathogenic microorganism growth or toxin formation, or garlic-in-oil mixtures that are not modified in a way so that they are unable to support pathogenic microorganism growth or toxin formation, and
  - (2) Except as specified in subparagraph (C)(4) of this definition, a food that because of the interaction of its a<sub>w</sub> and pH values is designated as product assessment required (PA) in Table A or B of this definition:

Heat-treated to destroy vegetative cells and subsequently packaged			
a <sub>w</sub> values	pH: 4.6 or less	pH: > 4.6 - 5.6	pH: > 5.6
< 0.92	Non-TCS food	Non-TCS food	Non-TCS food
> 0.92 - 0.95	Non-TCS food	Non-TCS food	PA*
> 0.95	Non-TCS food	PA	PA

Table A Interaction of pH and a<sub>w</sub> for control of spores in food

\*PA means Product Assessment required

	Not heat-treated of heat-treated but not packaged				
a <sub>w</sub> values	pH: < 4.2	рН: 4.2 - 4.6	pH: > 4.6 - 5.0	pH: > 5.0	
< 0.88	Non-TCS food	Non-TCS food	Non-TCS food	Non-TCS food	
0.88 - 0.90	Non-TCS food	Non-TCS food	Non-TCS food	PA	
> 0.90 - 0.92	Non-TCS food	Non-TCS food	PA	PA	
> 0.92	Non-TCS food	PA	PA	PA	

# Table B Interaction of pH and aw for control of vegetative cells and spores in food Not heat-treated or heat-treated but not packaged

#### (C) TCS food does not include:

- (1) An air-cooled hard-boiled egg with shell intact, or an egg with shell intact that is not hard-boiled, but has been pasteurized to destroy all viable *Salmonellae*,
- (2) A food in an unopened hermetically sealed container that is commercially processed to achieve and maintain commercial sterility under conditions of non-refrigerated storage and distribution,
- (3) A food that because of its pH or aw value, or interaction of aw and pH values, is designated as a non-TCS food in Table A or B of this definition,
- (4) A food that is designated as product assessment required (PA) in Table A or B of this definition and has undergone a product assessment showing that the growth or toxin formation of pathogenic microorganisms that are reasonably likely to occur in that food is precluded due to:
  - (a) Intrinsic factors including added or natural characteristics of the food such as preservatives, antimicrobials, humectants, acidulants, or nutrients,
  - (b) Extrinsic factors including environmental or operational factors that affect the food such as packaging, modified atmosphere such as reduced oxygen packaging, shelf life and use, or temperature range of storage and use, or
  - (c) A combination of intrinsic and extrinsic factors, or
- (5) A food that does not support the growth or toxin formation of pathogenic microorganisms in accordance with one of the subparagraphs (C)(1) (C)(4) of this definition even though the food may contain a pathogenic microorganism or chemical or physical contaminant at a level sufficient to cause illness or injury.

#### Utensil

A food-contact implement or container used in the storage, preparation, transportation, dispensing, sale, or service of food, such as kitchenware or tableware that is multiuse, single-service, or single-use; gloves used in contact with food; temperature sensing probes of food temperature measuring devices; and probe-type price or identification tags used in contact with food.

#### Variance

An approval by the Southern Nevada Health District's Board of Health pursuant to NRS 439.200, demonstrating an exceptional and undue hardship to the person requesting the variance, which authorizes a modification or deviation from the requirement of a regulation and would not cause substantial detriment to the public welfare or impair substantially the purpose of the regulation.

#### Waiver

An agreement between the Health Authority and a permit holder that authorizes a modification of one or more requirements of these regulations, if in the opinion of the health authority, a health hazard or nuisance will not result from the modification.

#### Warewashing

The cleaning and sanitizing of utensils and food-contact surfaces of equipment.

#### Whole-Muscle, Intact Beef

Whole muscle beef that is not injected, mechanically tenderized, reconstructed, or scored and marinated, from which beef steaks may be cut.

2-6	Food Handler Employment Requirements

Supervision
Assignment of Responsibility
Knowledge
Duties of the PIC

#### 2-101 Assignment of Responsibility

- (A) Each permit holder must designate a PIC to be present at the food establishment during all hours of operation. <sup>Pf</sup> A permit holder who is an individual may act as PIC.
- (B) When there are two or more separately permitted food establishments on the premises that are the legal responsibility of the same person, the permit holder may, during specific time periods when food is not being prepared, packaged, or served, designate a single PIC who responsible for each separately permitted food establishment.<sup>Pf</sup>
- (C) This section does not apply to certain types of food establishments deemed by the Health Authority to pose minimal risk of causing, or contributing to, foodborne illness based on the nature of the operation and extent of the food preparation. <sup>Pf</sup>

# 2-102Knowledge2-102.1Demonstration

Based on the risks inherent to the food operation, during inspections, and upon request, the PIC must demonstrate knowledge of foodborne illness prevention, application of HACCP principles, and the requirements of these regulations to the Health Authority. The PIC must demonstrate this knowledge by:

- (A) Complying with these regulations by having no violations of priority items during the current inspection; <sup>Pf</sup>
- (B) Being a certified food protection manager who has shown proficiency of required information through passing a test that is part of an accredited program; <sup>Pf</sup> or
- (C) Responding correctly to the inspector's questions as they relate to the specific food operation. The areas of knowledge include:

- (1) Describing the relationship between the prevention of foodborne illness and the personal hygiene of a food handler; <sup>Pf</sup>
- (2) Explaining the responsibility of the PIC for preventing the transmission of foodborne illness by a food handler who has a disease or medical condition that may cause foodborne illness; <sup>Pf</sup>
- (3) Describing the symptoms associated with the diseases that are transmissible through food; <sup>Pf</sup>
- (4) Explaining the significance of the relationship between maintaining the time and temperature of TCS food and the prevention of foodborne illness; <sup>Pf</sup>
- (5) Explaining the hazards involved in the consumption of raw or undercooked meat, poultry, eggs, and fish; <sup>Pf</sup>
- (6) Stating the required food temperatures and times for the safe cooking of TCS food including meat, poultry, eggs, and fish; <sup>Pf</sup>
- (7) Stating the required temperatures and times for the safe refrigerated storage, hot holding, cooling, and reheating of TCS food; <sup>Pf</sup>
- (8) Describing the relationship between the prevention of foodborne illness and the management and control of the following:
  - (a) Cross-contamination, <sup>Pf</sup>
  - (b) Hand contact with ready-to-eat foods, <sup>Pf</sup>
  - (c) Handwashing, <sup>Pf</sup> and
  - (d) Maintaining the food establishment in a clean condition and in good repair; <sup>Pf</sup>
- (9) Describing foods identified as major food allergens and the symptoms that a major food allergen could cause in a sensitive individual who has an allergic reaction.<sup>Pf</sup>
- (10) Explaining the relationship between food safety and providing equipment that is:
  - (a) Sufficient in number and capacity <sup>Pf</sup>, and
  - (b) Properly designed, constructed, located, installed, operated, maintained, and cleaned; <sup>Pf</sup>
- (11) Explaining correct procedures for cleaning and sanitizing utensils and food-contact surfaces of equipment; <sup>Pf</sup>
- (12) Identifying the source of water used in the food establishment and measures taken to ensure that it remains protected from contamination such as providing protection from backflow and precluding the creation of cross connections; <sup>Pf</sup>

- (13) Identifying poisonous or toxic materials in the food establishment and the procedures necessary to ensure that they are safely stored, dispensed, used, and disposed of according to law; <sup>Pf</sup>
- (14) Identifying critical control points in the food establishment, from purchasing through sale or service, that when not controlled could contribute to the transmission of foodborne illness and explaining steps taken to ensure that the points are controlled in accordance with the requirements of these regulations; <sup>Pf</sup>
- (15) Explaining the details of how the PIC and food handlers comply with the HACCP plan if a plan is required by the law, these regulations, or an agreement between the Health Authority and the food establishment; <sup>Pf</sup>
- (16) Explaining the responsibilities, rights, and authorities assigned by these regulations to the:
  - (a) Food handler, Pf
  - (b) Employee, Pf
  - (c) PIC, Pf
  - (d) Health Authority; <sup>Pf</sup> and
- (17) Explaining how the PIC and food handlers comply with reporting responsibilities and exclusion or restriction of food handlers. <sup>Pf</sup>

#### 2-102.2 Certified Food Protection Manager

- (A) The PIC must be a certified food protection manager who has shown proficiency of required information through passing a test that is part of an accredited program.
- (B) This section does not apply to certain types of food establishments deemed by the Health Authority to pose minimal risk of causing, or contributing to, foodborne illness based on the nature of the operation and extent of food preparation.

#### 2-102.3 Food Protection Manager Certification

- (A) A PIC who demonstrates knowledge by being a food protection manager that is certified by a food protection manager certification program that is evaluated and listed by a Conference for Food Protection-recognized accrediting agency as conforming to the Conference for Food Protection Standards for Accreditation of Food Protection Manager Certification Programs is deemed to comply with ¶2-102.1(B).
- (B) A food establishment that has a PIC that is certified by a food protection manager certification program that is evaluated and listed by a Conference for food Protection-recognized accrediting agency as conforming to the Conference for food Protection Standards for Accreditation of food Protection Manager Certification Programs is deemed to comply with §2-102.2.

#### 2-103 Duties of the PIC

The PIC must ensure that:

- (A) Food establishment operations are not conducted in a private home or in a room used as living or sleeping quarters as specified under § 6-202.11, <sup>Pf</sup>
- (B) Individuals unnecessary to the food establishment operation are not allowed in the food preparation, food storage, or warewashing area, except that brief visits and tours may be authorized by the PIC if steps are taken to ensure that exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles are protected from contamination, <sup>Pf</sup>
- **(C)** Employees and other persons such as delivery and maintenance persons and pesticide applicators entering the food preparation, food storage, and warewashing areas comply with these regulations, <sup>Pf</sup>
- (D) Employees are effectively cleaning their hands, by routinely monitoring the employees' handwashing, <sup>Pf</sup>
- (E) Employees are visibly observing foods as they are received to determine that they are from approved sources, delivered at the required temperatures, protected from contamination, unadulterated, and accurately presented, by routinely monitoring the food handlers' observations and periodically evaluating foods upon delivery, <sup>Pf</sup>
- (F) Employees are verifying that foods delivered to the food establishment during non-operating hours are from approved sources and are placed into appropriate storage locations such that they are maintained at the required temperatures, protected from contamination, unadulterated, and accurately presented, <sup>Pf</sup>
- (G) Employees are properly cooking TCS food, being particularly careful in cooking those foods known to cause severe foodborne illness and death, such as eggs and comminuted meats, through daily oversight of the food handlers' routine monitoring of the cooking temperatures using appropriate temperature-measuring devices properly scaled and calibrated as specified under § 4-203.1 and ¶ 4- 502.1(B), <sup>Pf</sup>
- (H) Employees are using proper methods to rapidly cool TCS foods that are not held hot or are not for consumption within four hours, through daily oversight of the food handlers' routine monitoring of food temperatures during cooling, <sup>Pf</sup>
- (I) Employees are properly maintaining the temperatures of TCS foods during hot and cold holding through daily oversight of the food handlers' routine monitoring of food temperatures, <sup>Pf</sup>
- (J) Consumers who order raw or partially cooked ready-to-eat foods of animal origin are informed as specified under § 3-603 that the food is not cooked sufficiently to ensure its safety, <sup>Pf</sup>
- (K) Employees are properly cleaning and sanitizing multiuse equipment and utensils before they are reused, through routine monitoring of solution temperature and exposure time for hot water sanitizing, and chemical concentration, pH, temperature, and exposure time for chemical sanitizing, <sup>Pf</sup>

- (L) Consumers are notified that clean tableware is to be used when they return to self-service areas such as salad bars and buffets as specified under § 3-304.6, <sup>Pf</sup>
- (M) Except when approval is obtained from the Health Authority as specified in ¶ 3-301.1(E), employees are preventing cross-contamination of ready- to-eat food with bare hands by properly using suitable utensils such as deli tissue, spatulas, tongs, single-use gloves, or dispensing equipment, <sup>Pf</sup>
- (N) Employees are properly trained in food safety, including food allergy awareness, as it relates to their assigned duties, <sup>Pf</sup>
- (O) Food handlers are informed, in a verifiable manner, of their responsibility to report in accordance with law, information about their health and activities as they relate to diseases that are transmissible through food, as specified under ¶ 2- 201.1(A), to the PIC, <sup>Pf</sup> and,
- (P) Written procedures and plans, where specified by these regulations and as developed by the food establishment, are maintained and implemented as required. <sup>Pf</sup>

2-2	Employee Health
Subpart 2-201	Responsibilities of the Permit Holder, PIC, Food Handlers, and Employees

# 2-201 Responsibilities of the Permit Holder, PIC, and Food Handlers2-201.1 Responsibilities and Reporting Symptoms and Diagnosis

- (A) The permit holder must require food handlers to report to the PIC information about their health and activities as they relate to diseases that are transmissible through food. A food handler must report the information in a manner that allows the PIC to reduce the risk of foodborne illness transmission, including providing necessary additional information, such as the date of onset of symptoms and an illness, or of a diagnosis without symptoms, if the food handler:
  - (1) Has any of the following symptoms:
    - (a) Vomiting, <sup>P</sup>
    - (b) Diarrhea, <sup>P</sup>
    - (c) Jaundice, <sup>P</sup>
    - (d) Sore throat with fever, <sup>P</sup> or
    - (e) A lesion containing pus such as a boil or infected wound that is open or draining and is:
      - (i) On the hands or wrists, unless an impermeable cover such as a finger cot or stall protects the lesion and a single-use glove is worn over the impermeable cover, <sup>P</sup>

- (ii) On exposed portions of the arms, unless the lesion is protected by an impermeable cover, <sup>P</sup> or
- (iii) On other parts of the body, unless the lesion is covered by a dry, durable, tight-fitting bandage, <sup>P</sup>
- (2) Has an illness diagnosed by a health practitioner due to:
  - (a) Norovirus, <sup>P</sup>
  - (b) Hepatitis A virus, <sup>P</sup>
  - (c) Shigella spp.,<sup>P</sup>
  - (d) Shiga toxin-producing Escherichia Coli, P
  - (e) Typhoid fever (Salmonella Typhi), <sup>P</sup> or
  - (f) Salmonella (non-Typhoidal), <sup>P</sup>
- (3) Had Typhoid fever, diagnosed by a health practitioner, within the past three months, without having received antibiotic therapy, as determined by a health practitioner, <sup>P</sup>
- (4) Has been exposed to, or is the suspected source of, a confirmed disease outbreak, because the food handler consumed or prepared food implicated in the outbreak, or consumed food at an event prepared by a person who is infected or ill with: <sup>P</sup>
  - (a) Norovirus within the past 48 hours of the last exposure, <sup>P</sup>
  - (b) Shiga toxin-producing *Escherichia coli* or *Shigella* spp. within the past three calendar days of the last exposure, <sup>P</sup>
  - (C) Typhoid fever within the past 14 calendar days of the last exposure, <sup>P</sup> or
  - (d) Hepatitis A virus within the past 30 calendar days of the last exposure, <sup>P</sup> or
- (5) Has been potentially exposed by attending or working in a setting where there is a suspected or confirmed disease outbreak, or knowingly living in the same household with an individual who works or attends a setting where there is a suspected or confirmed disease outbreak, or knowingly living in the same household with an individual diagnosed with an illness caused by:
  - (a) Norovirus within the past 48 hours of the last exposure, <sup>P</sup>
  - (b) Shiga toxin-producing E*scherichia coli* or *Shigella* spp. within the past three calendar days of the last exposure, <sup>P</sup>
  - (C) Typhoid fever within the past 14 calendar days of the last exposure, <sup>P</sup> or
  - (d) Hepatitis A virus within the past 30 calendar days of the last exposure.<sup>P</sup>
- (B) The PIC must notify the Health Authority when a food handler is:
  - (1) Jaundiced, <sup>Pf</sup> or
  - (2) Diagnosed with an illness due to a pathogen as specified under Subparagraphs (A)(2)(a)-(f) of this section. <sup>Pf</sup>
- (C) The PIC must ensure that an employee:

- (1) Who exhibits or reports a symptom, or who reports a diagnosed illness as specified under subparagraphs (a)(1) (3) of this section, is prohibited from becoming a food handler until the employee meets the criteria for the specific symptoms or diagnosed illness as specified under § 2-201.3, <sup>P</sup> and
- (2) Who will work as a food handler in a food establishment that serves as a highly susceptible population and reports a history of exposure as specified under subparagraphs (A)(4)-(5), is prohibited from becoming a food handler until the employee meets the criteria as specified under ¶ 2-201.3(J).<sup>P</sup>
- (D) The PIC must ensure that a food handler who exhibits or reports a symptom, or who reports a diagnosed illness or a history of exposure as specified under Subparagraphs (A)(1)–(5) of this section is:
  - Excluded as specified under ¶¶ 2-201.2 (A) (C), and Subparagraphs (D)(1), (E)(1), (F)(1), (G) or (H)(1) and in compliance with the provisions specified under ¶¶ 2-201.3(A)—(H), <sup>p</sup> or
  - Restricted as specified under Subparagraphs 2-201.2 (D)(2), (E)(2), (F)(2), (H)(2), or ¶¶ 2-201.2(I) or (J) and in compliance with the provisions specified under ¶¶ 2-201.3(D)—(J).<sup>P</sup>
- (E) A food handler must report to the PIC the information as specified under ¶ (A) of this section. Pf
- (F) A food handler must:
  - (1) Comply with an exclusion as specified under  $\P\P 2-201.2$  (A)—(C) and Subparagraphs 2-201.2(D)(1), (E)(1), (F)(1), (G), or (H)(1) and with the provisions specified under  $\P\P 2-201.3(A) (H)$ , <sup>P</sup> or
  - (2) Comply with a restriction as specified under Subparagraphs 2- 201.2(D)(2), (E)(2), (F)(2), (G), (H)(2), or ¶¶ 2-201.2 (H), (I), or (J) and comply with the provisions specified under ¶¶ 2-201.3(D) (J).<sup>P</sup>

#### 2-201.2 Exclusions and Restrictions

The PIC must exclude or restrict a food handler from a food establishment in accordance with the following:

- (A) If symptomatic with vomiting or diarrhea, except when the symptom is from a noninfectious condition, exclude a food handler if the food handler is:
  - (1) Symptomatic with vomiting or diarrhea, <sup>P</sup> or
  - (2) Symptomatic with vomiting or diarrhea and diagnosed with an infection from Norovirus, *Shigella* spp., *Salmonella* (non-Typhoidal), or Shiga toxin-producing *E. Coli*.<sup>P</sup>
- (B) If jaundiced or diagnosed with Hepatitis A infection, exclude a food handler who is:

- (1) Jaundiced and the onset of jaundice occurred within the last seven calendar days, unless the food handler provides to the PIC written medical documentation from a health practitioner specifying that the jaundice is not caused by Hepatitis A virus or other fecal-orally transmitted infection, <sup>P</sup>
- (2) Diagnosed with an infection from Hepatitis A virus within 14 calendar days from the onset of any illness symptoms, or within seven calendar days of the onset of jaundice, <sup>P</sup> or
- (3) Diagnosed with an infection from Hepatitis A virus without developing symptoms.<sup>P</sup>
- (C) If diagnosed with Typhoid fever or the food handler reported an illness with Typhoid fever within the past three months , exclude the food handler as specified under Subparagraph 2-201.1(A)(3), <sup>P</sup>
- (D) If diagnosed with an asymptomatic infection from Norovirus:
  - (1) Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>P</sup> or
  - (2) Restrict the food handler who works in a food establishment not serving a highly susceptible population.<sup>P</sup>
- (E) If diagnosed with an infection from *Shigella* spp. and is asymptomatic:
  - (1) Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>P</sup> or
  - (2) Restrict the food handler who works in a food establishment not serving a highly susceptible population.<sup>P</sup>
- (F) If diagnosed with an infection from Shiga toxin-producing E. *Coli*, and is asymptomatic:
  - (1) Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>P</sup> or
  - (2) Restrict the food handler who works in a food establishment not serving a highly susceptible population.<sup>P</sup>
- (G) If diagnosed with an infection from *Salmonella* (non-Typhoidal) and is asymptomatic, restrict the food handler who works in a food establishment serving a highly susceptible population or in a food establishment not serving a highly susceptible population.<sup>P</sup>
- (H) If symptomatic with an acute onset of sore throat with fever:
  - (1) Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>P</sup> or

- (2) Restrict the food handler who works in a food establishment not serving a highly susceptible population.<sup>P</sup>
- (I) If infected with a skin lesion containing pus such as a boil or infected wound that is open or draining and not properly covered as specified under Subparagraph 2-201.1(A)(1)(e), restrict the food handler.<sup>P</sup>
- (J) If a food handler is exposed to a foodborne pathogen as specified under Subparagraphs 2-201.1(A)(4)(a – d) or 2-201.1(A)(5)(a–d), restrict the food handler who works in a food establishment serving a highly susceptible population.<sup>P</sup>

# 2-201.3 Removal, Adjustment, or Retention of Exclusions and Restrictions

The PIC must adhere to the following conditions when removing, adjusting, or retaining the exclusion or restriction of a food handler:

- (A) Except when a food handler is diagnosed with Typhoid fever or an infection from Hepatitis A virus:
  - (1) Reinstate a food handler who was excluded as specified under Subparagraph 2-201.2(A)(1) if the food handler:
    - (a) Is asymptomatic for at least 24 hours, <sup>P</sup> or
    - **(b)** Provides to the PIC written medical documentation from a health practitioner that states the symptom is from a noninfectious condition.<sup>P</sup>
  - (2) If a food handler was diagnosed with an infection from norovirus and excluded as specified under Subparagraph 2-201.2(A)(2):
    - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (D)(1) or (2) of this section are met, <sup>P</sup> or
    - (b) Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (D)(1) or (2) of this section are met.<sup>P</sup>
  - (3) If a food handler was diagnosed with an infection from *Shigella* spp. And excluded as specified under subparagraph 2-201.2(A)(2):
    - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (E)(1) or (2) of this section are met, <sup>P</sup> or
    - (b) Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible

population, until the conditions for reinstatement as specified under Subparagraphs (E)(1) or (2), or (E)(1) and (3)(a) of this section are met.<sup>P</sup>

- (4) If a food handler was diagnosed with an infection from Shiga toxin- producing *Escherichia coli* and excluded as specified under Subparagraph 2-201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (F)(1) or (2) of this section are met, <sup>P</sup> or
  - (b) Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (F)(1) or (2) are met.<sup>P</sup>
- (5) If a food handler was diagnosed with an infection from *Salmonella* (non-Typhoidal) and excluded as specified under Subparagraph 2- 201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 30 calendar days until conditions for reinstatement as specified under Subparagraphs (G)(1) or (2) of this section are met, <sup>P</sup> or
  - (b) Retain the exclusion for the food handler who is symptomatic, until conditions for reinstatement as specified under Subparagraphs (G)(1) or (G)(2) of this section are met.<sup>P</sup>
- (B) Reinstate a food handler who was excluded as specified under ¶ 2- 201.2(B) if the PIC obtains approval from the Health Authority and one of the following conditions is met,
  - (1) The food handler has been jaundiced for more than seven calendar days, <sup>P</sup>
  - (2) The food handler has been symptomatic with symptoms other than jaundice for more than 14 calendar days, <sup>P</sup> or
  - (3) The food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a Hepatitis A virus infection.<sup>P</sup>
- (C) Reinstate a food handler who was excluded as specified under ¶ 2- 201.2(C) if:
  - (1) The PIC obtains approval from the Health Authority, <sup>P</sup> and
  - (2) The food handler provides to the PIC written medical documentation from a health practitioner that states the food handler is free from Typhoid fever. <sup>P</sup>
- (D) Reinstate a food handler who was excluded for a diagnosis with an infection from Norovirus under Subparagraphs 2-201.2(A)(2) or (D)(1) or who was restricted under Subparagraph 2-201.2(D)(2) if the PIC obtains approval from the Health Authority and one of the following conditions is met:

- (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a norovirus infection, <sup>P</sup>
- (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than 48 hours have passed since the food handler became asymptomatic, <sup>P</sup> or
- (3) The food handler was excluded or restricted and did not develop symptoms and more than 48 hours have passed since the food handler was diagnosed.<sup>P</sup>
- (E) Reinstate a food handler who was excluded for a diagnosis with an infection from a Shigella species under Subparagraphs 2-201.2(A)(2) or (E)(1) or who was restricted under Subparagraph 2-201.2(E)(2) if the PIC obtains approval from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a *Shigella* spp. Infection based on test results showing 2 consecutive negative stool specimen cultures that are taken:
    - (a) Not earlier than 48 hours after discontinuance of antibiotics, <sup>P</sup> and
    - (b) At least 24 hours apart, <sup>P</sup>
  - (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than seven calendar days have passed since the food handler became asymptomatic, <sup>P</sup> or
  - (3) The food handler was excluded or restricted and did not develop symptoms and more than seven calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (F) Reinstate a food handler who was excluded or restricted, due to a STEC diagnosis, as specified under Subparagraphs 2-201.2(A)(2) or (F)(1), or who was restricted under Subparagraph 2-201.2(F)(2) if the PIC obtains approval from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of an infection from Shiga toxin-producing *Escherichia coli* based on test results that show 2 consecutive negative stool specimen cultures that are taken:
    - (a) Not earlier than 48 hours after discontinuance of antibiotics, <sup>P</sup> and
    - (b) At least 24 hours apart, <sup>P</sup>
  - (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved and more than seven calendar days have passed since the food handler became asymptomatic, <sup>P</sup> or

- (3) The food handler was excluded or restricted and did not develop symptoms and more than seven calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (G) Reinstate a food handler who was excluded due to non-Typhoidal Salmonella, as specified under Subparagraph 2-201.2(A)(2), or who was restricted as specified under ¶ 2-201.2(G) if the PIC obtains approval from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a *Salmonella* (non-Typhoidal) infection based on test results showing 2 consecutive negative stool specimen cultures that are taken,
    - (a) Not earlier than 48 hours after discontinuance of antibiotics, <sup>P</sup> and
    - (b) At least 24 hours apart, <sup>P</sup>
  - (2) The food handler was restricted after symptoms of vomiting or diarrhea resolved, and more than 30 calendar days have passed since the food handler became asymptomatic, <sup>P</sup> or
  - (3) The food handler was excluded or restricted and did not develop symptoms and more than 30 calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (H) Reinstate a food handler who was excluded or restricted due to sore throat with fever, as specified under Subparagraphs 2-201.2(H)(1) or (2), if the food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler meets one of the following conditions:
  - (1) Has received antibiotic therapy for *Streptococcus pyogenes* infection for more than 24 hours, <sup>P</sup>
  - (2) Has at least one negative throat specimen culture for *Streptococcus pyogenes* infection, <sup>P</sup> or
  - (3) Is otherwise determined by a health practitioner to be free of a *Streptococcus pyogenes* infection. <sup>P</sup>
- (I) Reinstate a food handler who was restricted as specified under ¶ 2-201.2(I) if the skin, infected wound, cut, or pustular boil is properly covered with one of the following:
  - (1) An impermeable cover such as a finger cot or stall and a single-use glove over the impermeable cover if the infected wound or pustular boil is on the hand, finger, or wrist,
  - (2) An impermeable cover on the arm if the infected wound or pustular boil is on the arm, <sup>P</sup> or
  - (3) A dry, durable, tight-fitting bandage if the infected wound or pustular boil is on another part of the body.<sup>P</sup>

- (J) Reinstate a food handler who was restricted as specified under ¶ 2-201.2(J) and was exposed to one of the following pathogens as specified under Subparagraph 2-201.1(A)(4)(a-d) or 2-201.1(A)(5)(a-d):
  - (1) Norovirus and one of the following conditions are met:
    - (a) More than 48 hours have passed since the last day the food handler was potentially exposed, <sup>P</sup> or
    - (b) More than 48 hours have passed since the food employee's household contact became asymptomatic.<sup>P</sup>
  - (2) *Shigella* spp. Or Shiga toxin-producing E*scherichia coli* and one of the following conditions is met:
    - (a) More than three calendar days have passed since the last day the food handler was potentially exposed, <sup>P</sup> or
    - (b) More than three calendar days have passed since the food handler's household contact became asymptomatic. <sup>P</sup>
  - (3) Typhoid fever (caused by *Salmonella* Typhi) and one of the following conditions is met:
    - (a) More than 14 calendar days have passed since the last day the food handler was potentially exposed, <sup>P</sup> or
    - (b) More than 14 calendar days have passed since the food handler's household contact became asymptomatic. <sup>P</sup>
  - (4) Hepatitis A virus and one of the following conditions is met:
    - (a) The food handler is immune to Hepatitis A virus infection because of a prior illness from Hepatitis A, <sup>P</sup>
    - (b) The food handler is immune to Hepatitis A virus infection because of vaccination against Hepatitis A, <sup>P</sup>
    - (c) The food handler is immune to Hepatitis A virus infection because of IgG administration, <sup>P</sup>
    - (d) More than 30 calendar days have passed since the last day the food handler was potentially exposed, <sup>P</sup>
    - (e) More than 30 calendar days have passed since the food handler's household contact became jaundiced, <sup>P</sup> or
    - (f) The food handler does not use an alternative procedure that allows bare hand contact with ready-to-eat food until at least 30 calendar days after the potential exposure, as specified in Subparagraphs (I)(4)(d) and (e)of this section, and the food handler receives additional training about:
      - (i) Hepatitis A symptoms and preventing the transmission of infection, <sup>P</sup>
      - (ii) Proper handwashing procedures, <sup>P</sup> and
      - (iii) Protecting ready-to-eat food from contamination introduced by bare hand contact.<sup>P</sup>

2-3	Personal Cleanliness
Subparts	
2-301 2-302	Hands and Arms Fingernail Maintenance
2-303	Jewelry Prohibition
2-304	Outer Clothing in Clean Condition

#### 2-301 Hands and Arms 2-301.1 Clean Condition

Food handlers must keep their hands and exposed portions of their arms clean. Hands and arms include surrogate prosthetic devices for hands and arms.<sup>P</sup>

# 2-301.2 Cleaning Procedure

- (A) Except as specified in ¶ (D), food handlers must clean their hands and exposed portions of their arms for at least 20 seconds, using a cleaning compound in a handwashing sink that is equipped as specified under § 5-202.2 and Subpart 6-301.<sup>P</sup>
- (B) Food handlers must use the following cleaning procedure in the order stated to clean their hands and exposed portions of their arms:
  - (1) Rinse under clean, running warm water, <sup>P</sup>
  - (2) Apply an amount of cleaning compound recommended by the cleaning compound manufacturer, <sup>P</sup>
  - (3) Rub together vigorously for at least 10 to 15 seconds while:
    - (a) Paying particular attention to removing soil from underneath the fingernails during the cleaning procedure, <sup>P</sup> and
    - (b) Creating friction on all surfaces of the hands and arms, fingertips, and areas between the fingers, <sup>P</sup>
  - (4) Thoroughly rinse under clean, running warm water, <sup>P</sup> and
  - (5) Immediately follow the cleaning procedure with thorough drying using clean, disposable towels.<sup>P</sup>
- (C) To avoid recontaminating their hands, food handlers may use disposable paper towels or similar clean barriers when touching surfaces such as manually operated faucet handles on a handwashing sink or the handle of a restroom door.

(D) If approved and capable of removing the types of soils encountered in the food operations involved, an automatic handwashing facility may be used by food handlers to clean their hands and exposed portions of their arms.

# 2-301.3 When to Wash

Food handlers must clean their hands and exposed portions of their arms as specified under § 2-301.2 immediately before engaging in food preparation including working with exposed food, clean equipment and utensils, and unwrapped single-service and single-use articles <sup>P</sup> and:

- (A) After touching bare human body parts other than clean hands and clean, exposed portions of arms, <sup>P</sup>
- (B) After using the restroom, <sup>P</sup>
- (C) After caring for or handling service animals or aquatic animals as specified in ¶ 2-403(B), <sup>P</sup>
- (D) Except as specified in ¶ 2-401.1(B), after coughing, sneezing, using a handkerchief or disposable tissue, using tobacco, eating, or drinking, <sup>P</sup>
- (E) After handling soiled equipment or utensils, <sup>P</sup>
- (F) During food preparation, as often as necessary to remove soil and contamination and to prevent cross contamination when changing tasks, <sup>P</sup>
- (G) When switching between working with raw food and working with ready-to-eat food,<sup>P</sup>
- (H) Before donning gloves to initiate a task that involves working with food, <sup>P</sup> and
- (I) After engaging in other activities that contaminate the hands.<sup>P</sup>

# 2-301.4 Where to Wash

Food handlers must clean their hands and exposed portions of their arms in a designated handwashing sink or approved automatic handwashing facility and must not clean their hands in a sink used for food preparation or warewashing or in a service sink or a curbed cleaning facility used for the disposal of wastewater.<sup>Pf</sup>

#### 2-301.5 Hand Antiseptics

- (A) A hand antiseptic used as a topical application, a hand dip, or an antisepticsoap must:
  - (1) Comply with one of the following:
    - (a) Be an approved drug that is listed in the FDA publication *Approved Drug Products with Therapeutic Equivalence Evaluations* as an approved drug based on safety and effectiveness, <sup>Pf</sup> or

- (b) Have active antimicrobial ingredients that are listed in the FDA monograph for OTC Health Care Antiseptic Drug Products as an antiseptic handwash, <sup>Pf</sup> and
- (2) Consist only of components which the intended use of each complies with one of the following:
  - (a) A threshold of regulation exemption under 21 CFR 170.39 *Threshold of regulation for substances used in food-contact articles*; <sup>Pf</sup> or
  - **(b)** 21 CFR 178 Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers as regulated for use as a food additive with conditions of safe use, <sup>Pf</sup> or
  - (c) A determination of Generally Recognized as Safe (GRAS). Partial listings of substances with food uses that are GRAS may be found in 21 CFR 182 *Substances Generally Recognized as Safe*, 21 CFR 184 *Direct Food Substances Affirmed as Generally Recognized as Safe*, or 21 CFR 186 *Indirect Food Substances Affirmed as Generally Recognized as Safe for use in contact with food, and in FDA's Inventory of GRAS Notices*, <sup>Pf</sup> or
  - (d) A prior sanction listed under 21 CFR 181 Prior-Sanctioned Food Ingredients, <sup>Pf</sup> or
  - (e) An effective food contact notification, <sup>Pf</sup> and
- (3) Be applied only to hands and exposed portions of arms that are cleaned as specified under § 2-301.2. <sup>Pf</sup>
- (B) If a hand antiseptic or a hand antiseptic solution used as a hand dip does not meet the criteria specified under Subparagraph (A)(2) of this section, use must be:
  - (1) Followed by thorough hand rinsing in clean water beforehand contact with food or by the use of gloves, <sup>pf</sup> or
  - (2) Limited to situations that involve no direct contact with food by the bare hands. <sup>Pf</sup>
- (C) A hand antiseptic solution used as a hand dip must be maintained clean and at a strength equivalent to at least 100 mg/L chlorine. <sup>Pf</sup>

# 2-302 Fingernail Maintenance

- (A) Food handlers must keep their fingernails trimmed, filed, and maintained so the edges and surfaces are cleanable and not rough. <sup>Pf</sup>
- (B) Except as provided in ¶ (C) of this section, or unless wearing intact gloves in good repair, a food handler may not wear fingernail polish or artificial fingernails when working with exposed food.
- (C) ¶ (B) of this section does not apply to food handlers such as counter staff who only serve beverages and wrapped or packaged foods, hostesses, and wait staff if they present a minimal risk of contaminating exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

# 2-303 Jewelry Prohibition

Except for a plain ring such as a wedding band, while preparing food, food handlers may not wear jewelry including medical information jewelry on their arms and hands.

# 2-304 Outer Clothing in Clean Condition

Food handlers must wear clean outer clothing to prevent contamination of food, equipment, utensils, linens, and single-service and single-use articles. Employee aprons must not be worn into toilet facilities.

2-4	Hygienic Practices	
Subparts		
2-401	Food Contamination Prevention	
2-402	Hair Restraint Effectiveness	
2-403	Animal Handling Prohibition	

# 2-401Food Contamination Prevention2-401.1Eating, Drinking, or Using Tobacco

- (A) Except as specified in ¶ (B) of this section, an employee must not eat, drink, or use any form of tobacco, smoking, or vaping products except in designated areas where the contamination of exposed food; clean equipment, utensils, and linens; unwrapped single-service and single-use articles or other items needing protection cannot result.
- (B) A food handler may drink from a closed beverage container only when the container is handled to prevent contamination of:
  - (1) The food handler's hands;
  - (2) The container; and
  - (3) Exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.
- (C) A food establishment must fully comply with the Nevada Clean Indoor Air Act, NRS 202.2483.

# 2-401.2 Discharges from the Eyes, Nose, and Mouth

Food handlers experiencing persistent sneezing, coughing, or a runny nose that causes discharges from the eyes, nose, or mouth must not work with exposed food; clean equipment, utensils, and linens; or unwrapped single-service or single-use articles.

# 2-401.3 Use of Bandages, Finger Cots, or Finger Stalls

If used, an impermeable cover such as a bandage, finger cot or finger stall located on the wrist, hand or finger of a food handler working with exposed food must be covered with a single-use glove.

# 2-402 Hair Restraint Effectiveness

- (A) Except as provided in ¶ (B) of this section, food handlers must wear hair restraints for hair such as hats, hair coverings or nets, beard restraints, clothing that covers body hair, or other hair restraints that effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.
- (B) This section does not apply to food handlers such as counter staff who only serve beverages and wrapped or packaged foods, hostesses, and wait staff if they present a minimal risk of contaminating exposed food; clean equipment, utensils, and linens; and unwrapped singleservice and single-use articles.

# 2-403 Animal Handling Prohibition

- (A) Except as specified in ¶ (B) of this section, food handlers must not care for or handle animals such as patrol dogs, service animals, or pets that are allowed as specified in Subparagraphs 6-501.14(B)(2)-(6). <sup>Pf</sup>
- (B) Food handlers with service animals may handle or care for their service animals and food handlers may handle or care for fish in aquariums or molluscan shellfish or crustacea in display tanks if they wash their hands as specified under § 2-301.2 and ¶ 2-301.3(C).

2-5	Responding to Contamination Events
Subpart 2-501	Procedures for Clean-up of Vomiting and Diarrheal Events

# 2-501 Procedures for Clean-up of Vomiting and Diarrheal Events

A food establishment must have written procedures for employees to follow when responding to events that involve the discharge of vomitus or fecal matter onto surfaces in the food establishment. The procedures must address the specific actions employees must take to minimize the spread of contamination and the exposure of employees, consumers, food, and surfaces to vomitus or fecal matter.<sup>Pf</sup>

2-6	Food Handler Employment Requirements	
Subpart		
2-601	Food Handler Safety Training Card Requirements	
2-602	Persons Exempt from Food Handler Safety Training Card Requirements	

# 2-601 Food Handler Safety Training Card Requirements

(A) Except as specified in § 2-602, a person must be in possession of a valid food handler safety training card issued by SNHD prior to employment in a food establishment.

- (B) The person may, as an alternative to the food handler safety training card, obtain a Certified Food Safety Manager card issued by SNHD, if the applicant has completed the training and passed a proctored exam that is part of an accredited program in conformance with § 2-102.3.
- (C) The issued card must be maintained at their workstation, or on their person, and be available for review by the Health Authority.

# 2-602 Persons Exempt from Food Handler Safety Training Card Requirements

The following are exempt from obtaining a food handler safety training card:

- (A) A person employed in a food establishment who only handles food that is packaged and not TCS food and only handles TCS foods incidentally, outside the normal and usual course of the person's assigned duties,
- (B) Temporary trainers, guest chefs, and other personnel working at a food establishment for not more than seven calendar days within a 6-month period,
- (C) Persons who are Registered Environmental Health Specialists,
- **(D)** Student volunteers in a school kitchen who work under the supervision of a Certified Food Safety Manager,
- (E) Inmates who work under the management of a Certified Food Safety Manager, and
- (F) Individuals unable to obtain a Food Handler Safety Training Card because of a disability who work under the supervision of a Certified Food Safety Manager.

# 3-101 Safe, Unadulterated, and Honestly Presented Condition

Food must be safe, unadulterated, and honestly presented, as specified under § 3-601.2.<sup>P</sup>

3-2	Sources, Specifications, and Original Containers and Records	
Subparts		
3-201	Sources	
3-202	Specifications for Receiving	
3-203	Original Containers and Records	

# 3-201 Sources

# 3-201.1 Compliance with Food Law

- (A) Food must be obtained from approved sources.<sup>P</sup>
- (B) Food prepared in a private home must not be used, sold, offered or displayed for sale or service in a food establishment.<sup>P</sup>
- (C) Packaged food sold, offered or displayed for sale, or served must be labeled as specified in law, including 21 CFR 101 Food Labeling, 9 CFR 317 Labeling, Marking Devices, and Containers, and 9 CFR 381 Subpart N Labeling and Containers, and as specified under §§ 3-202.7 and 3-202.8. <sup>Pf</sup>
- (D) Fish, other than those specified in ¶ 3-402.1(B), that are intended for consumption in raw or undercooked form and allowed as specified in ¶ 3-401.1(D), may be sold, offered or displayed for sale, or served only when they are obtained from a supplier that freezes the fish as specified under § 3-402.1; or when they are frozen on the premises as specified under § 3-402.1 and records are retained as specified under § 3-402.2.

- (E) Whole-muscle, intact beef steaks that are intended for consumption in an undercooked form without a consumer advisory as specified in ¶ 3-401.1(C) must be:
  - (1) Obtained from a food processing establishment that, upon request by the purchaser, packages the steaks and labels them, to indicate that the steaks meet the definition of whole-muscle, intact beef, <sup>Pf</sup> or
  - (2) Deemed acceptable by the Health Authority based on other evidence, such as written buyer specifications or invoices, that indicates that the steaks meet the definition of whole-muscle, intact beef, <sup>Pf</sup> and
  - (3) If individually cut in a food establishment:
    - (a) Cut from whole-muscle, intact beef that is labeled by a food processing establishment as specified in Subparagraph (E)(1) of this section or identified as specified in Subparagraph (E)(2) of this section, <sup>Pf</sup>
    - (b) Prepared so they remain intact, <sup>Pf</sup> and
    - (c) If packaged for undercooking in a food establishment, labeled as specified in Subparagraph (E)(1) of this section or identified as specified in (E)(2) of this section. <sup>Pf</sup>
- (F) Meat and poultry that is not a ready-to-eat food and is in a packaged form when sold, offered or displayed for sale, or served, must be labeled to include safe handling instructions as specified in law, including 9 CFR 317.2(I) and 9 CFR 381.125(b).
- (G) Eggs that have not been specifically treated to destroy all viable *Salmonellae* must be labeled to include safe handling instructions as specified in law, including 21 CFR 101.17(h).

# **3-201.2** Food in a Hermetically Sealed Container

Food in a hermetically sealed container must be obtained from a food processing plant that is regulated by the food regulatory agency that has jurisdiction over the plant.<sup>P</sup>

# 3-201.3 Fluid Milk and Milk Products

Fluid milk and milk products must be obtained from sources that comply with Grade A Standards as specified in law.

- 3-201.4 Fish
- (A) Fish that are received for use, sale, or service must be:
  - (1) Commercially and legally caught or harvested, <sup>P</sup> or
  - (2) Approved for use, sale, or service.<sup>P</sup>
- (B) Molluscan shellfish that are recreationally caught must not be received for use, sale, or service.<sup>P</sup>

# 3-201.5 Molluscan Shellfish

- (A) Molluscan shellfish must be obtained from sources according to law and the requirements specified in the most recent version of the National Shellfish Sanitation Program Guide for the Control of Molluscan Shellfish.<sup>P</sup>
- (B) Molluscan shellfish received in interstate commerce must be from sources that are listed in the FDA Interstate Certified Shellfish Shippers List.<sup>P</sup>

# 3-201.6 Wild Mushrooms

- (A) Except as specified in ¶ (B) of this section, mushroom species picked in the wild must not be used, sold, offered or displayed for sale, or served by a food establishment unless the food establishment has been approved to do so.
- (B) This section does not apply to:
  - (1) Cultivated wild mushroom species that are grown, harvested, and processed in an operation that is regulated by the Health Authority, or
  - (2) Wild mushroom species if they are in packaged form and are the product of a food processing plant that is regulated by the food regulatory agency of jurisdiction over the plant.

# 3-201.7 Game Animals

- (A) If game animals are received for use, sale, or service, they must be:
  - (1) Commercially raised for food <sup>P</sup> and:
    - (a) Raised, slaughtered, and processed under an FDA or USDA Food Safety and Inspection program and in accordance with laws regarding animal health , <sup>P</sup> or
    - (b) Raised, slaughtered, and processed under an inspection program determined by the Health Authority to be equivalent to the FDA or USDA Food Safety and Inspection program.<sup>P</sup>
  - (2) Under an inspection program administered by the USDA for game animals such as exotic animals that are inspected and approved in accordance with 9 CFR 352 Subpart A *Exotic Animals; Voluntary Inspection* or rabbits that are inspected and certified in accordance with 9 CFR 354 *Voluntary Inspection of Rabbits and Edible Products Thereof.*<sup>P</sup>
  - (3) As allowed by law, for wild game animals that are live-caught:
    - (a) Under a routine inspection program conducted by a regulatory agency such as the agency that has animal health jurisdiction, <sup>P</sup> and
    - (b) Slaughtered and processed according to:

- (i) Laws governing meat and poultry as determined by the agency that has animal health jurisdiction and the agency that conducts the inspection program, <sup>P</sup> and
- (ii) Requirements which are developed by the agency that has animal health jurisdiction and the agency that conducts the inspection program with consideration of factors such as the need for antemortem and postmortem examination by an approved veterinarian or veterinarian's designee; <sup>P</sup> or
- (4) As allowed by law, for field-dressed wild game animals under a routine inspection program that ensures the animals:
  - (a) Receive a postmortem examination by an approved veterinarian or veterinarian's designee, or
  - (b) Are field-dressed and transported according to requirements specified by the agency that has animal health jurisdiction and the agency that conducts the inspection program, <sup>P</sup> and
  - (c) Are processed according to laws governing meat and poultry as determined by the agency that has animal health jurisdiction and the agency that conducts the inspection program.<sup>P</sup>
- (B) A game animal must not be received for use, sale, or service if it is a species of wildlife that is listed in 50 CFR 17 *Endangered and Threatened Wildlife and Plants*.<sup>P</sup>

# **3-202** Specifications for Receiving

# 3-202.1 Temperature

- (A) Except as specified in ¶ (B) of this section, refrigerated TCS food must be at a temperature of 41°F (5°C) or below when received. A food establishment must reject delivery of refrigerated TCS food, unless it is delivered at a temperature of 41°F (5°C) or below, <sup>P</sup>
- (B) If a temperature other than 41°F (5°C) for a TCS food is specified in law governing its distribution, such as laws governing milk and molluscan shellfish, the food must be received at or below the specified temperature.
- (C) Raw eggs must be received in refrigerated equipment that maintains an ambient air temperature of 45°F (7°C) or below.<sup>P</sup>
- (D) TCS food that is cooked to a temperature and for a time specified under §§ 3-401.1 -3-401.3 and received hot must be at a temperature of 135°F (57°C) or above.<sup>P</sup>
- (E) A food that is labeled frozen and shipped frozen by a food processing plant must be received frozen. <sup>Pf</sup>
- (F) Upon receipt, TCS food must be free of evidence of previous temperature abuse. <sup>Pf</sup>

# 3-202.2 Additives

Food must not contain unapproved food additives or additives that exceed amounts specified in 21 CFR 170180, inclusive, generally recognized as safe or prior-sanctioned substances that exceed amounts specified in 21 CFR 181-186, inclusive, substances that exceed amounts specified in 9 CFR Subpart C Section 424.21(b) *Food ingredients and sources of radiation*, or pesticide residues that exceed provisions specified in 40 CFR 180 *Tolerances and Exemptions for Pesticides Chemical Residues in Food*.<sup>P</sup>

# 3-202.3 Eggs

Eggs must be received clean and sound and must not exceed the restricted egg tolerances for U.S. Consumer Grade B as specified in current version of the USDA United States Standards, Grades, and Weight Classes for Shell Eggs.<sup>P</sup>

# 3-202.4 Eggs and Milk Products, Pasteurized

- (A) Egg products must be obtained pasteurized.<sup>P</sup>
- (B) Fluid and dry milk and milk products must:
  - (1) Be obtained pasteurized, <sup>P</sup> and
  - (2) Comply with Grade A Standards as specified in law.<sup>P</sup>
- (C) Frozen milk products, such as ice cream, must be obtained pasteurized as specified in 21 CFR 135 *Frozen Desserts*.<sup>P</sup>
- (D) Cheese must be obtained pasteurized unless alternative procedures to pasteurization are specified in the CFR, such as 21 CFR 133 *Cheeses and Related Cheese Products*.<sup>P</sup>

# 3-202.5 Package Integrity

Food packages must be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. <sup>Pf</sup>

# 3-202.6 Ice

Ice for use as a food or a cooling medium must be made from drinking water.<sup>P</sup>

# 3-202.7 Shucked Shellfish, Packaging and Identification

- (A) Raw shucked shellstock must be obtained in nonreturnable packages which bear a legible label that identifies the: <sup>Pf</sup>
  - (1) Name, address, and certification number of the shucker, packer or repacker of the molluscan shellfish; <sup>Pf</sup> and

- (2) The sell by or best if used by date for packages with a capacity of less than 1.89 L (one-half gallon) or the date shucked for packages with a capacity of 1.89 L (one-half gallon) or more. <sup>Pf</sup>
- (B) A package of raw shucked shellstock that does not bear a label, or which bears a label which does not contain all the information as specified under ¶ (A) of this section, must be subject to a hold order or seizure and destruction in accordance with 21 CFR Subpart D Section 1240.60 (d) *Specific Administrative Decisions Regarding Interstate Shipments, Molluscan shellfish.*

# 3-202.8 Shellstock Identification

- (A) Shellstock must be obtained in containers bearing legible source identification tags or labels that are affixed by the harvester or molluscan shellfish dealer that depurates, ships, or reships the shellstock, as specified in the National Shellfish Sanitation Program Guide for the Control of Molluscan Shellfish, and that list: <sup>Pf</sup>
  - (1) Except as specified under ¶ (C) of this section, on the harvester's tag or label, the following information in the following order: <sup>Pf</sup>
    - (a) The harvester's identification number, <sup>Pf</sup>
    - (b) The date of harvesting, <sup>Pf</sup>
    - (c) The most precise identification of the harvest location or aquaculture site and the abbreviation of the name of the state or country in which the shellfish are harvested, <sup>Pf</sup>
    - (d) The type and quantity of shellfish, <sup>Pf</sup> and
    - (e) The following statement in bold, capitalized type: "THIS TAG IS REQUIRED TO BE ATTACHED UNTIL CONTAINER IS EMPTY OR RETAGGED AND THEREAFTER KEPT ON FILE FOR 90 DAYS", <sup>Pf</sup> and
  - (2) Except as specified in ¶ (D) of this section, on each molluscan shellfish dealer's tag or label, the following information in the following order: <sup>Pf</sup>
    - (a) The dealer's name and address, and the certification number, <sup>Pf</sup>
    - (b) The original shipper's certification number including the abbreviation of the name of the state or country in which the shellfish are harvested, <sup>Pf</sup>
    - (c) The same information as specified for a harvester's tag under Subparagraphs (A)(1)(b)-(d) of this section, <sup>Pf</sup> and
    - (d) The following statement in bold, capitalized type: "THIS TAG IS REQUIRED TO BE ATTACHED UNTIL CONTAINER IS EMPTY OR RETAGGED AND THEREAFTER KEPT ON FILE FOR 90 DAYS". <sup>Pf</sup>
- (B) A container of shellstock that does not bear a tag or label, or which bears a tag or label which does not contain all the information as specified under ¶ (A) of this section, must not be used, sold, offered or displayed for sale, or served and must be subject to a hold order or seizure and destruction in accordance with 21 CFR Subpart D Section 1240.60 (d) *Specific Administrative Decisions Regarding Interstate Shipments, Molluscan shellfish*.

- (C) If a place is provided on the harvester's tag or label for a molluscan shellfish dealer's name, address, and certification number, the dealer's information must be listed first.
- (D) If the harvester's tag or label is designed to accommodate each molluscan shellfish dealer's identification as specified under Subparagraphs (A)(2)(a) and (b) of this section, individual dealer tags or labels need not be provided.

# 3-202.9 Shellstock, Condition

A food establishment may offer shellstock for sale or service only when the shellstock was received reasonably free of mud, dead shellstock, and shellstock with broken shells. Dead shellfish or shellstock with badly broken shells must be discarded.

# 3-202.10 Juice Treated

Pre-packaged juice must:

- (A) Be obtained from a processor with a HACCP system as specified in 21 CFR Part 120 Hazard Analysis and Critical Control (HACCP) Systems, <sup>Pf</sup> and
- (B) Be obtained pasteurized or otherwise treated to attain a 5-log reduction of the most resistant microorganism of public health significance as specified in 21 CFR Part 120.24 *Process Controls*.<sup>P</sup>

# 3-203 Original Containers and Records3-203.1 Molluscan Shellfish, Original Container

- (A) Except as specified in ¶¶ (B)—(D) of this section, molluscan shellfish must not be removed from the container in which they are received other than immediately before sale or preparation for service.
- (B) For display purposes, shellstock may be removed from the container in which they are received, displayed on drained ice, or held in a display container, and a quantity specified by a consumer may be removed from the display or display container and provided to the consumer only when:
  - (1) The source of the shellstock on display is identified as specified under § 3-202.8 and recorded as specified under § 3-203.2, and
  - (2) The shellstock are protected from contamination.
- (C) Shucked shellfish may be removed from the container in which they were received and held in a display container from which individual servings are dispensed upon a consumer's request only when:
  - (1) The labeling information for the shellfish on display as specified under § 3-202.7 is retained and correlated to the date when, or dates during which, the shellfish are sold or served, and
  - (2) The shellfish are protected from contamination.

- (D) Shucked shellfish may be removed from the container in which they were received and repacked in consumer self-service containers only when:
  - (1) The labeling information for the shellfish is on each consumer self-service container as specified under § 3-202.7 and  $\P\P$  3-602.1(A) and (B)(1)-(5),
  - (2) The labeling information as specified under § 3-202.7 is retained and correlated with the date when, or dates during which, the shellfish are sold or served,
  - (3) The labeling information and dates specified under Subparagraph (D)(2) of this section are maintained for 90 calendar days, and
  - (4) The shellfish are protected from contamination.

# 3-203.2 Shellstock, Maintaining Identification

- (A) Except as specified under Subparagraph (C)(2) of this section, shellstock tags or labels must remain attached to the container in which the shellstock are received until the container is empty. <sup>Pf</sup>
- (B) The date when the last shellstock from the container is sold or served must be recorded on the tag or label. <sup>Pf</sup>
- (C) The identity of the source of shellstock that are sold or served must be maintained by retaining tags or labels for 90 calendar days from the date that is recorded on the tag or label, as specified under ¶ (B) of this section, by: <sup>Pf</sup>
  - (1) Using an approved record keeping system that keeps the tags or labels in chronological order correlated to the date that is recorded on the tag or label, as specified under ¶ (B) of this section, <sup>Pf</sup> and
  - (2) If shellstock are removed from the tagged or labeled container:
    - (a) Preserving source identification by using a record keeping system as specified under Subparagraph (C)(1) of this section, <sup>Pf</sup> and
    - (b) Ensuring that shellstock from one tagged or labeled container are not commingled with shellstock from another container with different certification numbers; different harvest dates; or different growing areas as identified on the tag or label before being ordered by the consumer.<sup>Pf</sup>

3-307	Preventing Contamination from Miscellaneous Sources of Contamination	

# 3-301 Preventing Contamination by Employees

# 3-301.1 Preventing Contamination from Hands

- (A) Food handlers must wash their hands as specified under § 2-301.2.
- (B) Except when washing fruits and vegetables as specified under § 3-302.5 or as specified in ¶¶ (D) and (E), food handlers must not contact exposed, ready-to-eat food with their bare hands or arms and must use suitable utensils such as deli tissue, spatulas, tongs, single-use gloves, or dispensing equipment.<sup>P</sup>
- (C) Food handlers must minimize bare hand and arm contact with exposed food that is not in a ready-to-eat form. <sup>Pf</sup>
- (D) ¶ (B) does not apply to a food handler that contacts exposed, ready-to-eat food with bare hands at the time the ready-to-eat food is being added as an ingredient to a food that:
  - (1) Contains a raw animal food and is to be cooked in the food establishment to heat all parts of the food to the minimum temperatures specified in ¶¶ 3-401.1(A)-(B) or § 3-401.2, or
  - (2) Does not contain a raw animal food but is to be cooked in the food establishment to heat all parts of the food to a temperature of at least 145°F (63°C).
- (E) Food handlers not serving a highly susceptible population may contact exposed, ready-to-eat food with their bare hands only when:
  - (1) The permit holder obtains prior approval from the Health Authority,
  - (2) Written procedures are maintained in the food establishment and made available to the Health Authority upon request that include:
    - (a) Each bare hand contact procedure must include a listing of the specific ready-toeat foods that are touched by bare hands,
    - (b) Diagrams and other information showing that handwashing facilities, installed, located, equipped, and maintained as specified under §§ 5-203.1, 5-204.1, 5-205.1, 6-301.1, 6-301.2, and 6-301.3, are in an easily accessible location and in

close proximity to the workstation where the bare hand contact procedure is conducted,

- (3) A written employee health policy that details how the food establishment complies with §§ 2-201.1, 2-201.2, and 2-201.3 including:
  - (a) Documentation that food handlers acknowledge that they are informed to report information about their health and activities as they relate to gastrointestinal symptoms and diseases that are transmittable through food as specified under ¶ 2-201.1(A),
  - (b) Documentation that food handlers acknowledge their responsibilities as specified under ¶ 2-201.11(E) and (F), and
  - (c) Documentation that the PIC acknowledges the responsibilities as specified under ¶¶ 2-201.1(B), (C) and (D), and §§ 2-201.2 and 2-201.3,
- (4) Documentation that food handlers acknowledge that they have received training in:
  - (a) The risks of contacting the specific ready-to-eat foods with bare hands,
  - (b) Proper handwashing as specified under § 2-301.2,
  - (c) When to wash their hands as specified under § 2-301.3,
  - (d) Where to wash their hands as specified under § 2-301.4,
  - (e) Proper fingernail maintenance as specified under § 2-302,
  - (f) Prohibition of jewelry as specified under § 2-303, and
  - (g) Good hygienic practices as specified under §§2-401.1 and 2-401.2;
- (5) Documentation that hands are washed before food preparation and as necessary to prevent cross contamination by food handlers as specified under §§ 2-301.1, 2- 301.2, 2- 301.4, and 2-301.5 during all hours of operation when the specific ready-to-eat foods are prepared, or general task or specific process is being performed;
- (6) Documentation that food handlers contacting ready-to-eat food with bare hands use two or more of the following control measures to provide additional safeguards to hazards associated with bare hand contact:
  - (a) Double handwashing,
  - (b) Nail brushes,
  - (c) A hand antiseptic after handwashing as specified under § 2-301.5,
  - (d) Incentive programs such as paid sick leave that assist or encourage food handlers not to work when they are ill, or
  - (e) Other approved control measures; and
  - (f) Documentation that corrective action is taken when Subparagraphs (E)(1)-(6) of this section are not followed.

# 3-301.2 Preventing Contamination when Tasting

A food handler must not use a utensil more than once to taste food that is to be sold or served.<sup>P</sup>

# 3-302 Preventing Food and Ingredient Contamination

# 3-302.1 Packaged and Unpackaged Food—Separation, Packaging, and Segregation

- (A) Food must be protected from cross contamination by:
  - (1) Separating raw animal foods during storage, preparation, holding, and display from:
    - (a) Raw ready-to-eat food including other raw animal food such as fish for sushi or molluscan shellfish, or other raw ready-to-eat food such as fruits and vegetables, <sup>P</sup>
    - (b) Cooked ready-to-eat food, <sup>P</sup> and
    - (c) Fruits and vegetables before they are washed.<sup>P</sup>
    - (d) Except that frozen, commercially processed, and packaged raw animal food may be stored or displayed with or above frozen, commercially processed, and packaged, ready-to-eat food.
  - (2) Except when combined as ingredients, separating types of raw animal foods from each other such as beef, fish, lamb, pork, and poultry during storage, preparation, holding, and display by:
    - (a) Using separate equipment for each type, <sup>P</sup> or
    - (b) Arranging each type of food in equipment so that cross contamination of one type with another is prevented, <sup>P</sup> and
    - (c) Preparing each type of food at different times or in separate areas, <sup>P</sup>
  - (3) Cleaning equipment and utensils as specified under § 4-602.1 and sanitizing as specified under § 4-702,
  - (4) Except as specified under Subparagraph 3-501.5(B)(2) and in ¶ (B) of this section, storing food in packages, covered containers, or wrappings,
  - (5) Cleaning hermetically sealed containers of food of visible soil before opening,
  - (6) Protecting food containers that are received packaged together in a case or overwrap from cuts when the case or overwrap is opened,
  - (7) Storing damaged, spoiled, or recalled food being held in the food establishment as specified under § 6-404, and
  - (8) Separating fruits and vegetables, before they are washed as specified under § 3-302.5 from ready-to-eat food.
- (B) Subparagraph (A)(4) of this section does not apply to:
  - (1) Whole, uncut, raw fruits and vegetables and nuts in the shell, that require peeling or hulling before consumption,
  - (2) Sections or slabs of raw meat or bacon that are hung on clean, sanitized hooks or placed on clean, sanitized racks,

- (3) Whole, uncut, processed meats such as country hams, and smoked or cured sausages that are placed on clean, sanitized racks,
- (4) Food being cooled as specified under Subparagraph 3-501.5(B)(2), or
- (5) Shellstock.

# 3-302.2 Food Storage Containers, Identified with Common Name of Food

Except for containers holding food that can be readily and unmistakably recognized such as dry pasta, working containers holding food or food ingredients that are removed from their original packages for use in the food establishment, such as cooking oils, flour, herbs, potato flakes, salt, spices, and sugar must be identified with the common name of the food.

# 3-302.3 Pasteurized Eggs, Substitute for Raw Eggs for Certain Recipes

Pasteurized eggs or egg products must be substituted for raw eggs in the preparation of foods such as Caesar salad, hollandaise or Béarnaise sauce, mayonnaise, meringue, eggnog, ice cream, and egg-fortified beverages that are not:

- (A) Cooked as specified under Subparagraphs 3-401.1(A)(1) or (2), <sup>P</sup> or
- (B) Included in ¶ 3-401.1(D).<sup>P</sup>

# 3-302.4 Protection from Unapproved Additives

- (A) Food must be protected from contamination that may result from the addition of, as specified in § 3-202.2:
  - (1) Unsafe or unapproved food or color additives, <sup>P</sup> and
  - (2) Unsafe or unapproved levels of approved food and color additives.<sup>P</sup>
- (B) A food handler must not:
  - (1) Apply sulfiting agents to fresh fruits and vegetables intended for raw consumption or to a food considered to be a good source of vitamin B<sub>1</sub>, <sup>P</sup> or
  - (2) Except for grapes, serve or sell food specified under Subparagraph (B)(1) of this section that is treated with sulfiting agents before receipt by the food establishment.<sup>P</sup>

# 3-302.5 Washing Fruits and Vegetables

(A) Except as specified in ¶ (B) of this section and except for whole, raw fruits and vegetables that are intended for washing by the consumer before consumption, raw fruits and vegetables must be thoroughly washed in water to remove soil and other contaminants before being cut, combined with other ingredients, cooked, served, or offered for sale in ready-to-eat form.

- (B) Fruits and vegetables may be washed by using chemicals as specified under § 7-204.2.
- (C) Devices used for on-site generation of chemicals meeting the requirements specified in 21 CFR 173.315, *Chemicals used in washing or to assist in the peeling of fruits and vegetables*, for the washing of raw, whole fruits and vegetables must be used in accordance with the manufacturer's instructions.<sup>Pf</sup>

# 3-303 Preventing Contamination from Ice Used as a Coolant

# 3-303.1 Ice Used as Exterior Coolant, Prohibited as Ingredient

After use as a medium for cooling the exterior surfaces of food such as melons or fish, packaged foods such as canned beverages, or cooling coils and tubes of equipment, ice must not be used as food.<sup>P</sup>

# 3-303.2 Storage or Display of Food in Contact with Water or Ice

- (A) Packaged food must not be stored in direct contact with ice or water if the food is subject to the entry of water because of the nature of its packaging, wrapping, or container or its positioning in the ice water.
- (B) Except as specified in ¶¶ (C)—(E) of this section, unpackaged food must not be stored in direct contact with undrained ice.
- (C) Whole, raw fruits, herbs or vegetables; cut, raw vegetables such as celery or carrot sticks or cut potatoes; and tofu may be immersed in ice or water.
- (D) Raw poultry and raw fish that are received immersed in ice in shipping containers may remain in that condition while in storage awaiting preparation, display, service, or sale.
- (E) Raw fish may be immersed in ice for storage.

# 3-304 Preventing Contamination from Equipment, Utensils, and Linens3-304.1 Food Contact with Equipment and Utensils

Food must only contact surfaces of:

- (A) Equipment and utensils that are cleaned as specified under Part 4-6 of these regulations and sanitized as specified under Part 4-7 of these regulations, <sup>P</sup>
- (B) Single-service and single-use articles, <sup>P</sup> or
- (C) Linens, such as cloth napkins, as specified under § 3-304.3 that are laundered as specified under Part 4-8 of these regulations.<sup>P</sup>

# 3-304.2 In-Use Utensils, Between-Use Storage

During pauses in food preparation or dispensing, food preparation and dispensing utensils must be stored:

- (A) Except as specified under ¶ (B) of this section, in the food with their handles above the top of the food and the container,
- (B) In non- TCS food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon,
- (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under §§ 4-602.1 and 4-702.1,
- (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes,
- (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not a TCS food,
- (F) In a container of water if the water is maintained at a temperature of at least 135°F (57°C) and the container is cleaned at a frequency specified under Subparagraph 4- 602.1(D)(7), or
- (G) In a container of ice or water maintained at a temperature of 41°F (5°C) or lower, if the in-use utensils are only used for non-TCS foods and the container is cleaned at a frequency specified under Subparagraph 4-602.1(D)(6).

# 3-304.3 Linens and Napkins, Use Limitation

Linens, such as cloth napkins, must not be used in contact with food unless they are used to line a container for the service of foods and the linens and napkins are replaced each time the container is refilled for a new consumer.

#### 3-304.4 Wiping Cloths, Use Limitation.

- (A) Cloths in use for wiping food spills from tableware and carry-out containers that occur as food is being served must be:
  - (1) Maintained dry, and
  - (2) Used for no other purpose.
- (B) Cloths in use for wiping counters and other equipment surfaces must be:
  - Held between uses in a chemical sanitizer solution at a concentration specified under § 4-501.14, and
  - (2) Laundered daily as specified under ¶ 4-802(D).
- (C) Cloths in use for wiping surfaces in contact with raw animal foods must be kept separate from cloths used for other purposes.

- (D) Dry wiping cloths and the chemical sanitizing solutions specified in Subparagraph (B)(1) of this section in which wet wiping cloths are held between uses must be free of food debris and visible soil.
- (E) Containers of chemical sanitizing solutions specified in Subparagraph (B)(1) of this section in which wet wiping cloths are held between uses must be stored and used in a manner that prevents contamination of food, equipment, utensils, linens, single-service, or single-use articles.
- **(F)** Single-use disposable sanitizer wipes must be used in accordance with EPA-approved manufacturer's label use instructions.

# 3-304.5 Gloves, Use Limitation

- (A) If used, single-use gloves must be used for only one task such as working with ready-to-eat food or with raw animal food, used for no other purpose, and discarded when damaged or soiled, or when interruptions occur in the operation.<sup>P</sup>
- (B) Except as specified in ¶ (C) of this section, slash-resistant gloves that are used to protect the hands during operations requiring cutting must be used in direct contact only with food that is subsequently cooked as specified under Part 3-4 of these regulations such as frozen food or a primal cut of meat.
- (C) Slash-resistant gloves may be used with ready-to-eat food that will not be subsequently cooked if the slash-resistant gloves have a smooth, durable, and nonabsorbent outer surface; or if the slash-resistant gloves are covered with a smooth, durable, nonabsorbent glove, or a single-use glove.
- (D) Cloth gloves must not be used in direct contact with food unless the food is subsequently cooked as required under Part 3-4 of these regulations such as frozen food or a primal cut of meat.

# 3-304.6 Using Clean Tableware for Second Portions and Refills

- (A) Except for refilling a consumer's drinking cup or container without contact between the pouring utensil and the lip-contact area of the drinking cup or container, food handlers must not use tableware, including single-service articles, soiled by the consumer, to provide second portions or refills.
- (B) Except as specified in ¶ (C) of this section, self-service consumers must not be allowed to use soiled tableware, including single-service articles, to obtain additional food from the display and serving equipment.
- (C) Drinking cups and containers may be reused by self-service consumers if refilling is a contamination-free process as specified under ¶¶ 4-204.3(A), (B), and (D).

# 3-304.7 Refilling Returnables

- (A) Except as specified in ¶¶ (B)—(E) of this section, empty containers returned to a food establishment for cleaning and refilling with food must be cleaned and refilled in a regulated food establishment.<sup>P</sup>
- (B) A take-home food container returned to a food establishment may be refilled at a food establishment with food if the food container is:
  - (1) Designed and constructed for reuse and in accordance with the requirements specified under Parts 4-1 and 4-2 of these regulations;<sup>P</sup>
  - (2) One that was initially provided by the food establishment to the consumer, either empty or filled with food by the food establishment, for the purpose of being returned for reuse,
  - (3) Returned to the food establishment by the consumer after use,
  - (4) Subject to the following steps before being refilled with food:
    - (a) Cleaned as specified under Part 4-6 of these regulations,
    - (b) Sanitized as specified under Part 4-7 of these regulations, <sup>P</sup> and
    - (c) Visually inspected by a food handler to verify that the container, as returned, meets the requirements specified under Part 4-1 and 4-2 of these regulations.<sup>P</sup>
- (C) A take-home food container returned to a food establishment may be refilled at a food establishment with beverage if:
  - (1) The beverage is not a TCS food,
  - (2) The design of the container and of the rinsing equipment and the nature of the beverage, when considered together, allow effective cleaning at home or in the food establishment,
  - (3) Facilities for rinsing before refilling returned containers with fresh, hot water that is under pressure and not recirculated are provided as part of the dispensing system,
  - (4) The consumer-owned container returned to the food establishment for refilling is refilled for sale or service only to the same consumer, and
  - (5) The container is refilled by:
    - (a) A food handler of the food establishment, or
    - (b) The owner of the container if the beverage system includes a contaminationfree transfer process as specified under ¶¶ 4-204.3(A), (B), and (D) that cannot be bypassed by the container owner.
- (D) Consumer-owned, personal take-out beverage containers, such as thermally insulated bottles, non-spill coffee cups, and promotional beverage glasses, may be refilled by food handlers or the

consumer, if refilling is a contamination-free process as specified under  $\P\P$  4-204.3(A), (B), and (D).

(E) Consumer-owned containers that are not food-specific may be filled at a water vending machine or system.

# 3-305Preventing Contamination from the Premises3-305.1Food Storage

- (A) Except as specified in ¶¶ (B) and (C) of this section, food must be protected from contamination by storing the food:
  - (1) In a clean, dry location where it is not exposed to dust or other contamination,
  - (2) Where it is not exposed to splash or is protected from splash using a physical barrier or distance provided that,
    - (a) If a splash guard is used as a physical barrier, it must be tall enough to prevent splash but no less than 12 inches, and
    - (b) If distance is used as a means of protection from splash, the source of potential contamination must be a horizontal distance of no less than 18 inches from the food handling or storage area, and
  - (3) At least six inches (15 cm) above the floor.
- (B) Food in packages and working containers may be stored less than six inches (15 cm) above the floor on case lot handling equipment as specified under § 4-204.23.
- (C) Pressurized beverage containers, cased food in waterproof containers such as bottles or cans, and milk containers in plastic crates may be stored on a floor that is clean and not exposed to floor moisture.

# 3-305.2 Food Storage, Prohibited Areas

Food must not be stored:

- (A) In locker rooms,
- (B) In restrooms,
- (C) In dressing rooms,
- (D) In garbage rooms,
- (E) In mechanical rooms,
- (F) Under sewer lines that are not shielded to intercept potential drips,

- (G) Under leaking water lines, including leaking automatic fire sprinkler heads, or under lines on which water has condensed,
- (H) Under open stairwells, or
- (I) Under other sources of contamination.

# 3-305.3 Vended TCS Food, Original Container

TCS food dispensed through a vending machine must be in the package in which it was placed at the food establishment or food processing plant at which it was prepared.

# 3-305.4 Food Preparation

During preparation, unpackaged food must be protected from environmental sources of contamination.

# 3-306 Preventing Contamination by Consumers

# 3-306.1 Food Display

Except for nuts in the shell and whole, raw fruits and vegetables that are intended for hulling, peeling, or washing by the consumer before consumption, food on display must be protected from contamination by the use of:

- (A) Packaging,
- (B) Food shields that meet the NSF/ANSI 2 standard,
- (C) Counters with a horizontal setback of no less than 24 inches,
- (D) Enclosed display cases,
- (E) Scupper drains where open ice bins are installed,
- (F) Drink rails at bar tops used for dining and open food is stored below, or
- (G) Other effective means. <sup>P</sup>

# 3-306.2 Condiments, Protection

- (A) Condiments must be protected from contamination by being kept in dispensers that are designed to provide protection, protected food displays provided with the proper utensils, original containers designed for dispensing, or individual packages or portions.
- (B) Condiments at a vending machine location must be in individual packages or provided in dispensers that are filled at an approved location, such as the food establishment that provides food to the vending machine location, a food processing plant, or a properly equipped facility that is located on the site of the vending machine location.

# **3-306.3** Consumer Self-Service Operations.

- (A) Raw, unpackaged animal food, such as beef, lamb, pork, poultry, and fish must not be offered for consumer self-service. <sup>P</sup> This paragraph does not apply to:
  - (1) Consumer self-service of ready-to-eat foods at buffets or salad bars that serve foods such as sushi or raw shellfish,
  - (2) Ready-to-cook individual portions for immediate cooking and consumption on the premises such as consumer-cooked meats or consumer-selected ingredients for Mongolian barbecue, or
  - (3) Raw, frozen, shell-on shrimp, or lobster.
- (B) Consumer self-service operations for ready-to-eat foods must be provided with suitable utensils or effective dispensing methods that protect the food from contamination. <sup>Pf</sup>
- (C) Consumer self-service operations, such as buffets and salad bars, must be monitored by food handlers trained in safe operating procedures. <sup>Pf</sup>
- (D) A sign must be conspicuously posted to notify consumers to use a clean plate or container each time they serve themselves. The sign must also state that no eating is allowed while self-serving food and that consumers must only use the utensils provided to handle the food.

# 3-306.4 Returned Food and Re-Service of Food

- (A) Except as specified in ¶ (B) of this section, after being served or sold and in the possession of a consumer, food that is unused or returned by the consumer must not be used, sold, offered or displayed for sale, or served.<sup>P</sup>
- (B) Except as specified under ¶ 3-801(G), a container of food that is not TCS food may be re-served from one consumer to another if:
  - (1) The food is dispensed so that it is protected from contamination and the container is closed between uses, such as a narrow-neck bottle containing catsup, steak sauce, or wine, or
  - (2) The food, such as crackers, salt, or pepper, is in an unopened original package and is maintained in sound condition.

# 3-307 Preventing Contamination from Miscellaneous Sources of Contamination

Food must be protected from contamination that may result from a factor or source not specified under Subparts 3-301- 3-306.

# 3-4 Destruction of Organisms of Public Health Concerns

Subparts	
3-401	Cooking
3-402	Freezing
3-403	Reheating for Hot Holding
3-404	Treating Juice

# 3-401Cooking3-401.1Raw Animal Foods

- (A) Except as specified under ¶ (B) and in ¶¶ (C) and (D) of this section, raw animal foods such as eggs, fish, meat, poultry, and foods containing these raw animal foods, must be cooked to heat all parts of the food to a temperature and for a time that complies with one of the following methods based on the food that is being cooked:
  - (1) 145°F (63°C) or above for 15 seconds for:  $^{P}$ 
    - (a) Raw eggs that are broken and prepared in response to a consumer's order and for immediate service, <sup>P</sup> and
    - (b) Except as specified under Subparagraphs (A)(2) and (A)(3) and ¶ (B), and in ¶ (C) of this section, fish and intact meat including game animals commercially raised for food as specified under Subparagraph 3-201.7(A)(2), <sup>P</sup>
  - (2) 155°F (68°C) for 17 seconds or the temperature specified in the following chart that corresponds to the holding time for ratites, mechanically tenderized, and injected meats; the following if they are comminuted: fish, meat, game animals commercially raised for food as specified under Subparagraph 3-201.7(A)(1), and game animals under an inspection program as specified under Subparagraph 3-201.7(A)(2); and raw eggs that are not prepared as specified under Subparagraph (A)(1)(a) of this section: <sup>P</sup>

Minimum Temperature °F (°C)	Minimum Time
145 (63)	3 minutes
150 (66)	1 minute
158 (70)	< 1 second (instantaneous)

or,

- (3) 165°F (75°C) or above for <1 second (instantaneous) for poultry, baluts, stuffed fish, stuffed meat, stuffed pasta, stuffed poultry, stuffed ratites, or stuffing containing fish, meat, poultry, or ratites.<sup>P</sup>
- (B) Whole meat roasts including beef, corned beef, lamb, pork, and cured pork roasts such as ham must be cooked:

(1) As specified in the following chart, to heat all parts of the food to a temperature and for the holding time that corresponds to that temperature: <sup>P</sup>

Temperature °F (°C)	<sup>1</sup> Time in Minutes	Temperature °F (°C)	<sup>1</sup> Time in Seconds
130 (54.4)	112	147 (63.9)	134
131 (55.0)	89	149 (65.0)	85
133 (56.1)	56	151 (66.1)	54
135 (57.2)	36	153 (67.2)	34
136 (57.8)	28	155 (68.3)	22
138 (58.9)	18	157 (69.4)	14
140 (60.0)	12	158 (70.0)	0
142 (61.1)	8		
144 (62.2)	5		
145 (62.8)	4		

<sup>1</sup>Holding time may include post oven heat rise.

, and

(2) If cooked in an oven, use an oven that is preheated to the temperature specified for the roast's weight in the following chart and is held at that temperature: <sup>Pf</sup>

Oven Type	Less than 10 lbs (4.5 kg)	10 lbs (4.5 kg) or More		
Still Dry	350°F (177°C) or more	250°F (121°C) or more		
Convection	325°F (163°C) or more	250°F (121°C) or more		
High Humidity <sup>1</sup>	250°F (121°C) or less	250°F (121°C) or less		

#### **Oven Temperature Based on Roast Weight**

<sup>1</sup> Relative humidity greater than 90% for at least 1 hour as measured in the cooking chamber or exit of the oven; or in a moisture-impermeable bag that provides 100% humidity.

- (C) A raw or undercooked whole-muscle, intact beef steak may be sold, offered or displayed for sale, or served in a ready-to-eat form if:
  - (1) The food establishment serves a population that is not a highly susceptible population,
  - (2) The steak is labeled to indicate that it meets the definition of whole-muscle, intact beef as specified under ¶ 3-201.1(E), and
  - (3) The steak is cooked on both the top and bottom to a surface temperature of 145°F (63°C) or above and a cooked color change is achieved on all external surfaces.
- (D) A raw animal food such as raw eggs, raw fish, raw-marinated fish, raw molluscan shellfish, or steak tartare; or a partially-cooked food such as lightly-cooked fish, soft-cooked eggs, or rare

meat other than whole-muscle, intact beef steaks as specified in  $\P$  (C) of this section, may be sold or served upon consumer request or selection in a ready-to-eat form only when:

- (1) As specified under ¶¶ 3-801(C)(1) and (2), the food establishment serves a population that is not a highly susceptible population,
- (2) The food, if offered for sale or service by consumer selection from a children's menu, does not contain comminuted meat <sup>Pf</sup>
- (3) The consumer is informed as specified under § 3-603 that to ensure its safety, the food should be cooked as specified under  $\P$  (A) or (B) of this section, and
- (4) The Health Authority grants a waiver from ¶ (A) or (B) of this section as specified in § 8-103.1 based on a HACCP plan that:
  - (a) Is submitted by the permit holder and approved as specified under § 8-103.2,
  - (b) Documents scientific data or other information showing that a lesser time and temperature regimen results in a safe food, and
  - (c) Verifies that equipment and procedures for food preparation and training of food handlers at the food establishment meet the conditions of the waiver.

#### 3-401.2 Microwave Cooking

Raw animal foods cooked in a microwave oven must be:

- (A) Rotated or stirred throughout or midway during cooking to compensate for uneven distribution of heat,
- (B) Covered to retain surface moisture,
- (C) Heated to a temperature of at least  $165 \degree F (74 \degree C)$  in all parts of the food, <sup>P</sup> and
- (D) Allowed to stand covered for two minutes after cooking to obtain temperature equilibrium.

# 3-401.3 Plant Food Cooking for Hot Holding

Plant foods that are cooked for hot holding must be cooked to a temperature of 135°F (57°C). Pf

# 3-401.4 Non-Continuous Cooking of Raw Animal Foods

Raw animal foods that are cooked using a non-continuous cooking process must be:

- (A) Subject to an initial heating process that is no longer than 60 minutes in duration,<sup>P</sup>
- (B) Immediately after initial heating, cooled according to the time and temperature parameters specified for cooked TCS food under ¶ 3-501.4(A), <sup>P</sup>

- (C) After cooling, held frozen or cold, as specified for TCS food under  $\P$  3-501.6(A)(2), <sup>P</sup>
- (D) Prior to sale or service, cooked using a process that heats all parts of the food to a temperature and for a time as specified under ¶¶ 3-401.1 (A)-(C), <sup>P</sup>
- (E) Cooled according to the time and temperature parameters specified for cooked TCS food under ¶ 3-501.4(A) if not either hot held as specified under ¶ 3-501.6(A), served immediately, or held using time as a public health control as specified under § 3-501.9 after complete cooking<sup>P</sup>, and
- (F) Prepared and stored according to written procedures that:
  - (1) Are approved, <sup>Pf</sup>
  - (2) Are maintained in the food establishment and available to the Health Authority upon request, <sup>Pf</sup>
  - (3) Describe how the requirements specified under ¶ (A)-(E) of this section are monitored and documented by the permit holder and the corrective action to be taken by the food establishment if the requirements are not met, <sup>Pf</sup>
  - (4) Describe how the foods, after initial heating, but prior to complete cooking, are to be marked or otherwise identified as foods that must be cooked as specified under ¶ (D) of this section prior to being sold, offered or displayed for sale, or service, <sup>Pf</sup> and
  - (5) Describe how the foods, after initial heating but prior to cooking as specified under ¶ (D) of this section, are to be separated from ready-to-eat foods as specified under ¶ 3-302.1 (A). Pf

# 3-402 Freezing

# 3-402.1 Parasite Destruction

- (A) Except as specified in ¶ (B) of this section, before service or sale in ready-to-eat form, raw, rawmarinated, partially cooked, or marinated-partially cooked fish must be:
  - (1) Frozen and stored at a temperature of -4°F (-20°C) or below for a minimum of 168 hours (7 days) in a freezer, <sup>P</sup>
  - (2) Frozen at -31°F (-35°C) or below until solid and stored at -31°F (-35°C) or below for a minimum of 15 hours, <sup>P</sup> or
  - (3) Frozen at -31°F (-35°C) or below until solid and stored at -4°F (-20°C) or below for a minimum of 24 hours.<sup>P</sup>
- (B) Paragraph (A) of this section does not apply to:
  - (1) Molluscan shellstock,

- (2) A scallop product consisting only of the shucked adductor muscle,
- (3) Tuna of the species *Thunnus alalunga, Thunnus albacares* (Yellowfin tuna), *Thunnus atlanticus, Thunnus maccoyii* (Bluefin tuna, Southern), *Thunnus obesus* (Bigeye tuna), *or Thunnus thynnus* (Bluefin tuna, Northern), or
- (4) Aquacultured fish, such as salmon, that:
  - (a) If raised in open water, are raised in net-pens, or
  - (b) Are raised in land-based operations such as ponds or tanks, and
  - (c) Are fed formulated feed, such as pellets, that contains no live parasites infective to the aquacultured fish.
- (5) Fish eggs that have been removed from the skein and rinsed.

# 3-402.2 Records, Creation and Retention

- (A) Except as specified in ¶ 3-402.1(B) and ¶ (B) of this section, if raw, raw-marinated, partially cooked, or marinated-partially cooked fish are served or sold in ready-to-eat form, the PIC must record the freezing temperature and time to which the fish are subjected and must retain the records of the food establishment for 90 calendar days beyond the time of service or sale of the fish. <sup>Pf</sup>
- (B) If the fish are frozen by a supplier, a written statement from the supplier stipulating that the fish supplied are frozen to a temperature and for a time specified under § 3-402.1 may substitute for the records specified under ¶ (A) of this section.
- (C) If raw, raw-marinated, partially cooked, or marinated-partially cooked fish are served or sold in ready-to-eat form, and the fish were raised and fed as specified in Subparagraph 3-402.1(B)(4), a written agreement or statement from the supplier or aquaculturist stipulating that the fish were raised and fed as specified in Subparagraph 3-402.1(B)(4) must be obtained by the PIC and retained at the food establishment for 90 calendar days beyond the time of service or sale of the fish.<sup>Pf</sup>

# 3-402.3 Preparation for Immediate Service

Cooked and refrigerated food that is prepared for immediate service in response to an individual consumer order, such as a roast beef sandwich au jus, may be served at any temperature.

# 3-403 Reheating for Hot Holding

- (A) Except as specified under ¶¶ (B) and (C) and in ¶ (E) of this section, TCS food that is cooked, cooled, and reheated for hot holding must be heated so that all parts of the food reach a temperature of at least 165°F (74°C) for 15 seconds.<sup>P</sup>
- (B) Except as specified under ¶ (C) of this section, TCS food reheated in a microwave oven for hot holding must be heated so that all parts of the food reach a temperature of at least 165 °F (74 °C)

and the food is rotated or stirred, covered, and allowed to stand covered for two minutes after reheating.<sup>P</sup>

- (C) Ready-to-eat TCS food that has been commercially processed and packaged in a food processing plant that is inspected by the regulatory authority that has jurisdiction over the plant, must be heated to a temperature of at least 135°F (57°C) when being reheated for hot holding.<sup>P</sup>
- (D) Reheating for hot holding as specified under ¶¶ (A)-(C) of this section must be done rapidly and the time the food is between 41°F (5°C) and the temperatures specified under ¶¶ (A)-(C) of this section must not exceed two hours.<sup>P</sup>
- (E) Remaining unsliced portions of meat roasts that are cooked as specified under ¶ 3- 401.1(B) may be reheated for hot holding using the oven parameters and minimum time and temperature conditions specified under ¶ 3-401.1(B).

# 3-404 Treating Juice

Juice packaged in a food establishment must be:

- (A) Treated under a HACCP plan as specified in ¶¶ 8-201.4(B)-(E) to attain a 5-log reduction of the most resistant microorganism of public health significance; <sup>P</sup> or
- (B) If not treated to yield a 5-log reduction of the most resistant microorganism of public health significance, labeled as specified under § 3-602.1, and as specified in 21 CFR 101.17(g) Food labeling, warning, notice, and safe handling statements. Juices that have not been specifically processed to prevent, reduce, or eliminate the presence of pathogens with the following, "WARNING: This product has not been pasteurized and, therefore, may contain harmful bacteria that can cause serious illness in children, the elderly, and persons with weakened immune systems.": <sup>Pf</sup>
  - (1) Pf and
  - (2) <sup>Pf</sup>

3-5	Limitation of Growth of Organisms of Public Health Concern	
Subparts		
3-501	Temperature and Time Control	
3-502	Specialized Processing Methods	

# 3-501Temperature and Time Control3-501.1Frozen Food

Stored frozen foods must be maintained frozen.

# 3-501.2 TCS Food, Slacking

Frozen TCS food that is slacked to moderate the temperature must be held:

- (A) Under refrigeration that maintains the food temperature at 41°F (5°C) or below, or
- (B) At any temperature if the food remains frozen.

#### 3-501.3 Thawing

Except as specified in  $\P$  (D) of this section, TCS food must be thawed:

- (A) Under refrigeration that maintains the food temperature at 41°F (5°C) or below, or
- (B) Completely submerged under running water:
  - (1) At a water temperature of 70°F (21°C) or below,
  - (2) With sufficient water velocity to agitate and float off loose particles in an overflow, and
  - (3) For a period of time that does not allow thawed portions of ready-to-eat food to rise above 41°F (5°C), or
  - (4) For a period of time that does not allow thawed portions of a raw animal food requiring cooking as specified under ¶ 3-401.1(A) or (B) to be above 41°F (5°C), for more than four hours including:
    - (a) The time the food is exposed to the running water and the time needed for preparation for cooking, or
    - (b) The time it takes under refrigeration to lower the food temperature to 41 °F (5 °C),
- (C) As part of a cooking process if the food that is frozen is:
  - (1) Cooked as specified under ¶¶ 3-401.1(A) or (B) or § 3-401.2, or
  - (2) Thawed in a microwave oven and immediately transferred to conventional cooking equipment; or
- (D) Using any procedure if a portion of frozen ready-to-eat food is thawed and prepared for immediate service in response to an individual consumer's order.

#### 3-501.3.1 Thawing Reduced Oxygen Packaged Fish

Reduced oxygen packaged fish that bears a label indicating that it is to be kept frozen until time of use must be removed from the reduced oxygen environment:

(A) Prior to its thawing under refrigeration as specified in ¶ (A) of section 3-501.3, or

(B) Prior to, or immediately upon completion of, its thawing using procedures specified in ¶ (B) of section 3-501.3.

#### 3-501.4 Cooling

- (A) Cooked TCS food must be cooled:
  - (1) Within two hours from  $135^{\circ}F$  (57°C) to 70°F (21°C), <sup>P</sup> and
  - (2) Within a total of six hours from 135°F (57°C) to 41°F (5°C) or below.<sup>P</sup>
- (B) TCS food must be cooled within four hours to 41°F (5°C) or below if prepared from ingredients at ambient temperature, such as reconstituted foods and canned tuna.<sup>P</sup>
- (C) Except as specified under ¶ (D) of this section, a TCS food received in compliance with laws allowing a temperature above 41°F (5°C) during shipment from the supplier as specified in ¶ 3-202.1(B), must be cooled within four hours to 41°F (5°C) or below.<sup>P</sup>
- (D) Raw eggs must be received as specified under ¶ 3-202.1(C) and immediately placed in refrigerated equipment that maintains an ambient air temperature of 45°F (7°C) or below.<sup>P</sup>

#### 3-501.5 Cooling Methods

- (A) Cooling must be accomplished in accordance with the time and temperature criteria specified under § 3-501.4 by using one or more of the following methods based on the type of food being cooled:
  - (1) Placing the food in shallow pans, <sup>Pf</sup>
  - (2) Separating the food into smaller or thinner portions, <sup>Pf</sup>
  - (3) Using rapid cooling equipment, <sup>Pf</sup>
  - (4) Stirring the food in a container placed in an ice water bath, <sup>Pf</sup>
  - (5) Using containers that facilitate heat transfer, <sup>Pf</sup>
  - (6) Adding ice as an ingredient, <sup>Pf</sup> or
  - (7) Other effective methods. <sup>Pf</sup>
- (B) When placed in cooling or cold-holding equipment, food containers in which food is being cooled must be:
  - (1) Arranged in the equipment to provide maximum heat transfer through the container walls, and

(2) Loosely covered or uncovered if protected from overhead contamination as specified under Subparagraph 3-305.1(A)(2), during the cooling period to facilitate heat transfer from the surface of the food.

#### 3-501.6 TCS Food, Hot and Cold Holding

- (A) Except during active preparation, cooking, or cooling, or when time is used as the public health control as specified under § 3-501.9, and except as specified under ¶ (B) and in ¶ (C) of this section, TCS food must be maintained:
  - (1) At 135°F (57°C) or above, except roasts cooked to a temperature and for a time specified in ¶ 3-401.1(B) or reheated as specified in ¶ 3-403.1(E) may be held at a temperature of 130°F (54°C)<sup>P</sup> or above, or
  - (2) At 41°F (5°C) or below. <sup>P</sup>
- (B) Raw shell eggs must be stored in refrigerated equipment that maintains an ambient air temperature of 45°F (7°C) or below.<sup>P</sup>
- (C) TCS food in a homogenous liquid form may be maintained outside of the temperature control requirements, as specified under ¶ (A) of this section, while contained within specially designed equipment that complies with the design and construction requirements specified under ¶ 4-204.3(E).

#### 3-501.7 Ready-to-Eat, TCS Food, Date Marking

- (A) Except when packaging food using a reduced oxygen packaging method as specified under § 3-502.2, and except as specified in ¶¶ (E) and (F) of this section, refrigerated, ready-to-eat, TCS food prepared and held in a food establishment for more than 24 hours must be clearly marked to indicate the date or day by which the food must be consumed on the premises, sold, or discarded when held at a temperature of 41°F (5°C) or below for a maximum of seven calendar days. The day of preparation must be counted as day one.<sup>Pf</sup>
- (B) Except as specified in ¶¶ (E)—(G) of this section, refrigerated, ready-to-eat TCS food prepared and packaged by a food processing plant must be clearly marked, at the time the original container is opened in a food establishment and if the food is held for more than 24 hours, to indicate the date or day by which the food must be consumed on the premises, sold, or discarded, based on the temperature and time combinations specified in ¶ (A) of this section and: Pf
  - (1) The day the original container is opened in the food establishment must be counted as day one, <sup>Pf</sup> and
  - (2) The day or date marked by the food establishment must not exceed a manufacturer's use-by date if the manufacturer determined the use-by date based on food safety. <sup>Pf</sup>

- (C) A refrigerated, ready-to-eat TCS food ingredient or a portion of a refrigerated, ready-to-eat, TCS food that is subsequently combined with additional ingredients or portions of food must retain the date marking of the earliest-prepared or first- prepared ingredient.<sup>Pf</sup>
- (D) A date marking system that meets the criteria stated in ¶¶ (A) and (B) of this section may include:
  - (1) Using an approved method for refrigerated, ready-to-eat TCS food that is frequently rewrapped, such as lunchmeat or a roast, or for which date marking is impractical, such as soft serve mix or milk in a dispensing machine,
  - (2) Marking the date or day of preparation, in combination with a procedure to discard the food on or before the last date or day by which the food must be consumed on the premises, sold, or discarded as specified under ¶ (A) of this section,
  - (3) Marking the date or day the original container is opened in a food establishment, in combination with a procedure to discard the food on or before the last date or day by which the food must be consumed on the premises, sold, or discarded as specified under ¶ (B) of this section, or
  - (4) Using calendar dates, days of the week, color-coded marks, or other effective marking methods, provided that the marking system is disclosed to the Health Authority upon request.
- (E) ¶¶ (A) and (B) of this section do not apply to individual meal portions served or re-packaged for sale from a bulk container upon a consumer's request.
- (F) ¶¶ (A) and (B) of this section do not apply to shellstock.
- (G) ¶ (B) of this section does not apply to the following foods prepared and packaged by a food processing plant inspected by a Regulatory Authority:
  - (1) Deli salads, such as ham salad, seafood salad, chicken salad, egg salad, pasta salad, potato salad, and macaroni salad, manufactured in accordance with 21 CFR 110 *Current Good Manufacturing Practice in Manufacturing, Packing, or Holding Human Food*,
  - (2) Hard cheeses containing not more than 39% moisture as defined in 21 CFR 133 *Cheeses* and *Related Cheese Products*, such as cheddar, gruyere, parmesan and reggiano, and romano,
  - (3) Semi-soft cheeses containing more than 39% moisture, but not more than 50% moisture, as defined in 21 CFR 133 *Cheeses and Related Cheese Products*, such as blue, edam, gorgonzola, gouda, and monterey jack,
  - (4) Cultured dairy products as defined in 21 CFR 131 *Milk and Cream*, such as yogurt, sour cream, and buttermilk,

- (5) Preserved fish products, such as pickled herring and dried or salted cod, and other acidified fish products defined in 21 CFR 114 *Acidified Foods*,
- (6) Shelf stable, dry fermented sausages, such as pepperoni and Genoa, and
- (7) Shelf stable salt-cured products such as prosciutto and Parma (ham).

#### 3-501.8 Ready-to-Eat, TCS Food, Disposition

- (A) A food specified in ¶ 3-501.7(A) or (B) must be discarded if it:
  - (1) Exceeds the temperature and time combination specified in ¶ 3-501.7(A), except time that the product is frozen, <sup>P</sup>
  - (2) Is in a container or package that does not bear a date or day, <sup>P</sup> or
  - (3) Is appropriately marked with a date or day that exceeds a temperature and time combination as specified in ¶ 3-501.7(A).<sup>P</sup>
- (B) Refrigerated, ready-to-eat, TCS food prepared in a food establishment and dispensed through a vending machine with an automatic shutoff control must be discarded if it exceeds a temperature and time combination as specified in ¶ 3-501.7(A).<sup>P</sup>

#### 3-501.9 Time as a Public Health Control

- (A) Except as specified under ¶ (D) of this section, if time without temperature control is used as the public health control for a working supply of TCS food before cooking, or for ready-to-eat TCS food that is being sold, offered or displayed for sale, or service :
  - (1) Written procedures must be prepared in advance, maintained in the food establishment, and made available to the Health Authority upon request, and
  - (2) Written procedures must specify: <sup>Pf</sup>
    - (a) Methods of compliance with Subparagraphs (B)(1)-(3) or (C)(1)-(5) of this section, <sup>Pf</sup> and
    - (b) Methods of compliance with § 3-501.4 for food that is prepared, cooked, and refrigerated before time is used as a public health control. <sup>Pf</sup>
- (B) If time without temperature control is used as the public health control up to a maximum of four hours:
  - (1) Except as specified in ¶(B)(2), the food must have an initial temperature of 41°F (5°C) or less when removed from cold holding temperature control, or 135°F (57°C) or greater when removed from hot holding temperature control, <sup>P</sup>
  - (2) The food may have an initial temperature of 21°C (70°F) or below if;

- (a) It is a ready-to-eat fruit or vegetable that upon cutting is rendered a TCS food as defined in ¶1-201.10(B), or
- (b) It is a ready-to-eat hermetically sealed food that upon opening is rendered a TCS food a defined in ¶1-201.10(B),
- (c) The food temperature does not exceed 21°C (70°F) within a maximum time period of 4 hours from the time it was rendered a TCS food; and
- (d) The food is marked or otherwise identified to indicate the time that is 4 hours past the point in time when the food is rendered a TCS food as specified in sub¶¶'s (B)(2)(a) and (b) of this section.
- (3) The food must be marked or otherwise identified to indicate the time that is four (4) hours past the point in time when the food is removed from temperature control; <sup>Pf</sup>
- (4) The food must be cooked and served, served at any temperature if ready-to-eat, or discarded, within four (4) hours from the point in time when the food is removed from temperature control;<sup>P</sup> and
- (5) The food in unmarked containers or packages or marked to exceed a four (4) hour limit, must be discarded.<sup>P</sup>
- (C) If time without temperature control is used as the public health control up to a maximum of six hours:
  - (1) The food must have an initial temperature of 41°F (5°C) or below when removed from temperature control and the food temperature must not exceed 70°F (21°C) within a maximum time period of six hours, <sup>P</sup>
  - (2) The food must be monitored to ensure the warmest portion of the food does not exceed 70°F (21°C) during the six hour period, unless an ambient air temperature is maintained that ensures the food does not exceed 70°F (21°C) during the six hour holding period, <sup>Pf</sup>
  - (3) The food must be marked or otherwise identified to indicate: Pf
    - (a) The time when the food is removed from 41°F (5°C) or below cold holding temperature control, <sup>Pf</sup> and
    - (b) The time that is six hours past the point in time when the food is removed from cold holding temperature control, <sup>Pf</sup>
  - (4) The food must be:
    - (a) Discarded if the temperature of the food exceeds 70°F (21°C), <sup>P</sup> or
    - (b) Cooked and served, served at any temperature if ready-to-eat, or discarded within a maximum of six hours from the point in time when the food is removed from 41°F (5°C) or below cold holding temperature control, <sup>P</sup> and

- (5) The food in unmarked containers or packages, or marked with a time that exceeds the six hour limit, must be discarded.<sup>P</sup>
- (D) A food establishment that serves a highly susceptible population must not use time as specified under ¶¶ (A), (B) or (C) of this section as the public health control for raw eggs.

#### 3-502 Specialized Processing Methods

#### 3-502.1 Waiver Requirement

A food establishment must obtain a waiver from the Health Authority as specified in § 8-103.1 and under § 8-103.2 before: <sup>Pf</sup>

- (A) Smoking food as a method of food preservation rather than as a method of flavor enhancement, <sup>Pf</sup>
- (B) Curing food, Pf
- (C) Using food additives or adding components such as vinegar: Pf
  - (1) As a method of food preservation rather than as a method of flavor enhancement, <sup>Pf</sup> or
  - (2) To render a food so that it is not TCS food, <sup>Pf</sup>
- (D) Packaging TCS food using a reduced oxygen packaging method, except a waiver is not required when the growth of and toxin formation by *Clostridium botulinum* and the growth of *Listeria monocytogenes* are controlled as specified under § 3-502.2; <sup>Pf</sup>
- (E) Operating a molluscan shellstock life-support system display tank used to store or display shellstock that are offered for human consumption, <sup>Pf</sup>
- (F) Custom processing animals that are for personal use as food and are not sold, offered or displayed for sale, or service in a food establishment, <sup>Pf</sup>
- (G) Preparing food by another method that is determined by the Health Authority to require a waiver, <sup>Pf</sup> or
- (H) Sprouting of seeds or beans. <sup>Pf</sup>

#### 3-502.2 Reduced Oxygen Packaging Without a Waiver, Criteria

- (A) Except for a food establishment that obtains a waiver as specified under § 3-502.1, a food establishment that packages TCS food using a reduced oxygen packaging method must control the growth and toxin formation of *Clostridium botulinum* and the growth of *Listeria* monocytogenes.<sup>P</sup>
- (B) Except as specified under ¶ (F) of this section, a food establishment that packages TCS food using a reduced oxygen packaging method must implement a HACCP plan that contains the information specified under ¶¶ 8-201.4 (B) and (D) and that: <sup>Pf</sup>

- (1) Identifies the food to be packaged, <sup>Pf</sup>
- (2) Except as specified under  $\P\P$  (C)—(E) of this section, requires that the packaged food must be maintained at 41°F (5°C) or below and meet at least one of the following criteria: Pf
  - (a) Has an  $a_w$  of 0.91 or less, <sup>Pf</sup>
  - (b) Has a pH of 4.6 or less, <sup>Pf</sup>
  - (c) Is a meat or poultry product cured at a food processing plant regulated by the USDA using substances specified in 9 CFR 424.21, *Use of Food Ingredients and Sources of Radiation*, and is received in an intact package, <sup>Pf</sup> or
  - (d) Is a food with a high level of competing organisms such as raw meat, raw poultry, or raw vegetables, <sup>Pf</sup>
- (3) Describes how the package must be prominently and conspicuously labeled on the principal display panel in bold type on a contrasting background, with instructions to: <sup>Pf</sup>
  - (a) Maintain the food at 41°F (5°C) or below, <sup>Pf</sup> and
  - (b) Discard the food if within 30 calendar days of its packaging if it is not served for on-premises consumption, or consumed if served or sold for off-premises consumption, <sup>Pf</sup>
- (4) Limits the refrigerated shelf life to no more than 30 calendar days from packaging to consumption, except the time the product is maintained frozen, or the original manufacturer's sell by or use by date, whichever occurs first, <sup>P</sup>
- (5) Includes operational procedures that:
  - (a) Prohibit contacting ready-to-eat food with bare hands as specified under ¶ 3-301.1(B), <sup>Pf</sup>
  - (b) Identify a designated work area and the method by which: Pf
    - (i) Physical barriers or methods of separation of raw foods and ready-toeat foods minimize cross contamination, <sup>Pf</sup> and
    - Access to the processing equipment is limited to responsible trained personnel familiar with the potential hazards of the operation, <sup>pf</sup> and
  - (c) Delineate cleaning and sanitization procedures for food-contact surfaces, <sup>Pf</sup> and
- (6) Describes the training program that ensures that the individual responsible for the reduced oxygen packaging operation understands the <sup>Pf</sup>:
  - (a) Concepts required for a safe operation, <sup>Pf</sup>
  - (b) Equipment and facilities, <sup>Pf</sup> and

- (c) Procedures specified under Subparagraph (B)(5) of this section and ¶¶ 8-201.4
   (C) and (E). <sup>Pf</sup>
- (7) Is provided to the Health Authority prior to implementation as specified under ¶ 8-201.3(B).
- (C) Except for fish that is frozen before, during, and after packaging and bears a label indicating that it is to be kept frozen until time of use, a food establishment must not package fish using a reduced oxygen packaging method.<sup>P</sup>
- (D) Except as specified under ¶ (C) and ¶ (F) of this section, a food establishment that packages TCS food using a cook-chill or sous vide process must:
  - (1) Provide a HACCP plan that contains the information as specified under ¶¶ 8-201.4(C) and (D) to the Health Authority prior to implementation, <sup>Pf</sup>
  - (2) Ensure the food is:
    - (a) Not distributed wholesale, <sup>Pf</sup>
    - (b) Cooked to heat all parts of the food to a temperature and for a time as specified under  $\P\P$  3-401.1(A), (B), and (C), <sup>P</sup>
    - (c) Protected from contamination before and after cooking as specified under Parts 3-3 and 3-4 of these regulations, <sup>P</sup>
    - (d) Placed in a package with an oxygen barrier and sealed before cooking, or placed in a package and sealed immediately after cooking and before reaching a temperature below 135°F (57°C)
    - (e) Cooled to 41°F (5°C) in the sealed package or bag as specified under § 3-501.4 and:<sup>P</sup>
      - (i) Cooled to 34°F (1°C) within 48 hours of reaching 41°F (5°C) and held at that temperature until consumed or discarded within 30 calendar days after the date of packaging, <sup>P</sup>
      - (ii) Held at 41°F (5°C) or below for no more than seven calendar days, at which time the food must be consumed or discarded, <sup>P</sup> or
      - (iii) Cooled to 34°F (1°C) within 48 hours of reaching 41°F (5°C) and then may be slacked back to 41°F (5°C) or below for no more than 7 days, at which time the food must be consumed or discarded. The total shelf-life of the food must not exceed 30 days from its date of packaging, <sup>P</sup> or
      - (iv) Held frozen with no shelf-life restriction while frozen until consumed or used.<sup>P</sup>
    - (f) Held in a refrigeration unit that is equipped with an electronic system that continuously monitors time and temperature and is visually examined for proper operation twice daily, <sup>Pf</sup>
    - (g) Monitored with verifiable time and food temperature electronic monitoring devices if transported off-site to a satellite location for retail sale by the same person, , <sup>Pf</sup> and
    - (h) Labeled with the product name and the date packaged, and

- (3) Maintain the records required to confirm that cooling and cold holding refrigeration time/temperature parameters are required as part of the HACCP plan and:
  - (a) Make such records available to the Health Authority upon request, <sup>Pf</sup> and
  - (b) Hold such records for at least six months, <sup>Pf</sup> and
- (4) Implement written operational procedures as specified under Subparagraph (B)(5) of this section and a training program as specified under Subparagraph (B)(6) of this section. <sup>Pf</sup>
- (E) Except as specified under ¶ (F) of this section, a food establishment that packages cheese using a reduced oxygen packaging method must:
  - (1) Limit the cheeses packaged to those that are commercially manufactured in a food processing plant with no ingredients added in the food establishment and that meet the Standards of Identity as specified in 21 CFR 133.150 Hard Cheeses, 21 CFR 133.169 Pasteurized Process Cheese or 21 CFR 133.187 Semisoft Cheeses, <sup>P</sup>
  - (2) Have a HACCP plan that contains the information specified under  $\P\P$  8-201.4(C) and (E) and as specified under  $\P\P$  (B)(1), (B)(3)(a), (B)(5) and (B)(6) of this section, <sup>Pf</sup>
  - (3) Label the package on the principal display panel with a use-by date that does not exceed 30 calendar days from its packaging or the original manufacturer's sell-by or use-by date, whichever occurs first, <sup>Pf</sup> and
  - (4) Discards the reduced oxygen packaged cheese if it is not sold for off-premises consumption or consumed within 30 calendar days of its packaging. <sup>Pf</sup>
- (F) A HACCP plan is not required when a food establishment uses a reduced oxygen packaging method to package TCS food that is always:
  - (1) Labeled with the production time and date,
  - (2) Held at 41°F (5°C) or below during refrigerated storage, and
  - (3) Removed from its package in the food establishment within 48 hours after packaging.

3-6	Food Identity, Presentation, and On-Premises Labeling	
Subparts		
3-601	Accurate Representation	
3-602	Labeling	
3-603	Consumer Advisory for Consumption of Animal Foods that are Raw, Undercooked, or Not	
	Otherwise Processed to Eliminate Pathogens	

3-601 Accurate Representation

#### **3-601.1** Standards of Identity

Packaged food must comply with standard of identity requirements in 21 CFR 131-169 and 9 CFR 319 *Definitions and Standards of Identity or Composition*, and the general requirements in 21 CFR 130 *Food Standards: General* and 9 CFR 319 Subpart A *General*.

#### **3-601.2** Honestly Presented

- (A) Food must be sold, offered or displayed for sale, or served in a way that does not mislead or misinform the consumer.
- (B) Food or color additives, colored overwraps, or lights must not be used to misrepresent the true appearance, color, or quality of a food.

#### 3-602 Labeling

#### **3-602.1** Food Labels

- (A) Food packaged in a food establishment for retail sale must be labeled as specified in NAC 446.187 Labeling, 21 CFR 101 Food Labeling, and 9 CFR 317 Labeling, Marking Devices, and Containers.
- (B) Label information must include:
  - (1) The common name of the food, or absent a common name, an adequately descriptive identity statement,
  - (2) If made from two or more ingredients, a list of ingredients and sub-ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors, and chemical preservatives, if contained in the food,
  - (3) An accurate declaration of net quantity of contents,
  - (4) The name of the food establishment and address for the place of business of the manufacturer, packer, or distributor,
  - (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient, <sup>Pf</sup>
  - (6) Nutrition labeling as specified in 21 CFR 101 Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling unless exempted in the Federal Food, Drug, and Cosmetic Act § 403(q)(3)—(5), and
  - (7) If canthaxanthin or astaxanthin is used as a color additive for any salmonid fish, an ingredient label that discloses the use of canthaxanthin or astaxanthin must be present on any bulk containers or retail packages. If the fish is not in a package or container, the list of ingredients may be disclosed by other written means, such as a placard or counter card.

- (C) Bulk food that is available for consumer self-dispensing must be prominently labeled with the following information in plain view of the consumer:
  - (1) The manufacturer's or processor's label that was provided with the food, or
  - (2) A card, sign, or other method of notification that includes the information specified under Subparagraphs (B)(1), (2), and (6) of this section.
- (D) Bulk, unpackaged foods such as bakery products and unpackaged foods that are portioned to consumer specification need not be labeled if:
  - (1) A health, nutrient content, or other claim is not made, and
  - (2) Not otherwise required by law, and
  - (3) The food is manufactured or prepared on the premises of the food establishment or at another food establishment or a food processing plant that is owned by the same person and is regulated by the food regulatory agency of jurisdiction.

#### 3-602.2 Other Forms of Information

- (A) If required by law, consumer warnings must be provided.
- (B) Food establishment or manufacturer dating information on foods must not be concealed or altered.

## **3-603** Consumer Advisory for Consumption of Animal Foods that are Raw, Undercooked, or Not Otherwise Processed to Eliminate Pathogens

- (A) Except as specified in ¶ 3-401.1(C) and under ¶ 3-801(C), if an animal food such as beef, eggs, fish, lamb, pork, poultry, or shellstock is sold, offered for sale, or served raw, undercooked, or without otherwise being processed to eliminate pathogens, either in ready-to-eat form or as an ingredient in another ready-to-eat food, the food establishment must inform consumers of the significantly increased risk of consuming such foods by way of a disclosure and a reminder, as specified in ¶¶ (B) and (C) of this section using brochures, deli case or menu advisories, label statements, table tents, placards, or other effective written means.<sup>Pf</sup>
- (B) The disclosure must include:
  - (1) A description of the animal-derived food, such as "oysters on the half shell (raw oysters)", "raw-egg Caesar salad", and "hamburgers (can be cooked to order)", <sup>Pf</sup> or
  - (2) Identification of the animal-derived foods by asterisking them to a footnote that states that the items are served raw or undercooked, or contain (or may contain), raw or undercooked ingredients.<sup>Pf</sup>

- (C) The reminder must include asterisking the animal-derived foods requiring disclosure to a footnote that states:
  - (1) Regarding the safety of these items, written information is available upon request, Pf
  - (2) Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, <sup>Pf</sup> or
  - (3) Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions. <sup>Pf</sup>

3-7	Contaminated Food
Subpart 3-701	Discarding or Reconditioning Unsafe, Adulterated, or Contaminated Food

#### 3-701 Discarding or Reconditioning Unsafe, Adulterated, or Contaminated Food

- (A) A food that is unsafe, adulterated, misbranded or not honestly presented as specified under § 3-101 must be discarded or reconditioned according to an approved procedure.<sup>P</sup>
- (B) Food that is not from an approved source as specified under Subpart 3-201 must be discarded.<sup>P</sup>
- (C) Ready-to-eat food that might have been contaminated by a food handler who has been restricted or excluded as specified under § 2-201.2 must be discarded.<sup>P</sup>
- (D) Food that is contaminated by food handlers, consumers, or other persons through contact with their hands, bodily discharges, such as nasal or oral discharges, or other means must be discarded.<sup>P</sup>

3-8	Special Requirements for Highly Susceptible Populations	
Subpart		
3-801	Pasteurized Foods, Prohibited Re-Service, and Prohibited Food	

#### 3-801 Pasteurized Foods, Prohibited Re-Service, and Prohibited Food

In a food establishment that serves a highly susceptible population:

- (A) The following criteria apply to juice:
  - (1) For the purposes of paragraph (A) only, children who are age 9 or less and receive food in a school, daycare, or similar facility that provides custodial care are included as highly susceptible populations,

- (2) Prepackaged juice or a prepackaged beverage containing juice, that bears a warning label as specified in 21 CFR, 101.17(g) *Food Labeling, Warning, Notice, and Safe Handling Statements,* Juices that have not been specifically processed to prevent, reduce, or eliminate the presence of pathogens must not be sold, offered or displayed for sale, or served, <sup>P</sup>
- (3) Packaged juice or a packaged beverage containing juice, that bears a warning label as specified under ¶ 3-404(B) must not be sold, offered or displayed for sale, or served, <sup>P</sup> and
- (4) Unpackaged juice that is prepared on the premises for service or sale in a ready-to- eat form must be processed under a HACCP plan that contains the information specified under ¶¶ 8-201.4(C)—(E) and as specified in 21 CFR Part 120 Hazard Analysis and Critical Control Point (HACCP) Systems, including, without limitation, Subpart B Pathogen Reduction and 21 CFR 120.24 Process controls.<sup>P</sup>
- (B) Pasteurized eggs or egg products must be substituted for raw eggs in the preparation of: <sup>P</sup>
  - (1) Foods such as Caesar salad, hollandaise or Béarnaise sauce, mayonnaise, meringue, eggnog, ice cream, and egg-fortified beverages, and
  - (2) Except as specified in ¶ (F) of this section, recipes in which more than one egg is broken and the eggs are combined, <sup>P</sup>
- (C) The following foods must not be sold, offered or displayed for sale, or served in a ready-to-eat form: <sup>P</sup>
  - (1) Raw animal foods such as raw fish, raw-marinated fish, raw molluscan shellfish, and steak tartare, <sup>P</sup>
  - (2) A partially cooked animal food such as lightly cooked fish, rare meat, soft-cooked eggs that are made from raw eggs, and meringue, <sup>P</sup> and
  - (3) Raw seed sprouts.<sup>P</sup>
- (D) Food handlers must not contact ready-to-eat food as specified under ¶¶ 3-301.1(B) and (E).<sup>P</sup>
- (E) Time only, as the public health control as specified under ¶ 3-501.9(D), must not be used for raw eggs.<sup>P</sup>
- (F) Subparagraph (B)(2) of this section does not apply if:
  - (1) The raw eggs are combined immediately before cooking for one consumer's serving at a single meal, cooked as specified under Subparagraph 3-401.1(A)(1), and served immediately, such as an omelet, soufflé, or scrambled eggs,
  - (2) The raw eggs are combined as an ingredient immediately before baking and the eggs are thoroughly cooked to a ready-to-eat form, such as a cake, muffin, or bread, or

- (3) The preparation of the food is conducted under a HACCP plan that:
  - (a) Identifies the food to be prepared,
  - (b) Prohibits contacting ready-to-eat food with bare hands,
  - (c) Includes specifications and practices that ensure:
    - (i) Salmonella Enteritidis growth is controlled before and after cooking, and
    - (ii) Salmonella Enteritidis is destroyed by cooking the eggs according to the temperature and time specified in Subparagraph 3-401.1(A)(2),
  - (d) Contains the information specified under ¶ 8-201.4(D) including procedures that:
    - (i) Control cross-contamination of ready-to-eat food with raw eggs, and
    - (ii) Delineate cleaning and sanitization procedures for food-contact surfaces, and
  - (e) Describes the training program that ensures that the food handler responsible for the preparation of the food understands the procedures to be used.
- (G) Except as specified in ¶ (H) of this section, food may be re-served as specified under Subparagraph 3-306.4(B)(1) and (2).
- (H) Food must not be re-served under the following conditions:
  - (1) Any food served to patients or clients who are under contact precautions in medical isolation or quarantine, or protective environment isolation must not be re-served to others outside.
  - (2) Packages of food from any patients, clients, or other consumers should not be reserved to persons in protective environment isolation.

#### Chapter 4 Equipment, Utensils, and Linens

Parts	
4-1	Materials for Construction and Repair
4-2	Design and Construction
4-3	Numbers and Capacities
4-4	Location and Installation
4-5	Maintenance and Operation
4-6	Cleaning of Equipment and Utensils
4-7	Sanitization of Equipment and Utensils
4-8	Laundering
4-9	Protection of Clean Items

4-1	Materials for Construction and Repair	
Subparts		
4-101	Multiuse	
4-102	Single-Service and Single-Use Characteristics	

## 4-101Multiuse4-101.1Characteristics

Materials that are used in the construction of utensils and food-contact surfaces of equipment must not allow the migration of deleterious substances or impart colors, odors, or tastes to food and under normal use conditions must be: <sup>P</sup>

- (A) Safe, <sup>P</sup>
- (B) Durable, corrosion-resistant, and nonabsorbent,
- (C) Sufficient in weight and thickness to withstand repeated warewashing,
- (D) Finished to have a smooth, easily cleanable surface, and
- (E) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition.

#### 4-101.2 Cast Iron, Use Limitation

- (A) Except as specified in ¶¶ (B) and (C) of this section, cast iron must not be used for utensils or food-contact surfaces of equipment.
- (B) Cast iron may be used as a surface for cooking.
- (C) Cast iron may be used as utensils for serving food if the utensils are used only as part of an uninterrupted process from cooking through service.

#### 4-101.3 Lead, Use Limitation

(A) Ceramic, china and crystal utensils, including, without limitation, hand painted ceramic or china that are used in contact with food must be lead-free or contain levels of lead not exceeding the limits in the following utensil categories: <sup>P</sup>

Utensil Category	Ceramic Article Description	Maximum Lead mg/L	
Beverage Mugs, Cups, Pitchers	Coffee Mugs	0.5	
Large Hollowware	Bowls	1	
(excluding pitchers)	<u>&gt;</u> 1.1 Liter (1.16 Quart)	1	
Small Hollowware	Bowls	2.0	
(excluding cups & mugs)	< 1.1 Liter (1.16 Quart)	2.0	
Flat tableware	Plates, Saucers	3.0	

- (B) Pewter alloys containing lead in excess of 0.05% must not be used as a food-contact surface.<sup>P</sup>
- (C) Solder and flux containing lead in excess of 0.2% must not be used as a food-contact surface.

#### 4-101.4 Copper, Use Limitation

- (A) Except as specified in ¶ (B) of this section, copper and copper alloys such as brass must not be used in contact with a food that has a pH below 6 such as vinegar, fruit juice, or wine, or for a fitting or tubing installed between a backflow prevention device and a carbonator.<sup>P</sup>
- (B) Copper and copper alloys may be used in contact with beer brewing ingredients that have a pH below 6 in the pre-fermentation and fermentation steps of a beer brewing operation such as a brewpub or microbrewery.

#### 4-101.5 Galvanized Metal, Use Limitation

Galvanized metal must not be used for utensils or food-contact surfaces of equipment that are used in contact with acidic food.<sup>P</sup>

#### 4-101.6 Sponges, Use Limitation

Sponges must not be used in contact with cleaned and sanitized or in-use food-contact surfaces.

#### 4-101.7 Wood, Use Limitation

- (A) Except as specified in ¶¶ (B)-(D) of this section, wood must not be used as a food-contact surface.
- (B) Sealed wood may be used for non-food contact surfaces that are not regularly exposed to moisture and have no wet-line penetrations. Examples include, but are not limited to, bar tops, dining tables, or cabinets in a customer interface area that are not used for open food storage or preparation.

- (C) Hard maple or an equivalently hard, close-grained wood may be used for:
  - (1) Cutting boards; cutting blocks; bakers' tables; and utensils such as rolling pins, doughnut dowels, salad bowls, and chopsticks, and
  - (2) Wooden paddles used in confectionery operations for pressure scraping kettles when manually preparing confections at a temperature of 230°F (110 °C) or above.
- (D) Whole, uncut, raw fruits and vegetables, and nuts in the shell may be kept in the wood shipping containers in which they were received, until the fruits, vegetables, or nuts are used.
- (E) If the nature of the food requires removal of rinds, peels, husks, or shells before consumption, the whole, uncut, raw food may be kept in:
  - (1) Untreated wood containers, or
  - (2) Treated wood containers if the containers are treated with a preservative that meets the requirements specified in 21 CFR 178.3800 *Preservatives for wood*.

#### 4-101.8 Nonstick Coatings, Use Limitation

Multiuse kitchenware such as frying pans, griddles, saucepans, cookie sheets, and waffle bakers that have a perfluorocarbon resin coating must be used with non-scoring or non-scratching utensils and cleaning aids.

#### 4-101.9 Nonfood-Contact Surfaces

Nonfood-contact surfaces that are exposed to splash, spillage, or other food soiling or that require frequent cleaning must be constructed of a corrosion-resistant, nonabsorbent, and smooth material.

#### 4-102 Single-Service and Single-Use Characteristics

Materials that are used to make single-service and single-use articles:

- (A) May not:
  - (1) Allow the migration of deleterious substances, <sup>P</sup> or
  - (2) Impart colors, odors, or tastes to food, and
- (B) Must be:
  - (1) Safe, <sup>P</sup> and
  - (2) Clean.

4-2	Design and Construction
Subparts	
4-201	Durability and Strength
4-202	Cleanability
4-203	Accuracy
4-204	Functionality
4-205	Acceptability of Food Equipment, Certification and Classification

#### 4-201 Durability and Strength

#### 4-201.1 Equipment and Utensils

Equipment and utensils must be designed and constructed to be durable and to retain their characteristic qualities under normal use conditions.

#### 4-201.2 Food Temperature Measuring Devices

Food temperature measuring devices must not have sensors or stems constructed of glass, except that thermometers with glass sensors or stems that are encased in a shatterproof coating such as candy thermometers may be used.  $^{P}$ 

### 4-202 Cleanability

#### 4-202.1 Food-Contact Surfaces

- (A) Multiuse food-contact surfaces must be:
  - (1) Smooth, <sup>Pf</sup>
  - (2) Free of breaks, open seams, cracks, chips, inclusions, pits, and similar imperfections, Pf
  - (3) Free of sharp internal angles, corners, and crevices, <sup>Pf</sup>
  - (4) Finished to have smooth welds and joints, <sup>Pf</sup> and
  - (5) Except as specified in ¶ (B) of this section, accessible for cleaning and inspection by one of the following methods:
    - (a) Without being disassembled, <sup>Pf</sup>
    - (b) By disassembling without the use of tools, <sup>Pf</sup> or
    - (c) By easy disassembling with the use of handheld tools commonly available to maintenance and cleaning personnel such as screwdrivers, pliers, open-end wrenches, and Allen wrenches. <sup>Pf</sup>
- (B) Subparagraph (A)(5) of this section does not apply to cooking oil storage tanks, distribution lines for cooking oils, or beverage syrup lines or tubes.

#### 4-202.2 CIP Equipment

- (A) CIP equipment must meet the characteristics specified under § 4-202.1 and must be designed and constructed so that:
  - (1) Cleaning and sanitizing solutions circulate throughout a fixed system and contact all interior food-contact surfaces, <sup>Pf</sup> and
  - (2) The system is self-draining or capable of being completely drained of cleaning and sanitizing solutions, and
- (B) CIP equipment that is not designed to be disassembled for cleaning must be designed with inspection access points to ensure that all interior food-contact surfaces throughout the fixed system are being effectively cleaned.

#### 4-202.3 V Threads, Use Limitation

Except for hot oil cooking or filtering equipment, V type threads must not be used on food- contact surfaces.

#### 4-202.4 Hot Oil Filtering Equipment

Hot oil filtering equipment must meet the characteristics specified under § 4-202.1 or § 4-202.2 and must be readily accessible for filter replacement and cleaning of the filter.

#### 4-202.5 Can Openers

Cutting or piercing parts of can openers must be readily removable for cleaning and for replacement.

#### 4-202.6 Nonfood-Contact Surfaces

Nonfood-contact surfaces must be free of unnecessary ledges, projections, and crevices, and designed and constructed to allow easy cleaning and to facilitate maintenance.

#### 4-202.7 Kick Plates, Removable

Kick plates must be designed so that the areas behind them are accessible for inspection and cleaning by being removable by one of the methods specified under Subparagraph 4-202.1(A)(5), or capable of being rotated open, without unlocking equipment doors.

#### 4-202.8 Ventilation Hood Systems, Filters

Filters or other grease extracting equipment must be designed to be readily removable for cleaning and replacement if not designed to be cleaned in place.

#### 4-202.9 Shelving

- (A) Shelves that are located in areas subject to moisture, including where food is prepared, in refrigerators and freezers, or where utensils are washed must be made of metal, plastic, or plastic coated corrosion-resistant material, and be easily cleanable,
- (B) Shelves located in refrigerators or freezers must be maintained in a manner that does not restrict the circulation of air,
- (C) Shelves located in separate dry storage areas must be made of corrosion-resistant material, and made of metal, plastic, plastic coated materials, or other durable easily cleanable materials, including wood products that have a smooth finish that is resistant to damage by spills of food, water, or other leaks,
- (D) Shelves constructed of pressure-treated wood products which are impregnated or otherwise treated with chemicals to inhibit rotting or insect infestation must not be used in a food establishment, and
- (E) Shelves may not be lined with cardboard, aluminum foil, contact paper or other non-durable material.

#### 4-203 Accuracy

#### 4-203.1 Temperature Measuring Devices, Food

- (A) Food temperature measuring devices that are scaled only in Celsius or dually scaled in Celsius and Fahrenheit must be accurate to ±1°C in the intended range of use. <sup>Pf</sup>
- (B) Food temperature measuring devices that are scaled only in Fahrenheit must be accurate to  $\pm 2^{\circ}$ F in the intended range of use.<sup>Pf</sup>

#### 4-203.2 Temperature Measuring Devices, Ambient Air and Water

- (A) Ambient air and water temperature measuring devices that are scaled in Celsius or dually scaled in Celsius and Fahrenheit must be designed to be easily readable and accurate to ±1.5°C in the intended range of use.<sup>Pf</sup>
- (B) Ambient air and water temperature measuring devices that are scaled only in Fahrenheit must be accurate to  $\pm 3^{\circ}$ F in the intended range of use.<sup>Pf</sup>

#### 4-203.3 Pressure Measuring Devices, Mechanical Warewashing Equipment

Pressure measuring devices that display the pressures in the water supply line for the fresh hot water sanitizing rinse must have increments of 1 pound per square inch (7 kilopascals) or smaller and must be accurate to  $\pm 2$  pounds per square inch ( $\pm 14$  kilopascals) in the range indicated on the manufacturer's data plate.

#### 4-204 Functionality

#### 4-204.1 Ventilation Hood Systems, Drip Prevention

Exhaust ventilation hood systems in food preparation and warewashing areas including, without limitation, components such as hoods, fans, guards, and ducting must be designed to prevent grease or condensation from draining or dripping onto food, equipment, utensils, linens, and single-service and single-use articles.

#### 4-204.2 Equipment Openings, Closures and Deflectors

- (A) A cover or lid for equipment must overlap the opening and be sloped to drain.
- (B) An opening located within the top of a unit of equipment that is designed for use with a cover or lid must be flanged upward at least two-tenths of an inch (5 millimeters).
- (C) Except as specified under ¶ (D) of this section, fixed piping, temperature measuring devices, rotary shafts, and other parts extending into equipment must be provided with a watertight joint at the point where the item enters the equipment.
- (D) If a watertight joint is not provided:
  - (1) The piping, temperature measuring devices, rotary shafts, and other parts extending through the openings must be equipped with an apron designed to deflect condensation, drips, and dust from openings into the food, and
  - (2) The opening must be flanged as specified under ¶ (B) of this section.

#### 4-204.3 Dispensing Equipment, Protection of Equipment and Food

In equipment that dispenses or vends liquid food or ice in unpackaged form:

- (A) The delivery tube, chute, orifice, and splash surfaces directly above the container receiving the food must be designed in a manner, such as with barriers, baffles, or drip aprons, so that drips from condensation and splash are diverted from the opening of the container receiving the food,
- (B) The delivery tube, chute, and orifice must be protected from manual contact such as by being recessed,
- (C) The delivery tube or chute and orifice of equipment used to vend liquid food or ice in unpackaged form to self- service consumers must be designed so that the delivery tube or chute and orifice are protected from dust, insects, rodents, and other contamination by a self-closing door if the equipment is:
  - (1) Located in an outside area that does not otherwise afford the protection of an enclosure against the rain, windblown debris, insects, rodents, and other contaminants that are present in the environment, or
  - (2) Available for self-service during hours when it is not under the full-time supervision of a food handler, and

- (D) The dispensing equipment actuating lever or mechanism and filling device of consumer selfservice beverage dispensing equipment must be designed to prevent contact with the lipcontact surface of glasses or cups that are refilled.
- (E) Dispensing equipment in which TCS food in a homogenous liquid form is maintained outside of the temperature control requirements as specified under §3-501.6(A) must:
  - (1) Be specifically designed and equipped to maintain the commercial sterility of aseptically packaged food in a homogenous liquid form for a specified duration from the time of opening the packaging within the equipment, <sup>P</sup> and
  - (2) Conform to the requirements for this equipment as specified in NSF/ANSI 18 Manual Food and Beverage Dispensing Equipment. <sup>P</sup>

#### 4-204.4 Beverage Tubing, Separation

Except for cold plates that are constructed integrally with an ice storage bin, beverage tubing and coldplate beverage cooling devices must not be installed in contact with stored ice.

#### 4-204.5 Ice Units, Separation of Drains

Drain lines must not pass through an ice machine or ice storage bin.

#### 4-204.6 Condenser Unit, Separation

If a condenser unit is an integral component of equipment, the condenser unit must be separated from the food and food storage space by a dustproof barrier.

#### 4-204.7 Molluscan Shellfish Tanks

- (A) Except as specified under ¶ (B) of this section, molluscan shellfish life support system display tanks must not be used to store or display shellfish that are offered for human consumption and must be conspicuously marked so that it is obvious to the consumer that the shellfish are for display only.<sup>P</sup>
- (B) Molluscan shellfish life-support system display tanks that are used to store or display shellfish that are offered for human consumption must be operated and maintained in accordance with a waiver granted by the Health Authority as specified in § 8-103.1 and a HACCP plan that <sup>Pf</sup>:
  - (1) Is submitted by the permit holder and approved as specified under § 8-103.2, <sup>Pf</sup> and
  - (2) Ensures that:
    - (a) Water used with fish other than molluscan shellfish does not flow into the molluscan tank, <sup>Pf</sup>
    - (b) The safety and quality of the shellfish as they were received are not compromised by the use of the tank <sup>pf</sup>, and

(c) The identity of the source of the shellstock is retained as specified under § 3-202.9. <sup>Pf</sup>

#### 4-204.8 Temperature Measuring Devices

- (A) In a mechanically refrigerated or hot food storage unit, the sensor of a temperature measuring device must be located to measure the air temperature or a simulated product temperature in the warmest part of a mechanically refrigerated unit and in the coolest part of a hot food storage unit.
- (B) Except as specified in ¶ (C) of this section, cold or hot holding equipment used for TCS food must be designed to include and must be equipped with at least one integral or permanently affixed temperature measuring device that is located to allow easy viewing of the device's temperature display.
- (C) Paragraph (B) of this section does not apply to equipment for which the placement of a temperature measuring device is not a practical means for measuring the ambient air surrounding the food because of the design, type, and use of the equipment, such as calrod units, heat lamps, cold plates, bainmaries, steam tables, insulated food transport containers, and salad bars.
- (D) Temperature measuring devices must be designed to be easily readable.
- (E) Food temperature measuring devices and water temperature measuring devices on warewashing machines must have a numerical scale, printed record, or digital readout in increments no greater than 2°F or 1°C in the intended range of use. <sup>Pf</sup>

#### 4-204.9 Warewashing Machine, Data Plate Operating Specifications

A warewashing machine must be provided with an easily accessible and readable data plate affixed to the machine by the manufacturer that indicates the machine's design and operation specifications including the:

- (A) Temperatures required for washing, rinsing, and sanitizing,
- (B) Pressure required for the freshwater sanitizing rinse unless the machine is designed to use only a pumped sanitizing rinse, and
- (C) Conveyor speed for conveyor machines or cycle time for stationary rack machines.

#### 4-204.10 Warewashing Machines, Internal Baffles

Warewashing machine wash and rinse tanks must be equipped with baffles, curtains, or other means to minimize internal cross-contamination of the solutions in wash and rinse tanks.

#### 4-204.11 Warewashing Machines, Temperature Measuring Devices

A warewashing machine must be equipped with a temperature measuring device that indicates the temperature of the water:

- (A) In each wash and rinse tank, <sup>Pf</sup> and
- (B) As the water enters the hot water sanitizing final rinse manifold or in the chemical sanitizing solution tank. <sup>Pf</sup>

#### 4-204.12 Manual Warewashing Equipment, Heaters and Baskets

If hot water is used for sanitization in manual warewashing operations, the sanitizing compartment of the sink must be:

- (A) Designed with an integral heating device that is capable of maintaining water at a temperature not less than 171°F (77.2°C), <sup>Pf</sup> and
- (B) Provided with a rack or basket to allow complete immersion of equipment and utensils into the hot water. <sup>Pf</sup>

#### 4-204.13 Warewashing Machines, Automatic Dispensing of Detergents and Sanitizers

A warewashing machine that is installed after adoption of these regulations by the Health Authority, must be equipped to:

- (A) Automatically dispense detergents and sanitizers, <sup>Pf</sup> and
- (B) Incorporate a visual means to verify that detergents and sanitizers are delivered or a visual or audible alarm to signal if the detergents and sanitizers are not delivered to the respective washing and sanitizing cycles. <sup>Pf</sup>

#### 4-204.14 Warewashing Machines, Flow Pressure Device

- (A) Warewashing machines that provide a fresh hot water sanitizing rinse must be equipped with a pressure gauge or similar device such as a transducer that measures and displays the water pressure in the supply line immediately before entering the warewashing machine, and
- (B) If the flow pressure measuring device is upstream of the fresh hot water sanitizing rinse control valve, the device must be mounted in a one-fourth inch (6.4 millimeter) Iron Pipe Size (IPS) valve.
- (C) Paragraphs (A) and (B) of this section do not apply to a machine that uses only a pumped or recirculated sanitizing rinse.

#### 4-204.15 Warewashing Sinks and Drainboards, Self-Draining

Sinks and drainboards of warewashing sinks and machines must be self-draining.

#### 4-204.16 Equipment Compartments, Drainage

(A) Equipment and equipment compartments that are subject to accumulation of moisture due to conditions such as condensation, food or beverage drip, or water from melting ice must be sloped to an outlet that allows complete draining.

#### 4-204.17 Vending Machine, Vending Stage Closure

The dispensing compartment of a vending machine including a machine that is designed to vend prepackaged snack food that is not TCS food such as chips, party mixes, and pretzels must be equipped with a self-closing door or cover if the machine is:

- (A) Located in an outside area that does not otherwise afford the protection of an enclosure against the rain, windblown debris, insects, rodents, and other contaminants that are present in the environment, or
- (B) Available for self-service during hours when it is not under the full-time supervision of a food handler.

#### 4-204.18 Vending Machines, Automatic Shutoff

- (A) A machine vending TCS food must have an automatic control that prevents the machine from vending food:
  - (1) If there is a power failure, mechanical failure, or other condition that results in an internal machine temperature that cannot maintain food temperatures as specified under Chapter 3, <sup>P</sup> and
  - (2) If a condition specified under Subparagraph (A)(1) of this section occurs, until the machine is serviced and restocked with food that has been maintained at temperatures specified under Chapter 3.<sup>P</sup>
- (B) When the automatic shutoff within a machine vending TCS food is activated:
  - (1) In a refrigerated vending machine, the ambient air temperature must not exceed 41°F (5°C) for more than 30 minutes immediately after the machine is filled, serviced, or restocked, <sup>P</sup> or
  - (2) In a hot holding vending machine, the ambient air temperature must not be less than 135°F (57°C) for more than 120 minutes immediately after the machine is filled, serviced, or restocked.<sup>P</sup>

#### 4-204.19 Vending Machines, Liquid Waste Products

- (A) Vending machines designed to store beverages that are packaged in containers made from paper products must be equipped with diversion devices and retention pans or drains for container leakage.
- (B) Vending machines that dispense liquid food in bulk must be:

- (1) Provided with an internally mounted waste receptacle for the collection of drip, spillage, overflow, or other internal wastes, and
- (2) Equipped with an automatic shutoff device that will place the machine out of operation before the waste receptacle overflows.
- (C) Shutoff devices specified under Subparagraph (B)(2) of this section must prevent water or liquid food from continuously running if there is a failure of a flow control device in the water or liquid food system or waste accumulation that could lead to overflow of the waste receptacle.

#### 4-204.20 Vending Machine Doors and Openings

- (A) Vending machine doors and access opening covers to food and container storage spaces must be tight fitting so that the space along the entire interface between the doors or covers and the cabinet of the machine, if the doors or covers are in a closed position, is no greater than one-sixteenth inch (1.5 millimeters) by:
  - (1) Being covered with louvers, screens, or materials that provide an equivalent opening of not greater than one-sixteenth inch or 1.5 millimeters. Screening of 12 or more mesh to 1 inch (12 mesh to 2.5 centimeters) meets this requirement,
  - (2) Being effectively gasketed,
  - (3) Having interface surfaces that are at least one-half inch or 13 millimeters wide, or
  - (4) Jambs or surfaces used to form an L-shaped entry path to the interface.
- (B) Vending machine service connection openings through an exterior wall of a machine must be closed by sealants, clamps, or grommets so that the openings are no larger than one-sixteenth inch or 1.5 millimeters.

#### 4-204.21 Can Openers on Vending Machines

Cutting or piercing parts of can openers on vending machines must be protected from manual contact, dust, insects, rodents, and other contamination.

#### 4-204.22 Bearings and Gear Boxes, Leakproof

Equipment containing bearings and gears that require lubricants must be designed and constructed so that the lubricant cannot leak, drip, or be forced into food or onto food-contact surfaces.

#### 4-204.23 Case Lot Handling Apparatuses, Movability

Apparatuses such as dollies, pallets, racks, and skids used to store and transport large quantities of packaged foods received from a supplier in a cased or overwrapped lot, must be designed to be moved by hand or by conveniently available apparatuses such as hand trucks and forklifts.

#### 4-205 Acceptability of Food Equipment, Certification and Classification

- (A) Food equipment must meet the standard for sanitation set by an American National Standards Institute accredited certification program. Upon request of the Health Authority, the PIC must provide verification that the equipment meets the sanitation standard in the form of:
  - (1) Documentation of a sanitation certification marking from an ANSI accredited certification program,
  - (2) A field evaluation of the equipment by an ANSI accredited certification program with correction of deficiencies, or
  - (3) Other evidence that the equipment has been approved for use by a regulatory authority such as the USDA or FDA and is in compliance with Subparts 4-201 and 4-202 of these regulations.
- (B) Specialized food equipment such as barbecue grills or smokers, brick ovens, and processing equipment that does not have documentation of sanitation certification will be evaluated by the Health Authority to determine whether a field evaluation is required to verify compliance with Subparts 4-201 and 4-202.

4-3	Numbers and Capacities	
Subparts		
4-301	Equipment	
4-302	Utensils, Temperature Measuring Devices, and Testing Devices	
4-303	Availability of Cleaning Agents and Sanitizers	

#### 4-301 Equipment

#### 4-301.1 Cooling, Heating, and Holding Capacities

Equipment for cooling, heating, and holding cold and hot food, must be sufficient in number and capacity to provide food temperatures as specified under Chapter 3. <sup>Pf</sup>

#### 4-301.2 Manual Warewashing, Sink Compartment Requirements

- (A) Except as specified in ¶¶ (C) and (D) of this section, a sink with at least three-compartments and an integral self-draining drainboard on each end, must be provided in each food establishment in which warewashing and sanitizing equipment and utensils is required. <sup>Pf</sup>
- (B) Sink compartments must be large enough to accommodate immersion of the largest equipment and utensils. If equipment or utensils are too large for the warewashing sink, a warewashing machine or alternative equipment as specified in ¶ (C) of this section must be used. <sup>Pf</sup>

- (C) Alternative manual warewashing equipment may be used when there are special cleaning needs or constraints and its use is approved. Alternative manual warewashing equipment may include:
  - (1) High-pressure detergent sprayers,
  - (2) Low- or line-pressure spray detergent foamers,
  - (3) Other task-specific cleaning equipment,
  - (4) Brushes or other implements,
- (D) Satellite areas operated by the same person within a food establishment may operate without a three-compartment sink if there is a three-compartment sink available for use within 600 feet of the satellite area and the satellite area:
  - (1) Has a warewashing machine,
  - (2) Is a low-risk food establishment and uses disposable service wares, or
  - (3) Is a low-risk food establishment and no soiled service wares are returned to the satellite area after consumer use.

#### 4-301.3 Drainboards

Drainboards, utensil racks, or tables large enough to accommodate all soiled and cleaned items that may accumulate during hours of operation must be provided for necessary utensil holding before cleaning and after sanitizing. Drainboards, utensil racks, and tables must be designed to prevent the accumulation of standing water.

#### 4-301.4 Ventilation Hood Systems, Adequacy

Ventilation hood systems and devices must be sufficient in number and capacity to prevent grease or condensation from collecting on walls and ceilings.

#### 4-301.5 Clothes Washers and Dryers

- (A) Except as specified in ¶ (B) of this section, if work clothes or linens are laundered on the premises, a mechanical clothes washer and dryer must be provided and used.
- (B) If on-premises laundering is limited to wiping cloths intended to be used moist, or wiping cloths are air-dried as specified under § 4-901.2, a mechanical clothes washer and dryer need not be provided.

#### 4-302 Utensils, Temperature Measuring Devices, and Testing Devices

#### 4-302.1 Utensils, Consumer Self-Service

A food dispensing utensil must be available for each container displayed at a consumer self- service unit such as a buffet or salad bar. <sup>Pf</sup>

#### 4-302.2 Food Temperature Measuring Devices

- (A) Food temperature measuring devices must be provided and readily accessible for use in ensuring attainment and maintenance of food temperatures as specified under Chapter 3. <sup>Pf</sup>
- (B) A food temperature measuring device with a suitable small-diameter probe that is designed to measure the temperature of thin masses must be provided and readily accessible to accurately measure the temperature in thin foods such as meat patties and fish filets. <sup>Pf</sup>

#### 4-302.3 Temperature Measuring Devices, Manual and Mechanical Warewashing

- (A) In manual warewashing operations, a temperature measuring device must be provided and readily accessible for frequently measuring the washing and sanitizing temperatures. <sup>Pf</sup>
- (B) In hot water mechanical warewashing operations, an irreversible registering temperature indicator must be provided and readily accessible for measuring the utensil surface temperature.<sup>Pf</sup>

#### 4-302.4 Sanitizing Solutions, Testing Devices

A test kit or other device that accurately measures the concentration in mg/L (ppm) of sanitizing solutions must be provided.<sup>Pf</sup>

#### 4-303 Availability of Cleaning Agents and Sanitizers

- (A) Cleaning agents that are used to clean equipment and utensils as specified under Part 4-6 of these regulations, must be provided and available for use during all hours of operation. <sup>Pf</sup>
- (B) Except for those that are generated on-site at the time of use, chemical sanitizers that are used to sanitize equipment and utensils as specified under Part 4-7 of these regulations, must be provided and available for use during all hours of operation. <sup>Pf</sup>

4-4	Location and Installation
Subparts 4-401	Location of Equipment, Clothes Washers and Dryers, and Storage Cabinets, Contamination
4-402	Prevention Installation

#### 4-401 Location of Equipment, Clothes Washers and Dryers, and Storage Cabinets, Contamination Prevention

- (A) Except as specified in ¶ (B) of this section, equipment, a cabinet used for the storage of food, or a cabinet that is used to store cleaned and sanitized equipment, utensils, laundered linens, and single-service and single-use articles must not be located:
  - (1) In locker rooms,
  - (2) In restrooms,
  - (3) In garbage rooms,
  - (4) In mechanical rooms,
  - (5) Under sewer lines that are not shielded to intercept potential drips,
  - (6) Under leaking water lines including leaking automatic fire sprinkler heads or under lines on which water has condensed,
  - (7) Under open stairwells, or
  - (8) Under other sources of contamination.
- (B) A storage cabinet used for linens or single-service or single-use articles may be stored in a locker room.
- (C) If a mechanical clothes washer or dryer is provided, it must be located so that the washer or dryer is protected from contamination and only where there is no exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

#### 4-402 Installation

#### 4-402.1 Fixed Equipment, Spacing or Sealing

- (A) Equipment that is fixed because it is not easily movable must be installed so that it is:
  - (1) Spaced to allow access for cleaning along the sides, behind, and above the equipment,
  - (2) Spaced from adjoining equipment, walls, and ceilings a distance of not more than one thirty-second inch or 1 millimeter, or
  - (3) Sealed to adjoining equipment or walls, if the equipment is exposed to spillage or seepage.
- (B) Counter-mounted equipment that is not easily movable must be installed to allow cleaning of the equipment and areas underneath and around the equipment by being:
  - (1) Sealed, or
  - (2) Elevated on legs as specified under ¶ 4-402.2(D).

#### 4-402.2 Fixed Equipment, Elevation or Sealing

- (A) Except as specified in ¶¶ (B) and (C) of this section, floor- mounted equipment that is not easily movable must be sealed to the floor or elevated on legs that provide at least a 6-inch (15 centimeter) clearance between the floor and the equipment.
- (B) If no part of the floor under the floor-mounted equipment is more than 6 inches (15 centimeters) from the point of cleaning access, the clearance space may be only 4 inches (10 centimeters).
- (C) This section does not apply to display shelving units, display refrigeration units, and display freezer units located in the consumer shopping areas of a retail food store, if the floor under the units is maintained clean.
- (D) Except as specified in ¶ (E) of this section, counter-mounted equipment that is not easily movable must be elevated on legs that provide at least a 4-inch (10 centimeter) clearance between the table and the equipment.
- (E) The clearance space between the table and counter-mounted equipment may be:
  - (1) 3 inches (7.5 centimeters) if the horizontal distance of the tabletop under the equipment is no more than 20 inches (50 centimeters) from the point of access for cleaning, or
  - (2) 2 inches (5 centimeters) if the horizontal distance of the tabletop under the equipment is no more than 3 inches (7.5 centimeters) from the point of access for cleaning.

#### 4-5 Maintenance and Operation

# Subparts4-501Equipment4-502Utensils and Measuring Devices

#### 4-501 Equipment

#### 4-501.1 Good Repair and Proper Adjustment

- (A) Equipment must be maintained in a state of repair and condition that meets the requirements specified under Parts 4-1 and 4-2 of these regulations.
- (B) Equipment components such as doors, seals, hinges, fasteners, and kick plates must be kept intact, tight, and adjusted in accordance with manufacturer's specifications.
- (C) Cutting or piercing parts of can openers must be kept sharp to minimize the creation of metal fragments that can contaminate food when the container is opened.

#### 4-501.2 Cutting Surfaces

Surfaces such as cutting blocks and boards that are subject to scratching and scoring must be resurfaced if they can no longer be effectively cleaned and sanitized or discarded if they are not capable of being resurfaced.

#### 4-501.3 Microwave Ovens

Microwave ovens must meet the safety standards specified in 21 CFR 1030.10 Microwave ovens.

#### 4-501.4 Warewashing Equipment, Cleaning Frequency

A warewashing machine; the compartments of sinks, basins, or other receptacles used for washing and rinsing equipment, utensils, or raw foods, or laundering wiping cloths; and drainboards or other equipment used to substitute for drainboards as specified under § 4-301.3 must be cleaned:

- (A) Before use,
- (B) Throughout the day at a frequency necessary to prevent recontamination of equipment and utensils and to ensure that the equipment performs its intended function, and
- (C) If used, at least every 24 hours.

#### 4-501.5 Warewashing Machines, Manufacturers' Operating Instructions

- (A) A warewashing machine and its auxiliary components must be operated in accordance with the machine's data plate and other manufacturer's instructions.
- (B) A warewashing machine's conveyor speed or automatic cycle times must be maintained accurately timed in accordance with manufacturer's specifications.

#### 4-501.6 Warewashing Sinks, Use Limitation

- (A) A warewashing sink must not be used for handwashing as specified under § 2-301.4.
- (B) If a warewashing sink is used to wash wiping cloths, wash farm products, or thaw food, the sink must be cleaned as specified under § 4-501.4 before and after each time it is used to wash wiping cloths or wash farm products or thaw food. Sinks used for food preparation must be sanitized as specified under Part 4-7 of these regulations before and after using the sink to prepare food.

#### 4-501.7 Warewashing Equipment, Cleaning Agents

When used for warewashing, the wash compartment of a sink, mechanical warewasher, or wash receptacle of alternative manual warewashing equipment as specified in ¶ 4-301.2(C), must contain a wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent according to the cleaning agent manufacturer's label instructions.<sup>Pf</sup>

#### 4-501.8 Warewashing Equipment, Clean Solutions

The wash, rinse, and sanitize solutions must be maintained clean.

#### 4-501.9 Manual Warewashing Equipment, Wash Solution Temperature

The temperature of the wash solution in manual warewashing equipment must be maintained at not less than 110°F (43°C) or the temperature specified on the cleaning agent manufacturer's label instructions. <sup>Pf</sup>

#### 4-501.10 Mechanical Warewashing Equipment, Wash Solution Temperature

- (A) The temperature of the wash solution in spray type warewashers that use hot water to sanitize must not be less than:
  - (1) For a stationary rack, single temperature machine, 165°F (74°C), <sup>Pf</sup>
  - (2) For a stationary rack, dual temperature machine, 150°F (66°C), <sup>Pf</sup>
  - (3) For a single tank, conveyor, dual temperature machine, 160°F (71°C), <sup>Pf</sup> or
  - (4) For a multitank, conveyor, multitemperature machine, 150°F (66°C). <sup>Pf</sup>
- (B) The temperature of the wash solution in spray-type warewashers that use chemicals to sanitize must not be less than 120°F (49°C) unless otherwise specified by the equipment manufacturer.<sup>Pf</sup>

#### 4-501.11 Manual Warewashing Equipment, Hot Water Sanitization Temperatures

If immersion in hot water is used for sanitizing in a manual operation, the temperature of the water must be maintained at 171°F (77°C) or above.<sup>P</sup>

#### 4-501.12 Mechanical Warewashing Equipment, Hot Water Sanitization Temperatures

- (A) Except as specified in ¶ (B) of this section, in a mechanical operation, the temperature of the fresh hot water sanitizing rinse as it enters the manifold must not be more than 194°F (90°C), or less than: <sup>Pf</sup>
  - (1) For a stationary rack, single temperature machine, 165°F (74°C), <sup>Pf</sup> or
  - (2) For all other machines, 180°F (82°C). <sup>Pf</sup>
- (B) The maximum temperature specified under ¶ (A) of this section, does not apply to the high pressure and temperature systems with wand-type, hand-held, spraying devices used for the inplace manual cleaning and sanitizing of equipment such as meat saws.

#### 4-501.13 Mechanical Warewashing Equipment, Sanitization Pressure

The flow pressure of the fresh hot water sanitizing rinse in a warewashing machine, as measured in the water line immediately downstream or upstream from the fresh hot water sanitizing rinse control valve, must be within the range specified on the machine manufacturer's data plate and must not be less than 5 pounds per square inch (35 kilopascals) or more than 30 pounds per square inch (200 kilopascals).

#### 4-501.14 Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration, and Hardness

A chemical sanitizer used in a sanitizing solution for a manual or mechanical operation at contact times specified under ¶4-702(C) must meet the criteria specified under §7-204.1 Sanitizers, Criteria, must be used in accordance with the EPA-registered label use instructions, and must be used as follows:

(A) A chlorine solution must have a minimum temperature based on the concentration and pH of the solution as listed in the following chart, <sup>P</sup>

Concentration	Minimum	Minimum
Range	Temperature	Temperature
(MG/L)	PH 10 or less	PH 8 or less
	°F (°C)	°F (°C)
25-49	120 (49)	120 (49)
50-99	100 (38)	75 (24)
100	55 (13)	55 (13)

- (B) An iodine solution must have a:
  - (1) Minimum temperature of 68°F (20°C), <sup>P</sup>
  - (2) pH of 5.0 or less or a pH no higher than the level for which the manufacturer specifies the solution is effective, <sup>P</sup> and
  - (3) Concentration between 12.5 MG/L and 25 MG/L, <sup>P</sup>
- (C) A quaternary ammonium compound solution must:
  - (1) Have a minimum temperature of  $75^{\circ}F$  (24°C), <sup>P</sup>
  - (2) Have a concentration as specified under § 7-204.1 and as indicated by the manufacturer's use directions included in the labeling, <sup>P</sup> and
  - (3) Be used only in water with 500 MG/L hardness or less or in water having a hardness no greater than specified by the EPA-registered label use instructions, <sup>P</sup>
- (D) If another solution of a chemical specified under ¶¶ (A)-(C) of this section is used, the permit holder must demonstrate to the Health Authority that the solution achieves sanitization and the use of the solution must be approved, <sup>P</sup>

- (E) If a chemical sanitizer other than chlorine, iodine, or a quaternary ammonium compound is used, it must be applied in accordance with the EPA-registered label use instructions, <sup>P</sup> and
- (F) If a chemical sanitizer is generated by a device located on-site at the food establishment it must be used as specified in  $\P\P(A)$ -(D) of this section and must be produced by a device that:
  - (1) Complies with Regulation as specified in §§ 2(q)(1) and 12 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), <sup>P</sup>
  - (2) Complies with 40 CFR 152.500 *Requirement for Devices* and 40 CFR 156.10 *Labeling requirements*, <sup>P</sup>
  - (3) Displays the EPA device manufacturing facility registration number on the device, <sup>Pf</sup> and
  - (4) Is operated and maintained in accordance with manufacturer's instructions. <sup>Pf</sup>

#### 4-501.15 Manual Warewashing Equipment, Chemical Sanitization Using Detergent-Sanitizers

If a detergent-sanitizer is used to sanitize in a cleaning and sanitizing procedure where there is no distinct water rinse between the washing and sanitizing steps, the agent applied in the sanitizing step must be the same detergent-sanitizer that is used in the washing step.

#### 4-501.16 Warewashing Equipment, Determining Chemical Sanitizer Concentration

Concentration of the sanitizing solution must be accurately determined by using a test kit or other device. <sup>Pf</sup>

## 4-502Utensils and Measuring Devices4-502.1Good Repair and Calibration

- (A) Utensils must be maintained in a state of repair or condition that complies with the requirements specified under Parts 4-1 and 4-2 or must be discarded.
- (B) Food temperature measuring devices must be calibrated in accordance with manufacturer's specifications as necessary to ensure their accuracy. <sup>Pf</sup>
- (C) Ambient air temperature, water pressure, and water temperature measuring devices must be maintained in good repair and be accurate within the intended range of use.

#### 4-502.2 Single-Service and Single-Use Articles, Required Use

A food establishment without facilities specified under Parts 4-6 and 4-7 for cleaning and sanitizing kitchenware and tableware must provide only single-use kitchenware, single-service articles, and single-use articles for use by food handlers, and single-service articles for use by consumers.<sup>P</sup>

#### 4-502.3 Single-Service and Single-Use Articles, Use Limitation

- (A) Single-service and single-use articles must not be reused.
- (B) The bulk milk container dispensing tube must be cut on the diagonal leaving no more than one inch protruding from the chilled dispensing head.

# 4-502.4 Shells, Use Limitation

Mollusk and crustacea shells must not be used more than once as serving containers.

4-6	Cleaning of Equipment and Utensils
Subparts	
4-601	Cleaning Objective for Equipment , Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils
4-602	Frequency
4-603	Methods

# 4-601 Cleaning Objective for Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils

- (A) Equipment, food-contact surfaces, and utensils must be clean to sight and touch. <sup>Pf</sup>
- (B) The food-contact surfaces of cooking equipment and pans must be kept free of encrusted grease deposits and other soil accumulations.
- (C) Nonfood-contact surfaces of equipment must be kept free of an accumulation of dust, dirt, food residue, and other debris.

#### 4-602 Frequency

# 4-602.1 Equipment Food-Contact Surfaces and Utensils

- (A) Equipment, food-contact surfaces, and utensils must be cleaned:
  - (1) Except as specified in ¶ (B) of this section, before each use with a different type of raw animal food such as beef, fish, lamb, pork, or poultry, <sup>P</sup>
  - (2) Each time there is a change from working with raw foods to working with ready-to-eat foods, <sup>P</sup>
  - (3) Between uses with raw fruits and vegetables and with TCS food, <sup>P</sup>
  - (4) Before using or storing a food temperature measuring device, <sup>P</sup> and
  - (5) At any time during the operation when contamination may have occurred.<sup>P</sup>

- (B) Subparagraph (A)(1) of this section does not apply if the utensils and food-contact surfaces of equipment are in contact with a succession of different types of raw meat and poultry each requiring a higher cooking temperature as specified under § 3-401.1 than the previous type.
- (C) Except as specified in ¶ (D) of this section, if used with TCS food, utensils and food-contact surfaces of equipment must be cleaned throughout the day at least every four hours.<sup>P</sup>
- (D) Surfaces of utensils and equipment contacting TCS food may be cleaned less frequently than every four hours if:
  - (1) In storage, containers of TCS food and their contents are maintained at temperatures specified under Chapter 3 and the containers are cleaned when they are empty,
  - (2) Utensils and equipment are used to prepare food in a refrigerated room or area that is maintained at one of the temperatures in the following chart and:
    - (a) The utensils and equipment are cleaned at the frequency in the following chart that corresponds to the temperature, and

Temperature	<b>Cleaning Frequency</b>
41°F (5.0°C) or below	24 hours
> 41°F-45°F (>5.0°C-7.2°C)	20 hours
> 45°F-50°F (>7.2°C-10.0°C)	16 hours
> 50°F-55°F (>10.0°C-12.8°C)	10 hours

- (b) The cleaning frequency based on the ambient temperature of the refrigerated room or area is documented in the food establishment.
- (3) Containers in serving situations such as salad bars, delis, and cafeteria lines that hold ready-to-eat TCS food that is maintained at the temperatures specified under Chapter 3, are intermittently combined with additional supplies of the same food that is at the required temperature, and the containers are cleaned at least every 24 hours,
- (4) Temperature measuring devices are maintained in contact with food, such as when left in a container of deli food or in a roast, held at temperatures specified under Chapter 3,
- (5) Equipment is used for storage of packaged or unpackaged food, such as a reach-in refrigerator, and the equipment is cleaned at a frequency necessary to preclude accumulation of soil residues,
- (6) The cleaning schedule is approved based on consideration of:
  - (a) Characteristics of the equipment and its use,
  - (b) The type of food involved,

- (c) The amount of food residue accumulation, and
- (d) The temperature at which the food is maintained during the operation and the potential for the rapid and progressive multiplication of pathogenic or toxigenic microorganisms that are capable of causing foodborne illness, or
- (7) In-use utensils are intermittently stored in a container of water in which the water is maintained at 135°F (57°C) or more and the utensils and container are cleaned at least every 24 hours or at a frequency necessary to preclude accumulation of soil residues.
- (E) Except when dry cleaning methods are used as specified under § 4-603.1, surfaces of utensils and equipment contacting food that is not TCS food must be cleaned:
  - (1) At any time when contamination may have occurred,
  - (2) At least every 24 hours for iced tea dispensers and consumer self-service utensils such as tongs, scoops, or ladles,
  - (3) Before restocking consumer self-service equipment and utensils such as condiment dispensers and display containers, and
  - (4) In equipment such as beverage dispensing nozzles and enclosed components of equipment such as cooking oil storage tanks and distribution lines, beverage and syrup dispensing lines or tubes, and coffee bean grinders:
    - (a) At a frequency specified by the manufacturer, or
    - (b) At a frequency necessary to preclude accumulation of soil, scale, or microbial growth.
  - (5) Equipment such as ice bins, ice makers, and water vending machines must be cleaned at a frequency necessary to preclude accumulation of soil, scale, or microbial growth.
- (F) To verify that the frequency of cleaning for ice bins, ice makers, and water vending machines is adequate, a food establishment that is packaging ice for human consumption must submit to an approved laboratory, once every six months, a sample of each type of finished product for microbiological analysis. The analysis must include testing for fecal coliform and total coliform organisms, and:
  - (1) If the test results in a positive sample, the unit must be taken out of service until such time a follow up test confirms the absence of total coliform.
  - (2) Records of sampling and analyses must be maintained for a period of not less than 2 years and made available to the Health Authority upon request.

# 4-602.2 Cooking and Baking Equipment

- (A) The food-contact surfaces of cooking and baking equipment must be cleaned at least every 24 hours. This section does not apply to hot oil cooking and filtering equipment if it is cleaned as specified in Subparagraph 4-602.1(D)(6).
- (B) The cavities and door seals of microwave ovens must be cleaned at least every 24 hours by using the manufacturer's recommended cleaning procedure.

# 4-602.3 Nonfood-Contact Surfaces

Nonfood-contact surfaces of equipment must be cleaned at a frequency necessary to preclude accumulation of soil residues.

4-603	Methods
4-603.1	Dry Cleaning

- (A) If used, dry cleaning methods such as brushing, scraping, and vacuuming must contact only surfaces that are soiled with dry food residues that are not TCS food.
- (B) Cleaning equipment used in dry cleaning food-contact surfaces must not be used for any other purpose.

# 4-603.2 Precleaning

- (A) Food debris on equipment and utensils must be scraped over a garbage receptacle or must be removed in a warewashing machine with a prewash cycle.
- (B) If necessary for effective cleaning, utensils and equipment must be preflushed, presoaked, or scrubbed with abrasives.

# 4-603.3 Loading of Soiled Items, Warewashing Machines

Soiled items to be cleaned in a warewashing machine must be loaded into racks, trays, or baskets or onto conveyors in a position that:

- (A) Exposes the items to the unobstructed spray from all cycles, and
- (B) Allows the items to drain.

# 4-603.4 Wet Cleaning

- (A) Utensils and food-contact surfaces of equipment must be effectively washed to remove or completely loosen soils by using the manual or mechanical means necessary such as the application of detergents containing wetting agents and emulsifiers; acid, alkaline, or abrasive cleaners; hot water; brushes; scouring pads; high-pressure sprays; or ultrasonic devices.
- (B) The washing procedures selected must be based on the type and purpose of the equipment or utensil, and on the type of soil to be removed.

# 4-603.5 Washing, Procedures for Alternative Manual Warewashing Equipment

If washing in sink compartments or a warewashing machine is impractical such as when the equipment is fixed or the utensils are too large, washing must be done by using alternative manual warewashing equipment as specified in  $\P$  4-301.2(C) in accordance with the following procedures:

- (A) Equipment must be disassembled as necessary to allow access of the detergent solution to all parts,
- (B) Equipment components and utensils must be scraped or rough cleaned to remove food particle accumulation, and
- (C) Equipment and utensils must be washed as specified under ¶ 4-603.4(A).

#### 4-603.6 Rinsing Procedures

Washed utensils and equipment must be rinsed so that abrasives are removed, and cleaning chemicals are removed or diluted, through the use of water or a detergent-sanitizer solution by using one of the following procedures:

- (A) Use of a distinct, separate water rinse after washing and before sanitizing if using:
  - (1) A three-compartment sink,
  - (2) Alternative manual warewashing equipment equivalent to a three-compartment sink as specified in ¶ 4-301.2(C), or
  - (3) A three-step washing, rinsing, and sanitizing procedure in a warewashing system for CIP equipment,
- (B) Use of a detergent-sanitizer as specified under § 4-501.15 if using:
  - (1) Alternative warewashing equipment as specified in ¶ 4-301.2(C) that is approved for use with a detergent-sanitizer, or
  - (2) A warewashing system for CIP equipment,
- (C) If using a warewashing machine that does not recycle the sanitizing solution as specified under ¶
   (D) of this section, or alternative manual warewashing equipment such as sprayers, use of a non-distinct water rinse that is:
  - (1) Integrated in the application of the sanitizing solution, and
  - (2) Wasted immediately after each application, or
- (D) If using a warewashing machine that recycles the sanitizing solution for use in the next wash cycle, use of a non-distinct water rinse that is integrated in the application of the sanitizing solution.

4-7	Sanitization of Equipment and Utensils
6 h h	
Subparts 4-701	Sanitization Objective for Food Contact Surfaces and Utansils
4-701	Sanitization Objective for Food-Contact Surfaces and Utensils Hot Water and Chemical Sanitization Methods
4-702	not water and chemical samulation methods

# 4-701 Sanitization Objective for Food-Contact Surfaces and Utensils4-701.1 Frequency Before Use After Cleaning

Utensils and food-contact surfaces of equipment must be sanitized before use after cleaning.<sup>P</sup>

# 4-702 Hot Water and Chemical Sanitization Methods

After being cleaned, utensils and food-contact surfaces of equipment must be sanitized in:

- (A) Hot water manual operations by immersion for at least 30 seconds and as specified under § 4-501.11, <sup>P</sup>
- (B) Hot water mechanical operations by being cycled through equipment that is set up as specified under §§ 4-501.5, 4-501.12, and 4-501.13 and achieving a utensil surface temperature of 160°F (71°C) as measured by an irreversible registering temperature indicator, <sup>P</sup> or
- (C) Chemical manual or mechanical operations, including the application of sanitizing chemicals by immersion, manual swabbing, brushing, or pressure spraying methods, using a solution as specified under § 4-501.14. Contact times must be consistent with those on EPA-registered label use instructions by providing:
  - (1) Except as specified under Subparagraph (C)(2) of this section, a contact time of at least ten (10) seconds for a chlorine solution specified under ¶ 4-501.14(A), <sup>P</sup>
  - (2) A contact time of at least seven seconds for a chlorine solution of 50 mg/L that has a pH of 10 or less and a temperature of at least 100°F (38°C) or a pH of 8 or less and a temperature of at least 75°F (24°C), <sup>P</sup>
  - (3) A contact time of at least 30 seconds for other chemical sanitizing solutions, <sup>P</sup> or
  - (4) A contact time used in relationship with a combination of temperature, concentration, and pH that, when evaluated for efficacy, yields sanitization as defined in ¶ 1-201.<sup>P</sup>

4-8	Laundering
Subparts	
4-801	Laundering Objective for Clean Linens
4-802	Frequency Specifications
4-803	Methods

# 4-801 Laundering Objective for Clean Linens

Clean linens must be free from food residues and other soiling matter.

# 4-802 Frequency Specifications

- (A) Linens that do not come in direct contact with food must be laundered between operations if they become wet, sticky, or visibly soiled.
- (B) Cloth gloves used as specified in ¶ 3-304.5(D) must be laundered before being used with a different type of raw animal food such as beef, fish, lamb, pork or poultry.
- (C) Linens that are used as specified under § 3-304.3 and cloth napkins must be laundered between each use.
- (D) Wet wiping cloths must be laundered daily.
- (E) Dry wiping cloths must be laundered as necessary to prevent contamination of food and clean serving utensils.

# 4-803 Methods

# 4-803.1 Storage of Soiled Linens

Soiled linens must be kept in clean, nonabsorbent receptacles or clean, washable laundry bags and stored and transported to prevent contamination of food, clean equipment, clean utensils, and single-service and single-use articles.

# 4-803.2 Mechanical Washing

- (A) Except as specified in ¶ (B) of this section, linens must be mechanically washed.
- (B) In food establishments in which only wiping cloths are laundered as specified in ¶4- 301.5(B), the wiping cloths may be laundered in a mechanical washer, sink designated only for laundering wiping cloths, or a warewashing or food preparation sink that is cleaned as specified under § 4-501.4.

# 4-803.3 Use of Laundry Facilities

- (A) Except as specified in ¶ (B) of this section, laundry facilities on the premises of a food establishment must be used only for the washing and drying of items used in the operation of the establishment.
- (B) Separate laundry facilities located on the premises for the purpose of general laundering such as for institutions providing boarding and lodging may also be used for laundering food establishment items.

4-9	Protection of Clean Items	
Subparts		
4-901	Drying	
4-902	Lubricating and Reassembling	
4-903	Storing	
4-904	Preventing Contamination	

# 4-901Drying4-901.1Equipment and Utensils, Air-Drying Required

After cleaning and sanitizing, equipment and utensils:

- (A) Shall be air-dried or used after adequate draining as specified in the first paragraph of 40 CFR 180.940 *Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (food-contact surface sanitizing solutions)*, before contact with food, and
- (B) May not be cloth dried except that utensils that have been air-dried may be polished with cloths that are maintained clean and dry.

# 4-901.2 Wiping Cloths, Air-Drying Locations

Wiping cloths laundered in a food establishment that does not have a mechanical clothes dryer as specified in ¶ 4-301.5(B) must be air-dried in a location and in a manner that prevents contamination of food, equipment, utensils, linens, and single-service and single-use articles and the wiping cloths. This section does not apply if wiping cloths are stored after laundering in a sanitizing solution as specified under § 4-501.14.

# 4-902 Lubricating and Reassembling

# 4-902.1 Food-Contact Surfaces

Lubricants as specified under § 7-205 must be applied to food-contact surfaces that require lubrication in a manner that does not contaminate the food-contact surfaces.

# 4-902.2 Equipment

Equipment must be reassembled so that food-contact surfaces are not contaminated.

# 4-903 Storing4-903.1 Equipment, Utensils, Linens, and Single- Service and Single-Use Articles

- (A) Except as specified in ¶ (D) of this section, cleaned and sanitized equipment and utensils, laundered linens, and single-service and single-use articles must be stored:
  - (1) In a clean, dry location,
  - (2) Where they are not exposed to splash, dust, or other contamination, and

- (3) At least 6 inches (15 cm) above the floor.
- (B) Clean equipment and utensils must be stored as specified under ¶ (A) of this section and must be stored:
  - (1) In a self-draining position that allows air drying, and
  - (2) Covered or inverted.
- (C) Single-service and single-use articles must be stored as specified under ¶(A) of this section and must be kept in the original protective package or stored by using other means that afford protection from contamination until used.
- (D) Items that are kept in closed packages may be stored less than 6 inches (15 cm) above the floor on dollies, pallets, racks, and skids that are designed as specified under § 4- 204.23.

# 4-903.2 Prohibitions

- (A) Except as specified in ¶ (B) of this section, cleaned and sanitized equipment and utensils, laundered linens, and single-service and single-use articles must not be stored:
  - (1) In locker rooms,
  - (2) In restrooms,
  - (3) In garbage rooms,
  - (4) In mechanical rooms,
  - (5) Under sewer lines that are not shielded to intercept potential drips,
  - (6) Under leaking water lines including leaking automatic fire sprinkler heads or under lines on which water has condensed,
  - (7) Under open stairwells, or
  - (8) Under other sources of contamination.
- (B) Laundered linens and single-service and single-use articles that are packaged or in a facility such as a cabinet may be stored in a locker room.

# 4-904 Preventing Contamination

# 4-904.1 Kitchenware and Tableware

(A) Single-service and single-use articles and cleaned and sanitized utensils must be handled, displayed, and dispensed so that contamination of food and lip-contact surfaces is prevented.

- (B) Knives, forks, and spoons that are not prewrapped must be presented so that only the handles are touched by food handlers and by consumers if consumer self-service is provided.
- (C) Except as specified under ¶ (B) of this section, single-service articles that are intended for food or lip-contact must be furnished for consumer self-service with the original individual wrapper intact or from an approved dispenser.

# 4-904.2 Soiled and Clean Tableware

Soiled tableware must be removed from consumer eating and drinking areas and handled so that clean tableware is not contaminated.

# 4-904.3 Preset Tableware

- (A) Except as specified in ¶ (B) of this section, tableware that is preset must be protected from contamination by being wrapped, covered, or inverted.
- (B) Preset tableware may be exposed if:
  - (1) Unused settings are removed when a consumer is seated, or
  - (2) Settings not removed when a consumer is seated are cleaned and sanitized before further use.

# 4-904.4 Rinsing Equipment and Utensils after Cleaning and Sanitizing

After being cleaned and sanitized, equipment and utensils must not be rinsed before air drying or use unless:

- (A) The rinse is applied directly from a potable water supply by a warewashing machine that is maintained and operated as specified under Subparts 4-204 and 4-501, and
- (B) The rinse is applied only after the equipment and utensils have been sanitized by the application of hot water or by the application of a chemical sanitizer solution whose EPA-registered label use instructions call for rinsing off the sanitizer after it is applied in a commercial warewashing machine.

5-1	Water
Subparts	
Subparts	
5-101	Source
5-102	Quality
5-103	Quantity and Availability
5-104	Distribution, Delivery, and Retention

# 5-101Source5-101.1Approved System

Drinking water must be obtained from an approved source that is:

- (A) A public water system meeting NRS 445A, NAC 445A and 40 CFR 141, <sup>P</sup> or
- (B) A non-public water system that meets state standards and requires: <sup>P</sup>
  - (1) Sampling and testing at least annually or as required by the state drinking water standards, and
  - (2) Test results for water analysis to be retained in the food establishment, or as required by law, or
- (C) Bottled drinking water that meets the requirements in 5-101.3.<sup>P</sup>

# 5-101.2 System Flushing and Disinfection

A drinking water system must be flushed and disinfected before being placed in service after construction, repair, modification, or after an emergency situation, such as a flood, that may introduce contaminants to the system.<sup>P</sup>

# 5-101.3 Bottled Drinking Water

Bottled drinking water used or sold in a food establishment must be obtained from an approved source in accordance with 21 CFR 129 *Processing and Bottling of Bottled Drinking Water* and 21 CFR 165.110 *Bottled Water*.<sup>P</sup>

# 5-102 Quality

# 5-102.1 Standards

Except as specified under § 5-102.2:

- (A) Water from a public water system must meet 40 CFR 141 *National Primary Drinking Water Regulations* and state drinking water quality standards, <sup>P</sup> and
- (B) Water from a non-public water system must meet state drinking water quality standards.<sup>P</sup>

# 5-102.2 Non-Drinking Water

- (A) A non-drinking water supply must be used only if its use is approved.<sup>P</sup>
- (B) Non-drinking water must be used only for non-culinary purposes such as air conditioning, non-food equipment cooling, irrigation, and fire protection.<sup>P</sup>

# 5-102.3 Sampling

Except when used as specified under § 5-102.2, water from a non-public water system must be sampled and tested at least annually and as required by the water quality standard regulations for Nevada.<sup>Pf</sup>

# 5-102.4 Sample Report

The most recent sample report for the non-public water system must be retained on file in the food establishment or the report must be maintained as specified by water quality standard regulations for Nevada.

#### 5-103 Quantity and Availability 5-103.1 Capacity

- (A) The water source and system must be of sufficient capacity to meet the peak water demands of the food establishment.<sup>Pf</sup>
- (B) Hot water generation and distribution systems must be sufficient to meet the peak hot water demands throughout the food establishment. The Health Authority may require an assessment by a professional engineer or a licensed plumbing contractor to determine sufficient hot water capacity if peak demands cannot be met. <sup>Pf</sup>

# 5-103.2 Pressure

Water under pressure must be provided to all fixtures, equipment, and non-food equipment that are required to use water except that water supplied as specified under  $\P\P$  5-104.2(A) and (B) to a temporary food establishment or in response to a temporary interruption of a water supply need not be under pressure.<sup>Pf</sup>

- 5-104 Distribution, Delivery, and Retention
- 5-104.1 System

Water must be received from the source through the use of:

- (A) An approved public water main, <sup>Pf</sup> or
- (B) One or more of the following that must be constructed, maintained, and operated according to law: <sup>Pf</sup>
  - (1) Non-public water main, water pumps, pipes, hoses, connections, and other appurtenances, <sup>Pf</sup>
  - (2) Water transport vehicles, <sup>Pf</sup> or
  - (3) Water containers. <sup>Pf</sup>

#### 5-104.2 Alternative Water Supply

Water meeting the requirements specified under §§ 5-101, 5-102, and 5-103 must be made available for a mobile facility, for a temporary food establishment without a permanent water supply, and for a food establishment with a temporary interruption of its water supply through:

- (A) A supply of containers of commercially bottled drinking water, <sup>Pf</sup>
- (B) One or more closed portable water containers, <sup>Pf</sup>
- (C) An enclosed vehicular water tank, <sup>Pf</sup>
- (D) An on-premises water storage tank, <sup>Pf</sup> or
- (E) Piping, tubing, or hoses connected to an adjacent approved source. <sup>Pf</sup>

5-2	Plumbing System
Subparts 5-201 5-202 5-203 5-204 5-205	Approved Materials Design, Construction, and Installation Numbers and Capacities Location and Placement Operation and Maintenance

#### 5-201 Approved Materials

- (A) A plumbing system and hoses conveying water must be constructed and repaired with approved materials according to law.<sup>P</sup>
- (B) A water filter must be made of approved materials.<sup>P</sup>

# 5-202 Design, Construction, and Installation

# 5-202.1 Approved System and Cleanable Fixtures

- (A) A plumbing system must be designed, constructed, and installed according to law.<sup>P</sup>
- (B) A plumbing fixture such as a handwashing sink, toilet, or urinal must be easily cleanable.

# 5-202.2 Handwashing Sink, Installation

- (A) Handwashing sinks must be equipped to provide water at a temperature of at least 100°F (38°C) through a mixing valve or combination faucet. <sup>Pf</sup>
- (B) A steam mixing valve must not be used at a handwashing sink.
- (C) A self-closing, slow-closing, or metering faucet must provide a flow of water for at least 15 seconds without the need to reactivate the faucet.
- (D) An automatic handwashing facility must be installed in accordance with the manufacturer's instructions.

# 5-202.3 Backflow Prevention, Air Gap

An air gap between the water supply inlet and the flood level rim of the plumbing fixture, equipment, or non-food equipment must be at least twice the diameter of the water supply inlet and must not be less than 1 inch (25 mm).<sup>P</sup>

# 5-202.4 Backflow Prevention Device, Design Standard

A backflow or back siphonage prevention device installed on a water supply system must meet American Society of Sanitary Engineering (ASSE) standards for construction, installation, maintenance, inspection, and testing for that specific application and type of device.<sup>P</sup>

# 5-202.5 Conditioning Device, Design

A water filter, screen, and other water conditioning device installed on water lines must be designed to facilitate disassembly for periodic servicing and cleaning. A water filter element must be of the replaceable type.

# 5-203Numbers and Capacities5-203.1Handwashing Sinks

Plumbing Code. Pf

(A) Except as specified in ¶¶ (B) and (C) of this section, each food establishment must have a number of handwashing sinks necessary for convenient use by employees, in areas specified under §5-204.1, and no less than the number of handwashing sinks required by the Uniform

(B) If approved and capable of removing the types of soils encountered in the food operations involved, automatic handwashing facilities may be substituted for handwashing sinks in a food establishment that has at least one handwashing sink.

# 5-203.2 Toilets and Urinals

At least one toilet, and not fewer than the toilets required by the Uniform Plumbing Code, must be provided.

# 5-203.3 Service Sink

- (A) At least one service sink or one curbed cleaning facility equipped with a floor drain must be provided and conveniently located for the cleaning of mops or similar wet floor cleaning tools and for the disposal of mop water and similar liquid wastewater.
- (B) Toilets, urinals, or sinks normally used for preparing food or washing utensils or equipment may not be used as a service sink for the disposal of commercial or industrial wastewater such as mop water.

# 5-203.4 Backflow Prevention Device, When Required

A plumbing system must be installed to preclude backflow of a solid, liquid, or gas contaminant into the water supply system at each point of use at the food establishment, including on a hose bibb if a hose is attached or on a hose bibb if a hose is not attached and backflow prevention is required by law, by:

- (A) Providing an air gap as specified under §5-202.3, <sup>P</sup> or
- (B) Installing an approved backflow prevention device as specified under §5-202.4.<sup>P</sup>

# 5-203.5 Backflow Prevention Device, Carbonator

- (A) If not provided with an air gap as specified under §5-202.3, a dual check valve with an intermediate vent preceded by a screen of not less than 100 mesh to 1 inch (100 mesh to 25.4 mm) must be installed upstream from a carbonating device and downstream from any copper in the water supply line.<sup>P</sup>
- (B) A dual check valve attached to the carbonator need not be of the vented type if an air gap or vented backflow prevention device has been otherwise provided as specified under ¶ (A) of this section.

# 5-204 Location and Placement

# 5-204.1 Handwashing Sinks

A handwashing sink must be located:

(A) To allow convenient use by employees in food preparation, food dispensing, and warewashing areas, <sup>Pf</sup> and

(B) In, or immediately adjacent to, restrooms. <sup>Pf</sup>

# 5-204.2 Backflow Prevention Device, Location

A backflow prevention device must be located so that it may be serviced and maintained.

# 5-204.3 Conditioning Device, Location

A water filter, screen, and other water conditioning device installed on water lines must be located to facilitate disassembly for periodic servicing and cleaning.

# 5-205 Operation and Maintenance

# 5-205.1 Using a Handwashing Sink

- (A) A handwashing sink must be maintained so that it is accessible at all times for employee use. <sup>Pf</sup>
- (B) A handwashing sink must not be used for purposes other than handwashing. <sup>Pf</sup>
- (C) An automatic handwashing facility must be used in accordance with manufacturer's instructions. <sup>Pf</sup>

# 5-205.2 Prohibiting a Cross Connection

- (A) A person must not create a cross connection by connecting a pipe or conduit between the drinking water system and a non-drinking water system or a water system of unknown quality.<sup>P</sup>
- (B) The piping of a non-drinking water system must be durably identified so that it is readily distinguishable from piping that carries drinking water.<sup>Pf</sup>

# 5-205.3 Scheduling Inspection and Service for a Water System Device

A device such as a water treatment device or backflow preventer must be scheduled for inspection and service in accordance with manufacturer's instructions and as necessary to prevent device failure based on local water conditions. Records demonstrating inspection and service must be maintained or obtained by the PIC and made available to the Health Authority upon request.<sup>Pf</sup>

# 5-205.4 Water Reservoir of Fogging Devices, Cleaning

- (A) A reservoir that is used to supply water to a device such as a fogger must be:
  - (1) Maintained in accordance with manufacturer's specifications, <sup>P</sup> and
  - (2) Cleaned in accordance with manufacturer's specifications or according to the procedures specified under ¶ (B) of this section, whichever is more stringent.<sup>P</sup>
- (B) Cleaning procedures must include at least the following steps and must be conducted at least once a week:

- (1) Draining and complete disassembly of the water and aerosol contact parts, <sup>P</sup>
- (2) Brush-cleaning the reservoir, aerosol tubing, and discharge nozzles with a suitable detergent solution, <sup>P</sup>
- (3) Flushing the complete system with water to remove the detergent solution and particulate accumulation, <sup>P</sup> and
- (4) Rinsing by immersing, spraying, or swabbing the reservoir, aerosol tubing, and discharge nozzles with at least 50 mg/L hypochlorite solution.<sup>P</sup>

#### 5-205.5 System Maintained in Good Repair

A plumbing system must be:

- (A) Repaired according to law, <sup>P</sup> and
- (B) Maintained in good repair.

Mobile Water Tank and Mobile Food Establishment Water Tank	
Approved Materials	
Design and Construction	
Numbers and Capacities	
Operation and Maintenance	
	Approved Materials Design and Construction Numbers and Capacities

# 5-301 Approved Materials

Materials that are used in the construction of a mobile water tank, mobile unit water tank, and appurtenances must be:

(A) Safe, <sup>P</sup>

- (B) Durable, corrosion-resistant, and nonabsorbent, and
- (C) Finished to have a smooth, easily cleanable surface.

#### 5-302 Design and Construction

# 5-302.1 Enclosed System, Sloped to Drain

A mobile water tank must be:

- (A) Enclosed from the filling inlet to the discharge outlet, and
- (B) Sloped to an outlet that allows complete drainage of the tank.

# 5-302.2 Inspection and Cleaning Port, Protected and Secured

If a water tank is designed with an access port for inspection and cleaning, the opening must be in the top of the tank and:

- (A) Flanged upward at least ½ inch (13 mm), and
- (B) Equipped with a port cover assembly that is:
  - (1) Provided with a gasket and a device for securing the cover in place, and
  - (2) Flanged to overlap the opening and sloped to drain.

# 5-302.3 V Type Threads, Use Limitation

A fitting with V type threads on a water tank inlet or outlet must be allowed only when a hose is permanently attached.

# 5-302.4 Tank Vent, Protected

If provided, a water tank vent must terminate in a downward direction and must be covered with:

- (A) 16 mesh to 1 inch (16 mesh to 25.4 mm) screen or equivalent when the vent is in a protected area, or
- (B) A protective filter when the vent is in an area that is not protected from windblown dirt and debris.

# 5-302.5 Inlet and Outlet, Sloped to Drain

- (A) A water tank and its inlet and outlet must be sloped to drain.
- (B) A water tank inlet must be positioned so that it is protected from contaminants such as waste discharge, road dust, oil, or grease.

# 5-302.6 Hose, Construction and Identification

A hose used for conveying drinking water from a water tank must be:

- (A) Safe,<sup>P</sup>
- (B) Durable, corrosion-resistant, and nonabsorbent,
- (C) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition,
- (D) Finished with a smooth interior surface, and
- (E) Clearly and durably identified as to its use if not permanently attached.

# 5-303Numbers and Capacities5-303.1Filter, Compressed Air

A filter that does not pass oil or oil vapors must be installed in the air supply line between the compressor and the drinking water system when compressed air is used to pressurize the water tank system.

# 5-303.2 Protective Cover or Device

A cap and keeper chain, closed cabinet, closed storage tube, or other approved protective cover or device must be provided for a water inlet, outlet, and hose.

# 5-303.3 Mobile Food Establishment Tank Inlet

A mobile food establishment's water tank inlet must be:

- (A) Three-fourths inch (19.1 mm) in inner diameter or less, and
- (B) Provided with a hose connection of a size or type that will prevent its use for any other service.

# 5-304 Operation and Maintenance

# 5-304.1 System Flushing and Sanitization

A water tank, pump, and hoses must be flushed and sanitized before being placed in service after construction, repair, modification, and periods of nonuse.<sup>P</sup>

# 5-304.2 Using a Pump and Hoses, Backflow Prevention

A person must operate a water tank, pump, and hoses so that backflow and other contamination of the water supply are prevented.

# 5-304.3 Protecting Inlet, Outlet, and Hose Fitting

If not in use, a water tank and hose inlet and outlet fitting must be protected using a cover or device as specified under § 5-303.2.

# 5-304.4 Tank, Pump, and Hoses, Dedication

- (A) Except as specified in ¶ (B) of this section, a water tank, pump, and hoses used for conveying drinking water must be used for no other purpose.<sup>P</sup>
- (B) Water tanks, pumps, and hoses approved for liquid foods may be used for conveying drinking water if they are cleaned and sanitized before they are used to convey water.

5-4	Sewage, Other Liquid Waste, and Rainwater	
Subparts		
5-401	Mobile Holding Tank	
5-402	Retention, Drainage, and Delivery	
5-403	Disposal Facility	

# 5-401Mobile Holding Tank5-401.1Capacity and Drainage

A sewage holding tank in a mobile unit must be:

- (A) Sized 15 percent larger in capacity than the water supply tank(s), and
- (B) Sloped to a drain that is 1 inch (25 mm) in inner diameter or greater and equipped with a shutoff valve.

# 5-402 Retention, Drainage, and Delivery

# 5-402.1 Establishment Drainage System

Food establishment drainage systems that convey sewage, including grease interceptors, must be designed and installed as specified under  $\P$  5-202.1(A).

# 5-402.2 Backflow Prevention

- (A) Except as specified in ¶¶ (B), and (C) of this section, a direct connection must not exist between the sewage system and a drain originating from equipment in which food, portable equipment, or utensils are placed.<sup>P</sup>
- (B) Paragraph (A) of this section does not apply to floor drains that originate in refrigerated spaces that are constructed as an integral part of the building.
- (C) If allowed by law, a warewashing machine may have a direct connection between its waste outlet and a floor drain when the machine is located within 5 feet (1.5 m) of a trapped floor drain and the machine outlet is connected to the inlet side of a properly vented floor drain trap.

# 5-402.3 Grease Interceptor

If present, a grease interceptor must be located to be easily accessible for cleaning, maintenance, and inspections.

# 5-402.4 Conveying Sewage

Sewage must be conveyed to the point of disposal through an approved sanitary sewage system or other approved system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law. <sup>P</sup>

# 5-402.5 Removing Mobile Unit Waste

Sewage and other liquid wastes must be removed from a mobile unit at an approved waste servicing area or by a permitted liquid waste hauler. The sewage must be removed in such a way that a public health hazard or nuisance is not created.<sup>Pf</sup>

# 5-402.6 Flushing a Waste Retention Tank

A tank for liquid waste retention must be thoroughly flushed and drained in a sanitary manner during the servicing operation.

# 5-403 Disposal Facility

# 5-403.1 Approved Sewage Disposal System

Sewage must be disposed through an approved facility that is:

- (A) A public sewage treatment plant, <sup>P</sup> or
- (B) A permitted individual sewage disposal system that is sized, constructed, maintained, and operated according to law.<sup>P</sup>

# 5-403.2 Other Liquid Wastes and Rainwater

Condensate drainage and other non-sewage liquids and rainwater must be drained from the point of discharge to disposal according to law.

5-5	Refuse, Recyclables, and Returnables	
Subparts		
5-501	Facilities on the Premises	
5-502	Removal	
5-503	Community or Individual Facilities for Disposal and Recycling	

# 5-501 Facilities on the Premises

# 5-501.1 Indoor Storage Area

If located within the food establishment, a storage area for refuse, recyclables, and returnables must meet the requirements specified under Subparts 6-101 and 6-201 and §§ 6-202.5 and 6-202.6.

# 5-501.2 Outdoor Storage Surface

An outdoor storage surface for refuse, recyclables, and returnables must be constructed of nonabsorbent material such as concrete or asphalt and must be of a cleanable design, durable, and sloped to drain.

# 5-501.3 Outdoor Enclosure

If used, an outdoor enclosure for refuse, recyclables, and returnables must be constructed of durable and cleanable materials.

# 5-501.4 Receptacles

- (A) Except as specified in ¶ (B) of this section, receptacles and waste handling units for refuse, recyclables, and returnables and for use with materials containing food residue must be durable, cleanable, insect- and rodent-resistant, leakproof, and nonabsorbent.
- (B) Plastic bags and wet strength paper bags may be used to line receptacles for storage inside the food establishment, or within closed outside receptacles.

# 5-501.5 Receptacles in Vending Machines

Except for a receptacle for beverage bottle crown closures, a refuse receptacle must not be located within a vending machine.

# 5-501.6 Outside Receptacles

- (A) Receptacles and waste handling units for refuse, recyclables, and returnables used with materials containing food residue and used outside the food establishment must be designed and constructed to have tight-fitting lids, doors, or covers.
- (B) Receptacles and waste handling units for refuse and recyclables such as an on-site compactor must be installed so that accumulation of debris and insect and rodent attraction and harborage are minimized and effective cleaning is facilitated around and under the unit, if the unit is not installed flush with the base pad.

# 5-501.7 Storage Areas, Rooms, and Receptacles, Capacity and Availability

- (A) Interior and exterior storage areas, enclosures, and receptacles used to hold refuse, recyclables, and returnables must be of sufficient capacity to prevent nuisance conditions.
- (B) A minimum of one receptacle must be provided in each area of the food establishment or premises where refuse is generated or commonly discarded, or where recyclables or returnables are placed.
- (C) If disposable towels are used at handwashing lavatories, a waste receptacle must be located at each restroom sink or group of adjacent sinks.

# 5-501.8 Restroom Receptacle, Covered

A restroom used by females must be provided with a covered receptacle for sanitary napkins.

# 5-501.9 Cleaning Implements and Supplies

(A) Except as specified in ¶ (B) of this section, suitable cleaning implements and supplies such as high-pressure pumps, hot water, steam, and detergent must be provided as necessary for

effective cleaning of receptacles and waste handling units for refuse, recyclables, and returnables.

(B) If approved, off-premises-based cleaning services may be used.

# 5-501.10 Storage Areas, Redeeming Machines, Receptacles and Waste Handling Units, Location

- (A) An area designated for refuse, recyclables, returnables, and, except as specified in ¶(B) of this section, a redeeming machine for recyclables or returnables must be located so that it is separate from food, equipment, utensils, linens, and single-service and single-use articles and a public health hazard or nuisance is not created.
- (B) A redeeming machine may be located in the packaged food storage area or consumer area of a food establishment if food, equipment, utensils, linens, and single-service and single-use articles are not subject to contamination from the machines and a public health hazard or nuisance is not created.
- (C) The location of receptacles and waste handling units for refuse, recyclables, and returnables must not create a public health hazard or nuisance or interfere with the cleaning of adjacent space.

# 5-501.11 Storing Refuse, Recyclables, and Returnables

Refuse, recyclables, and returnables shall be stored in receptacles or waste handling units so that they are inaccessible to insects and rodents

# 5-501.12 Areas, Enclosures, and Receptacles, Good Repair

Storage areas, enclosures, and receptacles for refuse, recyclables, and returnables must be maintained in good repair.

# 5-501.13 Outside Storage Prohibitions

- (A) Except as specified in ¶ (B) of this section, refuse receptacles not meeting the requirements specified under ¶ 5-501.4(A) such as receptacles that are not rodent-resistant, unprotected plastic bags and paper bags, or baled units that contain materials with food residue must not be stored outside.
- (B) Cardboard or other packaging material that does not contain food residues and that is awaiting regularly scheduled delivery to a recycling or disposal site may be stored outside without being in a covered receptacle if it is stored so that it does not create a rodent harborage problem.

# 5-501.14 Covering Receptacles

Receptacles and waste handling units for refuse, recyclables, and returnables must be kept covered:

(A) Inside the food establishment if the receptacles and units:

- (1) Contain food residue and are not in continuous use, or
- (2) After they are filled, and
- (B) With tight-fitting lids or doors if kept outside the food establishment.

# 5-501.15 Using Drain Plugs

Drains in receptacles and waste handling units for refuse, recyclables, and returnables must have drain plugs in place.

# 5-501.16 Maintaining Refuse Areas and Enclosures

Storage areas and enclosures for refuse, recyclables, or returnables must be maintained clean and free of unnecessary items, as specified under § 6-501.15.

# 5-501.17 Cleaning Receptacles

- (A) Receptacles and waste handling units for refuse, recyclables, and returnables must be thoroughly cleaned in a way that does not contaminate food, equipment, utensils, linens, or single-service and single-use articles, and wastewater must be disposed of as specified under § 5-402.4.
- (B) Soiled receptacles and waste handling units for refuse, recyclables, and returnables must be cleaned at a frequency necessary to prevent them from developing a buildup of soil or becoming attractants for insects and rodents.

#### 5-502 Removal 5-502.1 Frequency

Refuse, recyclables, and returnables must be removed from the premises at a frequency that will minimize the development of objectionable odors and other conditions that attract or harbor insects and rodents.

# 5-502.2 Receptacles or Vehicles

Refuse, recyclables, and returnables must be removed from the premises by way of:

- (A) Portable receptacles that are constructed and maintained according to law, or
- (B) A transport vehicle that is constructed, maintained, and operated according to law.

# 5-503 Community or Individual Facilities for Disposal and Recycling

Solid waste must be recycled or disposed of in an approved recycling or refuse facility; or disposed of in an individual refuse facility such as a landfill or incinerator which is sized, constructed, maintained, and operated according to law.

# **Chapter 6** Facilities

Parts	
6-1	Materials for Construction and Repair
6-2	Design, Construction, and Installation
6-3	Numbers and Capacities
6-4	Location and Placement
6-5	Maintenance and Operation

6-1	Materials for Construction and Repair
Subparts 6-101	Indoor Area Surface Characteristics
6-102	Outdoor Area Surface Characteristics

# 6-101 Indoor Area Surface Characteristics

- (A) Except as specified in ¶ (B) of this section, materials for indoor floor, wall, and ceiling surfaces under conditions of normal use must be:
  - (1) Smooth, durable, and easily cleanable for areas where food establishment operations are conducted,
  - (2) Closely woven and easily cleanable carpet where carpeted areas are allowed, and
  - (3) Nonabsorbent for areas subject to moisture such as food preparation areas, walk-in refrigerators, warewashing areas, restrooms, mobile unit servicing areas, and areas subject to flushing or spray cleaning methods.

# (B) In a Temporary food establishment:

- (1) If graded to drain, a floor may be concrete, machine-laid asphalt, dirt or gravel if it is covered with mats, removable platforms, duckboards, or other approved materials that are effectively treated to control dust and mud, and
- (2) Walls and ceilings must be constructed of a material that protects the interior from the weather and windblown dust and debris.

# 6-102 Outdoor Area Surface Characteristics

- (A) The outdoor walking and driving areas must be surfaced with concrete, asphalt, gravel or other materials that have been effectively treated to minimize dust, facilitate maintenance, and prevent muddy conditions.
- (B) Exterior surfaces of buildings and Mobile Units must be of weather-resistant materials.

(C) Outdoor storage areas for refuse, recyclables, or returnables must be of materials specified under §§ 5-501.2 and 5-501.3.

Subparts 6-201 Cleanability 6-202 Functionality	6-2	Design, Construction, and Installation
	Subparts	
6-202 Functionality	6-201	Cleanability
	6-202	Functionality

# 6-201 Cleanability6-201.1 Floors, Walls, and Ceilings

Except as specified under § 6-201.4 and except for anti-slip floor coverings or applications that may be used for safety reasons, floors, floor coverings, walls, wall coverings, and ceilings must be designed, constructed, and installed so they are smooth, easily cleanable.

# 6-201.2 Floors, Walls, and Ceilings, Utility Lines

- (A) Utility service lines and pipes must not be unnecessarily exposed.
- (B) Exposed utility service lines and pipes must be installed so they do not obstruct or prevent cleaning of the floors, walls, or ceilings.
- (C) Exposed horizontal utility service lines and pipes must not be installed on the floor.

# 6-201.3 Floor and Wall Junctures, Coved, and Enclosed or Sealed

- (A) In food establishments in which cleaning methods other than water flushing are used for cleaning floors, the floor and wall junctures must be coved and closed to no larger than one thirty-second inch (1 mm).
- (B) The floors in food establishments in which water flush cleaning methods are used must be provided with drains and be graded to drain, and the floor and wall junctures must be coved and sealed.

# 6-201.4 Floor Carpeting, Restrictions and Installation

- (A) A floor covering such as carpeting or similar material must not be installed as a floor covering in food preparation areas, walk-in refrigerators, warewashing areas, restroom areas where handwashing sinks, toilets, and urinals are located, refuse storage rooms, or other areas where the floor is subject to moisture, flushing, or spray cleaning methods.
- (B) If carpeting is installed as a floor covering in areas other than those specified under ¶
   (A) of this section, it must be:
  - (1) Securely attached to the floor with a durable mastic, by using a stretch and tack method, or by another approved method, and

(2) Installed tightly against the wall under the coving or installed away from the wall with a space between the carpet and the wall and with the edges of the carpet secured by metal stripping or some other means.

# 6-201.5 Floor Covering, Mats and Duckboards

Mats and duckboards must be designed to be removable and easily cleanable.

# 6-201.6 Wall and Ceiling Coverings and Coatings

- (A) Wall and ceiling covering materials must be attached so that they are easily cleanable.
- (B) Except in areas used only for dry storage, concrete, porous blocks, or bricks used for indoor wall construction must be finished and sealed to provide a smooth, nonabsorbent, easily cleanable surface.

# 6-201.7 Walls and Ceilings, Attachments

- (A) Except as specified in ¶ (B) of this section, attachments to walls and ceilings such as light fixtures, mechanical room ventilation system components, vent covers, wall and ceiling mounted fans, decorative items, and other attachments must be easily cleanable and secured with no gaps.
- (B) In a consumer area, wall and ceiling surfaces and decorative items and attachments that are provided for ambiance need not meet this requirement if they are kept clean.

# 6-201.8 Walls and Ceilings, Studs, Joists, and Rafters

Except for temporary food establishments, studs, joists, and rafters must not be exposed in areas subject to moisture.

# 6-202 Functionality

# 6-202.1 Light Bulbs, Protective Shielding

- (A) Except as specified in ¶ (B) of this section, light bulbs must be shielded, coated, or otherwise shatter-resistant in areas where there is exposed food, clean equipment, utensils, and linens; or unwrapped single-service and single-use articles.
- (B) Shielded, coated, or otherwise shatter-resistant bulbs need not be used in areas used only for storing food in unopened packages, if:
  - (1) The integrity of the packages cannot be affected by broken glass falling onto them; and
  - (2) The packages are capable of being cleaned of debris from broken bulbs before the packages are opened.

(C) An infrared or other heat lamp must be protected against breakage by a shield surrounding and extending beyond the bulb so that only the face of the bulb is exposed.

# 6-202.2 Heating, Ventilating, Air Conditioning System Vents

Heating, ventilating, and air conditioning systems must be designed and installed so that make- up air intake and exhaust vents do not cause contamination of food, food-contact surfaces, equipment, or utensils.

# 6-202.3 Insect Control Devices, Design and Installation

- (A) Insect control devices that are used to electrocute or stun flying insects must be designed to retain the insect within the device.
- (B) Insect control devices must be installed so that:
  - (1) The devices are not located over a food handling or storage area, and
  - (2) Dead insects and insect fragments are prevented from being impelled onto or falling on food-contact surfaces, exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles.

# 6-202.4 Restrooms, Enclosed

A restroom located within a food preparation area must be completely enclosed and provided with a tight fitting and self-closing door. The restroom must be adequately vented as required by the International Building Code.

# 6-202.5 Outer Openings, Protected

- (A) Except as specified in ¶¶ (B), (C), and (E) and under ¶ (D) of this section, outer openings of a food establishment must be protected against the entry of insects and rodents by:
  - (1) Filling or closing holes and other gaps along floors, walls, and ceilings,
  - (2) Closed, tight-fitting windows, and
  - (3) Solid, self-closing, tight-fitting doors.
- (B) Paragraph (A) of this section does not apply if a food establishment opens into a larger structure, such as a mall, airport, or office building, or into an attached structure, such as a porch, and the outer openings from the larger or attached structure are protected against the entry of insects and rodents.
- (C) Exterior doors used as exits need not be self-closing if they are:
  - (1) Solid and tight-fitting,

- (2) Designated for use only when an emergency exists by the fire protection authority that has jurisdiction over the food establishment, and
- (3) Limited use so they are not used for entrance or exit from the building for purposes other than the designated emergency exit use.
- (D) Except as specified in ¶¶ (B) and (E) of this section, if the windows or doors of a food establishment, or of a larger structure within which a food establishment is located, are kept open for ventilation or other purposes or a temporary food establishment is not provided with windows and doors as specified under ¶ (A) of this section, the openings must be protected against the entry of insects and rodents by:
  - (1) 16 mesh to 1-inch (16 mesh to 25.4 mm) screens,
  - (2) Properly designed and installed air curtains to control flying insects, or
  - (3) Other effective means.
- (E) Paragraph (D) of this section does not apply if flying insects and other pests are absent due to the location of the establishment or other limiting conditions.

# 6-202.6 Exterior Walls and Roofs, Protective Barrier

Perimeter walls and roofs of a food establishment must effectively protect the facilities from the weather and the entry of insects, rodents, and other animals.

# 6-202.7 Outdoor Food Vending Areas, Overhead Protection

Except for machines that vend canned beverages, if located outside, a machine used to vend food must be provided with overhead protection.

# 6-202.8 Outdoor Servicing Areas, Overhead Protection

Servicing depot areas utilized for filling fresh water or the discharge of sewage or other liquid waste freshwater tanks must be provided with overhead protection unless otherwise protected using a closed system of hoses.

# 6-202.9 Outdoor Walking and Driving Surfaces, Graded to Drain

Exterior walking and driving surfaces must be graded to drain.

# 6-202.10 Outdoor Refuse Areas, Curbed and Graded to Drain

Outdoor refuse areas must be constructed in accordance with law and must be curbed and graded to a drain which collects and disposes of wastewater that results from the refuse and from cleaning the area and waste receptacles to the sanitary sewer or other approved sewer disposal system.

# 6-202.11 Private Homes and Living or Sleeping Quarters, Use Prohibition

A private home, a room used as living or sleeping quarters, or an area directly opening into a room used as living or sleeping quarters must not be used for conducting food establishment operations.<sup>P</sup>

# 6-202.12 Living or Sleeping Quarters, Separation

Living or sleeping quarters located on the premises of a food establishment such as those provided for lodging registration clerks or resident managers must be separated from rooms and areas used for food establishment operations by complete partitioning and solid self-closing doors.

6-3	Numbers and Capacities	
Subparts		
6-301	Handwashing Sinks	
6-302	Toilets and Urinals	
6-303	Lighting Intensity	
6-304	Mechanical Ventilation	
6-305	Designated Dressing Areas and Lockers	
6-306	Availability of Service Sinks	

# 6-301 Handwashing Sinks

# 6-301.1 Minimum Number

Handwashing sinks must be provided as specified under § 5-203.1.

# 6-301.2 Handwashing Cleanser, Availability

Each handwashing sink, or group of two adjacent handwashing sinks, must be provided with a supply of hand cleaning liquid or powder in an approved dispenser.<sup>Pf</sup>

# 6-301.3 Hand Drying Provision

Each handwashing sink, or group of two adjacent handwashing sinks, must be provided with individual, disposable towels stored in a sanitary manner.<sup>Pf</sup>

# 6-301.4 Handwashing Aids and Devices, Use Restrictions

A sink used for food preparation or utensil washing, or a service sink or curbed cleaning facility used for the disposal of mop water or similar wastes, must not be provided with the handwashing aids and devices required for a handwashing sink as specified under §§ 6-301.2 and 6-301.3 and ¶ 5-501.7(C).

# 6-301.5 Handwashing Signage

A sign or poster that notifies food handlers to wash their hands must be provided at all wall-mounted handwashing sinks used by food handlers and must be clearly visible to food handlers.

# 6-301.6 Disposable Towels, Waste Receptacle

A handwashing sink, or group of adjacent handwashing sinks, that is provided with disposable towels must be provided with an uncovered or hands-free waste receptacle as specified under ¶ 5-501.7(C).

# 6-302 Toilets and Urinals

# 6-302.1 Minimum Number

Toilets and urinals must be provided as specified under § 5-203.2.

# 6-302.2 Toilet Tissue, Availability

A supply of toilet tissue in a dispenser must be available at each toilet. Pf

# 6-303 Lighting Intensity

The light intensity must be:

- (A) At least ten foot candles (108 lux) at a distance of 30 inches (75 cm ) above the floor, in walk-in refrigeration units and dry food storage areas and in other areas and rooms during periods of use or cleaning,
- (B) At least 20 foot candles (215 lux):
  - (1) At a surface where food is provided for consumer self-service such as buffets and salad bars or where fresh produce or packaged foods are sold, offered or displayed for sale, or served,
  - (2) Inside equipment such as reach-in and under-counter refrigerators, and
  - (3) At a distance of 30 inches (75cm) above the floor in areas used for handwashing, warewashing, and equipment and utensil storage, and in restrooms, and,
- (C) At least 50 foot candles (540 lux) at a surface where a food handler is working with food or working with utensils or equipment such as knives, slicers, grinders, or saws where employee safety is a factor.

# 6-304 Mechanical Ventilation

If necessary to keep rooms free of excessive heat, steam, condensation, vapors, obnoxious odors, smoke, and fumes, mechanical ventilation of sufficient capacity must be provided.

# 6-305 Designated Dressing Areas and Lockers

(A) Dressing rooms or dressing areas must be designated and used if employees routinely change their clothes in the establishment.

(B) Lockers or other suitable facilities must be provided and used for the orderly storage of employees' clothing and other possessions, away from where food is prepared or unpackaged food is stored.

# 6-306 Availability of Service Sinks

A service sink or curbed cleaning facility must be provided as specified under ¶ 5-203.3(A).

6-4	Location and Placement
Subparts	
6-401	Conveniently Located Handwashing Sinks
6-402	Convenience and Accessibility of Toilet Rooms
6-403	Designated Areas for Employee Accommodations
6-404	Segregation and Location of Distressed Merchandise
6-405	Refuse, Recyclables, and Returnables Receptacles, Waste Handling Units, and Designated
	Storage Areas

# 6-401 Conveniently Located Handwashing Sinks

Handwashing sinks must be conveniently located as specified under § 5-204.1.

#### 6-402 Convenience and Accessibility of Restrooms

Restrooms must be conveniently located and accessible to employees during all hours of operation.

#### 6-403 Designated Areas for Employee Accommodations

- (A) Areas designated for employees to eat, drink, and use tobacco must be located so that food, equipment, linens, and single-service and single-use articles are protected from contamination.
- (B) Lockers or other suitable facilities must be located in a designated room or area where contamination of food, equipment, utensils, linens, and single-service and single-use articles cannot occur.

#### 6-404 Segregation and Location of Distressed Merchandise

Products that are held by the permit holder for credit, redemption, or return to the distributor, such as damaged, spoiled, or recalled products, must be segregated and held in designated areas that are separated from food, equipment, utensils, linens, and single-service and single-use articles. <sup>Pf</sup>

# 6-405 Refuse, Recyclables, and Returnables Receptacles, Waste Handling Units, and Designated Storage Areas

Storage areas, enclosures, receptacles, and waste handling units for storage of refuse, recyclables, and returnables must be located as specified under § 5-501.10.

6-5 Maintenance and Operation
Subpart
6-501 Premises, Structures, Attachments, and Fixtures—Methods

# 6-501Premises, Structures, Attachments, and Fixtures—Methods6-501.1Repairing

Facilities must be maintained in good repair.

# 6-501.2 Cleaning, Frequency and Restrictions

- (A) Facilities must be cleaned as often as necessary to keep them clean.
- (B) Except for cleaning that is necessary because of a spill or other accident, cleaning must be done during periods when the least amount of food is exposed and the potential for cross-contamination is minimized.

# 6-501.3 Cleaning Floors, Dustless Methods

- (A) Except as specified in ¶ (B) of this section, only dustless methods of cleaning must be used, such as wet cleaning, vacuum cleaning, mopping with treated dust mops, or sweeping using a broom and dust-arresting compounds.
- (B) Spills or drippage on floors that occur between normal floor cleaning times may be cleaned:
  - (1) Without the use of dust-arresting compounds, and
  - (2) In the case of liquid spills or drippage, with the use of a small amount of absorbent compound such as sawdust or diatomaceous earth applied immediately before spot cleaning.

# 6-501.4 Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- (A) Intake and exhaust air ducts must be cleaned, and filters changed so they are not a source of contamination by dust, dirt, and other materials.
- (B) If vented to the outside, ventilation systems must not create a public health hazard, nuisance, or unlawful discharge.

# 6-501.5 Cleaning Maintenance Tools, Preventing Contamination

Food preparation sinks, handwashing sinks, and warewashing equipment must not be used for the cleaning of maintenance tools, the preparation or holding of maintenance materials, or the disposal of commercial or industrial wastewater such as mop water.<sup>Pf</sup>

# 6-501.6 Drying Mops

After use, mops must be placed in a position and in a location that allows them to air-dry without soiling walls, equipment, or supplies.

# 6-501.7 Absorbent Materials on Floors, Use Limitation

Except as specified in ¶ 6-501.3(B), sawdust, wood shavings, granular salt, baked clay, diatomaceous earth, or similar materials must not be used on floors.

# 6-501.8 Cleaning of Plumbing Fixtures

Plumbing fixtures such as handwashing sinks, toilets, and urinals must be cleaned as often as necessary to keep them clean.

# 6-501.9 Closing Restroom Doors

Except during cleaning and maintenance operations, restroom doors must be kept closed.

# 6-501.10 Controlling Pests

The premises must be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests must be controlled to eliminate their presence on the premises by:

- (A) Routinely inspecting incoming shipments of food and supplies,
- (B) Routinely inspecting the premises for evidence of pests,
- (C) Using methods, if pests are found, such as trapping devices or other means of pest control as specified under §§ 7-202.2, 7-206.2, and 7-206.3, <sup>Pf</sup> and
- (D) Eliminating harborage conditions.

# 6-501.11 Removing Dead or Trapped Birds, Insects, Rodents, and Other Pests

Dead or trapped birds, insects, rodents, and other pests must be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests.

# 6-501.12 Storing Maintenance Tools

Maintenance tools such as brooms, mops, vacuum cleaners, and similar items must be:

- (A) Stored so they do not contaminate food, equipment, utensils, linens, and single-service and single-use articles, and
- (B) Stored in an orderly manner that facilitates cleaning the area used for storing the maintenance tools.

# 6-501.13 Maintaining Premises, Unnecessary Items and Litter

The premises must be free of:

- (A) Items that are unnecessary to the operation or maintenance of the establishment such as equipment that is nonfunctional or no longer used, and
- (B) Litter.

# 6-501.14 Prohibiting Animals

- (A) Except as specified in ¶¶ (B) and (C) of this section, live animals must not be allowed on the premises of a food establishment. <sup>Pf</sup>
- (B) Live animals may be allowed in the following situations if the contamination of food, grocery carts or baskets, dining tables or chairs, clean equipment, utensils, linens, and unwrapped single-service and single-use articles cannot result:
  - (1) Edible fish or decorative fish in aquariums, shellfish or crustacea on ice or under refrigeration, and shellfish and crustacea in display tank systems,
  - (2) Patrol dogs accompanying police or security officers in offices, storage areas, and dining areas,
  - (3) Sentry dogs running loose in outside fenced areas for security reasons,
  - (4) Service animals as defined by NRS 426.097, and as provided by the Americans with Disabilities Act, controlled by the disabled employee or person in areas that are not used for food preparation and that are usually open for customers, such as dining and sales areas, if a health or safety hazard will not result from the presence or activities of the service animal,
  - (5) Dogs in outdoor dining areas, which are accessible without passing through the food establishment, and the patrons and staff operate in accordance with a signed *Dogs in Outdoor Dining Areas Agreement* (Appendix C), and
  - (6) Caged animals or animals that are similarly confined, such as in a variety store that sells pets or a tourist park that displays animals in areas that are not used for food preparation, storage, sales, display, or dining.
- (C) Live or dead fish bait must be stored where contamination of food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles cannot result.

7-2 Operational Supplies and Applications	
7-3	Stock and Retail Sale
7-1	Labeling and Identification
Subparts	
7-101	Identifying Information on Original Containers
7-102	Common Name on Working Containers

#### 7-101 Identifying Information on Original Containers

Containers of poisonous or toxic materials and personal care items must bear a legible manufacturer's label. <sup>Pf</sup>

#### 7-102 Common Name on Working Containers

Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies must be clearly and individually identified with the common name of the material. <sup>Pf</sup>

7-2	Operational Supplies and Applications
Subpart	
7-201	Separation in Storage
7-202	Presence and Use
7-203	Poisonous or Toxic Material Container Prohibitions
7-204	Chemicals
7-205	Criteria for Lubricants with Incidental Food Contact
7-206	Pesticides
7-207	Medicines
7-208	Storage of First Aid Supplies
7-209	Storage of Other Personal Care Items

#### 7-201 Separation in Storage

Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by:

- (A) Separating the poisonous or toxic materials by spacing or partitioning, <sup>P</sup> and
- (B) Locating the poisonous or toxic materials in a location that is not above food, equipment, utensils, linens, and single-service and single-use articles. This paragraph does not apply to equipment and utensil cleaners and sanitizers that are stored in warewashing areas for

availability and convenience if the materials are stored to prevent contamination of food, equipment, utensils, linens, and single-service and single-use articles.<sup>P</sup>

#### 7-202 Presence and Use

#### 7-202.1 Restriction

- (A) Only those poisonous or toxic materials that are required for the operation and maintenance of a food establishment, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, must be allowed in a food establishment.<sup>Pf</sup>
- (B) Paragraph (A) of this section does not apply to packaged poisonous or toxic materials that are for retail sale.

#### 7-202.2 Conditions of Use

Poisonous or toxic materials must be:

- (A) Used according to:
  - (1) Law and these regulations,
  - (2) Manufacturer's use directions included in labeling, and, for a pesticide, manufacturer's label instructions that state that use is allowed in a food establishment, <sup>P</sup>
  - (3) The conditions of certification, if certification is required, for use of the pest control materials, <sup>P</sup> and
  - (4) Additional conditions that may be established by the Health Authority, and
- (B) Applied so that:
  - (1) A hazard to employees or other persons is not constituted, <sup>P</sup> and
  - (2) Contamination, including, without limitation, toxic residues due to drip, drain, fog, splash or spray on food, equipment, utensils, linens, and single-service and single-use articles is prevented, which, for a restricted-use pesticide, must be achieved by: <sup>P</sup>
    - (a) Removing the items, <sup>P</sup>
    - (b) Covering the items with impermeable covers or taking other appropriate preventive actions, <sup>P</sup> and
    - (c) Cleaning and sanitizing equipment and utensils after the application.<sup>P</sup>
- (C) A restricted-use pesticide must be applied only by an applicator certified by the State of Nevada in accordance with NAC Chapter 555 and 40 CFR 152, or an individual under the direct supervision of a certified applicator. <sup>Pf</sup>

#### 7-203 Poisonous or Toxic Material Container Prohibitions

A container previously used to store poisonous or toxic materials must not be used to store, transport, or dispense food.<sup>P</sup>

# 7-204Chemicals7-204.1Sanitizers, Criteria

Chemical sanitizers, including chemical sanitizing solutions generated on-site, and other chemical antimicrobials applied to food-contact surfaces must:

- (A) Meet the requirements specified in 40 CFR 180.940 *Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions)*, <sup>P</sup> or
- (B) Meet the requirements as specified in 40 CFR 180.2020 Pesticide Chemicals Not Requiring a Tolerance or Exemption from Tolerance Non-food determinations.<sup>P</sup>

#### 7-204.2 Chemicals for Washing, Treatment, Storage and Processing Fruits and Vegetables, Criteria

- (A) Chemicals, including those generated on-site, used to wash or peel raw, whole fruits and vegetables or used in the treatment, storage, and processing of fruits and vegetables must:
  - (1) Be an approved food additive listed for this intended use in 21 CFR 173 *Perfluorinated ion exchange membranes*, <sup>P</sup> or
  - (2) Be generally recognized as safe (GRAS) for this intended use, <sup>P</sup> or
  - (3) Be the subject of an effective food contact notification for this intended use (only effective for the manufacturer or supplier identified in the notification), <sup>P</sup> and
  - (4) Meet the requirements in 40 CFR 156 Labeling Requirements for Pesticides and Devices.
- (B) Ozone as an antimicrobial agent used in the treatment, storage, and processing of fruits and vegetables in a food establishment must meet the requirements specified in 21 CFR 173.368 *Ozone*.

#### 7-204.3 Boiler Water Additives, Criteria

Chemicals used as boiler water additives must meet the requirements specified in 21 CFR 173.310 *Boiler* water additives.<sup>P</sup>

#### 7-204.4 Drying Agents, Criteria

Drying agents used in conjunction with sanitization must:

(A) Contain only components that are listed as one of the following:

- (1) GRAS for use in food as specified in 21 CFR 182 Substances Generally Recognized as Safe, or 21 CFR 184 Direct Food Substances Affirmed as Generally Recognized as Safe, <sup>P</sup>
- (2) GRAS for the intended use as specified in 21 CFR 186 *Indirect Food Substances Affirmed* as Generally Recognized as Safe, <sup>P</sup>
- (3) GRAS for the intended use as determined by experts qualified in scientific training and experience to evaluate the safety of substances added, directly or indirectly, to food as described in 21 CFR 170.30 *Eligibility for classification as generally recognized as safe (GRAS)*, <sup>P</sup>
- (4) Subject of an effective Food Contact Notification as described in the Federal Food Drug and Cosmetic Act Section 409(h), <sup>P</sup>
- (5) Approved for use as a drying agent under a prior sanction as described in the Federal Food Drug and Cosmetic Act (FFDCA) § 201(s)(4), <sup>P</sup>
- (6) Specifically regulated as an indirect food additive for use as a drying agent as specified in 21 CFR Parts 174-178, <sup>P</sup> or
- (7) Approved for use as a drying agent under the threshold of regulation process established by 21 CFR 170.39 Threshold of regulation for substances used in foodcontact articles; <sup>P</sup> and
- (B) When sanitization is with chemicals, the requirements under Subparagraph (A)(5), (A)(6), or (A)(7) of this section must be specifically for use with chemical sanitizing solutions.<sup>P</sup>

#### 7-205 Criteria for Lubricants with Incidental Food Contact

Lubricants must meet the requirements specified in 21 CFR 178.3570 *Lubricants with incidental food contact*, if they are used on food-contact surfaces, on bearings and gears located on or within food-contact surfaces, or on bearings and gears that are located so that lubricants may leak, drip, or be forced into food or onto food-contact surfaces.

# 7-206Pesticides7-206.1Restricted-Use Pesticides, Criteria

Restricted-use pesticides specified under ¶ 7-202.2(C) must meet the requirements specified in 40 CFR 152 Subpart I *Classification of Pesticides*.<sup>P</sup>

#### 7-206.2 Rodent Bait Stations and Snap Traps

Rodent bait or snap traps must be contained in a covered, tamper-resistant bait station.<sup>P</sup>

#### 7-206.3 Tracking-Powders, Pest Control Monitoring

(A) Except as specified in ¶ (B) of this section, a tracking-powder pesticide must not be used in a food establishment.<sup>P</sup>

(B) If used, a nontoxic tracking-powder such as talcum or flour must not contaminate food, equipment, utensils, linens, and single-service and single-use articles.

#### 7-207 Medicines

#### 7-207.1 Restriction and Storage

- (A) Except for medicines that are stored or displayed for retail sale, only those medicines that are necessary for the health of employees may be allowed in a food establishment.<sup>Pf</sup>
- (B) Medicines that are in a food establishment for the employees' use must be labeled as specified under § 7-101.1 and located to prevent the contamination of food, equipment, utensils, linens, and single-service and single-use articles.<sup>P</sup>

#### 7-207.2 Refrigerated Medicines, Storage

Medicines belonging to employees, or to children in a day care center, that require refrigeration and are stored in a food refrigerator must be:

- (A) Stored in a package or container and kept inside a covered, leakproof container that is identified as a container for the storage of medicines, <sup>P</sup> and
- (B) Located so they are inaccessible to children.<sup>P</sup>

#### 7-208 Storage of First Aid Supplies

First aid supplies that are in a food establishment for the employees' use must be:

- (A) Labeled as specified under § 7-101, <sup>Pf</sup> and
- (B) Stored in a kit or a container that is located to prevent the contamination of food, equipment, utensils, and linens, and single-service and single-use articles.<sup>P</sup>

#### 7-209 Storage of Other Personal Care Items

Except as specified under §§ 7-207.2 and 7-208, employees must store their personal care items in facilities as specified under ¶ 6-305.1 (B).

7-3	Stock and Retail Sale
Subpart 7-301	Separation during Storage and Display

#### 7-301 Separation During Storage and Display

Poisonous or toxic materials must be stored and displayed for retail sale so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by:

- (A) Separating the poisonous or toxic materials by spacing or partitioning, <sup>P</sup> and
- (B) Locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles.<sup>P</sup>

### Chapter 8 Compliance and Enforcement

Parts	
8-1	Regulatory Applicability
8-2	Plan Submission and Approval
8-3	Permit to Operate
8-4	Inspection and Correction of Violations
8-5	Prevention of Foodborne Disease Transmission by Employees
8-6	Administrative, Hearing, and Appeals Process

Regulatory Applicability	
Use for Intended Purpose—Public Health Protection	
Additional Requirements for Preventing Health Hazards, Provision for	
Not Addressed	
Waivers	

#### 8-101 Use for Intended Purpose -Public Health Protection

- (A) Existing facilities or equipment that were in use and approved before the effective date of these regulations will be considered compliant only when:
  - (1) The facilities or equipment are in good repair and capable of being maintained in a sanitary condition,
  - (2) Food-contact surfaces comply with Subpart 4-101,
  - (3) The capacities of cooling, heating, and holding equipment comply with § 4-301.1, and
  - (4) The permit holder has not changed or substantially remodeled the facility.

#### 8-102 Additional Requirements for Preventing Health Hazards, Provision for Conditions Not Addressed

- (A) If necessary to protect against public health hazards or nuisances, the Health Authority may impose specific requirements in addition to the requirements contained in these regulations.
- (B) The Health Authority must document the conditions that necessitate the imposition of additional requirements and the underlying public health rationale. The documentation must be provided to the permit applicant or permit holder and a copy must be maintained in the Health Authority's file for the food establishment.
- (C) If a food establishment objects to additional requirements imposed upon it, the permit holder may request a hearing before the Board of Health. In order to object and request a hearing,

the permit holder must notify the Health Authority of its objection and desire for a hearing within five days of the date documentation was sent pursuant to Subsection (B).

# 8-103 Waivers8-103.1 Modifications and Waivers

The Health Authority may grant a waiver by modifying the requirements of these regulations if in the opinion of the Health Authority a health hazard or nuisance will be sufficiently mitigated. If the permit holder fails to meet the conditions of the waiver, the Health Authority may revoke the waiver. Waivers automatically terminate without further notice upon change of permit holder.

#### 8-103.2 Documentation of Proposed Waiver and Justification

Before a waiver request is approved, the applicant must submit the following information to the Health Authority for consideration:

- (A) A statement citing the relevant regulation to be waived, <sup>Pf</sup>
- (B) The reasons the regulation should be waived,
- (C) An analysis of the rationale for how potential health hazards and nuisances addressed by the relevant regulation will be alternatively mitigated, <sup>Pf</sup>
- (D) A HACCP plan, if required as specified under ¶ 8-201.3(A), that includes the information specified under § 8-201.4 as it is relevant to the waiver requested, <sup>Pf</sup> and,
- (E) Any other information necessary to explain how the potential health hazard or nuisance will be sufficiently mitigated. <sup>Pf</sup>

#### 8-103.3 Conformance with Approved Procedures

If the Health Authority grants a waiver as specified in § 8-103.1, or a HACCP plan is otherwise required as specified under § 8-201.3, the permit holder must:

- (A) Comply with the HACCP plans, procedures, and conditions that are submitted as specified under §8-201.4 and approved as a basis for the modification or waiver; <sup>P</sup> and
- (B) Maintain and provide to the Health Authority, upon request, records specified under ¶¶ 8-201.4(D) and (E)(3) that demonstrate that the following are routinely employed,
  - (1) Procedures for monitoring the critical control points, <sup>Pf</sup>
  - (2) Monitoring of the critical control points, <sup>Pf</sup>
  - (3) Verification of the effectiveness of the operation or process, <sup>Pf</sup> and
  - (4) Necessary corrective actions if there is failure at a critical control point. <sup>Pf</sup>

8-2	Plan Submission and Approval	
Subparts 8-201 8-202 8-203	Facility and Operating Plans Confidentiality of Trade Secrets Construction Inspection and Approval—Preoperational Inspections	

## 8-201 Facility and Operating Plans

#### 8-201.1 When Plans are Required

A permit applicant or permit holder must submit properly prepared plans and specifications to the Health Authority for review and approval before:

- (A) The construction of a food establishment, <sup>Pf</sup>
- (B) The conversion of an existing structure for use as a food establishment, <sup>Pf</sup> or
- **(C)** The remodeling of a food establishment or a change of type of food establishment or food operation as specified under 8-302 if the Health Authority determines that plans and specifications are necessary to ensure compliance with these regulations, <sup>Pf</sup>

#### 8-201.2 Contents of the Plans and Specifications

The plans and specifications for a food establishment, including a food establishment specified under § 8-201.3, must include, as required by the Health Authority based on the type of operation, type of food preparation, and foods prepared, the following information to demonstrate conformance with these regulation provisions:

- (A) Intended menu,
- (B) Anticipated volume of food to be stored, prepared, and sold or served,
- (C) Proposed equipment layout, mechanical and plumbing schematics, construction materials, and finish and lighting schedules,
- **(D)** Proposed equipment types, manufacturers, model numbers, locations, dimensions, performance capacities, and installation specifications,
- (E) Evidence that standard procedures that ensure compliance with the requirements of these regulations are developed or are being developed, and
- **(F)** Other information, such as approvals from the building department, fire prevention, and the sewer authority, that may be required by the Health Authority for the proper review of the proposed construction, conversion or modification, and procedures for operating a food establishment.

#### 8-201.3 When a HACCP Plan is Required

- (A) Before engaging in an activity for which a HACCP plan is required by law, these regulations, or by the Health Authority, a permit applicant or permit holder must submit a properly prepared HACCP plan as specified under § 8-201.4 to the Health Authority for review and potential approval.
- (B) Before engaging in reduced oxygen packaging without a waiver, as specified under § 3-502.2, a permit applicant or permit holder must submit a properly prepared HACCP plan to the Health Authority.

#### 8-201.4 Contents of a HACCP Plan

For a food establishment that is required under § 8-201.3 to have a HACCP plan, the permit applicant or permit holder must submit a properly prepared HACCP plan to the Health Authority that includes:

- (A) General information such as the name of the permit applicant or permit holder, the food establishment address, and contact information,
- (B) A categorization of the types of TCS foods that are to be controlled under the HACCP plan, <sup>Pf</sup>
- (C) A flow diagram or chart for specific food or category type that identifies:
  - (1) Each step in the process, <sup>Pf</sup> and
  - (2) The steps that are critical control points, <sup>Pf</sup>
- (D) The ingredients, recipes or formulations, materials and equipment used in the preparation of each specific food or category type and methods and procedural control measures that address the food safety concerns involved, <sup>Pf</sup>
- (E) A critical control point summary for each specific food or category type that clearly identifies:
  - (1) Each critical control point, <sup>Pf</sup>
  - (2) The significant hazards for each critical control point, <sup>Pf</sup>
  - (3) The critical limits for each critical control point, <sup>Pf</sup>
  - (4) The method and frequency for monitoring and controlling each critical control point by the designated food handler or the PIC, <sup>Pf</sup>
  - (5) Action to be taken by the designated food handler or PIC if the limits for each critical control point are not met, <sup>Pf</sup>
  - (6) The method and frequency for the PIC to routinely verify that the food handler is following the approved operating procedures and monitoring critical control points, <sup>Pf</sup> and

- (7) Records to be maintained by the PIC to demonstrate that the HACCP plan is properly operated and managed, <sup>Pf</sup>
- (F) Supporting documents such as:
  - (1) Food handler and supervisory training plan that addresses the food safety issues of concern; <sup>Pf</sup>
  - (2) Copies of blank records forms that are necessary to implement the HACCP plan; Pf
  - (3) Additional scientific data or other information supporting the determination that food safety is not compromised by the proposal.<sup>Pf</sup>
- (G) Any other information required by the Health Authority.

#### 8-202 Confidentiality of Trade Secrets

The Health Authority will not treat any information as confidential unless a request is made in writing identifying the information to be kept confidential, citations to relevant legal authority, and explanation why confidentiality outweighs the public interest in availability of information. A declaration outlining which information is intended to remain proprietary in nature must accompany the request for confidentiality and will be reviewed for compliance with Nevada law. A confirmation letter will be provided once it is approved.

#### 8-203 Construction Inspection and Approval—Preoperational Inspections

- (A) The Health Authority must conduct one or more preoperational inspections to verify that the food establishment is constructed and equipped in accordance with the approved plans and approved modifications of those plans, has established standard operating procedures as specified under ¶ 8-201.2(E), and is in compliance with law and these regulations.
- (B) A stop work order may be issued by the Health Authority whenever work is being done contrary to the provisions of these regulations or proceeding in a manner not in accordance with approved plans. Once a stop work order is issued, such work must not resume until authorized by the Health Authority.

8-3	Permit to Operate
Subparts	
8-301	Prerequisite for Operation Requirement
8-302	Application Procedure
8-303	Permit Issuance
8-304	Conditions of Retention

8-301 Prerequisite for Operation Requirement

A person must not operate a food establishment without a valid permit to operate issued by the Health Authority. <sup>Pf</sup>

#### 8-302 Application Procedure

#### 8-302.1 Submission 30 Calendar Days Before Proposed Opening

- (A) An applicant must submit an application for a permit at least 30 calendar days before the date planned for opening a food establishment or the expiration date of the current permit for an existing facility.
- (B) A stop work order may be issued by the Health Authority whenever work is being done contrary to the provisions of these regulations or proceeding in a manner not in accordance with approved plans. Once a stop work order is issued, such work may not resume until authorized by the Health Authority.

#### 8-302.2 Form of Submission

- (A) A person desiring to operate a food establishment must submit to the Health Authority an application for a permit on a form provided by the Health Authority.
- (B) An application for a permit or waiver is subject to the following time constraints:
  - (1) Except as indicated in Subparagraph (2) of this section, permit applications expire 180 calendar days after the date the application is received by the Health Authority unless the Health Authority grants an extension before the expiration date.
  - (2) Permit applications issued in conjunction with the construction of new establishments or in conjunction with food establishments undergoing remodeling, expire one calendar year after the date the application is received by the Health Authority unless the Health Authority grants an extension before the expiration date.

#### 8-302.3 Qualifications and Responsibilities of Applicants

To qualify for a permit, an applicant must:

- (A) Be an owner of the food establishment or an officer of the legal entity that is an owner of the food establishment,
- (B) Comply with the requirements of these regulations,
- (C) Demonstrate adequate food safety knowledge or employ a PIC who demonstrates adequate food safety knowledge,
- (D) As specified under subparagraph 8-402.2, agree to allow access to the food establishment and to provide required information, and
- (E) Pay the applicable fees either at the time the application is submitted or by the payment due date.

#### 8-302.4 Contents of the Application

The application submission must include:

- (A) The name, mailing address, telephone number, email, and signature of the person who is a legal owner of the business applying for the permit,
- (B) The name, mailing address, and the physical location of the food establishment,
- (C) A copy of the deed, lease, management agreement, or other legal document demonstrating the right to occupy and control where the food establishment is to be located,
- (D) A statement signed by the applicant that:
  - (1) Attests to the accuracy of the information provided in the application, and
  - (2) Affirms that the applicant will:
    - (a) Comply with these regulations, and
    - (b) As specified under subparagraph 8-402.2, agree to allow access to the food establishment and to provide required information as specified in NRS 446.890, and
- (E) A completed food establishment questionnaire,
- (F) A statement signed by the applicant declaring exempt or non-exempt status of the facility as specified in the Nevada Clean Indoor Air Act, NRS 202.2483. Facilities declaring exempt status must also provide documentation verifying exempt status, including but not limited to a nonrestricted gaming license, a retail tobacco store license, or any other exemption as specified in NRS 202.2483, Subsection 3, and,
- (G) Other information required by the Health Authority.

#### 8-303 Issuance

#### 8-303.1 Permit Issuance

The Health Authority may issue a permit to a food establishment after the following requirements are met:

- (A) A properly completed application is submitted,
- (B) The required fee is paid, and
- (C) A final permitting inspection shows that the food establishment:
  - (1) Has designated a PIC with adequate food safety knowledge,

- (2) Has the necessary equipment and infrastructure to support the intended menu and anticipated volume of food to be stored, prepared, and sold or served, and
- (3) Is in substantial compliance with these regulations either by:
  - (a) Being constructed, converted, or remodeled in accordance with the approved plans, or
  - (b) Receiving 15 or fewer demerits during a final permitting inspection. Food establishments receiving more than 15 demerits during a final permitting inspection for change of permit holder must be closed, if in operation. A reinspection may be conducted after applicable fees are paid and must result in 15 or fewer demerits, with no repeat priority or priority foundation violations occurring, for permit issuance.

#### 8-303.2 Denial of Application for Permit, Notice

If an application for a permit to operate is denied, the Health Authority must provide the applicant with a notice that includes:

- (A) The specific reasons and regulatory citations for the permit denial,
- (B) The actions, if any, that the applicant must take to qualify for a permit, and

(C) Reference to the applicant's right of appeal provided in NAC 439.346.

#### 8-304 Conditions of Retention

#### 8-304.1 Responsibilities of the Health Authority

- (A) At the time a permit is first issued, the Health Authority must inform the permit holder where a copy of these regulations may be obtained so that the permit holder is notified of the compliance requirements and the conditions of retention, as specified under § 8-304.2, that are applicable to the permit.
- (B) Failure to provide the information specified in ¶ (A) of this section does not preclude the Health Authority from taking authorized action or seeking remedies if the permit holder fails to comply with these regulations or an order, warning, or directive of the Health Authority.

#### 8-304.2 Responsibilities of the Permit Holder

A food establishment must:

- (A) Post the most recent grade or pass card and health permit in a location that is conspicuous to the consumer upon entering the food establishment. Obscuring or unauthorized removal of the grade or pass card, may result in administrative action including, but not limited to the assessment of applicable fees,
- (B) Post a health warning for drinking during pregnancy as specified in NRS 446.842,

- (C) Comply with the provisions of these regulations including the conditions of a granted variance, approved waiver, or required HACCP plan,
- (D) Immediately contact the Health Authority to report an illness of a food handler as specified in ¶ 2-201.1 of these regulations,
- (E) Immediately discontinue operations and notify the Health Authority when an imminent health hazard might exist as specified in § 8-404.1 of this chapter,
- (F) Allow representatives of the Health Authority access to the food establishment as specified in NRS 446.890 and § 8-402.1 of these regulations,
- (G) Replace facilities and equipment which are no longer serviceable with facilities and equipment that comply with these regulations when:
  - (1) The Health Authority directs replacement because the existing facilities and equipment constitute a public health hazard or the facilities and equipment no longer comply with the criteria upon which the facilities and equipment were approved,
  - (2) The Health Authority directs the replacement of the facilities and equipment at a change of permit holder, or
  - (3) The facilities and equipment have exceeded their useful service life and should be replaced in the normal course of operation,
- (H) Comply with the requirements of NRS 202.2483, the Nevada Clean Indoor Air Act, including posting required signage,
- (I) Comply with directives of the Health Authority, including, but not limited to, time frames for corrective actions specified in inspection reports, supervisory conferences, compliance schedules, notices, orders, warnings, and other directives issued by the Health Authority concerning the permit holder's food establishment or in response to community emergencies,
- (J) Comply with all laws related to the operation of a food establishment. The responsibility of upholding these requirements falls solely on the permit holder and failure to do so may result in permit suspension or revocation,
- (K) Comply with notices issued and served by the Health Authority according to law,
- (L) Notify the Health Authority in writing no later than 30 calendar days after a business closure. Failure to do so will result in the permit holder being responsible for any fees incurred,
- (M) Notify the Health Authority in writing no later than 30 calendar days after establishment updates such as changes to mailing address or business name, failure to do so will result in the permit holder being responsible for any fees incurred, and

(N) Maintain a valid health permit to operate by renewing the permit annually when applicable. Failure to pay the health permit fee within the established timeframes will result in late fees and permit suspension.

#### 8-304.3 Permits Not Transferable

A permit may not be transferred from one person to another person, from one food establishment to another, or from one type of operation to another unless approved by the Health Authority.

8-4	Inspection and Correction of Violations	
Subpart		
8-401	Frequency	
8-402	Competency and Access	
8-403	Report of Findings	
8-404	Imminent Health Hazard	
8-405	Violation of Priority Items and Priority Foundation Items	
8-406	Time Frame for Correction of Core Items	
8-407	Unsafe Food—Examination and Condemnation of Food	

#### 8-401 Frequency

#### 8-401.1 Establishing Inspection Interval

- (A) The Health Authority may inspect each permitted food establishment at least once every year as provided by NRS 446.885, or as often as necessary to ensure compliance with these regulations.
- (B) After receiving a downgrade, a food establishment must accept reinspection to ensure compliance with these regulations. The food establishment must pay applicable fees no later than ten calendar days after the reinspection to avoid permit suspension. Reinspection may occur less than 15 calendar days after the inspection resulting in the downgrade at the request of the permit holder and at the discretion of the Health Authority. If the PIC requests an inspection prior to 15 calendar days, applicable fees must be paid prior to the reinspection.

#### 8-401.2 Performance and Risk-Based

Within the parameters specified in § 8-401.1, the Health Authority may conduct more frequent inspections of a food establishment based upon the Health Authority's assessment of a food establishment's history of compliance with this Regulation and the establishment's potential as a vector of foodborne illness by evaluating:

- (A) Past performance, for nonconformance with these regulations or HACCP plan requirements that are priority or priority foundation items,
- (B) Past performance, for numerous or repeat violations of these regulations or HACCP plan requirements that are core items,
- (C) Past complaints investigated and found to be valid,

- (D) The hazards associated with the foods that are prepared, stored, or served,
- (E) The type of operation including the methods and extent of food storage, preparation, and service,
- (F) The number of people served, and
- (G) Whether the population served is a highly susceptible population.

#### 8-402.1 Allowed at Reasonable Times after Due Notice

A food establishment must allow the Health Authority to inspect the food establishment during normal business hours or at any other reasonable time. After the Health Authority presents official credentials, the PIC must allow the Health Authority to inspect the food establishment and must provide information and records for review as specified in these regulations and to which the Health Authority is entitled according to NRS 446.890. In the event of a disease outbreak or suspected disease outbreak, a food establishment must grant emergency access to the Health Authority upon request.

#### 8-402.2 Refusal, Notification of Right to Access, and Final Request for Access

- (A) If a person denies the Health Authority full access to inspect a food establishment, or refuses to provide requested information or documents, the Health Authority must inform the person that:
  - (1) The permit holder is required to allow access to the Health Authority as specified under § 8-402.1 of these regulations, and
  - (2) Access is a condition of the acceptance and retention of a food establishment permit to operate.
- (B) If access continues to be denied, the Health Authority may:
  - (1) Contact law enforcement in accordance with NRS 446.940 to assist with entrance into the facility, or
  - (2) Immediately suspend all food establishment permits, assess any associated fees, and take any further administrative action up to and including permit revocation.

#### 8-402.3 Intimidation of a Public Officer

A food establishment and its employees and agents must not directly or indirectly intimidate a public employee. Intimidation of a public officer is a serious violation of these regulations and is grounds for administrative action up to and including permit revocation and food handler safety card revocation.

#### 8-403 Report of Findings

#### 8-403.1 Documentation Information and Observations

After inspecting a food establishment, the Health Authority must document its findings on an inspection report form, including:

- (A) Administrative information about the food establishment's identity, street address, inspection date and inspection result,
- (B) Specific factual observations of conditions or deviations from these regulations that require correction by the permit holder, including:
  - (1) Failure of the PIC to demonstrate the knowledge of foodborne illness prevention, application of HACCP principles, and the requirements of these regulations as specified under § 2-102.1,
  - (2) Failure of food handlers, or the PIC, to report a disease or medical condition as specified under ¶¶ 2-201.1(B) and (D),
  - (3) Imminent health hazards, priority or priority foundation items, and core items of this regulation,
  - (4) Failure of the appropriate food handlers to demonstrate their knowledge of, and ability to perform in accordance with, the procedural, monitoring, verification, and corrective action practices required by the Health Authority as specified under § 8- 103.3,
  - (5) Failure of the PIC to provide records required by the Health Authority for determining conformance with a HACCP plan as specified under Subparagraph 8-201.4(E)(7),
  - (6) Non-conformance with critical limits of a HACCP plan, and
- (C) Corrective actions for deviations from these regulations

#### 8-403.2 Food Establishment Grades

- (A) Except for temporary food establishments, every food establishment must post its health permit and the current grade or pass card for each permitted area, received at the time of the most recent inspection, in an area that is conspicuous to the consumer upon entering the food establishment.
- (B) Food establishment grades must be determined as follows:
  - (1) A Grade; a demerit score of 0 to 10,
  - (2) B Grade; a demerit score of 11 to 20, and
  - (3) C Grade; a demerit score of 21 to 40.
- (C) When a food establishment receives more than 40 demerits in an inspection, the permit must be suspended immediately. The food establishment must remain closed until the permit holder has corrected the priority and priority foundation items, paid all applicable and outstanding

fees, and an inspection is conducted that results in a score of ten or fewer demerits with no repeat violations of priority or priority foundation items.

- (D) When a food establishment with a current B Grade receives 11 or more demerits or repeat violations of priority or priority foundation items on its reinspection, the food establishment will be placed on a C Grade even if it does not receive 21 or more demerits. A subsequent reinspection must be conducted as specified in ¶ 8-403.2(D) and the food establishment must pay all applicable and outstanding fees.
- (E) When a food establishment with a current C Grade receives 11 or more demerits or repeat violations of priority or priority foundation items on its reinspection, the food establishment's permit must be suspended even if it receives fewer than 41 demerits. The food establishment must remain closed until the permit holder has corrected the priority and priority foundation items, paid applicable and outstanding fees, and an inspection is conducted resulting in a score of 10 or fewer demerits with no repeat violations of priority or priority foundation items.
- (F) Notwithstanding the grade criteria of ¶ 8-403.2(B), whenever a repeat violation of a priority item is documented in the next routine inspection, the food establishment must be downgraded to the next lower grade.
- (G) Notwithstanding the grade criteria of ¶ 8-403.2(B), whenever the Health Authority orders a food establishment to take a piece of equipment out of service because it constitutes a public health hazard or is not approved, the equipment must remain out of service until approved. If a food establishment places the equipment back into service without approval, the food establishment must be downgraded to the next lower grade.
- (H) Food establishments such as, annual itinerants, farmers markets, and those undergoing a
   Change of Permit Holder will be inspected on a pass fail criteria which is determined as follows:
  - (1) Pass; a demerit score of 0 15,
  - (2) Fail; a demerit score of 16 or more.
- (I) Notwithstanding the Pass/Fail criteria of ¶ 8-403.2(H), whenever a repeat violation of a priority item is documented in the next routine inspection, the permit must be immediately suspended. The food establishment must remain closed until the permit holder has corrected the priority and priority foundation items, paid any applicable fees, and an inspection is conducted that results in a score of 15 or fewer demerits with no repeat violation of a priority or priority foundation item.

#### 8-403.3 Refusal to Sign Acknowledgment.

- (A) When an individual declines to sign an acknowledgment of receipt of inspection findings as specified in § 8-403.3, the Health Authority must inform the individual that:
  - (1) Signing is for the sole purpose of acknowledging receipt of a copy of the report and does not signify agreement with findings,

- (2) Refusal to sign an acknowledgment of receipt will not affect the permit holder's obligation to correct the priority and priority foundation items noted in the inspection report within the time frames specified, and
- (3) Refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the Health Authority's historical record for the food establishment, and
- (B) After informing the individual as specified in ¶ (A), the Health Authority must make a final request that the PIC sign an acknowledgment receipt of inspectional findings.

#### 8-404 Imminent Health Hazard

#### 8-404.1 Ceasing Operations and Reporting

- (A) Except as specified in ¶ (B) and (C) of this section, a permit holder must immediately discontinue operations and notify the Health Authority if an imminent health hazard may exist because of an emergency such as a fire, flood, extended interruption of electrical or water service, sewage backup, misuse of poisonous or toxic materials, pest infestation, onset of an apparent foodborne illness outbreak, gross insanitary occurrence or condition, or other circumstance that may endanger public health.<sup>P</sup>
- (B) A permit holder need not discontinue operations in an area of an establishment that is unaffected by the imminent health hazard.
- (C) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the Health Authority may agree to continuing operations in the event of an extended interruption of electrical or water service if:
  - (1) A written emergency operating plan has been approved,
  - (2) Immediate corrective action is taken to eliminate, prevent, or control any food safety risk and imminent health hazard associated with the electrical or water service interruption, and
  - (3) The Health Authority is informed upon implementation of the written emergency operating plan.

#### 8-404.2 Resuming Operations

- (A) If a food establishment voluntarily ceases operation due to an imminent health hazard, the permit holder or PIC must notify the Health Authority when all items on the *Checklist for Reopening After an Imminent Health Hazard, Appendix B* are in compliance and, receive approval to reopen by the Health Authority, prior to resuming operations.
- (B) If food establishment operations are discontinued by the Health Authority due to an imminent health hazard, as specified in ¶ 8-404.1 of this Chapter, the permit holder or PIC must pay applicable fees and when all items on the *Checklist for Reopening After an Imminent Health Hazard, Appendix B,* are in compliance and verified by the Health Authority, may be granted written permission to resume operation.

- (C) If food establishments operations are discontinued for excessive priority and priority foundation items as specified in § 8-403.2(B) of this Chapter, the permit holder of PIC must pay applicable fees and pass a reopening inspection with 10 or fewer demerits, and no repeat violations of priority or priority foundation items.
- (D) A food establishment with a history of non-compliance, including repeat violations of priority or priority foundation items, may be required to enter an administrative process such that required training, compliance plans, or other stipulations are placed on the permit to operate.

## 8-405 Priority Items and Priority Foundation Items8-405.1 Timely Correction

- (A) Except as specified in ¶ (B) of this section, a permit holder must at the time of inspection correct a violation of a priority item or priority foundation item of these regulations and implement corrective actions for a HACCP plan provision that is not in compliance with its critical limit.<sup>Pf</sup>
- (B) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the Health Authority may agree to or specify a longer time frame, not to exceed: <sup>Pf</sup>
  - (1) For priority items, correction is required within 72 hours after the inspection, or
  - (2) For priority foundation items and HACCP plan deviations, correction is required within 10 calendar days after the inspection.

#### 8-405.2 Verification and Documentation of Correction

The permit holder must notify the Health Authority within the timeframe specified in ¶ 8-405.1(B), unless otherwise specified, after corrections are made to priority or priority foundation items, or a HACCP plan deviation.

#### 8-406 Time Frame for Correction of Core Items

- (A) Except as specified in ¶ (B), the permit holder must correct core items by a date and time specified by the Health Authority but no later than 90 calendar days after the inspection.
- (B) The Health Authority may approve a compliance schedule that extends beyond the time limits specified under  $\P$  (A) if a written schedule of compliance is submitted by the permit holder.

#### 8-407 Unsafe Food—Examination and Condemnation of Food

A food establishment must comply with any order issued pursuant to NRS 585.360 and NRS 446.920.

8-5	Prevention of Foodborne Disease Transmission by Employees
Subpart 8-501	Investigation and Control

## 8-501 Investigation and Control 8-501.1 Obtaining Information: Personal History of Illness, Medical Examination, and Specimen Analysis

- (A) When the Health Authority has reasonable cause to believe that a food handler has possibly transmitted disease, might be infected with a disease in a communicable form that is transmissible through food, might be a carrier of infectious agents that cause a disease that is transmissible through food, or is affected with a boil, an infected wound, or acute respiratory infection, the Health Authority may:
  - (1) Secure a confidential medical history of the food handler suspected of transmitting disease or make other investigations as deemed appropriate, and
  - (2) Require appropriate medical examinations, including collection of specimens for laboratory analysis, of a suspected food handler.
- (B) Any confidential medical history obtained pursuant to ¶ (A) must be kept confidential and not released, except as required by law or by order of a court having jurisdiction.

### 8-501.2 Restriction or Exclusion of Food Handler, or Summary Suspension of Permit

- (A) Based on the findings of an investigation related to a food handler who is suspected of being infected or diseased, the Health Authority may issue an order to the suspected food handler or permit holder instituting one or more of the following control measures:
  - (1) Restricting the food handler,
  - (2) Excluding the food handler, or
  - (3) Closing the food establishment by suspending a permit to operate in accordance with NRS 446.935.
- (B) Any such order must not be released to the public, except as required by law or by order of a court having jurisdiction, or after redacting out the name and any identifying information for the food handler.

# 8-501.3 Restriction or Exclusion Order, Warning or Hearing Not Required, Information Required in Order

Based on the findings of the investigation as specified in ¶ 8-501.1, and to control disease transmission, the Health Authority may issue an order of restriction or exclusion to a suspected food handler or the permit holder without prior warning, notice of a hearing. Any such order must:

- (A) State the reasons for the restriction or exclusion that is ordered,
- (B) State the evidence that the food handler or the permit holder must provide in order to demonstrate that the reasons for the restriction or exclusion are resolved,
- (C) State that the suspected food handler or the permit holder may request a hearing by submitting a timely request as provided in law, and
- (D) Provide the name and address of the Health Authority representative to whom a request for a hearing may be made.

#### 8-501.4 Removal of Exclusions and Restrictions

The Health Authority must release a food handler from restriction or exclusion in accordance with NRS 446.935 and the conditions specified under § 2- 201.3.

8-6	Administrative Process
Subparts	
8-601	Administrative Process for Non-Compliance
8-602	Permit Suspension and Reinstatement
8-603	Appeal Process

#### 8-601 Administrative Process for Non-Compliance

Food establishments exhibiting a history of uncontrolled risk factors for foodborne illness and noncompliance with these regulations may enter the administrative process for non-compliance.

- (A) Additional conditions may be placed upon the permit.
- (B) Failure to gain control of risk factors for foodborne illness at the facility can lead to further administrative actions up to and including suspension of the permit to operate, pending permit revocation.

#### 8-602 Permit Suspension and Reinstatement

#### 8-602.1 Suspension or Revocation of Permit, Reinstatement of Suspended Permit, Hearings

Permits issued under the provisions of these regulations may be suspended as specified in NRS 446.880.

- (A) Permits issued under the provisions of these regulations may be suspended temporarily by the Health Authority for failure of the permit holder to comply with the requirements of these regulations.
- (B) Whenever a permit holder or PIC fails to comply with any notice issued under the provisions of these regulations, the permit holder or PIC must be notified in writing that the permit and associated permits are, upon service of the notice, immediately suspended pending permit

revocation. The notice must contain a statement informing the permit holder or PIC that an opportunity for a hearing will be provided if a written request for a hearing is filed with the Health Authority within five business days.

- (C) Whenever the Health Authority finds an insanitary or other condition in the operation of a food establishment which, in its judgment, constitutes an imminent health hazard to public health, it may without warning, notice, or hearing issue a written order to the permit holder or PIC citing the condition, specifying the corrective action to be taken, and specifying the time within which the action must be taken. The order may state that the permit is immediately suspended and all food operations at all associated permits must be immediately discontinued. Any person to whom such an order is issued must comply with it immediately. Upon written petition to the Health Authority, the person must be afforded a hearing as soon as possible.
- (D) Any person whose permit(s) has been suspended but is not pending revocation may, at any time, make application for reinspection for reinstatement of the permit. Within ten business days following receipt of a written request, including a statement signed by the applicant that in their opinion the conditions causing suspension of the permit have been corrected, the Health Authority may conduct a reinspection. If the applicant is in compliance with the requirements of these regulations, the permit must be reinstated.
- (E) For serious or repeated violations of any of the requirements of these regulations, or for interference with the Health Authority in the performance of their duties, the permit may be permanently revoked after an opportunity for a hearing has been provided by the Health Authority. Before taking such an action the Health Authority must notify the permit holder, in writing, of the reasons for which the permit is subject to revocation and advising the permit holder of the requirements for filing a request for a hearing. A permit may be suspended for cause pending its revocation or a hearing relative thereto.
- (F) Unless a request for a hearing is filed with the Health Authority by the permit holder within five business days following service of the notice, the Health Authority may permanently revoke the permit.
- (G) The hearings provided for in this section must be conducted at a time and place designated by the Health Authority. Based upon the record of the hearing, the Health Authority must make a finding and may sustain, modify, or rescind any previous official notice or order considered in the hearing. A written report of the hearing decision must be furnished to the permit holder by the Health Authority.

#### 8-602.2 Post Revocation Action

- (A) Once the permit has been revoked, as specified in § 8-602.1, the permit holder must discontinue all food activity associated with the food establishment in question. Failure to do so may result in:
  - (1) The Health Authority requesting an injunction from the District Court of Jurisdiction, against continued operation by the previous permit holder.

- (2) The Health Authority referring the non-compliance to the District Attorney of Jurisdiction for prosecution.
- (B) Once the timeframe for appeal has transpired, any food remaining at the location in question may be denatured and destroyed by the Health Authority as specified in NRS 446.920.
- (C) Following permit revocation, any persons listed as sole proprietor, officer, or managing member of the business must be prohibited from obtaining a food establishment permit within the jurisdiction of the Southern Nevada Health District.

#### 8-603 Appeal Process

- (A) A person aggrieved by findings or corrective action required by the Health Authority following an inspection or investigation may make a written request for a meeting with the inspector responsible for the action and the program supervisor to discuss the inspection or investigation, including, if applicable, the person's objections to the findings or corrective action required, and any requests to modify the inspection or investigation report. A request for such a meeting must be received by the Health Authority no later than 15 business days after the date of the inspection or investigation.
- (B) If the meeting held pursuant to ¶ (A) does not resolve the issue, the aggrieved person may submit a written request for a meeting with the section manager or division director to discuss any unresolved issues. A request for such a meeting must be received by the Health Authority no later than 10 business days after the meeting held pursuant to ¶ (A).

8-7	Service of Notice	
Subparts 8-701	Service of Notice	

## 8-701Service of Notice8-701.1Delivery of Notice

Notices provided for in NRS 446.895 shall be deemed to have been properly served when the original of the inspection report form or other notice has been delivered personally to the permit holder or PIC, or such notice has been sent by email, registered, or certified mail, return or read receipt requested, to the last known address of the permit holder. A copy of such notice shall be filed with the records of the Health Authority.

### Chapter 9 Commissaries

Parts 9-1 9-2	Permitting Requirements Operational Requirements
9-1	Permitting Requirements
Subparts 9-101	Prerequisite for Operation

#### 9-1 Permitting Requirements

Commissaries must operate within the parameters set forth in Chapters 1-8 of these regulations unless specified otherwise in this chapter. This chapter describes additional requirements specific to Commissaries.

## 9-101Prerequisite for Operation9-101.1Commissaries

Commissaries must:

- (A) Limit the number and type of permit holders contracted based on their equipment capabilities, space, and service capacity,
- (B) Designate an easily identifiable area for each contracted permit holder that is large enough to accommodate storage of their food and equipment,
- (C) Have a three-compartment sink and handwashing sink that is conveniently located and easily accessible for use by contracted permit holders,
- (D) Provide access to restrooms stocked with handwashing soap and disposable hand towels during all hours of operation for use by contracted permit holders,
- (E) Have an area for filling freshwater tanks with drinking water that meets Section 5-202, and
- (F) If the commissary contracts with Mobile Unit permit holders, it must:
  - (1) Have an area for washing equipment and vehicles. Hoses used for washing must be pressurized, long enough to reach all parts of the equipment or vehicle and be stored off the ground,
  - (2) Construct the premises with curbs and proper slopes which direct wastewater to drains as approved by the agencies having jurisdiction, and

(3) Provide an area for mobile units to dump wastewater into an exterior drain with adequate grease capture as approved by the sewer agency having jurisdiction.

#### 9-101.2 Support Kitchens

- (A) Support Kitchens may be utilized by a temporary event vendor if such use will not cause a nuisance or unmanageable food safety risk and is approved.
- (B) A support kitchen must not be used as a commissary for a food establishment with an annually renewable permit unless approved.

onsibilities of the Commissary Manager nissary Service Agreement

#### 9-201 Responsibilities of the Commissary Manager

A Commissary Manager, or designated PIC, must:

- (A) Be on the premises during all hours of operation,
- (B) Prohibit the use of the commissary by unpermitted operators,
- (C) Provide written notification within five business days to the Health Authority:
  - (1) When a contracted permit holder no longer has a valid agreement to use the commissary, or
  - (2) When a contracted permit holder's agreement or lease is changed in any way,
- (D) Provide written notification to each contracted permit holder when an imminent health hazard exists and prohibit them from utilizing the commissary until such time that the hazard is mitigated.
- (E) Provide an up-to-date list of contracted permit holders upon request of the Health Authority,
- **(F)** Maintain a sign in/sign out attendance log for all contracted permit holders. The attendance log must be true and accurate, updated daily, and made available upon request. The attendance log must include the following information:
  - (1) The commissary business name, address, phone number, and permit number,
  - (2) The contracted permit holder's business name and the name and signature of the PIC,

- (3) The vehicle identification number, if applicable, when there is more than one mobile unit operating under the same business name, and
- (4) The date, time in, and time out of each visit, or,
- (5) Other approved time tracking system.
- (G) Flush and sanitize pumps and hoses used to supply drinking water before being placed into service following construction, repair, modification, or periods exceeding 14 calendar days during which they were not used. The Health Authority may require water testing to verify the safety of the water supply.

#### 9-202 Commissary Service Agreement

A commissary service agreement must contain:

- (A) The commissary name, address, phone number, health permit number, and signature of the PIC,
- (B) The service(s) that the commissary will provide,
- (C) The number of hours per week/month that services are available to the contracted permit holder, and
- (D) A clause that indicates termination or changes to the agreement must result in written notification to the Health Authority within five business days of the date the agreement was terminated.

### Chapter 10 Mobile Units

Parts		
10-1 10-2	Permitting and Construction Requirements Operational Requirements	
		10-3
10-1	Permitting and Construction Requirements for Mobile Units	
Subparts		
10-101	Prerequisite for Operation	
10-102	Construction Requirements	
10-103	Mobile Unit Markings	

#### **10-1** Permitting and Construction Requirements for Mobile Units

Mobile Units must operate within the parameters set forth in Chapters 1-8 of these regulations unless specified otherwise in this chapter. This chapter describes additional requirements specific to Mobile Units.

#### 10-101 Prerequisite for Operation

Mobile Units must submit the following with their permit application:

- (A) Plans showing the layout of equipment and plumbing,
- (B) Proof of vehicle registration which includes the name of the registered owner, license plate number, vehicle identification number, and state of issuance,
- (C) If the mobile unit is being leased, a signed copy of the lease agreement,
- (D) A copy of the Nevada Secretary of State business license certificate,
- (E) Documentation of mobile unit identification markings that comply with 10-103,
- (F) Specifications for mechanical ventilation and electrical power generating equipment,
- (G) If liquified petroleum gas is used, a copy of a Nevada liquified petroleum gas inspection for the vehicle,
- (H) Menu,
- (I) The commercial business address where the mobile unit will be stored when not in use,
- (J) A commissary service agreement that complies with 9-202 and provides the number of hours and services necessary for the operation, and

- (K) Site-specific mobile units must also provide:
  - (1) A letter of permission to the Health Authority for access to restrooms that are conveniently located and accessible for use by food handlers during all hours of operation, and
  - (2) A lease agreement granting permission to operate on premises.

## 10-102 Construction Requirements

### 10-102.1 Prohibitions

- (A) Restrooms must not be built as an integral part of a Mobile Unit.
- (B) Freshwater and wastewater tanks must be built as an integral part of a Mobile Unit and are prohibited from being on the ground.
- (C) Permanent utility hook up is prohibited. The unit must be easily conveyable from place to place and return to the commissary whenever necessary for dumping wastewater and filling freshwater.

#### 10-102.2 Mobile Unit Equipment and Structure

Mobile units must comply with the following when applicable:

- (A) The mobile unit must be fully enclosed and tall enough on the inside to stand upright, 6-foot minimum height.
- (B) A maximum of two service openings that are no larger than 18 inches square, with either hinged or slider windows located in a manner to protect the food from contamination. Service openings must either be self-closing or protected by mechanical air curtains.
- (C) Screens must be limited to ventilation windows, service openings and doors.
- (D) Cooling and ventilation must be sufficient to maintain the interior ambient air temperature of the mobile unit below 100°F.
- (E) The freshwater holding tank connected to the 3-compartment sink and hand sink must be no less than 40 gallons in capacity, unless specified otherwise, and comply with Part 5-3 of these regulations and wastewater tanks must comply with Subpart 5-401 of these regulations. Water supplying more than one 3-compartment sink or handwashing sink may require increased water holding capacity. Water fixtures and tanks must meet the following requirements:
  - (1) Water pumps must activate automatically when water is dispensed from a fixture. Manually operated water pumps are prohibited.
  - (2) Shut off valves on wastewater tanks must be recreational vehicle waste valves.
  - (3) Tanks must be fitted with an electronic capacity indicator easily visible to the operator.

- (4) There must be no outlet(s) for overflow on wastewater tanks. Wastewater tanks may be vented as outlined in 5-302.4 or by use of an air admittance valve.
- (5) Mobile units that are low-risk food establishments may be approved to have a minimum of a 15-gallon freshwater tank.
- (F) Mobile Units must comply with all fuel gas and fire codes including, but not limited to, having an approved liquefied petroleum gas system with a leak detection alarm device installed when applicable.
- (G) Food equipment located on exterior attached patios of mobile units must be limited to a single unit of equipment that is inaccessible to the public.
- (H) Liquified petroleum gas piping systems, tanks, valves, connectors, appliances, and related parts must be installed according to current regulations of the Nevada Board for the Regulation of Liquified Petroleum Gas by properly licensed and certified individuals.
- (I) Electrical service, wiring, connections, panels, and associated parts of equipment must be installed by properly licensed individuals and be compliant with manufacturer installation specifications.

#### 10-103 Mobile Unit Markings

- (A) The mobile unit must have the business name and business address or business phone number clearly visible on the back, left and right sides of the mobile unit.
- (B) The name on the mobile unit must be the same as the fictitious business name filed with business licensing.
- (C) Each mobile unit having the same business name must provide markings to include a unique vehicle number for each unit.
- (D) The lettering must be easily visible from 50 feet away, no less than 3 inches tall and in colors that contrast with the paint color of the vehicle.

10-2	Operational Requirements
Subparts 10-201	Operational Restrictions

#### 10-201 Operational Restrictions

A mobile unit must not:

(A) Operate at one location for more than four hours unless it:

- (1) Is operating at a special event or farmers market, or
- (2) Has been issued a site-specific permit by the Health Authority
- (B) Operate at one location for more than one hour except where restrooms are available by employees, or unless prior approval is granted by the Health Authority,
- (C) Place tables, chairs or accessory items in the surrounding area,
- (D) Cool TCS food,
- (E) Store open TCS food in the vehicle overnight, or
- (F) Accumulate solid waste in a manner that creates a cross-contamination hazard, nuisance, or attractant for pests.

Subparts10-301Required Records for Mobile Units	10-3	Record Requirements	
	· ·	Required Records for Mobile Units	

#### 10-301 Required Records for Mobile Units

The following records must be submitted to the Health Authority upon request or as specified below. Records are to be maintained for no less than 90 calendar days.

- (A) The PIC must submit a route sheet to the Health Authority monthly. Changes to the route sheet must be submitted, in writing, to the Health Authority within two business days. The route sheet must contain:
  - (1) The business name and permit number of the mobile unit,
  - (2) The physical address for each stop, including for special events, and
  - (3) The date and estimated time of arrival and departure from each location.
- (B) Temperature logs must be maintained for:
  - (1) The internal temperature of each TCS food immediately prior to loading into the mobile unit's hot or cold holding equipment, and
  - (2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vehicle is in operation,
- (C) A valid commissary agreement letter,
- (D) Permission letters, operational plans, or waivers associated with the permit, and

(E) Same-day receipts for food when applicable.

### Chapter 11 Open-Air Vendors

Parts 11-1 11-2 11-3	Permitting Requirements Operational Requirements Record Requirements
11-1	Permitting Requirements
Subparts 11-101 11-102	Prerequisite for Operation Equipment Requirements

#### 11-1 Permitting Requirements

Open-air vendors must operate within the parameters set forth in Chapters 1-8 of these regulations unless specified otherwise in this chapter. This chapter describes additional requirements specific to open-air vendors. Prerequisite for Operation

The following must be submitted and approved prior to operating an open-air vendor permit:

- (A) A lease agreement granting permission to operate on premises,
- (B) Equipment specifications, plans, and menu,
- (C) A commissary service agreement that complies with Subpart 9-202 and provides the number of hours and services necessary for the operation, and
- (D) A letter of permission to the Health Authority for access to restrooms that are conveniently located and accessible for use by food handlers during all hours of operation.

#### 11-101 Equipment Requirements

#### 11-102.1 Open-Air Vendor Equipment and Design

Open-Air Vendors must:

- (A) Be limited to 100 square feet,
- (B) Provide an adequate number of handwashing sinks for open-food handling that meet the following criteria:
  - (1) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, singleuse paper towels, and maintained throughout the duration of the event.
  - (2) The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.

(3) An adequate number of handwashing sinks that meet the following criteria must be provided:

If portable, the handwashing sink must meet the requirements of Subpart 4-205,

- (a) Provide a continuous flow of hot and cold running water without the use of a manual pump,
- (b) be self-contained, and
- (1) equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply.
- (C) Provide overhead protection for food preparation areas unless prohibited by fire code.
- (D) If located outside:
  - (1) Operate on a surface such as asphalt or concrete and provide adequate groundcover to prevent environmental contamination from excessive food debris and grease buildup on the ground,
  - (2) Submit an outdoor control plan which describes how food will be protected from pests and during inclement weather conditions such as high wind or rain,
  - (3) Provide covers, lids, or doors for outdoor cooking equipment to protect food from contamination when it is left unattended, and
  - (4) Have equipment that is designed and capable of operating when the ambient temperature exceeds 100°F.
- (E) Be easily identifiable and have conspicuous name plates or other durable markings which match the permit name and number,
- (F) Have equipment which is portable and easily conveyed to the commissary for cleaning and maintenance,
- (G) Have no connections to a permanent utility such as water, sewer, gas, or power without approval from the agency of jurisdiction and the Health Authority, and
- (H) Have a physical separation between patrons and open food preparation areas using partitions, food shields, planters, walls, or similar means.

#### 11-102.2 Barbecue Equipment and Design

A barbecue must comply with §11-102.1 for open-air vendors and must:

- (A) Have barbecue cooking equipment that is commercially manufactured and made from nontoxic, durable, cleanable, and rust -resistant materials. All other equipment associated with the barbecue permit must meet the requirements of section 4-205,
- (B) Be located within 50 feet of:

- (1) A food establishment under the same permit holder that is capable of supporting the operation of the barbecue, or
- (2) A mobile unit under the same permit holder that is capable of supporting the operation of the barbecue.
- (C) Limit cooking equipment to commercially manufactured barbecue grills, smokers, rotisserie ovens, pizza ovens, or similar types of equipment,
- (D) Provide protective storage for wood chips, bark, or other organic materials used for smoking and flavoring to prevent contamination, and
- (E) Have a grease collection container or system for smokers and grills that prevents grease accumulation on the ground.

11-2	Operational Requirements
Subparts 11-201	Operational Requirements for Open-Air Vendors
11-202	Operational Requirements for Seasonal Permits

#### 11-201 Operational Requirements for Open-Air Vendors

Open-Air Vendors must:

- (A) Operate only at sites specified in the permit issued by the Health Authority,
- (B) Operate as a low-risk food establishment, unless approved to operate as a barbecue as described in 11-102.2 or a seasonal permit as described in 11-202 (B),
- (C) Conduct minimal food preparation on site,
- (D) Not conduct complex food processes such as cooling,
- (E) Not hold open TCS food for next-day service,
- (F) Submit menu changes to the Health Authority for approval prior to implementation,
- (G) Provide the Health Authority access to transportation or food storage vehicles utilized by the open-air vendor to ensure that the vehicle is maintained clean, free of trash, food debris, spills, insects, or any other source of contamination to the food or equipment, and
- (H) Provide a means to store and convey trash generated by the open-air vendor and consumers.

#### 11-202 Operational Requirements for Seasonal Permits

(A) Seasonal permits are only valid for periods up to 8 consecutive months of operation.

- (B) Seasonal permits must comply with all applicable sections of this regulation and once expired, must not be renewed until 12 months have elapsed from the start date of the previous operating period.
- (C) A Seasonal permit must operate as a low-risk food establishment unless it is located within 50 feet of:
  - (1) The contracted commissary, or
  - (2) A food establishment under the same permit holder that will provide the necessary support services to the seasonal operation.

11-3	Required Records
Subparts 11-301	Required Records for Open-Air Vendors

#### 11-301 Required Records for Open-Air Vendors

Open-Air Vendors must provide the following records to the Health Authority upon request:

- (A) Temperature logs for:
  - (1) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
  - (2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vendor is in operation,
- (B) A valid commissary agreement letter,
- (C) Permission letters, operational plans, or waivers associated with the permit, and
- (D) Same-day receipts for food when applicable.

# Chapter 12 Catering

Parts 12-1 12-2	Permitting Requirements Operational Requirements
12-1	Permitting Requirements
Subparts 12-101	Prerequisite for Operation

#### 12-1 Permitting Requirements

Catering food establishments must operate within the parameters set forth in Chapters 1-8 of these Regulations unless specified otherwise in this chapter. This chapter describes additional requirements specific to catering food establishments.

### 12-101 Prerequisite for Operation

- (A) A catering food establishment must provide an adequate number of handwashing sinks at the remote service site where open-food handling will occur. Handwashing sinks must:
  - (1) Be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
  - (2) Be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.
  - (3) Be adequate in number and meet the following criteria:
    - (a) If portable, the handwashing sink must meet the requirements of Subpart 4-205,
    - (b) Provide a continuous flow of hot and cold running water without the use of a manual pump, and
    - (c) Be self-contained and equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply.
- (B) Food transport vehicles must be constructed, equipped, and maintained in a manner that protects all food, equipment, utensils, linens, single-service, and single-use articles from contamination.

## 12-2 Operational Requirements

# Subparts12-201Operational Requirements12-202Food Temperature Monitoring Requirements

#### 12-201 Operational Requirements

At the site of the catering event, catering food establishments must:

- (A) Not perform complex food processes, including but not limited to cooling and par-cooking,
- (B) Prohibit TCS food served or displayed at an event from being re-served or held over for future service. Food that has been served or displayed must be left with the host or discarded at the conclusion of the event,
- (C) Provide the Health Authority access to transportation or food storage vehicles utilized by the open-air vendor to ensure that the vehicle is maintained clean, free of trash, food debris, spills, pests, or any other source of contamination to the food or equipment,
- (D) Dispose of waste generated at the event prior to leaving the site unless other arrangements have been made with the host for proper disposal, and
- (E) Return soiled utensils, equipment, tableware, and linen to the commissary kitchen at the completion of the catered event for cleaning, sanitizing, and storage.

#### 12-202 Food Temperature Monitoring Requirements

Temperature logs must be maintained for:

- (A) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
- (B) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours of the catering event,

## **Chapter 13** Swap Meet and Farmers Markets

Parts 13-1 13-2	Permitting Requirements Operational Requirements
13-1	Permitting Requirements
Subparts 13-101	Prerequisite for Operation

#### 13-1 Permitting Requirements

- (A) Swap meets and farmers markets must operate within the parameters set forth in Chapters 1-8 of these regulations unless specified otherwise in this chapter. This chapter describes additional requirements specific to swap meets and farmers markets.
- (B) Food vendors may operate at a swap meet or farmers market if site requirements are met and support services are provided as specified in 13-101.2.

#### 13-101 Prerequisite for Operation

#### 13-101.1 Swap Meet and Farmers Market Manager

- (A) Each swap meet or farmers market establishment must designate an operations manager who is responsible for ensuring that:
  - (1) A PIC is on the premises during all hours of operation.
  - (2) An up-to-date list of food vendors is provided to the Health Authority upon request,
  - (3) A copy of the producers certificate for exempt farmers participating in the swap meet or farmers market is provided to the Health Authority upon request,
  - (4) Health permits and grade cards are posted conspicuously as required,
  - (5) Unpermitted food vendors and food vendors with a suspended permit are prohibited from operating at the swap meet or farmers market,
  - (6) Animal attractions, animal pens, and petting zoos are at least 50 feet away from any food establishment or food establishment support area,
  - (7) The premises are maintained such that there is no overflowing trash, wastewater, sewage, or other nuisance condition present,
  - (8) There is a surplus of liquid soap and disposable towels for use in restroom facilities and all site requirements and support services are in compliance with these regulations, and

(9) There is a resource recovery plan implemented such that cardboard, glass, plastic bottles, and aluminum is collected and recycled if there are greater than 500 patrons in attendance per day.

## 13-101.2 Support Services

Newly constructed or substantially remodeled swap meets must have an onsite commissary if they contract with or lease space to three or more food vendors that handle TCS foods. The swap meet must provide access to the necessary support services for all contracted food vendors.

### 13-101.3 Farmers Market Certified Producer

- (A) Farmers markets must have at least one farmer who possesses a valid producer certificate for farm products being sold, offered or displayed for sale, or served.
- (B) A vendor may sell farm products of another farmer provided that a copy of the producer certificate or same-day receipts are available upon request for farm products being sold, offered or displayed for sale, or served.
- (C) Farmers are exempt from obtaining a health permit only if the farmer sells only farm products in their natural and unprocessed state. The Health Authority reserves the right to conduct surveys to verify exemption status.
- (D) Farmers must store, handle, and display farm products in a manner which prevents adulteration or the creation of a public health hazard or nuisance.

#### 13-101.4 Site Location

- (A) Each swap meet and farmers market establishment must have an adequate number of permanently plumbed restrooms that meet the requirements of Chapters 5 and 6 of these regulations. Restrooms must be available for use by food handlers during all hours of operation.
- (B) Each swap meet and farmers market establishment must have waste receptacles, including
  - (1) A minimum of one waste container, for use by patrons, located within 15 feet of each food vendor's space or booth.
  - (2) Waste containers located within or adjacent to restroom and handwashing facilities.
- (C) Farmers' Markets vendors may operate at any permitted Farmers Market location with permission from the Farmers Market manager and prior written notification to the Health Authority detailing where and when the food establishment will be in operation.

13-2	Operational Requirements
Subparts 13-201	Required Records
13-201	

### 13-201 Required Records

The following records must be maintained on site by the swap meet or farmer market manager and be available for review by the Health Authority:

- (A) Copies of the health permit for each participating food establishment,
- (B) A list of all participating food vendors, and
- (C) A copy of the producer certificate which lists the approved food for each participating farmer.

## **Chapter 14** Special Events and Temporary Food Establishments

Parts			
14-1	1 Special Event Requirements		
14-2	Temporary Food Establishments		
14-3	Annual Itinerants		
14-1	Special Event Requirements		
Subparts			
14-101	Event Coordinator		
14-102	General Requirements for Special Events		
14-103	Trade Shows, Conventions, Cook-Offs, and Tasting Events		

### 14-1 Special Events and Temporary Food Establishments

Special events, temporary food establishments, and annual itinerants are required to operate within the parameters set forth in Chapters 1-8 of these regulations. This chapter describes additional requirements specific to special events, temporary food establishments, and annual itinerants.

### 14-101 Event Coordinator

### 14-101.1 Permit Requirements

(A) An event coordinator permit is required for a special event when there are:

- (1) Five or more permitted food vendors or mobile vendors, or
- (2) Two or more tasting booths.

#### (B) An event coordinator permit is not required if either of the following conditions apply:

- (1) Except as required in 14-101.1(A)(2), temporary food establishments or food vendors are owned and operated by the same person and the event is not a tasting event.
- (2) The special event does not meet the definition of a food establishment as described in these regulations.

#### 14-101.2 Application Submission

- (A) The event coordinator must submit the following items with the event coordinator permit application:
  - (1) A letter of permission or other legally executed document from the property owner granting permission to operate the event at the site address,
  - (2) A list of food vendors and their contact information,

- (3) A site map of the event indicating the location of food vendors, toilet and handwashing facilities, trash receptacles, parking, lighting, electrical access, and support service areas, and
- (4) A description of support services.
- (B) The Health Authority may deny an Event Coordinator Permit if:
  - (1) The application is not submitted at least one business day prior to the event start date,
  - (2) The application is incomplete, or there are missing supporting documents, and resubmission does not occur at least three business days prior to the event start date, or
  - (3) Other authorities or agencies having jurisdiction do not authorize the event.

### 14-101.3 Responsibilities of the Event Coordinator

The event coordinator is responsible for all items as specified on the event coordinator permit application such as potable water supply, disposal of wastewater, disposal of solid waste, restroom facilities including associated handwashing sinks, power supply, central warewashing facilities, and central refrigeration services. The event coordinator must ensure that:

- (A) A finalized list of food vendors is provided to the Health Authority at least three business days prior to the event,
- (B) There is at least one PIC at the event during all hours of operation who is knowledgeable about the operation and available to the Health Authority during the event,
- (C) Unpermitted food vendors do not participate in the special event,
- (D) For special events that exceed three days in duration, a three-compartment sink is provided for use by food vendors,
- (E) When power is supplied to food vendors by the event coordinator, power is capable of supporting all powered equipment, as contracted, for the duration of the event,
- (F) When central refrigeration services for food vendors are provided, the equipment is capable of maintaining food at 41°F or below for the duration of the event,
- (G) Food vendors are notified in advance of the availability and location of potable water sources or that potable water will not be provided,
- (H) A plan for the disposal of wastewater is provided to include the schedule for emptying communal gray water tanks when applicable.

- (I) A plan for waste disposal is provided and addresses collection and removal of solid waste during and after the event,
- (J) A resource recovery plan is implemented at events where attendance is expected to exceed 500 persons per day which provides that cardboard, glass, plastic bottles, and aluminum generated at an event of this size are collected and recycled, and
- (K) Non-potable water connections and containers are clearly labeled.

## 14-102 General Requirements for Special Events

### 14-102.1 Toilet facilities

- (A) The event coordinator must ensure that an adequate number of toilet facilities are provided for patron and participant use so as not to create a nuisance or public health hazard.
- (B) When the number of sewered toilets is insufficient, portable toilets must be provided. The permit holder of a special event must provide toilet facilities as set forth in NAC 444.825 unless otherwise approved based on an operational plan that includes more frequent cleaning and disposal of waste.
- (C) Toilets must be adequately serviced, stocked with dispenser-held toilet tissue, and maintained during the event.
- (D) Toilets must be set at least 50 feet away from any food operation.

#### 14-102.2 Handwashing Sinks

- (A) Handwashing sinks must be located at each toileting area.
- (B) At least one handwashing sink for each group of five toilet facilities must be provided.
- (C) Handwashing sinks must be adequately serviced, stocked, and maintained during the event. Liquid hand soap in a pump dispenser, and single-use paper towels dispensed in a sanitary manner, must be available at the handwashing sink.
- (D) A waste receptacle must be located at the handwashing sink for the disposal of paper towels.
- (E) Handwashing sinks for customer use must be placed at the exit to any animal attraction associated with the event.

#### 14-102.3 Animal Attractions

Animal attractions must not create nuisances, odors, or pest problems that impact food service operations. The Health Authority may impose additional restrictions and requirements to ensure the health of the public. All animal attractions must be set at least 50 feet away from any food operation.

#### 14-103 Trade Shows, Conventions, Cook-Offs, and Tasting Events

In addition to the responsibilities specified in section 14-101.3, the event coordinator of a trade show, convention, cook-off, or tasting event must inform all food vendors with a point of sale, or other arrangement for direct compensation for food or beverage, that they must have a valid health permit to participate in the event.

14-2	Temporary Food Establishments
Subparts	
14-201	Temporary Permit Requirements
14-202	Temporary Food Establishment Permit Exemptions
14-203	Operational Requirements for Temporary Food Establishments
14-204	Site Requirements

### 14-201 Temporary Permit Requirements

- (A) A person desiring to operate a temporary food establishment must apply for a permit at least one business day prior to the start date of the event.
- (B) Temporary food establishment operators who are found operating without a valid health permit will be required to cease food operations immediately until a valid health permit is obtained. Be advised that persons engaged in such activity are guilty of a misdemeanor under NRS 446.945 and may be prosecuted by the District Attorney per NRS 446.943.
- (C) A temporary food establishment permit must not exceed 14 consecutive days and is not transferable from person to person or from location to location.
- (D) A temporary food establishment must not exceed 100 square feet.
- (E) The temporary food establishment permit may be denied if:
  - (1) There are inadequate support services available to operate safely, or
  - (2) Food is unable to be protected due to inclement weather, or other conditions exist that cause a risk to public health.
- **(F)** The permit holder of the temporary food establishment must provide proof of payment of the permit application invoice upon request.

#### 14-202 Temporary Food Establishment Permit Exemptions

The Health Authority may exempt a temporary food establishment from the provisions of these regulations if the Health Authority determines that the food which is sold, offered or displayed for sale, or served at the establishment does not constitute a potential or actual hazard to the public health. Exemptions may include, but are not limited to:

- (A) Bottled water, canned soft drinks,
- (B) Customer self-service coffee or tea. This exemption does not include TCS or open-food handling except brewing coffee or tea,
- (C) Commercially prepared acidic beverages (such as orange juice, lemonade, and other similar beverages) that are served from the original properly labeled container without the addition of consumer ice or other regulated food product,
- (D) Hermetically sealed and unopened containers of non-TCS beverages, which do not require refrigeration,
- (E) Hot chocolate prepared for immediate service without the use of TCS foods,
- (F) Non-TCS prepackaged baked goods with proper labeling from an approved source and requiring no on-site preparation,
- (G) Non-TCS foods and unopened prepackaged food from an approved source with proper labeling, such as honey, jerked meats, potato chips, popcorn, and other similar foods,
- (H) Farm products sold by a vendor with a producer certificate and no food preparation, breaching of produce, or product sampling is done,
- (I) Commercially prepared, prepackaged, and unopened ice cream that is appropriately labeled including ingredients and manufacturer information, and
- (J) Vendors that provide samples of food without compensation, do not sell the food on-site, and are inspected under an Event Coordinator permit.

#### 14-203 Operational Requirements for Temporary Food Establishments

In addition to compliance with Chapters 1-8 of these regulations, temporary food establishments are subject to the additional operational requirements in this section.

#### 14-203.1 Equipment

Temporary food establishments must operate using equipment, which is in good condition, easily cleanable, and does not pose a food safety risk.

#### 14-203.2 Operational Requirements

Temporary food establishments must:

- (A) Conduct minimal food preparation on site,
- (B) Not conduct complex food processes, including but not limited to cooling, at the event location,

- (C) Prohibit use or sale of reduced oxygen packaged foods which were packaged at a retail food establishment unless prior approval has been granted by the Health Authority
- (D) Prohibit TCS food served or displayed at an event from being re-served or held over for future service,
- (E) Operate only at sites which written approval from the property owner has been obtained,
- (F) Submit menu changes to the Health Authority for approval prior to implementation,
- (G) Ensure that transportation vehicles are maintained clean, free of trash, food debris, spills, pests, or any other source of contamination to the food or equipment, and
- (H) In the absence of an approved commissary or permitted support kitchen, provide same day receipts for all TCS foods and/or open prepared food upon request to the Health Authority.

#### 14-203.3 Handwashing Facilities

- (A) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
- (B) The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.
- (C) An adequate number of handwashing sinks that meet the following criteria must be provided:
  - (1) If portable, the handwashing sink must be self-contained and equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply, and
  - (2) Provide a continuous flow of hot and cold running water.

#### 14-204 Site Requirements

- (A) Provide overhead protection for food preparation areas unless prohibited by fire code, and
- (B) Operate on a smooth surface such as asphalt or concrete, or provide adequate groundcover, to prevent dust or debris from becoming airborne.

14-3	Annual Itinerants	
Subparts		
14-301	Permit Requirements	
14-302	Operational Requirements	
14-303	Required Records	
14-304	Annual Itinerant Event Coordinator	

#### 14-301 Permit Requirements

In addition to compliance with Chapters 1-8 of these regulations, Annual Itinerants are subject to the additional requirements in this section. Annual Itinerants must:

- (A) Only operate at sites for which prior notice was given to the Health Authority,
- (B) Notify the Health Authority by submitting an Annual Itinerant Notification at least three business days prior to operating at a special event or farmers market. Updates to the schedule must be provided at least two business days prior to the start of each special event or farmers market. Failure to notify the Health Authority within the required timeframe will result in administrative action up to and including permit revocation,
- (C) Operate only at sites that meet the requirements in Subpart 14-204 and which written approval from the property owner has been obtained,
- (D) Submit menu changes to the Health Authority for approval prior to implementation,
- (E) Provide access to transportation or food storage vehicles utilized by the food vendor to ensure that the vehicle is maintained clean, free of trash, food debris, spills, insects, or any other source of contamination to the food or equipment, and
- (F) Not exceed 100 square feet in size.

## 14-302 Operational Requirements

#### 14-302.1 Operational Restrictions

Annual Itinerants must:

- (A) Conduct minimal food preparation on site,
- (B) Not conduct complex food processes, including but not limited to cooling, at the event location,
- (C) Prohibit TCS food served or displayed at an event from being re-served or held over for future service, and
- (D) Prohibit use or sale of reduced oxygen packaged foods which were packaged at a retail food establishment unless prior approval has been granted by the Health Authority.

#### 14-302.2 Handwashing Facilities

- (A) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
- (B) The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.
- (C) An adequate number of handwashing sinks that meet the following criteria must be provided:

- (1) If portable, the handwashing sink must meet the requirements of Subpart 4-205,
- (2) Provide a continuous flow of hot and cold running water without the use of a manual pump,
- (3) Be self-contained, and
- (4) Be equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply.

#### 14-303 Required Records

The Annual Itinerant permit holder must provide the following records to the Health Authority upon request:

- (A) Temperature logs for:
  - (1) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
  - (2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vendor is in operation,
- (B) A valid commissary agreement letter,
- (C) Permission letters, operational plans, or waivers associated with the permit, and
- (D) Same-day receipts for food when applicable.

#### 14-304 Annual Event Venue Permit Requirements

Annual Event Venues must comply with Subpart 14-101 and:

- (A) Provide permanently plumbed restrooms that meet the requirements of Chapters 5 and 6 of these regulations and are conveniently located and available for use by food vendors during all hours of operation,
- (B) Designate an area where food vendors may refill potable water and dump wastewater in an approved manner, and
- (C) Provide sufficient area lighting if the event operates after sundown.

14-4	Severability Clause	
Subparts 14-401	Severability Clause	

## 14-401Severability Clause

Should any section, paragraph, sentence, clause, or phrase of these regulations be declared unconstitutional or invalid for any reason the remainder of these regulations must not be affected thereby.

# Appendix A— Communicable Disease Protocol

The purpose of this Protocol is to assist the Person in Charge of a food establishment to take appropriate measures when dealing with an employee ill with pathogens that may be spread in food as required by Nevada Administrative Code (NAC) 441A-Communicable Diseases

Communicable Diseases that have the potential to cause Foodborne illness and are reportable to the Health Authority include but are not limited to: Amebiasis, Campylobacteriosis, Cryptosporidiosis, *E.coli* 0157:H7, Giardiasis, Hepatitis A, Salmonellosis, Shigellosis, Typhoid Fever and any extraordinary occurrence of illness or foodborne disease outbreak such as that associated with Norovirus (a more extensive list can be found in NAC 441A).

Food and beverage handlers are considered to be employed in sensitive occupations (NAC 441A.170) which enhance the potential for transmission of a communicable disease to other persons if a person who is infected with the communicable disease is working while in a contagious stage.

The Person in Charge of a food establishment must:

- Report known or suspect communicable disease to the Health Authority (NAC 441A.255).
- Prohibit a food handler from working with:
  - 1. Symptoms of gastrointestinal illness such as abdominal cramping, diarrhea, or vomiting until symptom free for at least 24 hours.
  - 2. Jaundice until laboratory results indicate the individual is not currently infected with Hepatitis A.
  - 3. A lesion(s) that cannot be effectively covered until such time as the wound has healed or a physician's note is provided indicating the lesion(s) is not infectious.
  - 4. Sore throat with fever. Note: A worker experiencing active symptoms caused by seasonal allergies or hay fever (persistent cough, running nose, and/or sneezing) shall be prohibited from open food service until symptoms are controlled.
- Cooperate with the Health Authority during an epidemiological investigation and carry out measures for the prevention, suppression, and control of a communicable disease (NAC 441A.280 and 441A.530) including:
  - 1. Providing information, including names and addresses of patrons and employees, work schedules of employees, illness histories of employees, menus and any other information necessary to complete the investigation.
  - 2. Providing access to employees for interviewing and obtaining clinical specimens.
  - 3. Providing food, beverage and environmental samples for laboratory analysis.
  - 4. Exclusion of an employee as required by NAC 441A specific to the diagnosis until cleared to return to work by the Health Authority.
  - 5. Institute infection control, and hygienic and sanitation measures as required by the Health Authority.

More information can be found on the FDA website: <u>Employee Health and Personal Hygiene</u>

## Appendix B— Checklist for Reopening Inspection After an Imminent Health Hazard

## Checklist for Reopening After an Imminent Health Hazard

The permit holder shall ensure that the imminent health hazard has been corrected and all items on this checklist are verified:

#### **Physical Facility**

- Electricity is available throughout facility
- If applicable, natural gas is available to facility
- All plumbing is operating properly
- There is no visible damage or incomplete repairs, all gaps and holes are sealed
- Floors, walls, and ceiling are clean
- Lights are operational and at proper brightness
- Cold and hot water is available throughout the facility
- Hot water is available at a minimum of 100°F at every hand sink
- Hot water is available at a minimum of 120°F at the 3-compartment sink

#### Facility Operation

- All potentially contaminated food is discarded
- All kitchenware and equipment are properly washed, rinsed, sanitized, and air dried
- All dishware and utensils are properly washed, rinsed, sanitized, and air dried
- Cold holding units are holding at or below 41°F
- Freezer units are holding at or below 0°F
- All unit thermometers are working properly
- Hot holding units are holding at or above 135°F
- Dishwasher/glasswasher is operating properly
- Hood ventilation system is operating properly
- Hand sinks and restrooms are stocked and operational

#### Inspection Readiness

- Sanitizer buckets are set up at proper concentration
- Thermometers are calibrated
- Pest control records are available
- Air curtains are operating properly
- Person in Charge is available and knowledgeable
- All food handlers have current Food Handler Safety Training Cards (Health Card)
- All food is labeled and dated as required
- Grade card and required signs are posted conspicuously

# Appendix C—Dogs in Outdoor Dining Areas Agreement

nitials	By initialing next to each box below, I attest that I understand and agree to enforce the following conditions when allowing dogs in an outdoor dining area located on the premises of my food establishment.		
		gs, dogs will not be allowed inside the food establishment s through the food establishment to access the outdoor	
	listed:	or dining area with the following minimum requirements	
	<ul> <li>Patrons must keep their dogs on a leash, in a carrier, or otherwise restrained,</li> <li>Dog waste must be cleaned up by the dog owner using disposable bags and/or clean up kits provand discarded in the designated covered trashcans,</li> <li>Dogs must remain on the ground, and are not allowed on seats, benches, tables, or other furnitu</li> <li>Dogs must not eat off of reusable tableware or utensils. If a cup or bowl is needed, please ask ar employee for a disposable container.</li> </ul>		
	<ul> <li>Each outdoor dining area where dogs are permitted:</li> <li>Will have a covered trashcan and disposable trash bags conveniently and conspicuously located for use by patrons. The trashcan(s) will be emptied on a frequent basis, into an outdoor dumpster, to prevent nuisance conditions, and</li> <li>Will be deep cleaned on a frequent enough basis to prevent pests, the buildup of soil, and odors. Mops, brooms, and other tools used to clean the outdoor dining area will not be used for other purposes and will be stored separately from any food storage or handling area.</li> </ul>		
	<ul> <li>The Person in Charge will enforce, and employees will be trained, on the following:</li> <li>Prohibiting dogs from eating or drinking from reusable kitchenware (i.e. by offering disposable wares to the patron),</li> <li>Preparation of a waste clean-up kit, when to provide it to a patron, and how to block off or clear an area that requires clean-up,</li> <li>Proper handwashing techniques, and</li> <li>Avoiding cross-contamination by prohibiting touching, serving, or cleaning up after dogs while working in a food handling capacity.</li> </ul>		
[	Waste clean-up kits will be provided by the food establishment to patrons as needed. The kit will contain disposable gloves, liquid absorbent, a scoop, and a scraper to be used by patrons to remove waste.		
	<ul> <li>I understand and agree that:</li> <li>The Americans with Disability Act takes precedence if there is a conflict with an interpretation of this agreement, and</li> <li>The permit holder is responsible for mitigating nuisance conditions created by allowing dogs on the outdoor premises of the food establishment. Damage to persons and/or animals related to animal interactions on premises are the sole responsibility of the permit holder and/or dog owner or handler.</li> </ul>

5,202	tested and certified. .12 HAND WASHING SINKs, Location		nder ¶ (A) of this section. Location and Placement
(A)	Wall-hung HAND WASHING SINKs, Location Wall-hung HAND WASHING SINKs shall be installed and located to allow convenient use by employees in areas used to prepare FOOD and wash UTENSILs.	5-204.1	Handwashing Sinks A handwashing sink shall be located:
(B)	In areas without walls, such as buffets, carving stations, and island stations, or due to EQUIPMENT configuration prohibiting conventional design, the HEALTH AUTHORITY may approve alternate HAND WASHING SINK design and placement. HAND WASHING SINKs shall be conveniently located and easily accessible to employees at all times.	. ,	<ol> <li>In each permit area to allow convenient use by employees in food preparation, food dispensing, and warewashing areas;</li> <li>In, or immediately adjacent to, toilet rooms.</li> <li>A handwashing sink shall be stocked with:         <ol> <li>A cleaning compound for hands in a fixed dispenser,</li> </ol> </li> </ol>
(C)	HAND WASHING SINKs shall be easily accessible and available to employees without opening doors or moving barriers.		<ul> <li>(2) Disposable towels in a fixed dispenser; and,</li> <li>(3) A lined waste receptacle</li> </ul>
(D)	<ul> <li>BEVERAGE and ice dispensing areas in new and extensively remodeled establishments shall have a separate and distinct wall-hung HAND WASHING SINK, if: <ol> <li>Located in a FOOD pick-up area.</li> <li>Bussing of soiled TABLEWARE area.</li> <li>Any open FOOD including but not limited to soup, toast, garnishes, salads, or salad dressings is placed in the area.</li> </ol> </li> <li>(4) Bagging ice.</li> </ul>		
(E)	Additional HAND WASHING SINKs are not required in areas used solely for the bussing of soiled TABLEWARE.		
(F)	All dish washing areas shall have convenient and easily accessible wall-hung HAND WASHING SINKs to allow proper hand washing after loading soiled TABLEWARE, and prior to unloading clean TABLEWARE.		
(G) (H)	<ul> <li>HAND WASHING SINKs shall be located in, or immediately adjacent to, rooms with toilets, or in toilet vestibules. Sinks used for preparing FOOD or for washing</li> <li>EQUIPMENT or UTENSILs may not be used for washing hands. The rinsing of FOOD and UTENSILs in HAND WASHING SINKs is prohibited.</li> <li>Fixed dispensers of liquid soap or detergent for cleaning hands shall be available at all</li> </ul>		
('')	HAND WASHING SINKs. Interim portable soap dispensers may be temporarily used when repairs may be required for fixed dispensers.		

<ol> <li>A supply of sanitary, disposable towels for drying hands shall be conveniently located near each HAND WASHING SINK. Shared common towels are prohibited. Waste receptacles that are EASILY CLEANABLE shall be conveniently located near the HAND WASHING SINK. Cloth towels are prohibited at employee HAND WASHING SINKs.</li> <li>HAND WASHING SINKs, dispensers for soap, towel dispensers, and all related fixtures sha be kept clean and in good repair. Hand blow dryers shall not be used at HAND WASHING SINKs as a sole means for drying hands in areas used by employees.</li> <li>A HAND WASHING SINK may have a direct connection to a sewer line drain.</li> <li>In areas that process or prepare raw FOOD of animal origin for consumption of as READY- TO-EAT FOOD, a separate HAND WASHING SINK shall be provided for the sole use of that operation.</li> <li>5-402.12 Backflow Prevention</li> </ol>	
A direct connection shall not exist between the SEWAGE system and a drain receiving discharge from EQUIPMENT in which FOOD, portable EQUIPMENT, or UTENSILs are placed. An air gap of a least 1" shall be provided between the EQUIPMENT drain pipe and the flood level rim of the flood drain. To reduce splash at the floor drain, the drain pipe may be cut at an angle, if adequate air gat is provided.	t portable equipment, or utensils are placed. P r (B) Paragraph (A) of this section does not apply to floor drains that originate in refrigerated
<ul> <li>5-402.13 Grease Trap <ul> <li>(A) As per the regulations adopted by the Southern Nevada Uniform Plumbing Code, one or more grease traps or grease interceptors shall be installed at any FOOD ESTABLISHMENT the generates grease that could enter a sewer system.</li> <li>(B) Grease traps or grease interceptors shall be EASILY CLEANABLE.</li> <li>(C) A grease trap or grease interceptor shall be located outside the FOOD ESTABLISHMEN whenever possible.</li> <li>(D) A grease trap or grease interceptor shall not be located in any area where FOOD is prepared or where UTENSILS or TABLEWARE are washed or stored. Prior to installation the location shall be APPROVED by the HEALTH AUTHORITY.</li> <li>(E) Alternative methods of grease disposal (grease machines) may be located within a FOO ESTABLISHMENT with prior approval from the HEALTH AUTHORITY.</li> </ul> </li> </ul>	t and inspections.
<ul> <li>5-402.14 Conveying SEWAGE</li> <li>(A) SEWAGE shall be conveyed to the point of disposal through an APPROVED sanitary SEWAGE system, or other APPROVED system, including use of SEWAGE transport VEHICLEs, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated in an APPROVED manner.</li> <li>(B) Soil and waste lines shall not be installed over FOOD preparation, storage, or EQUIPMENT and UTENSIL cleaning areas, unless separated by the floor immediately above or by some other method APPROVED by the HEALTH AUTHORITY such as the installation of trough pans under roof drain lines, soil lines, and waste lines which are drained into floor sinks.</li> </ul>	5-402.4 Conveying Sewage Sewage must be conveyed to the point of disposal through an approved sanitary sewage system or other approved system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law.

5	402.15 Gravity Drainage of Liquid Waste Effluent from EQUIPMENT to Sewer		
(/	A) Drainage of all liquid waste effluent from EQUIPMENT to sewer shall be accomplished		
	by gravity at not less than 1 inch per 12 of fall.		
(E	3) Sump pumps and lift stations are not allowed for the purpose of draining FOOD		
	service EQUIPMENT to sewer, except in the case of a lift station installed outside the		
	FOOD ESTABLISHMENT that has been APPROVED by the building and sanitation		
	REGULATORY AUTHORITY. In such a case, an alarm system with both audio and visual		
	signals shall be installed within each FOOD ESTABLISHMENT serviced by the lift stations.		
((	C) Evaporative wastewater may be drained to a heated evaporative pan device APPROVED by the HEALTH AUTHORITY.		
([	D) Secondary HVAC drains, within FOOD processing or storage areas, may not terminate at the ceiling or at any place that may be a source of FOOD or UTENSIL CONTAMINATION.

Poisonous or Toxic Materials No significant change	
Chapter 8 Compliance and Enforcement	
8-203.12 Change of Ownership of an Existing Establishment An existing FOOD ESTABLISHMENT, at the time of change of ownership, shall meet the following requirements prior to issuance of a health PERMIT:	<ul> <li>8-303 Issuance</li> <li>8-303.1 Permit Issuance</li> <li>The Health Authority may issue a permit to a food establishment after the following requirements</li> </ul>
(C) Facilities receiving more than 10 DEMERITS of violations shall be closed until applicable fees are paid, and a reinspection is conducted resulting in a total of 10 DEMERITS or less of violations, with no identical CRITICAL or MAJOR VIOLATIONS remaining.	<ul> <li>are met:</li> <li>(C) A final permitting inspection shows that the food establishment: <ul> <li>(3) Is in substantial compliance with these regulations either by:</li> <li>(a) Being constructed, converted, or remodeled in accordance with the approved plans, or</li> <li>(b) Receiving 15 or fewer demerits during a final permitting inspection. Food establishments receiving more than 15 demerits during a final permitting inspection. A reinspection for change of permit holder must be closed, if in operation. A reinspection may be conducted after applicable fees are paid and must result in 15 or fewer demerits, with no repeat priority or priority foundation violations occurring, for permit issuance.</li> </ul> </li> </ul>
<ul> <li>8-303 FOOD ESTABLISHMENT Grades</li> <li>8-303.11 Grades</li> <li>(E) Notwithstanding the grade criteria of Paragraph 8-303.11 (A) of this Chapter, whenever an identical consecutive CRITICAL or MAJOR VIOLATION is documented, the establishment shall be DOWNGRADEd to the next lower grade with a reinspection required and associated fee paid as specified in Paragraph 8-301.11 (B) of this Chapter.</li> </ul>	<ul> <li>8-403.2 Food Establishment Grades</li> <li>(F) Notwithstanding the grade criteria of ¶ 8-403.2(B), whenever a repeat violation of a priority item is documented in the next routine inspection, the food establishment must be downgraded to the next lower grade.</li> <li>(H) Food establishments such as, annual itinerants, farmers markets, and those undergoing a Change of Permit Holder will be inspected on a pass fail criteria which is determined as follows:</li> </ul>
	<ol> <li>Pass; a demerit score of 0 – 15,</li> <li>Fail; a demerit score of 16 or more.</li> </ol>
	(I) Notwithstanding the Pass/Fail criteria of ¶ 8-403.2(H), whenever a repeat violation of a priority item is documented in the next routine inspection, the permit must be immediately suspended. The food establishment must remain closed until the permit holder has corrected the priority and priority foundation items, paid any applicable fees, and an inspection is conducted that results in a score of 15 or fewer demerits with no repeat violation of a priority or priority foundation item.
	<ul> <li>8-405 Priority Items and Priority Foundation Items</li> <li>8-405.1 Timely Correction         <ul> <li>(A) Except as specified in ¶ (B) of this section, a permit holder must at the time of inspection correct a violation of a priority item or priority foundation item of these regulations and</li> </ul> </li> </ul>

	1
	implement corrective actions for a HACCP plan provision that is not in compliance with its critical limit. Pf
	(B) Considering the nature of the potential hazard involved and the complexity of the corrective action needed, the Health Authority may agree to or specify a longer time
	frame, not to exceed: Pf
	(1) For priority items, correction is required within 72 hours after the inspection, or
	(2) For priority foundation items and HACCP plan deviations, correction is required
	within 10 calendar days after the inspection.
	8-405.2 Verification and Documentation of Correction
	The permit holder must notify the Health Authority within the timeframe specified in $\P$ 8-
	405.1(B), unless otherwise specified, after corrections are made to priority or priority foundation
	items, or a HACCP plan deviation.
	8-406 Time Frame for Correction of Core Items
	(A) Except as specified in ¶ (B), the permit holder must correct core items by a date and time
	specified by the Health Authority but no later than 90 calendar days after the inspection.
	8-601 Administrative Process for Non-Compliance
	Food establishments exhibiting a history of uncontrolled risk factors for foodborne illness and
	non-compliance with these regulations may enter the administrative process for non-compliance.
	(A) Additional conditions may be placed upon the permit.
	(B) Failure to gain control of risk factors for foodborne illness at the facility can lead to further
	administrative actions up to and including suspension of the permit to operate, pending
	permit revocation.
	8-602.2 Post Revocation Action
	(C) Following permit revocation, any persons listed as sole proprietor, officer, or managing
	member of the business must be prohibited from obtaining a food establishment permit
	within the jurisdiction of the Southern Nevada Health District.
	<ul><li>8-602 Appeal Process</li><li>(A) A person aggrieved by findings or corrective action required by the Health Authority</li></ul>
	<ul> <li>(A) A person aggrieved by findings or corrective action required by the Health Authority following an inspection or investigation may make a written request for a meeting with</li> </ul>
	the inspector responsible for the action and the program supervisor to discuss the
	inspection or investigation, including, if applicable, the person's objections to the findings
	or corrective action required, and any requests to modify the inspection or investigation
	report. A request for such a meeting must be received by the Health Authority no later
	than 15 business days after the date of the inspection or investigation.
	(B) If the meeting held pursuant to $\P$ (A) does not resolve the issue, the aggrieved person may
	submit a written request for a meeting with the section manager or division director to
	discuss any unresolved issues. A request for such a meeting must be received by the
	Health Authority no later than 10 business days after the meeting held pursuant to $\P$ (A).

Swap N	Aeet and Farmers Markets	

	<ul> <li>13-101.2 Support Services         Newly constructed or substantially remodeled swap meets must have an onsite commissary if         they contract with or lease space to three or more food vendors that handle TCS foods. The swap         meet must provide access to the necessary support services for all contracted food vendors.     </li> <li>13-201 Required Records         The following records must be maintained on site by the swap meet or farmer market manager         and be available for review by the Health Authority:         (A) Copies of the health permit for each participating food establishment,         (B) A list of all participating food vendors, and         (C) A copy of the producer certificate which lists the approved food for each participating         farmer.     </li> </ul>
Chapter 14 Special Events and Temporary Food Establishments	
EVENT COORDINATOR PERMIT means a PERMIT as issued by SNHD for a SPECIAL EVENT that will include 2 or more TEMPORARY FOOD ESTABLISHMENTs or FOOD BOOTHs at a given location, other than a single operator with multiple FOOD ESTABLISHMENTs located on their own property.	14-101       Event Coordinator         14-101.1       Permit Requirements         (A)       An event coordinator permit is required for a special event when there are: <ul> <li>(1)</li> <li>Five or more permitted food vendors or mobile vendors, or</li> <li>(2)</li> <li>Two or more tasting booths.</li> </ul>
	<ul> <li>14-201 Temporary Permit Requirements         <ul> <li>(A) A person desiring to operate a temporary food establishment must apply for a permit at least one business day prior to the start date of the event.</li> <li>(D) A temporary food establishment must not exceed 100 square feet.</li> </ul> </li> </ul>
	<ul> <li>14-202 Temporary Food Establishment Permit Exemptions</li> <li>The Health Authority may exempt a temporary food establishment from the provisions of these regulations if the Health Authority determines that the food which is sold, offered or displayed for sale, or served at the establishment does not constitute a potential or actual hazard to the public health. Exemptions may include, but are not limited to:         <ul> <li>(A) Bottled water, canned soft drinks,</li> <li>(B) Customer self-service coffee or tea. This exemption does not include TCS or open-food handling except brewing coffee or tea,</li> </ul> </li> </ul>
	<ul> <li>(C) Commercially prepared acidic beverages (such as orange juice, lemonade, and other similar beverages) that are served from the original properly labeled container without the addition of consumer ice or other regulated food product,</li> <li>(D) Hermetically sealed and unopened containers of non-TCS beverages, which do not require refrigeration,</li> <li>(E) Hot chocolate prepared for immediate service without the use of TCS foods,</li> <li>(F) Non-TCS prepackaged baked goods with proper labeling from an approved source and requiring no on-site preparation,</li> </ul>
	<ul> <li>(G) Non-TCS foods and unopened prepackaged food from an approved source with proper labeling, such as honey, jerked meats, potato chips, popcorn, and other similar foods,</li> <li>(H) Farm products sold by a vendor with a producer certificate and no food preparation, breaching of produce, or product sampling is done,</li> <li>(I) Commercially prepared, prepackaged, and unopened ice cream that is appropriately labeled including ingredients and manufacturer information, and</li> </ul>

(1)	) Vendors that provide samples of food without compensation, do not sell the food on-site, and are inspected under an Event Coordinator permit.
14	4-3 Annual Itinerants
14	1-302.2 Handwashing Facilities
(C	C) An adequate number of handwashing sinks that meet the following criteria must be
	provided:
	(1) If portable, the handwashing sink must meet the requirements of Subpart 4-205,
	(2) Provide a continuous flow of hot and cold running water without the use of a manual pump,
	(3) Be self-contained, and
	(4) Be equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply.
14	4-303 Required Records
	he Annual Itinerant permit holder must provide the following records to the Health Authority
ur	pon request:
(A	N) Temperature logs for:
	(1) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
	(2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vendor is in operation,

#### SOUTHERN NEVADA HEALTH DISTRICT <u>(SNHD)</u> <u>2023 FOOD</u> REGULATIONS GOVERNING THE SANITATION OF FOOD ESTABLISHMENTS

WHEREAS, the Southern Nevada Health District (SNHD) has been established by the County of Clark and the cities of Las Vegas, North Las Vegas, Henderson, Mesquite, and Boulder City as the is a public Health Authority for those entities, and organized pursuant to Nevada Revised Statutes (NRS) Chapter 439, has with jurisdiction over all public health matters in the Health Districtwithin Clark County Nevada; and

WHEREAS, the Southern Nevada District Board of Health (Board) is the <u>Southern Nevada Health District</u> governing body-of the SNHD, and is authorized to adopt regulations to regulate sanitation and sanitary practices in the interest of the public health, and to-protect and promote the public health and safety in the geographical area subject to the<u>its</u> jurisdiction of the Health District and is specifically authorized to adopt; and

WHEREAS, in accordance with the authority granted pursuant to Nevada Revised Statutes Chapter 439 and Chapter 446, the Board hereby adopts regulations regarding to establish uniform, minimum standards for the operation of food establishments as per NRS 446.940(2); and 3- in Clark County, Nevada;

WHEREAS, unsanitary conditions of food establishments constitute a hazard to public health and welfare, the Board finds that the sanitation and safety of food establishments does affect the public health, and finds that it is necessary to adopt Southern Nevada Health District Regulations Governing the Sanitation and Safety of Food Establishments to promote and regulate the safe and sanitary handling of food items in a food establishment; and

WHEREAS, these regulations in no way preclude a food establishment from establishing additional rules and operating procedures as long as they do not contradict those established herein.

WHEREAS, the Board believes that deems the following regulations are designed necessary to protect and promote the public health and safety, it does therefore publish, promulgate, and order compliance within Clark County, Nevada with the substantive and procedural requirements hereinafter set forth.

	23

Change of Permit Holder does not apply to portable food establishments such as mobile vendors, open-air vendors,

Method for cleaning equipment with a detergent solution, water rinse, and sanitizing solution by circulating

CIP means CLEANED IN PLACE by the circulation or flowing by mechanical means through a piping system of-

annual itinerants, or farmers markets unless otherwise approved.

Cleaned in place (CIP)

(A)

CONDITIONAL FOOD HANDLER means a prospective FOOD HANDLER to whom a job offer is made, conditional on responses to subsequent medical questions or examinations designed to identify potential FOOD HANDLERs who may be suffering from a disease that can be transmitted through FOOD, and done in compliance with Title 1 of the Americans with Disabilities Act of 1990. CONFIRMED DISEASE OUTBREAK means a FOOD BORNE ILLNESS foodborne illness outbreak in which anepidemiologicallaboratory analysis, followed by lab analysis, of appropriate specimens identifies caustic agents whicha causative agent and epidemiological analysis implicates athe food as the causesource of anthe illness.

#### Consumer CONSUMER means a PERSON

An individual who is a member of the public, takes possession of food, and doesis not functionfunctioning in the capacity of an operator of a food establishment or FOOD PROCESSING ESTABLISHMENT, and does not offer the food for resale.

CONTAMINATION means the presence of extraneous, especially infectious, material that renders a substance or preparation impure or harmful.

**CORROSION-RESISTANT MATERIAL** means a structural Core Item

(A) A provision in these regulations that is not designated as a priority item or a priority foundation item.

Core item includes an item that usually relates to general sanitation, operational controls, sanitation standard (B) operating procedures (SSOP), facilities, structures, equipment design, or general maintenance.

## Corrosion-Resistant Material

A material that maintains acceptable surface cleanability characteristics under prolonged influence of the FOOD to be contacted, contact with food or during the normal use of cleaning compounds and sanitizing solutions, and other conditions of the use environment. **COUNTER-MOUNTED EQUIPMENT** means

Counter-Mounted Equipment

Equipment that is not portable and is designed to be mounted off the floor on a table, counter, or shelf. **CRITICAL CONTROL POINT** means Critical Control Point

A point or procedure in a specific food process system where loss of control may result in an unacceptable health risk. **CRITICAL LIMIT** means

# **Critical Limit**

The maximum and/or minimum value to which a physical, biological, or chemical parameter must be controlled at a critical control point to minimize the risk that thean identified food safety hazard may occur.

CRITICAL VIOLATIONS means items directly related to the protection of the public from FOOD BORNE ILLNESS or injury including but not limited to FOOD from unsafe sources, inadequate cooking, improper holding temperatures, contaminated EQUIPMENT, and poor hygienic practices.

CROSS CONTAMINATION means the passing of bacteria, microorganisms, or other harmful substances indirectly from one surface to another through improper or unsanitary EQUIPMENT, procedures, or products.

**CUT LEAFY GREENS** means

Cut Leafy Greens

Fresh leafy greens whose leaves have been cut, shredded, sliced, chopped, or torn. The term "leafy greens" includes\_ include iceberg lettuce, romaine lettuce, leaf lettuce, butter lettuce, baby leaf lettuce (i.e., immature lettuce or leafy greens), escarole, endive, spring mix, spinach, cabbage, kale, arugula and chard. The term leafy greens does not include herbs such as cilantro or parsley.

chard. The term "leafy greens" does not include herbs such as cilantro or parsley. **DEMERIT**-means the numerical value assigned to

Downgrade

Violations reported on an individual violation of these Regulations.

DISCLOSURE means a written statement that clearly identifies the animal-derived FOOD which is, or can be ordered to be served raw, undercooked, or without otherwise being processed to eliminate pathogens. DISTRICT BOARD OF HEALTH The DISTRICT BOARD OF HEALTH of Southern Nevada consists of two representatives of the Board of County Commissioners, two representatives of the governing body of the largest incorporated cityinspection resulting in the county, one representative of the governing body of each any grade other city in the county, five at large members, including two physicians, one registered nurse, one environmental specialist, and one member of a business/industry regulated by the HEALTH AUTHORITY DOWNGRADE means to post a lowerthan an 'A' letter grade at a permitted food establishment. DRINKING WATER DRINKING WATER means-Drinking Water (A) Water that meets criteria as specified in 40 CFR 141, National Primary Drinking Water Regulations. DRINKING WATER and is traditionally known as potable water. Drinking water includes the term water except where the term used connotes that the water is not potable, includingbut not limited to such as boiler water, mop water, rain water, waste water rainwater, wastewater, and non-**DRINKING**nondrinking water. DRY STORAGE AREA means Dry Storage Area A room or area designated for the storage of packaged or containerized bulk food that is not a POTENTIALLY HAZARD-FOOD (PHF) TIME /TEMPERATURE CONTROL FOR SAFETY (TCS) food and dry goods such as single-service items. ncluding but not limited to SINGLE SERVICE ARTICLES. ASILY CLEANABLE EASILY CLEANABLE means **Easily Cleanable** (A) A characteristic of a surface that: (1) Allows effective removal of soil by normal cleaning methods. (2) Is dependent on the material, design, construction, and installation of the surface-, and Varies with the likelihood of the surface's surface's role in introducing pathogenic or toxigenic agents<sub>7</sub> (3) or other contaminants into food based on the surface's approved placement, purpose, and use. (B) Easily cleanable includes a tiered application of the criteria that qualify the surface as easily cleanable as specified in Paragraph subparagraph (A) of this definition to different situations in which varying degrees of cleanability are required including but not limited tosuch as: The appropriateness of stainless steel for a food preparation surface, as opposed to the lack of need (1) for stainless steel to be used for floors or tables used for consumer dining, or (1)(2) The need for a different degree of cleanability for a utilitarian attachment or accessory in the kitchen as opposed to a decorative attachment or accessory in the consumer dining area. ASILY MOVEABLE EASILY MOVEABLE means portable, **Easily Movable** 

- (A) <u>Portable</u>; mounted on casters, gliders, or rollers<sub>7</sub>; or provided with a mechanical means to safely tilt a unit of equipment for cleaning-, and
- (B) Having no utility connection, a utility connection that disconnects quickly. or a flexible utility connection line of sufficient length to allow the equipment to be moved for cleaning of the equipment and cleaning of the adjacent area.

GG means

#### Egg

(A) — The shell egg of avian species including but not limited tosuch as chicken, duck, goose, guinea fowl, quail, RATHES, ratites or turkey.

Egg does not include:

(A) A balut-

(B) The egg of reptile species including but not limited tosuch as alligator, or

#### (B)(C) An egg product.

**SG PRODUCT** 

EGG PRODUCT means

Egg Product

All, or a portion<sub>7</sub> of the contents found inside eggs separated from the shell and pasteurized in a food processing **ESTABLISHMENTplant**, with or without added ingredients, intended for human consumption including but not limited to, such as dried, frozen<sub>7</sub> or liquid eggs.

Egg product does not include food which contains eggs only in a relatively small proportion including but not limited tosuch as cake mixes.

# Employee

An ENTEROHEMORRHAGIC ESCHERICHIA COLI (EHEC) means *E.coli* which cause hemorrhagic colitis, meaning bleeding enterically or bleeding from the intestine. The term is typically used in association with *E.coli* that has the capacity to produce Shiga toxins and to cause attacking and effacing lesions in the intestine. EHEC is a subset of SHIGA TOXIN-PRODUCING ESCHERICHIA COLI (STEC), whose members produce additional virulence factors. Infections with EHEC may be ASYMPTOMATIC but are classically associated with bloody diarrhea (hemorrhagic colitis), and hemolytic uremic syndrome (HUS), or thrombotic thrombocytopenic purpura (TTP). Examples of serotypes of EHEC include: *E.coli* 0157:H7, *E.coli* 0157:NM, *E.coli* 026:H11, *E. coli* 0145:NM, *E.coli* 103.H2, or *E.coli* 011:NM. Also see shiga toxin producing *E.coli*.

#### EQUIPMENT

EQUIPMENT means individual who is a permit holder, PIC, food handler, individual having supervisory or management duties, individual on the payroll, family member, volunteer, individual performing work under contractual agreement, or other individual working in a food establishment.

### Equipment

An article that is used in the operation of a food establishment including but not limited tosuch as a freezer, grinder, hood, ice maker, meat block, mixer, oven, reach-in refrigerator, scale, sink, slicer, stove, table, temperature measuring device for ambient air, vending machine, or WARE WASHING warewashing machine.

Equipment does not include apparatuses used for handling or storing large quantities of packaged FOOD<u>foods</u> that isare received from a supplier in a <u>casecased</u> or <u>over wrappedoverwrapped</u> lot, <u>including but not limited tosuch as</u> hand trucks, forklifts, dollies, pallets, racks, and skids.

#### Event Coordinator EXCLUDE means

A designated individual responsible for the coordination of temporary food establishments, food vendors, and associated support services and permits for a special event.

#### Exclude

To prevent a PERSONan individual from working as an employee in a food establishment or entering a food establishment as an employee.

## **Facilities**

The structure and interior surfaces of a food establishment including accessories such as soap and towel dispensers and attachments such as light fixtures and heating or air conditioning system vents.

#### Farmer

Any person who operates a farm in the United States as any of the following: an owner, part owner, tenant, or sharecropper.

## Farmers' Market

A place of business where a farmer, or a representative designated by the farmer, and possessing the producer certificate of farm products, can bring their products for direct sale to the consumer. A minimum of one farmer, or designated representative, must be present and offering at least one farm product for sale for the venue to be operated as a farmers' market.

#### Farm Products FISH means:

**A**-\_

All agricultural, horticultural, viticultural and vegetable products of the soil. The term does not include livestock and livestock products, poultry and poultry products, uncertified non-graded whole shell eggs, fish and fish products, shellstock and shellstock products, crustacean and crustacean products, honey, hay and timber products, or milk and milk products.

# <u>Fish</u>

Fresh or saltwater finfish, <u>crustaceancrustaceans</u> and other forms of aquatic life<del>, other than birds or mammals, and</del>\_ (including-<u>but not limited to</u> alligator, frog, aquatic turtle, jellyfish, sea cucumber, <u>and</u> sea urchin; and the roe of such animals) <u>other than birds or mammals</u>, and <u>all</u> mollusks, if such animal life is intended for human consumption.

Fish includes an edible human food product derived in whole or in part from fish, including fish that have been processed in any manner.

#### Food

**FOOD**-means A raw, cooked, or processed edible substance, ice, <u>BEVERAGEwater</u>, <u>beverage</u>, or <del>an</del> ingredient used<sub>7</sub> or intended for use or for sale<sub>7</sub> in whole or in part for human consumption<sub>7</sub> or chewing gum.

### Food Additive

Food Additive has the meaning stated in the FOOD-CONTACT SURFACE means surfaces of EQUIPMENT and UTENSILs21 USC 321(s) and 21 CFR 170.3(e)(1).

# Foodborne Disease Outbreak

The occurrence of two or more cases of a similar illness resulting from the ingestion of a common food.

## Food-Contact Surface

(A) A surface of equipment or a utensil with which food normally comes ininto contact, and the surfaces with or

(B) A surface of equipment or a utensil from which food may drain back onto surfaces, drip, or splash:

(1) Into a food, or

(1)(2) Onto a surface normally in contact with food.

## Food Establishment

Any place, structure, premises, vehicle or vessel, or any part thereof, in which any food intended for ultimate human consumption is manufactured or prepared by any manner or means whatever, or in which any food is stored, sold, offered or displayed for sale, or served.

Food Establishment does not include:

**FOOD BORNE DISEASE OUTBREAK** means the occurrence of two or more cases of the same or a similar illness resulting from the ingestion of a common FOOD or FOOD from a common source.

FOOD BORNE ILLNESS means adverse health effects resulting from the ingestion of contaminated or ADULTERATED FOOD or water.

OOD ESTABLISHMENT

<del>(A)</del>	FOOD ESTABLISHMENT means an operation at a particular location that stores, prepares, packages, serves,
	vends, or otherwise provides FOOD for human consumption which:
	(1) Includes but is not limited to a restaurant, satellite or catered feeding location, catering operation
	if the operation provides FOOD directly to a CONSUMER, market, vending location, a conveyance
	used to transport people, or an institution.
	(2) Includes an operator that relinquishes possession of FOOD to a CONSUMER, directly or indirectly,
	through a delivery service including but not limited to home delivery of grocery orders, restaurant
	take out orders, or service that is provided by common carriers.
	ESTABLISHMENT includes:
	ment of the operation, or a separate preparation facility, that supplies a vending location, or a satellite feeding-
locatio	on, unless the vending or feeding location is PERMITted by the applicable REGULATORY AUTHORITY.
	(3) An operation that is conducted in a mobile, stationary, temporary, or permanent facility or location where consumption is on or off the PREMISES.
Food	Establishment-does-not-include:
	(4) An establishment that offers meets the exemption requirements pursuant to NRS 446.870 and is-
	subject to the requirements of NAC 446.042.
(A)	Private homes, unless the food prepared or manufactured in the home is sold, <u>or</u> offered or displayed for sale $_{\tilde{\tau}}$
	or for compensation or contractual consideration of any kind $_{\overline{r}_{\boldsymbol{k}}}$
(-)	
(B)	Fraternal or social clubhouses at that have a status as a 501 (c)(7) or (8), and which attendance is limited to
	members of the club $_{\tau_{L}}$
(0)	
(C)	Vehicles operated by common carriers engaged in interstate commerce, or any third-party delivery service
	that delivers food from a food establishment does not directly handle unpackaged food.
(D)	Any establishment in which religious, charitable, and other non-profit501(c)(3) nonprofit organizations sell
(0)	food occasionally (no more than three occurrences in a 90-day period), on the premises of their organization,
	to raise money, or in which charitable organizations receive salvaged food in bulk quantities for free
	distribution, unless the establishment is open on a regular basis to sell food to members of the general
	public <sub>7</sub>
(E)	Any establishment where animals, including, without limitation, mammals, fish and poultry, are slaughtered
	which is regulated and inspected by the State Department of Agriculture.pursuant to NRS 583,
(F)	Dairy farms and plants which process milk and products of milk, or frozen desserts, which are regulated
	inunder NRS <i>Chapter</i> 584.
(G)	The premises of a wholesale dealer of alcoholic beverages licensed inunder NRS Chapter-369-and who handles
	only alcoholic beverages which are in sealed containers.
(H)	A facility that produces eggs which is regulated pursuant to NRS 583,
(I)	A cottage food operation that meets the requirements of NRS 446.866 with respect to food items as defined
	in that section,
(J)	A craft food operation that meets the requirements of NRS 587.6945 with respect to food items as defined in
	that section,
(К)	A farm for purposes of holding a farm-to-fork event,
<u>(L)</u>	A kitchen in a private home,

 (M)
 A bed-and- breakfast operation that is owner occupied, the number of available guest bedrooms does not

 exceed six , breakfast is the only meal offered, the number of guests served does not exceed 18, and the

 consumer is informed by statements contained in published advertisements, mailed brochures, and placards

 posted at the registration area that the food is prepared in a kitchen that is not regulated and inspected by

 the Health Authority,

(N) A permitted family or group care home.

(0) A permitted childcare center that serves only a limited menu as described in NRS 446.941,

(P) A demonstration kitchen or cooking class that does not store food or sell food to the public, or

(Q) An establishment that meets the exemption criteria pursuant to NRS 446.870 and NAC 446.042.

### Food Handler

An individual who works, or is contracted to work, with unpackaged food, food equipment or utensils, or food-contact surfaces.

# Food FOOD GRADE means products which are considered safe for use with FOOD by the Food and Drug Administration. Federal government regulations regarding FOOD GRADE products can be found in 21 CFR, Parts 170-189-Processing Plant

dditives, and Parts 70-82 Color Additives.

## FOOD HANDLER means

- (A) Any-PERSON employed in or operating a FOOD ESTABLISHMENT, including but not limited to an employer, the PERMIT HOLDER, a PERSON IN CHARGE, a PERSON having supervisory or managerial duties, a PERSON on the payroll, a family member, a volunteer, a PERSON performing work under contractual agreement, an employee or other natural PERSON who handles, stores, transports, prepares, manufactures, serves, or sells FOOD, or who comes in contact with eating or cooking UTENSILs or other EQUIPMENT used in the handling, preparation, manufacture, service, or sale of FOOD, or any other PERSON working in a FOOD ESTABLISHMENT.
- The term does not include a PERSON who only handles FOOD that is permanently SEALED or PACKAGED for saledirectly to the CONSUMER and who, if the FOOD is POTENTIALLY HAZARDOUS, handles the FOOD onlyoccasionally or incidentally outside the normal and usual course and scope of his responsibilities or employment.
- (B) Temporary trainers, guest chefs and other PERSONnel working at a FOOD ESTABLISHMENT less than 14 days are exempt from obtaining health cards.
- OOD HANDLER HEALTH CARD means a document issued by the HEALTH AUTHORITY after obtaining a Hepatitis A immunization and attending a required course on FOOD safety.

FOOD PROCESSING ESTABLISHMENT means A commercial operation that manufactures, packages, labels, or stores food for human consumption, but does not provide FOOD directly to a CONSUMER, including any establishment thatcans FOOD, or packages FOOD in packaging with a modified atmosphere, or processes vitamins, FOOD supplements, FOOD ADDITIVEs, spices, tea, coffee, salsa, jelly or jam, CONDIMENTs, or candyand provides food for sale or distribution to other business entities such as food processing plants or food establishments.

# Food Vendor

Any non-permanent food establishment in which TCS food, or open food intended for ultimate human consumption, is stored, prepared, or served and does not exceed 100 square feet in size. Food vendor includes Temporary Food Establishments, Open-Air Vendors, Tasting Booths, Seasonal and Annual Itinerant permit holders.

**Game Animal** 

<u>An</u> **FOOD ZONE** means surfaces of EQUIPMENT and UTENSILs with which FOOD normally comes in contact, and the surfaces with which FOOD may come in contact and drain back onto surfaces normally in contact with FOOD. **FROZEN FOOD** means a FOOD maintained at a temperature at which all moisture therein is in a solid state.

#### SAME ANIMAL means:

Animals that areanimal, the products of FOOD which are food, that is not classified as livestock, sheep, swine, goat,
horse, mule, or other equine in <del>as specified in</del> 9 CFR 301.2- <i>Definitions</i> , or as poultry, or fish.

- (A) Game Animal includes mammals including but not limited tosuch as reindeer, elk, deer, antelope, water buffalo, bison, rabbit, squirrel, opossum, raccoon, nutria, or muskrat, and non-aquaticnonaquatic reptiles including but not limited tosuch as land snakes.
- (B) Game animal does not include ratites.

**GENERAL USE PESTICIDE** means a pesticide that is not classified by EPA for RESTRICTed use as specified in 40 GFR 152.175, Pesticides Classified for Restricted Use.

Grade A Standards

means-The requirements for compliance stated inof Milk Ordinance forwith which certain fluid and dry milk and milk products <u>comply</u>.

## Handwashing Sink

(A) A lavatory, a basin, <u>a or</u> vessel for washing, a wash basin, or a plumbing fixture specifically plumbedandespecially placed for hygienic practices use, in personal hygiene and designed for the washing of the hands.

HAND WASHING

(B) Unless specified otherwise, a handwashing sink is a permanently plumbed fixture.

(B)(C) Handwashing sink includes an automatic hand washinghandwashing facility. HAZARD means a biological, chemical, or physical property that may cause an unacceptable CONSUMER health

RISK.

#### Hazard Analysis and Critical Control Point (HACCP) Plan

means A written document that delineates the formal procedures for following the HACCPhazard analysis and critical control point principles developed by The National Advisory Committee on Microbiological Criteria for FoodFoods. HEALTH AUTHORITY means the officers and agents of the Health District of Southern Nevada, or-Health Authority

The officers and agents of the local Board of Southern Nevada Health District.

Hermetically Sealed HEALTH PRACTITIONER means a physician licensed to practice medicine, or if allowed by LAW, a nurse practitioner, physician assistant, or other PERSON certified to act as a medical professional.

**HEARING OFFICER**-means an individual selected by the Southern Nevada District Board of Health from qualified applicants to the Health District. Such individual(s) shall not be employees of any entity which is PERMITted or regulated by the Environmental Health Division. The HEARING OFFICER(s) will be an independent contractor who serves at the pleasure of the Southern Nevada District Board of Health, paid in accordance with a fee schedule APPROVED by the Southern Nevada District Board of Health.

HERMETICALLY SEALED CONTAINER means Container

A container that is designed and intended to be secure against the entry of microorganisms and, in the case of low acid canned FOODfoods, to maintain the commercial sterility of its contents after processing. HRISK FOOD See definition of POTENTIALLY HAZARDOUS FOOD (TCS).

HIGHLY SUSCEPTIBLE POPULATION means PERSONs

**High-Risk Food Establishment** 

A permitted food establishment that presents a high relative risk of causing foodborne illness and is limited to food	
establishments that:	

- (A) Conduct complex food preparation steps including thawing, cooking, cooling, cold holding, reheating and hot holding for TCS food,
- (B) Perform extensive handling of large volumes of raw TCS food ingredients,
- (C) Operate extended hours of food preparation activities.
- (D) Perform advanced preparation of TCS food for next day service,
- (E) Primarily serve highly susceptible populations and any other high-risk and most medium-risk activities.
- (F) Conduct specialized processes such as smoking, curing, and reduced oxygen packaging or modified atmospheric packaging for extended shelf life,
- (G) Process/manufacture TCS food,
- (H) Prepare TCS food for off-premise serving, for which time and temperature requirements during transportation, holding, and service are relevant, or
- (I) Have a history of repeated critical violations, repeat violations, or enforcement issues.

Examples of high-risk food establishments may include full-service restaurants, continuous operation casino/resort kitchens, processors/manufacturers of TCS food, caterers serving TCS food, a central kitchen that transports food to satellite locations, and establishments conducting specialized processing at retail.

## Highly Susceptible Population

Individuals who are more likely than other <u>people individuals</u> in the general population to experience FOOD-BORNEfoodborne illness because they are:

- (A) Immunocompromised, pre-schoolpreschool age children, or older adults-and
- (B) Obtaining food at a facility that provides services including but not limited to such as custodial care, health care, or assisted living, including but not limited tosuch as a child or adult day care center, kidney dialysis center, hospital or nursing home, or nutritional or socialization services including but not limited tosuch as a senior center.

#### IMMINENT HEALTH HAZARD means Imminent Health Hazard

A significant threat or danger to health that is considered to exist when there is evidence sufficient to show that a product, practice, circumstance, or event creates a situation that requires immediate correction or cessation of operation to prevent injury based on:

(A) The number of potential injuries, and

(A)[B]\_\_The nature, severity, and duration of the anticipated injury; illness, or disease.
(A) The number of potential injuries and illnesses to public's health.
INJECTED means
Injected

Manipulating meat to which a solution has been introduced into its interior by processes that are referred to as "injecting,""\_\_pump marinating,"\_\_ or "stitch pumping". WICE means:

### Intact Meat

A cut of whole muscle(s) meat that has not undergone comminution, injection, mechanical tenderization, vacuum tumbling with solutions, or reconstruction.

## Juice

(A) The aqueous liquid expressed or extracted from <u>lone</u> or more fruits or vegetables, <u>pureespurées</u> of the edible portions of <u>lone</u> or more fruits or vegetables, or any concentrates of such liquid or <u>puree</u>. <u>purée</u>. Juice does not include, for purposes of HACCP, liquids, <u>pureespurées</u>, or concentrates <u>whichthat</u> are not used as beverages or ingredients of beverages.

# KITCHENWARE means Kitchenware

Food preparation and storage utensils-

NDER means the washing and sanitizing of LINEN.

LAW-means applicable local, state, and federal statutes, regulations and ordinances.

LINEN means Like-for-like

The replacement of equipment with equipment that is similar in design, function, use and maintenance, maintains the same location as the replaced equipment, and requires no additional alteration or modification of existing finishes or fixtures as part of the installation.

## Linens

Fabric items including but not limited to such as cloth hampers, cloth napkins, table cloths tablecloths, wiping cloths, and work garments including cloth gloves.

#### LOW-RISK FOOD means FOOD Low-Risk Food Establishment

LOW-RISK FOOD EStablishinent

<u>A permitted food establishment</u> that presents verya low <u>relative</u> risk of causing FOOD BORNE ILLNESS when handled in specific ways as APPROVED by the HEALTH AUTHORITY. foodborne illness and is limited to food establishments that:

(A) Serve or sell only prepackaged non-TCS food,

(B) Conduct limited food preparation steps of non-TCS food such as slicing bagels, buttering toast, or opening prepackaged baked goods for individual sale,

(C) Serve only beverages and ice, such as espresso, mixed and blended drinks,

- (D) Rethermalize only commercially processed, TCS food such as hot dogs for hot holding and where cooling or reheating of food items is prohibited, or
- (E) Conduct cold holding of commercially prepackaged, ready-to-eat, TCS food such as sandwiches and frozen foods, without opening of the package.

Examples include, of low-risk food establishments may include convenience stores, site specific open-air vendors, concession stands, bars/lounges, coffee shops, warehouses, and mobile units for service of food frozen foods. Low-risk foods may include food which is treated to reduce pathogens in a food processing plant and is served within four hours after opening. Such foods include but are not limited to: canned legumes, vegetables, chili, cheese sauces, and processed meats such as canned luncheon meat and hot dogs.

# Major Food Allergen

- (A) Milk\_egg, fish (such as bass, flounder, cod, and including crustacean shellfish such as crab, lobster, or shrimp), tree nuts (such as almonds, pecans, or walnuts), wheat, peanuts, soybeans, and sesame, or
- (B) A food ingredient that contains protein derived from a food, as specified in paragraph (A) of this definition.

Major Food Allergen does not include:

(A) Any highly refined oil derived from a food specified in paragraph (A) of this definition and any ingredient derived from such highly refined oil, or

- (A)
   Any\_Open containers of PASTEURIZED or ULTRA-PASTEURIZED milk or similar liquid dairy products which are maintained at 41°F±2° or lower, to be steamed for immediate use in espresso type BEVERAGES.

   (B)
   ULTRA PASTEURIZED half and half, or similar coffee creamers in single serving HERMETICALLY SEALED
- CONTAINERS. (C) PRE-PACKAGED ice cream bars, and other frozen dairy products which are served without the need for a-
- dipper well.
- (D) Commercially PACKAGED hot dogs heated for warm holding shall be held at no less than 135°F±2° untilserved.
- (E) Nuts, high sugar candy, HONEY, cookies, bread, beef jerky, un sliced melons, and intact raw fruit.
   (B) MEAT means ingredient that is exempt under the 21 USC 321 (qq).

### <u>Meat</u>

The flesh of animals used as food including the dressed flesh of cattle, swine, sheep, <u>or</u> goats, and other edible animals, except <u>FISH</u>, <u>POULTRY</u> <u>fish</u>, <u>poultry</u>, and wild <u>GAME</u> <u>ANIMALS</u> <u>game animals</u> as specified <u>in-Chapterunder subparagraphs</u> 3-201.17 of these Regulations.7 (A)(3) and (4).

MAJOR VIOLATIONS means items that would provide an intervention to possibly eliminate a risk factor orcritical violation if left unaddressed may lead to a situation detrimental to public health. MECHANICALLY TENDERIZED means

## **Mechanically Tenderized**

Manipulating meat with deep penetration by piercing with a set of needles, pins, blades or any mechanical device, which breaks up muscle fiber and tough connective tissue, to increase tenderness. This includes injection, scoring, and processes which may be referred to as "blade tenderizing," ", jaccarding," ", pinning," ", or needling," or using blades, pins, needles or any mechanical device.

(A) MECHANICALLY TENDERIZED does not include processes by which solutions are INJECTED into MEAT.

## Medium-Risk Food Establishment

A permitted food establishment that presents a medium relative risk of causing foodborne illness and is limited to food establishments that:

(A) Prepare, cook, and serve most foods immediately,

(B) Limit the complex preparation of TCS food including cooking, cooling, and reheating for hot holding to extra or left-over foods from same day service. This excludes foods prepared in advance for future service,

(C) Limit cold or hot holding to a single meal service, or

(D) Use minimal preparation and assembly steps to prepare foods from raw ingredients.

Examples of medium-risk food establishments may include fast food restaurants, bakeries, sandwich shops, childcare facilities, elementary and middle schools with minimal food preparation, and processors/manufacturers of non-TCS food.

# mg/L

means-Milligrams per Liter, which is the metric equivalent of parts per million (ppm)-) MISBRANDED means-

# Misbranded

The presence of any written, printed, or graphic matter, upon or accompanying food, or containers of food which is false or misleading.

## Mobile Unit

A fully enclosed DMV registered truck or trailer in which food or beverages are prepared, processed, or served to customers. A mobile unit does not include equipment located outside the truck or trailer.

### Molluscan Shellfish

MOLLUSCAN SHELLSTOCK means Any edible species of fresh or frozen oysters, clams, mussels, and scallops or edible portions thereof, except when the scallop product consists only of the shucked adductor muscle.

## Molluscan Shellfish Dealer

A person who is authorized by a Shellfish Control Authority for the activities of shellstock shipper, shucker-packer, repacker, re-shipper, or depuration processor of molluscan shellfish according to the provisions of the National Shellfish Sanitation Program.

#### Natural and Unprocessed State

A farm product that has not been cut, sliced, shelled, canned, cooked, pickled, packaged, dried, milled, ground, or otherwise altered from its original state following harvest.

#### **Non-Continuous Cooking**

- (A) The cooking of food in a food establishment using a process in which the initial heating of the food is intentionally halted so that it may be cooled and held for complete cooking at a later time prior to sale or service.
- (B) Non-continuous cooking does not include cooking procedures that only involve temporarily interrupting or slowing an otherwise continuous cooking process.

#### **Occasional**

Occurring on an infrequent basis of no greater than three occurrences in a 90-day period.

OpenNATIONAL AUTOMATIC MERCHANDISING ASSOCIATION (NAMA) means a national trade association of the FOOD and refreshment vending, coffee service, and FOOD service management industries. NATIONAL SANITATION FOUNDATION (NSF) means an independent, not-for-profit organization that offers programs and services to augment and support the work of regulatory officials. This includes the development of public health standards, certification of products as conforming to those standards, and education and training in all areas of environmental health, including air, water, and FOOD safety.

EVADA ADMINISTRATIVE CODE (*NAC*) means the codified administrative regulations of the executive branch. NEVADA REVISED STATUTES (*NRS*) means the current codified LAWs of the State of Nevada, NON-

FOOD CONTACT SURFACE means all exposed surfaces other than FOOD and SPLASH ZONEs.

PACKAGED means:

-Air Vendor

A food vendor that is permitted to operate at a site-specific location.

#### Packaged

- (A) Bottled, canned, cartoned, securely-bagged, or securely wrapped, whether packaged in a PERMITted food establishment or a PERMITted FOOD PROCESSING ESTABLISHMENTfood processing plant.
- (B) Packaged does not include wrapped or placed in a wrapper, carry-out box, or other non-durable container used to containerize FOOD with the purpose of facilitating FOOD protection to protect the food during service or receipt of delivery to the FOOD consumer, by the CONSUMERa food handler, upon consumer request.

#### Permit

PASTEURIZED means heat treated to kill vegetative (non spore) cells of pathogens in FOOD such as JUICE, honey, milk and other dairy products.

**PERMIT** means The document issued by the appropriate <u>REGULATORYHealth</u> Authority that authorizes a person to operate a food establishment.

#### PERMIT HOLDER means the entity Permit Holder

The person that :

(A) is legally responsible for the operation of the FOOD ESTABLISHMENT including but not limited to the owner, the owner's agent, or other PERSON. and possesses a valid health permit to operate a FOOD ESTABLISHMENT. the food establishment.

## Person

PERSON means An association, a corporation, individual, partnership, limited liability company, or other legal entity, government, or governmental subdivision, or agency. PERSON IN CHARGE means Person-in-Charge (PIC)

The individual present at a food establishment who is responsible for itsthe operation at the time of inspection.

#### Personal Care Items

- (A) Items or substances that may be poisonous, toxic, or a source of contamination, and are used to maintain or enhance a <u>PERSON'sperson's</u> health, <u>hygienic practiceshygiene</u>, or appearance.
- (B) Personal Care Items include but are not limited toitems such as medicines, first aid supplies, and other items such as cosmetics, and toiletries, such as toothpaste and mouthwash.

PH means pH

The symbol for the negative logarithm of the hydrogen ion concentration, which is a measure of the degree of acidity or alkalinity of a <u>liquid.solution</u>. Values between  $\frac{92 \text{ even}}{2 \text{ seven}}$  indicate acidity and values between  $\frac{72 \text{ even}}{2 \text{ seven}}$  and 14 indicate alkalinity. The value <u>offor</u> pure distilled water is  $\frac{73 \text{ even}}{2 \text{ seven}}$ , which is considered neutral.

**PHYSICAL FACILITIES** means the structure and interior surfaces of a FOOD ESTABLISHMENT including but not limited to soap and towel dispensers, and attachments including but not limited to light fixtures, and heating or air conditioning system vents.

PLUMBING FIXTURE means

#### **Plumbing Fixture**

A receptacle or device of a water system that:

#### Is permanently or temporarily

- (A) Is connected to the water distribution system of the premises and demands a supply of water from the system, or
- (B) Discharges used water, waste materials, or sewage directly or indirectly to the drainage system of the premises.

#### PREMISES.

#### PLUMBING SYSTEM means

#### Plumbing System

The water supply and distribution pipes<sub>7i</sub> plumbing fixtures and traps<sub>7<math>i</sub> soil, waste<sub>1</sub> and vent pipes<sub>7<math>i</sub> sanitary and storm sewers<sub>7</sub> and building drains<sub>2</sub> including their respective connections, devices<sub>2</sub> and appurtenances within the premises<sub>2</sub> and water-treating equipment.</sub></sub></sub>

POISONOUS OR TOXIC MATERIALS means substances which Poisonous or Toxic Materials

Substances that are not intended for ingestion and are included in four4 categories-:

- (A) <u>Cleaners and sanitizers, which include</u> cleaning and sanitizing agents, and agents including but not limited tosuch as caustics, acids, drying agents, polishes, and other chemicals,
- (B) Pesticides, except sanitizers, including but not limited to which include substances such as insecticides, fungicides, and rodenticides,
- (C) Substances necessary for the operation and maintenance of the establishment including but not limited to non-FOODsuch as nonfood grade lubricants and personal care items that may be deleterious to health-, and
- (D) Substances which that are not necessary for the operation and maintenance of the FOOD establishment and are on the premises for retail sale, including but not limited to such as petroleum products and paints.

#### OTENTIALLY HAZARDOUS FOOD (PHF) (TCS) means:

(A) FOOD that requires (TCS) to limit pathogenic microorganism growth or toxin formation.

POTENTIALLY HAZARDOUS FOOD (TCS) includes;

An animal food that is raw or heat-treated, a plant FOOD that is heat-treated or consists of raw seed sprouts, cutmelons, CUT LEAFY GREENS, cut tomatoes or mixtures of cut tomatoes which are not modified in a way so thatthey are unable to support pathogenic microbial growth or toxin formation, or garlic in-oil mixtures which arenot modified in a way that results in mixtures that do not support pathogenic microbial growth or toxinformation and,

(1) Except as specified in Paragraph (C) (4) of this Chapter, a FOOD that because of the interaction of its AW and pH values is designated as Product Assessment Required (PA) in Table A or B of this definition.

. Interaction of pH and AW for control of spores in FOOD heat-treated to destroy vegetative cells and

- (A) A provision in these regulations that, when applied, contributes directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury and there is no other provision that more directly controls the hazard.
- (B) Priority item includes items with a quantifiable measure to show control of hazards such as cooking, reheating, cooling, handwashing; and

(C) Priority item is an item that is denoted in these regulations with a superscript P-<sup>P</sup>.

#### **Priority Foundation Item**

- (A) A provision in these regulations that, when applied, facilitates or enables one or more priority items,
- (B) Priority foundation item includes an item that requires the purposeful incorporation of specific actions, equipment or procedures by industry management to attain control of risk factors that contribute to foodborne illness or injury such as personnel training, infrastructure or necessary equipment, HACCP plans, documentation or record keeping, and labeling, and
- (C) Priority foundation item is an item that is denoted in these regulations with a superscript Pf -Pf.

#### Public Water System

Has the meaning stated in 40 CFR 141 National Primary Drinking Water regulations.

#### <u>Ratite</u>

A flightless bird including but not limited tosuch as an emu, ostrich, or rhea.

#### READY-TO-EAT FOOD

READY-TO-EAT FOOD means Ready-to-Eat Food

Food that:

- (A) Is in a form that is edible without additional preparation to achieve food safety, as specified in <u>Chapterunder</u> one of the following: ¶ 3-401.11, <u>Chapter1(A) or (B), §</u> 3-401.122, or <u>Chapter§</u> 3-402.11 of these-Regulations.1, or as specified in ¶ 3-401.1(C), or
- (B) Is a raw or partially cooked animal food and the consumer is advised as specified in Chapter 3-Subparagraphs 3-401.1(D)(1) and (3), and 401.11 (C) of these Regulations.

specified in Chapter 4-101.13 of these Regulations.
 (C) May receive additional preparation for palatability or aesthetic, epicurean, gastronomic, or culinary purposes.
 Ready-to-Eat Food includes:
 (A) Raw animal <u>FOOD food</u> that is cooked as specified in <u>Chapter under §</u> 3-401.11 or <u>Chapter 3-401.12</u>, or frozen as specified in <u>Chapter under §</u> 3-402.11 of these Regulations.1,

WAIVER

that

with

accordance

granted as

- (B) Raw fruits and vegetables which<u>that</u> are thoroughly washed to remove soil and other contaminants.as specified under § 3-302.5.
- (C) Fruits and vegetables which that are cooked and held for hot holding, as specified in Chapter under § 3-401.13of these Regulations.3,
- (D) All POTENTIALLY HAZARDOUS FOOD (TCS) food that is cooked to the temperature in theand time required for the specific food as specified in Chapterunder subpart 3-401 of these Regulations, and cooled as specified in Chapterunder § 3-501.14 of these Regulations.4.
- (E) Plant food for which further washing, cooking, or other processing is not required for food safety, and from which rinds, peels, husks, or shells, if naturally present are removed.
- (F) Substances derived from plants including but not limited tosuch as spices, seasonings, and sugar.
- (G) A bakery item including but not limited tosuch as bread, cakes, pies, fillings, or icing for which further cooking is not required for food safety-
- (H) The following products which that are produced in accordance with USDA guidelines and that have received a lethallethality treatment for pathogens; dry, fermented sausages, including but not limited tosuch as dry salami or pepperoni; salt-cured meat and poultry products, including but not limited tosuch as prosciutto ham, country cured ham, and Parma ham; and dried meat and poultry products, including but not limited tosuch as jerky or beef sticks, and

EOQD

(I) <u>Foods</u> manufactured as specified in 21 CFR part 113, *Thermally processed low-acid foods packaged in hermetically sealed containers*.

#### EDUCED OXYGEN PACKAGING

(A) REDUCED OXYGEN PACKAGING means:

Reduced Oxygen Packaging in which

- (A) The reduction of the amount of oxygen is removed or displaced in a package by removing oxygen; displacing oxygen and replaced by replacing it with another gas or combination of gases; or in whichotherwise controlling the oxygen content is controlled to a level below that is normally found in the atmosphere (approximately 21% at sea level).
- (B) A process as specified in paragraph (A) (1) of this definition that involves a food for which the hazards Clostridium botulinum or Listeria monocytogenes require control in the final packaged form.

Reduced Oxygen Packaging includes:

(A) Vacuum packaging, in which air is removed from a package of food and the package is hermetically sealed so that a vacuum remains inside the package  $\tau_{z}$ 

- (B) Modified atmosphere packaging, in which the atmosphere of a package of food is modified so that its composition is different from air but the atmosphere may change over time due to the permeability of the packaging material or to the respiration of the food. Modified atmosphere packaging includes reduction in the proportion of oxygen, total replacement of oxygen, or an increase in the proportion of other gases including but not limited tosuch as carbon dioxide or nitrogen.
- (C) Controlled atmosphere packaging, in which the atmosphere of a package of food is modified so that until the package is opened, its composition is different from air, and continuous control of that atmosphere is maintained including but not limited to, such as by using oxygen scavengers or a combination of total replacement of oxygen, non-respiring FOODnonrespiring food, and impermeable packaging material,
- (D) Cook -chill packaging, in which cooked food is hot filled into impermeable plastic-bags from which have the air has been expelled, and are then heat-sealed or crimpcrimped closed. The bagged food is rapidly chilled and refrigerated at temperatures that inhibit the growth of psychrotrophic pathogens, or
- (E) Sous vide packaging, in which raw or partially cooked food is placedvacuum packaged in a hermetically. SEALED,an impermeable bag, cooked in the bag, rapidly chilled, and refrigerated at temperatures that inhibit the growth of psychrotrophic pathogens.

REFUSE mean Refuse

Solid waste not carried by water through the sewage system. **REGULATORY AUTHORITY** means <u>Regulatory Authority</u>

The local, state or federal enforcement body or authorized representative having jurisdiction over thea food establishment.

#### **REMINDER** means

Reminder

A written statement concerning the health risk of consuming animal FOOD<u>foods</u> raw, undercooked, or without otherwise being processed to eliminate pathogens.

Remodel

(A) Changes in the floor plan layout,

(B) The alteration or installation of additional equipment,

(C) The conversion of a space not previously used for food handling activities, or

(D) Major changes to finishes requiring partial or complete closure of the establishment during demolition or installation.

(E) Remodel does not include:

- (1) Routine maintenance,
- (2) Like-for-Like equipment exchanges, or
- (3) Addition of plug-in equipment that does not require a ventilation hood, plumbing, gas, upgraded electrical circuitry, or a change in the facility layout.

#### Re-Service

The transfer to another PERSON of food that is unused and returned by a consumer after being served or sold and in the possession of the consumer<u>to another person</u>.
RESTRICT means
Restrict
To limit the activities of a food handler to avoid theso that there is no risk of transmitting a disease that is transmissible through food and to ensure the food handler does not work with exposed food, clean equipment, utensils, LINENLINENS, or unwrapped single-service ARTICLES or single-use articles.

RESTRICTED EGG means any check, dirty EGG, incubator reject, inedible, leaker or loss as specified in

#### <del>CFR 590.</del>

RESTRICTED USE PESTICIDE means-Restricted-Use Pesticide

A pesticide product that contains the active ingredients specified in 40 CFR 152.175-*Pesticides Classified for Restricted* Use, and that is limited to use by or under the direct supervision of a certified applicator. **RISK means** 

<u>Risk</u>

The likelihood that an adverse health effect will occur within a population as a result of a hazard in a food.

FOOD.

SAFE MATERIAL means: Sanitization

An article manufactured from or composed of materials that may not reasonably be expected to result, directly or indirectly, in their becoming a component or otherwise affecting the characteristics of any FOOD.

An ADDITIVE that is used as specified in Section 409 or 706 of the Federal Food, Drug and Cosmetic Act. (A) Other materials which are not ADDITIVEs and are used in conformity with applicable regulations of the Food and Drug Administration.

**SANITIZATION** means. The application of cumulative heat or chemicals on cleaned food-contact surfaces that, when evaluated for efficacy, is sufficient to yield a <u>reduction of 5 log reductionlogs</u>, which is equal to <u>a</u> 99.999% reduction of representative <u>test pathogensdisease microorganisms</u> of public health importance. **SEALED** means

#### Sealed

Free of cracks or other openings that allow the entry or passage of moisture. **SERVICE ANIMAL** means an animal including but not limited to a guide dog, signal dog, debris, or other animal specifically pests.

#### Service Animal

A dog or a miniature horse that has been trained to provide assistance to an individual do work or perform tasks for the benefit of a person with a disability. NRS 426.097 and 28 CFR §36.104

SERVICING DEPOT means a facility APPROVED by the HEALTH AUTHORITY or AGENCY OF JURISDICTION. for

aning, disposing of liquid and solid wastes, and refilling of water tanks of a PERMITted PORTABLE UNIT for service of FOOD, catering operation, mobile FOOD vendors AND FARMERS' MARKETS. A SERVICING DEPOT maybe a large mobile unit if it has been APPROVED by the HEALTH AUTHORITY or AGENCY OF JURISDICTION and meets the requirements of these Regulations. If FOOD is to be stored, the facility shall be designated as a COMMISSARY, not a SERVICING DEPOT.

**SEWAGE** means liquid waste containing animal or vegetable matter in suspension or solution and may include liquids containing chemicals in solution.

- (A) BLACK WATER means liquid and solid human body waste and the carriage water generated through toilet use.
- (B) GREY WATER means the waste water, not including BLACK WATER, from residential, commercial and industrial use including but not limited to sink drainage or washing machine discharges.

SHELLFISH CONTROL AUTHORITY means

<u>Sewage</u>

Wastewater consisting of liquid waste and water-carried solids, including effluent from commercial, industrial, and domestic sources and toilets.

#### Shellfish Control Authority

A state, federal, foreign, tribal, or other government entity legally responsible for administering a program that includes certification of molluscan SHELLSTOCKshellfish harvesters and all-dealers engaged infor interstate commerce. SHELLSTOCK means

# Shellstock

Raw, in-shell molluscan SHELLSTOCK.shellfish

#### Shiga toxin-producing Escherichia coli (STEC)

means Any *E. Coli* capable of producing Shiga toxins (also called verocytotoxins). STEC infections can be asymptomatic or Shiga-like toxins).may result in a spectrum of illness ranging from mild non-bloody diarrhea to hemorrhagic colitis (i.e., bloody diarrhea), to hemolytic uremic syndrome (HUS—a type of kidney failure). Examples of serotypes of STEC include both: *E. Coli* 0157:H7; *E. Coli* 0157:NM; *E. Coli* 026:H11; *E. Coli* 0145:NM; *E. Coli* 0103:H2; and *E. Coli* 0111:NM. STEC are sometimes referred to as VTEC (verocytotoxigenic *E. Coli*) or as EHEC (Enterohemorrhagic *E. Coli*). EHEC are a subset of STEC which can cause hemorrhagic colitis or HUS. *ii*, 0157 and *non E.coli* 0157. See ENTEROHEMORRHAGIC ESCHERICHIA COLI.

SHUCKED SHELLSTOCK means MOLLUSCAN SHELLSTOCK with

#### **Shucked Shellfish**

Molluscan shellfish that have one or both shells removed.

#### SINGLE-SERVICE AND SINGLE-USE ARTICLES means-Single-Service Articles

Tableware, carry-out utensils, and other items including but not limited tosuch as bags, containers, placemats, stirrers, straws, toothpicks, and wrappers which that are designed and constructed for one time, one person use after which they are intended for discard.

#### **Single-Use Articles**

- (A) Utensils and bulk food containers designed and constructed to be used once and discarded. SINGLE USE-ARTICLES including but not limited to
- (A)(B) Single-use articles include items such as wax paper, butcher paper, plastic wrap, formed aluminum food containers, jars, plastic tubs or buckets, bread wrappers, pickle barrels, ketchup bottles, and <u>#number</u> 10-or-other cans which do not meet the materials, durability, strength, and cleanability as specified in. Chapterspecifications under §§ 4-101.11, 4-201.11, Chapter 4-401.11, and Chapter 4-402202.11 of these-Regulations for multi-usemultiuse utensils.

#### SLACKING means

Site-Specific

A designated address or location that is clearly defined in the permit application for a food establishment.

#### Slacking

<u>The</u> process of moderating the temperature of a <u>FROZEN FOOD including but not limited tofood such as</u> allowing thea food to gradually increase from a temperature of -<u>23°C</u> (-10°F<u>±2°</u>) to <u>-4°C</u> (25°F<u>±2°</u>) in preparation for deep-fat frying or to facilitate even heat penetration during the cooking of previously block-<u>FOOD processing of these items including</u>. <u>but not limited to frozen food such as</u> shrimp.

# SMOOTH means:

### Smooth

- (A) A food-contact surface having a surface free of pits and inclusions with <u>a</u> cleanability equal to or exceeding that of (100 grit, <u>#) number</u> 3 stainless steel.
- (B) A non-food-contact surface or of equipment having a surface equal to that of commercial grade hot-rolled steel free of visible scale, and
- (C) A floor, wall, or ceiling having an even <u>or level</u> surface with no roughness or projections whichthat render it difficult to clean.

LASH ZONE means any surface, other than a FOOD ZONE, subject to routine splash, spillage, or other FOOD soiling during normal use.

### TABLEWARE means

Special Event

A temporary public gathering for a specific purpose that includes at least one temporary food establishment or food vendor as part of the event. The event has a defined start and stop date that does not exceed 14 calendar days.

#### Support Kitchen

A food establishment owned by another person that serves as a support area for a Temporary food establishment to prepare and store food, clean and sanitize equipment, acquire potable water and empty wastewater tanks of 15 gallons or less.

#### **Tableware**

Eating, drinking, and serving utensils for table use <u>such as flatware</u> including <u>but not limited to flatware</u>, forks, knives, and spoons; hollowware including <u>but not limited to</u> bowls, cups, serving dishes, <u>and</u> tumblers, and plates.

#### Tasting Event

A special event such as a sampling event, wine tasting, trade shows, and chili cook-offs, in which an entrance fee entitles attendees to food service in conjunction with the event without a point of sale at the individual food vendor spaces.

#### Temperature Measuring Device

A thermometer, thermocouple, thermistor, or other device that indicates the temperature of food, air, or water.

#### Temporary Food Establishment

and A feed establishment that an entropy feed and induction of the mean them 14

TCS food does not include: <u>(C)</u>

<u>> 0.92</u>

Non-TCS food

(1) An air-cooled hard-boiled egg with shell intact, or an egg with shell intact that is not hard-boiled, but has been pasteurized to destroy all viable Salmonellae,

PA

PA

PA

- A food in an unopened hermetically sealed container that is commercially processed to achieve and <u>(2)</u> maintain commercial sterility under conditions of non-refrigerated storage and distribution,
- A food that because of its pH or aw value, or interaction of aw and pH values, is designated as a non-<u>(3)</u> TCS food in Table A or B of this definition,

- (4) A food that is designated as product assessment required (PA) in Table A or B of this definition and has undergone a product assessment showing that the growth or toxin formation of pathogenic microorganisms that are reasonably likely to occur in that food is precluded due to:
  - (a) Intrinsic factors including added or natural characteristics of the food such as preservatives, antimicrobials, humectants, acidulants, or nutrients,
  - (b) Extrinsic factors including environmental or operational factors that affect the food such as packaging, modified atmosphere such as reduced oxygen packaging, shelf life and use, or temperature range of storage and use, or
  - (c) A combination of intrinsic and extrinsic factors, or

A food that does not support the growth or toxin formation of pathogenic microorganisms in accordance with one of the UHT means a heat treatment for FOOD products such as but not limited to; JUICE, milk and other dairyproducts, referring to Ultra-High Temperature or Ultra-Pasteurization that renders the treated products essentiallysterile.

JL means Underwriters Laboratory which is an independent, not for profit product safety testing and

#### certification organization.

**UL/EPH** means Underwriters Laboratory's environmental and public health certification classification for FOOD service EQUIPMENT.

ULTRA PASTEURIZED means a heat treatment for milk and other dairy products using a process called Ultra High Temperature processing or Ultra Pasteurization that renders the treated products essentially sterile.

UNCATEGORIZED FOOD ESTABLISHMENT means a FOOD ESTABLISHMENT that, by virtue of the unusual or special nature of design or operation, cannot comply with certain structural and/or operational requirements of these Regulations.

#### I.S. FOOD AND DRUG ADMINISTRATION (FDA)

S. DEPARTMENT OF AGRICULTURE (USDA)

J.S. ENVIRONMENTAL PROTECTION AGENCY (EPA)

(5) UTENSIL means subparagraphs (C)(1) — (C)(4) of this definition even though the food may contain a pathogenic microorganism or chemical or physical contaminant at a level sufficient to cause illness or injury.

#### Utensil

A food-contact implement or container used in the storage, preparation, transportation, dispensing, sale, or service of food-including but not limited to, such as kitchenware or tableware that is multi-use, SINGLE-SERVICE-ARTICLESmultiuse, single-service, or single-use-ARTICLES including but not limited to; gloves used in contact with food<sub>7</sub>; temperature sensing probes of food temperature measuring devices<sub>7</sub>; and probe-type price or identification tags used in contact with food.

VARIANCE means a written document mean a written document APPROVED Variance

<u>An approval</u> by the Southern Nevada Health District's Board of Health in compliance with the requirements of *NAC*pursuant to NRS 439-200 through *NAC* 439.280, upon demonstration of, demonstrating an exceptional and undue hardship to the person requesting the variance, which authorizes a modification or deviation from the requirement of a regulation and would not cause substantial detriment to the public welfare or impair substantially the purpose of the regulation.

VEHICLE means any device that transports any PERSON and goods upon a highway, except devices moved by human power.

#### VENDING MACHINE:

(A) A self-service device that upon insertion of a coin, paper currency, token, card, key, or optional manual operation dispenses unit servings of FOOD, in bulk or in packages, without the necessity of replenishing the device between each vending operation.

- (B) The term VENDING MACHINE does not include any device which dispenses only nuts, popcorn, ball gum, hard candy, PRE PACKAGED candy, cookies, crackers, or similar snacks, PRE PACKAGED BEVERAGEs which are not POTENTIALLY HAZARDOUS FOOD (TCS), or PRE PACKAGED ice.
- VENDING MACHINE LOCATION means the room, enclosure, space, or area where one or more -VENDING MACHINEs are installed and operated and includes the storage areas and areas on the PREMISES which are used to service and maintain the VENDING MACHINEs.

WAIVER means a written Waiver

An agreement between the Health Authority and a permit holder that authorizes a modification of one or more requirements of these regulations, if in the opinion of the health authority, a health hazard or nuisance will not result from the modification. Supporting documents of a WAIVER may include but is not limited to, operational plans, HACCP PLANs, scientific challenge studies, monitoring logs, validation studies from certified processing authorities, and labeling.

WARE WASHING means

Warewashing

The cleaning and sanitizing of utensils and food-contact surfaces of equipment.

Whole WHOLE MUSCLE INTACT BEEF means -Muscle, Intact Beef

Whole muscle beef that is not an IMMINENT HEALTH HAZARDinjected, mechanically tenderized, reconstructed, or scored and marinated, from which beef steaks may be cut.

- (17) Explaining how the <u>PERSON IN CHARGE, FOOD HANDLERs, and CONDITIONALPIC and</u> food handlers comply with reporting responsibilities and <u>exclusionsexclusion</u> or <u>RESTRICTions, restriction</u> of food handlers. <u>Pr</u>

#### 2-102.2 Certified Food Protection Manager

- (A) The PIC must be a certified food protection manager who has shown proficiency of required information through passing a test that is part of an accredited program.
- (B)
   This section does not apply to 2-103.11
   certain types of food establishments deemed by the Health

   Authority to pose minimal risk of causing, or contributing to, foodborne illness based on the nature of the operation and extent of food preparation.

#### 2-102.3 Food Protection Manager Certification-

- (A) A PERSON IN CHARGEPIC who demonstrates knowledge by being a food protection manager, and that is certified by a food protection manager certification program that is evaluated and listed by a Conference for Food Protection\_recognized accrediting agency as conforming to the Conference for Food Protection\_Standards for Accreditation of Food Protection Manager Certification Programs is deemed to comply with \$\mathbf{P}2-102.1(B)\$.
- (A)(B) A food establishment that has a PIC that is certified by a food protection manager certification program that is evaluated and listed by a Conference for food Protection-recognized accrediting agency as conforming to the Conference for food Protection Standards for Accreditation of food Protection Manager Certification Programs, is deemed to comply with Paragraph §2-\_102.11(B) of this Chapter, or has submitted a manager's certification program and paid applicable fees for review and approval by the local HEALTH AUTHORITY2.

 2-103
 PERSON IN CHARGE

 2-1022-103
 2-104.11

The PERSON IN CHARGE shall PIC must ensure that:

(A) Food establishment operations are not conducted in a private home or in a room used as living or sleeping quarters as specified in Chapterunder § 6-202.19 of these Regulations.11, <sup>Pf</sup>

#### PERSONS

- (B) Individuals unnecessary to the food establishment operation are not allowed in the food preparation, food storage, or WARE WASHING areaswarewashing area, except that brief visits and tours may be authorized by the PERSON IN CHARGEPIC if steps are taken to ensure that exposed food, clean equipment, utensils-and, linens, and unwrapped single-service ARTICLES and single-use articles are protected from contamination, pf ECOOD HANDLERS
- (C) <u>Employees</u> and other persons including but not limited to such as delivery and maintenance persons, and pesticide applicators entering the food preparation, food storage, and <u>WARE WASHINGwarewashing</u> areas comply with these regulations, <sup>Pf</sup>
- (D) <u>EmployeesFOOD HANDLERs</u> are effectively cleaning their hands, by routinely monitoring hand washing. <u>the</u> employees' handwashing, <u>pr</u>

#### FOOD HANDLERs

(E) Employees are visibly observing FOOD, foods as it is they are received, to determine that it is they are from approved sources, delivered at the required temperatures, protected from contamination, unadulterated, and accurately presented, by routinely monitoring the food handlers' observations and periodically evaluating FOOD foods upon receipt. delivery, <sup>pf</sup>

#### FOOD HANDLERS

- (F) Employees are verifying that foods delivered to the food establishment during non-operating hours are from approved sources and are placed into appropriate storage locations such that they are maintained at the required temperatures, protected from contamination, unadulterated, and accurately presented, <sup>Pf</sup>
- (F)(G) Employees are properly cooking PHF (TCS), food, being particularly careful in cooking FOODthose foods known to cause severe FOOD BORNEfoodborne illness and death, including but not limited tosuch as eggs and comminuted meats, through daily overseeingoversight of the food HANDLERs'handlers' routine monitoring of the cooking temperatures, use of using appropriate temperature MEASURING DEVICEs, which are measuring devices properly scaled and calibrated, as specified in Chapterunder § 4-302.13 of these Regulations.203.1 and ¶ 4- 502.1(B), <sup>pr</sup>

	<u>Employees</u> are using proper methods to rapidly cool PHF (TCS), which foods that are not held hot or are not
	for consumption within four hours, through overseeing daily oversight of the food HANDLER'shandlers'
	routine monitoring of food temperatures during cooling.
(I)	Employees are properly maintaining the temperatures of TCS foods during hot and cold holding through daily
	oversight of the food handlers' routine monitoring of food temperatures, <sup>Pf</sup>
	_Consumers who order raw or partially cooked ready-to-eat <del>FOOD<u>foods</u> of animal origin are informed, as specified in Chapter<u>under §</u> 3-603<del>.11 of these Regulations,</del> that the food is not cooked sufficiently to ensure its safety<sub>7</sub>, <sup>pf</sup> HANDLERs</del>
	Employees are properly <u>cleaning and</u> sanitizing <del>cleaned multi-use</del> multiuse equipment and utensils, before
(1)(1)(1)	they are re-used reused, through routine monitoring of solution temperature, and exposure time for hot water sanitizing, and chemical concentration, pH, temperature, and exposure time for chemical sanitizing, $\frac{p}{r}$
<del>(J)</del> (L)	_Consumers are notified as specified in Chapter 3-306.13 (D) of these Regulations, which <u>that</u> clean tableware is to be used when they return to self-service areas including but not limited to-such as salad bars and buffets- as specified under § 3-304.6, <sup>Pf</sup>
	Except when approval is obtained from the <u>HEALTH_AUTHORITY, Health Authority</u> as specified in <u>Chapter1</u> 3-301. <u>11 (A) of these Regulations, FOOD HANDLERs1(E), employees</u> are preventing cross-contamination of ready- to-eat food with bare hands by properly using suitable utensils <u>including but not limited tosuch as</u> deli tissue, spatulas, tongs, single-use gloves, or dispensing equipment <sub>7</sub> , <sup>Pr</sup> <u>HANDLERs</u>
	<u>Employees</u> are properly trained in food safety, <u>including food allergy awareness</u> , as it relates to their assigned duties, pri
( <del>M)</del> (O)	) FOOD HANDLERs and CONDITIONAL Food handlers are informed, in a verifiable manner, of their responsibility,

#### through food. A guidance document is provided in Appendix A.

#### (B) A FOOD HANDLER shall:

- (A) <u>A food handler must</u> report the information in a manner that allows the <u>PERSON IN CHARGEPIC</u> to reduce the risk of <u>FOOD BORNE diseasefoodborne illness</u> transmission.<u>The.</u>, including providing necessary additional information<u>should include</u>, such pertinent information as suspected exposure, the date of onset and of symptoms and an illness, or any observations of illness, with orof a diagnosis without symptoms, or reportable symptoms including but not limited to if the food handler:
  - (1) <u>Has any of the following symptoms:</u>
    - (a) Vomiting<del>., <sup>P</sup></del>
    - (b) Diarrhea-, P
    - (c) Jaundice-
    - (d) Sore throat with fever, <sup>P</sup> or
    - (e) A lesion; containing pus, or such as a boil or infected wound; that is open or draining and is:
      - (i) Located-On the hands or wrists. Such a lesion shall require, unless an impermeable cover including but not limited to a bandage or such as a finger cot, or stall protects the lesion and a single-use glove is worn over the impermeable cover, both of which shall be changed whenever hand washing is required.<sup>P</sup>
      - (ii) On exposed portions of <u>the</u> arms. Such a, <u>unless the</u> lesion <u>shall beis</u> protected by an impermeable cover, <sup>p</sup> or
      - (iii) On other parts of the body.-Such a, unless the lesion shall be covered by a dry, durable, tight-fitting bandage-,<sup>p</sup>
  - (2) Has an illness diagnosed by a health practitioner due to:
    - (a) Norovirus, <sup>P</sup>
    - (b) Hepatitis A virus, <sup>P</sup>
    - (c) Shigella spp.,<sup>P</sup>
    - (d) Shiga toxin-producing Escherichia Coli, P
    - (e) Typhoid fever (Salmonella Typhi), <sup>P</sup> or
    - (f) Salmonella (non-Typhoidal),<sup>P</sup>
  - (3) Had Typhoid fever, diagnosed by a health practitioner, within the past three months, without having received antibiotic therapy, as determined by a health practitioner, <sup>p</sup>
  - (4) Has been exposed to, or is the suspected source of, a confirmed disease outbreak, because the food handler consumed or prepared food implicated in the outbreak, or consumed food at an event prepared by a person who is infected or ill with: <sup>p</sup>
    - (a) Norovirus within the past 48 hours of the last exposure, P
    - (b) Shiga toxin-producing *Escherichia coli* or *Shigella* spp. within the past three calendar days of the last exposure, <sup>p</sup>
    - (c) Typhoid fever within the past 14 calendar days of the last exposure, <sup>P</sup> or
    - (d) Hepatitis A virus within the past 30 calendar days of the last exposure, <sup>P</sup> or
  - (5) Has been potentially exposed by attending or working in a setting where there is a suspected or confirmed disease outbreak, or knowingly living in the same household with an individual who works or attends a setting where there is a suspected or confirmed disease outbreak, or knowingly living in the same household with an individual diagnosed with an illness caused by:
    - (a) Norovirus within the past 48 hours of the last exposure, P

		(b) Shiga toxin-producing Escherichia coli or Shigella spp. within the past three calendar days of
		<ul> <li>the last exposure, <sup>P</sup></li> <li>(c) Typhoid fever within the past 14 calendar days of the last exposure, <sup>P</sup> or</li> </ul>
		(d) Hepatitis A virus within the past 30 calendar days of the last exposure. <sup>P</sup>
<u>(B)</u>	The PIC	Cmust notify the Health Authority when a food handler is:
	<u>(1)</u>	Jaundiced, <sup>pf</sup> or
	<u>(2)</u>	Diagnosed with an illness due to a pathogen as specified under Subparagraphs (A)(2)(a)—(f) of this section. <sup>Pf</sup>
<u>(C)</u>	The PIC	C must ensure that an employee:
	<u>(1)</u>	Who exhibits or reports a symptom, or who reports a diagnosed illness as specified under subparagraphs (a)(1) — (3) of this section, is prohibited from becoming a food handler until the employee meets the criteria for the specific symptoms or diagnosed illness as specified under § 2-201.3, <sup>p</sup> and
	<u>(2)</u>	Who will work as a food handler in a food establishment that serves as a highly susceptible population and reports a history of exposure as specified under subparagraphs (A)(4)-(5), is prohibited from becoming a food handler until the employee meets the criteria as specified under ¶ 2-201.3(J). <sup>P</sup>
<u>(D)</u>		C must ensure that a food handler who exhibits or reports a symptom, or who reports a diagnosed or a history of exposure as specified under Subparagraphs (A)(1)—(5) of this section is:
	<u>(1)</u>	Excluded as specified under $\P\P 2-201.2$ (A) – (C), and Subparagraphs (D)(1), (E)(1), (F)(1), (G) or (H)(1) and in compliance with the provisions specified under $\P\P 2-201.3$ (A)–(H), <sup>P</sup> or
	<u>(2)</u>	Restricted as specified under Subparagraphs 2-201.2 (D)(2), (E)(2), (F)(2), (H)(2), or ¶¶ 2-201.2(I) or (J) and in compliance with the provisions specified under ¶¶ 2-201.3(D)–(J). <sup>P</sup>
<u>(E)</u>	A food	handler must report to the PIC the information as specified under ¶ (A) of this section. Pf
<u>(F)</u>	A food	handler must:
	<u>(1)</u>	Comply with an exclusion as specified under $\P 2-201.2$ (A)—(C) and Subparagraphs 2-201.2(D)(1), (E)(1), (F)(1), (G), or (H)(1) and with the provisions specified under $\P 2-201.3(A) - (H)$ , <sup>P</sup> or
	<u>(2)</u>	Comply with a restriction as specified under Subparagraphs 2- 201.2(D)(2), (E)(2), (F)(2), (G), (H)(2), or $\P 2$ -201.2 (H), (I), or (J) and comply with the provisions specified under $\P 2$ -201.3(D) – (J). <sup>P</sup>
<u>2-201.</u>	2	Exclusions and Restrictions
<u>The Pl</u>	<u>C must e</u>	xclude or restrict a food handler from a food establishment in accordance with the following:
<u>(A)</u>		ptomatic with vomiting or diarrhea, except when the symptom is from a noninfectious condition, e a food handler if the food handler is:
	<u>(1)</u>	Symptomatic with vomiting or diarrhea, <sup>P</sup> or

(2) Symptomatic with vomiting or diarrhea and diagnosed with an infection from Norovirus, *Shigella* spp., Salmonella (non-Typhoidal), or Shiga toxin-producing *E. Coli*.<sup>P</sup>

<u>(B)</u>	lf jaun	diced or diagnosed with Hepatitis A infection, exclude a food handler who is:
	<u>(1)</u>	Jaundiced and the onset of jaundice occurred within the last seven calendar days, unless the food handler provides to the PIC written medical documentation from a health practitioner specifying that the jaundice is not caused by Hepatitis A virus or other fecal-orally transmitted infection, <sup>P</sup>
	<u>(2)</u>	Diagnosed with an infection from Hepatitis A virus within 14 calendar days from the onset of any illness symptoms, or within seven calendar days of the onset of jaundice, <sup>P</sup> or
	<u>(3)</u>	Diagnosed with an infection from Hepatitis A virus without developing symptoms. <sup>P</sup>
<u>(C)</u>		nosed with Typhoid fever or the food handler reported an illness with Typhoid fever within the past months , exclude the food handler as specified under Subparagraph 2-201.1(A)(3), $^{P}$
<u>(D)</u>	If diag	nosed with an asymptomatic infection from Norovirus:
	<u>(1)</u>	Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>p</sup> Or
	<u>(2)</u>	Restrict the food handler who works in a food establishment not serving a highly susceptible population. <sup>P</sup>
<u>(E)</u>	If diag	nosed with an infection from Shigella spp. and is asymptomatic:
	<u>(1)</u>	Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>p</sup> or
	<u>(2)</u>	<u>Restrict the food handler who works in a food establishment not serving a highly susceptible</u> population. <sup>P</sup>
<u>(F)</u>	If diag	nosed with an infection from Shiga toxin-producing E. Coli, and is asymptomatic:
	<u>(1)</u>	Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>p</sup> or
	<u>(2)</u>	Restrict the food handler who works in a food establishment not serving a highly susceptible population. <sup>P</sup>
<u>(G)</u>	who w	nosed with an infection from <i>Salmonella</i> (non-Typhoidal) and is asymptomatic, restrict the food handler vorks in a food establishment serving a highly susceptible population or in a food establishment not g a highly susceptible population. <sup>P</sup>
<u>(H)</u>	If sym	ptomatic with an acute onset of sore throat with fever:
	<u>(1)</u>	Exclude the food handler who works in a food establishment serving a highly susceptible population, <sup>P</sup> or
	<u>(2)</u>	Restrict the food handler who works in a food establishment not serving a highly susceptible population. <sup>P</sup>
<u>(I)</u>		cted with a skin lesion containing pus such as a boil or infected wound that is open or draining and not rly covered as specified under Subparagraph 2-201.1(A)(1)(e), restrict the food handler. $\frac{p}{2}$

(J) If a food handler is exposed to a foodborne pathogen as specified under Subparagraphs 2-201.1(A)(4)(a - d) or 2-201.1(A)(5)(a-d), restrict the food handler who works in a food establishment serving a highly susceptible population.<sup>p</sup>

#### 2-201.3 Removal, Adjustment, or Retention of Exclusions and Restrictions

The PIC must adhere to the following conditions when removing, adjusting, or retaining the exclusion or restriction of a food handler:

(A) Except when a food handler is diagnosed with Typhoid fever or an infection from Hepatitis A virus:

- (1) Reinstate a food handler who was excluded as specified under Subparagraph 2-201.2(A)(1) if the food handler:
  - (a) Is asymptomatic for at least 24 hours, <sup>P</sup> or
  - (b) Provides to the PIC written medical documentation from a health practitioner that states the symptom is from a noninfectious condition.<sup>P</sup>
- (2) If a food handler was diagnosed with an infection from norovirus and excluded as specified under Subparagraph 2-201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (D)(1) or (2) of this section are met, <sup>p</sup> or
  - (b)
     Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (D)(1) or (2) of this section are met.<sup>P</sup>
- (3) If a food handler was diagnosed with an infection from *Shigella* spp. And excluded as specified under subparagraph 2-201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (E)(1) or (2) of this section are met, <sup>P</sup> or
  - (b)
     Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (E)(1) or (2), or (E)(1) and (3)(a) of this section are met.<sup>P</sup>
- (4) If a food handler was diagnosed with an infection from Shiga toxin- producing *Escherichia coli* and excluded as specified under Subparagraph 2-201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 24 hours and works in a food establishment not serving a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (F)(1) or (2) of this section are met, <sup>p</sup> or
  - (b) Retain the exclusion for the food handler, who is asymptomatic for at least 24 hours and works in a food establishment that serves a highly susceptible population, until the conditions for reinstatement as specified under Subparagraphs (F)(1) or (2) are met.<sup>p</sup>
- If a food handler was diagnosed with an infection from Salmonella (non-Typhoidal) and excluded as specified under Subparagraph 2- 201.2(A)(2):
  - (a) Restrict the food handler, who is asymptomatic for at least 30 calendar days until conditions for reinstatement as specified under Subparagraphs (G)(1) or (2) of this section are met, <sup>p</sup> or

- (b) Retain the exclusion for the food handler who is symptomatic, until conditions for reinstatement as specified under Subparagraphs (G)(1) or (G)(2) of this section are met.<sup>e</sup>
- (B) Reinstate a food handler who was excluded as specified under ¶ 2-201.2(B) if the PIC obtains approval from the Health Authority and one of the following conditions is met,
  - (1) The food handler has been jaundiced for more than seven calendar days, <sup>P</sup>
  - (2) The food handler has been symptomatic with symptoms other than jaundice for more than 14 calendar days, <sup>p</sup> or
  - (3) The food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a Hepatitis A virus infection.<sup>P</sup>
- (C) Reinstate a food handler who was excluded as specified under ¶ 2- 201.2(C) if:
  - (1) The PIC obtains approval from the Health Authority, <sup>P</sup> and
  - (2) The food handler provides to the PIC written medical documentation from a health practitioner that states the food handler is free from Typhoid fever.<sup>p</sup>
- (D)
   Reinstate a food handler who was excluded for a diagnosis with an infection from Norovirus under

   Subparagraphs 2-201.2(A)(2) or (D)(1) or who was restricted under Subparagraph 2-201.2(D)(2) if the PIC obtains approval from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a norovirus infection, <sup>P</sup>
  - (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than 48 hours have passed since the food handler became asymptomatic, <sup>P</sup> or
  - (3) The food handler was excluded or restricted and did not develop symptoms and more than 48 hours have passed since the food handler was diagnosed.<sup>p</sup>
- (E)
   Reinstate a food handler who was excluded for a diagnosis with an infection from a Shiqella species under

   Subparagraphs 2-201.2(A)(2) or (E)(1) or who was restricted under Subparagraph 2-201.2(E)(2) if the PIC
   obtains approval from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a *Shigella* spp. Infection based on test results showing 2 consecutive negative stool specimen cultures that are taken:
    - (a) Not earlier than 48 hours after discontinuance of antibiotics, <sup>p</sup> and
       (b) At least 24 hours apart, <sup>p</sup>
  - (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved, and more than seven calendar days have passed since the food handler became asymptomatic, <sup>p</sup> or
  - (3) The food handler was excluded or restricted and did not develop symptoms and more than seven calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (F)
   Reinstate a food handler who was excluded or restricted, due to a STEC diagnosis, as specified under

   Subparagraphs 2-201.2(A)(2) or (F)(1), or who was restricted under Subparagraph 2-201.2(F)(2) if the PIC
   obtains approval from the Health Authority and one of the following conditions is met:

- (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of an infection from Shiga toxin-producing <u>Escherichia coli</u> based on test results that show 2 consecutive negative stool specimen cultures that are taken:
  - <u>Not earlier than 48 hours after discontinuance of antibiotics, <sup>p</sup> and</u>
     <u>At least 24 hours apart, <sup>p</sup></u>
- (2) The food handler was excluded or restricted after symptoms of vomiting or diarrhea resolved and more than seven calendar days have passed since the food handler became asymptomatic, <sup>p</sup> or
- (3) The food handler was excluded or restricted and did not develop symptoms and more than seven calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (G)
   Reinstate a food handler who was excluded due to non-Typhoidal Salmonella, as specified under

   Subparagraph 2-201.2(A)(2), or who was restricted as specified under ¶ 2-201.2(G) if the PIC obtains approval

   from the Health Authority and one of the following conditions is met:
  - (1) The excluded or restricted food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler is free of a *Salmonella* (non-Typhoidal) infection based on test results showing 2 consecutive negative stool specimen cultures that are taken,
    - (a) Not earlier than 48 hours after discontinuance of antibiotics, <sup>p</sup> and
       (b) At least 24 hours apart, <sup>p</sup>
  - (2) The food handler was restricted after symptoms of vomiting or diarrhea resolved, and more than 30 calendar days have passed since the food handler became asymptomatic, <sup>P</sup> or
  - (3) The food handler was excluded or restricted and did not develop symptoms and more than 30 calendar days have passed since the food handler was diagnosed.<sup>P</sup>
- (H) Reinstate a food handler who was excluded or restricted due to sore throat with fever, as specified under Subparagraphs 2-201.2(H)(1) or (2), if the food handler provides to the PIC written medical documentation from a health practitioner stating that the food handler meets one of the following conditions:
  - (1) Has received antibiotic therapy for *Streptococcus pyogenes* infection for more than 24 hours, <sup>P</sup>
  - (2) Has at least one negative throat specimen culture for Streptococcus pyogenes infection, <sup>P</sup> or
  - (3) Is otherwise determined by a health practitioner to be free of a *Streptococcus pyogenes* infection.<sup>P</sup>
- (I) Reinstate a food handler who was restricted as specified under ¶ 2-201.2(I) if the skin, infected wound, cut, or pustular boil is properly covered with one of the following:
  - (1) <u>An</u> Comply with directives from the HEALTH AUTHORITY regarding exclusion and/or RESTRICTion for Illness and Return to Work Criteria as specified in Chapter 8 of these Regulations.
  - The PERSON IN CHARGE shall take such measures to reduce the RISK of transmission of FOOD BORNE
  - disease to include:

(C)

(1) Exclusion or RESTRICTion of a FOOD HANDLER with active symptoms as noted in Section 2-201.11 (B) (1) of this Chapter. In such case of exclusion, the FOOD HANDLER shall not return to work until free of symptoms.

- (1) Notifying the HEALTH AUTHORITY of a diagnosed FOOD BORNE ILLNESS that has the potential to betransmitted through FOOD, or of active symptoms in a FOOD HANDLER that has had occurrence forspread of potential pathogens to FOOD.impermeable cover such as a finger cot or stall and a singleuse glove over the impermeable cover if the infected wound or pustular boil is on the hand, finger, or wrist, <sup>p</sup>
- (2) An impermeable cover on the arm if the infected wound or pustular boil is on the arm, <sup>P</sup> or
- (3) A dry, durable, tight-fitting bandage if the infected wound or pustular boil is on another part of the body.<sup>p</sup>
- (J)
   Reinstate a food handler who was restricted as specified under ¶ 2-201.2(J) and was exposed to one of the

   following pathogens as specified under Subparagraph 2-201.1(A)(4)(a-d) or 2-201.1(A)(5)(a-d):
  - (1) Norovirus and one of the following conditions are met:
    - (a) More than 48 hours have passed since the last day the food handler was potentially exposed.<sup>P</sup> or
    - (b) More than 48 hours have passed since the food employee's household contact became asymptomatic.<sup>P</sup>
  - (2) Shigella spp. Or Shiga toxin-producing Escherichia coli and one of the following conditions is met:
    - (a) More than three calendar days have passed since the last day the food handler was potentially exposed, <sup>p</sup> or
    - (b) More than three calendar days have passed since the food handler's household contact became asymptomatic.<sup>p</sup>
  - (3) Typhoid fever (caused by Salmonella Typhi) and one of the following conditions is met:
    - (a) More than 14 calendar days have passed since the last day the food handler was potentially exposed, <sup>p</sup> or
    - (b) More than 14 calendar days have passed since the food handler's household contact became asymptomatic.<sup>p</sup>
  - (4) Hepatitis A virus and one of the following conditions is met:
    - (a) The food handler is immune to Hepatitis A virus infection because of a prior illness from Hepatitis A, <sup>p</sup>
    - (b) The food handler is immune to Hepatitis A virus infection because of vaccination against Hepatitis A, <sup>p</sup>
    - (c) The food handler is immune to Hepatitis A virus infection because of IgG administration, P
    - (d) More than 30 calendar days have passed since the last day the food handler was potentially exposed,<sup>p</sup>
    - (e) More than 30 calendar days have passed since the food handler's household contact became jaundiced, <sup>P</sup> or
    - (f)
       The food handler does not use an alternative procedure that allows bare hand contact with

       ready-to-eat food until at least 30 calendar days after the potential exposure, as specified in

       Subparagraphs (I)(4)(d) and (e)of this section, and the food handler receives additional

       training about:
      - (i) Hepatitis A symptoms and preventing the transmission of infection, <sup>P</sup>
      - (ii) Proper handwashing procedures, <sup>P</sup> and
      - (iii) Protecting ready-to-eat food from contamination introduced by bare hand contact.<sup>P</sup>

- EGG PRODUCTs shall
- (A) Egg products must be obtained pasteurized.<sup>P</sup>
- (B) Fluid and dry milk and milk products shallmust:
  - (1) Be obtained pasteurized, <sup>P</sup> and
  - (2) Comply with Grade A Standards as specified in law.<sup>P</sup>
- (C) Frozen milk products, including but not limited to such as ice cream, shallmust be obtained pasteurized as specified in 21 CFR 135 *Frozen Desserts*.<sup>P</sup>
- (D) Cheese shallmust be obtained pasteurized unless processed by alternative procedures asto pasteurization are specified in the CFR's including but not limited to CFR, such as 21 CFR 133 Cheeses and Related Cheese Products for curing certain cheese varieties...<sup>P</sup>

## 3-202.33-202.5 3-205.15 Package Integrity

Food packages shallmust be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants.<sup>Pf</sup>

## 3 202.43-202.6 3 202.16 Ice

Ice, for use as a food or a cooling medium, shall <u>must</u> be made from drinking water. Ice produced in Clark County, and PACKAGED for off PREMISES consumption, shall have labeling that provides for trace back to the point of production. Existing facilities currently packaging ice for off premise consumption shall have one year from the adoption of these regulations to develop and submit labels to the HEALTH AUTHORITY for review and approval.<sup>P</sup>

3-202.17 SHUCKED SHELLSTOCK

## 3-202.53-202.7 Shucked Shellfish, Packaging and Identification

- (A) Raw shucked shellstock shallmust be obtained in non-returnablenonreturnable packages which bear a legible label or tag-that identifies: the: <sup>pf</sup>
  - The Name, address, and certification number of the shucker-\_packer or the re-packerrepacker of the molluscan shellfish; <sup>pf</sup> and

### MOLLUSCAN SHELLSTOCK.

- (2) The "sell by"<u>or best if used by</u> date for packages with a capacity of less than 1.89 L (<u>\frac{1}{2}(one-half</u> gallon)) or the date shucked for packages with a capacity of 1.89 L (<u>\frac{1}{2}(one-half</u> gallon)) or more.
- (B) A package of raw shucked shellstock that does not bear a label, or which bears a label that which does not contain all the information as specified in Paragraph under ¶ (A) of this section, shall must be subject to a hold order as allowed by LAW, or seizure and destruction, as specified in accordance with 21 CFR Subpart D Section 1240.60 (d) Specific Administrative Decisions Regarding Interstate Shipments, Section 1240.60(d) Molluscan shell fish.

3-202.63-202.8 3-202.18 Shellstock Identification

#### SHELLSTOCK shall

(A)	Shells	tock mu	st be obtained in containers bearing legible source identification tags or labels that are affixed
• •	by the	e harves	ter <del>and by each</del> or molluscan shellfish dealer that depurates, ships, or <del>re-ships</del> reships the
			specified in the National Shellfish Sanitation Program Guide for the Control of Molluscan
		-	://www.cfsan.fda.gov/ ear/nsspotoc.html)., and that list: <sup>Pf</sup>
Eroch			LSTOCK, including but not limited to oysters, clams, or mussels, shall be packed in non-returnable
Hesh			are labeled with the name and address of the original processor or the PERSON who re-packed
		0	the rapeled with the name and address of the original processor of the FLRSon who re-packed
	them		
	<u>(1)</u>		t as specified under ¶ (C) of this section, on the harvester's tag or label, the following
		<u>inforr</u>	nation in the following order: <sup>Pf</sup>
		<u>(a)</u>	The harvester's identification number, <sup>Pf</sup>
		<u>(b)</u>	The date of harvesting, <sup>Pf</sup>
<u>The n</u>	nost pre	cise iden	tification
		(c)	Each-container of un-SHUCKED SHELLSTOCK, including but not limited to oysters, clams, or
			mussels, shall be identified by a tag attached to the container stating the name and address of
			the original harvester, dealer, or processor, harvest location or aquaculture site and the
			abbreviation of the name of the state or country in which the kindshellfish are harvested, <sup>Pf</sup>
		(d)	The type and quantity of SHELLSTOCK in shellfish, Pf and
		(e)	The following statement in bold, capitalized type: "THIS TAG IS REQUIRED TO BE ATTACHED
			UNTIL CONTAINER IS EMPTY OR RETAGGED AND THEREAFTER KEPT ON FILE FOR 90 DAYS",
			<sup>Pf</sup> and

- Except as specified in ¶ (D) of this section, on each molluscan shellfish dealer's tag or label, the (2) containerfollowing information in the following order: Pf
  - <u>(a)</u> The dealer's name and address, and the interstate CERTIFICATION NUMBER issued bycertification number, Pf
  - The original shipper's certification number including the abbreviation of the name of the state (b) or bycountry in which the shellfish are harvested, Pf
  - The same information as specified for a harvester's tag under Subparagraphs (A)(1)(b)-(d) of (c) this section, Pf and
  - The following statement in bold, capitalized type: "THIS TAG IS REQUIRED TO BE ATTACHED (d) UNTIL CONTAINER IS EMPTY OR RETAGGED AND THEREAFTER KEPT ON FILE FOR 90 DAYS".
- A container of shellstock that does not bear a foreign agencytag or label, or which bears a tag or label which (B) does not contain all the information as specified under ¶ (A) of this section, must not be used, sold, offered or displayed for sale, or served and must be subject to a hold order or seizure and destruction in accordance with 21 CFR Subpart D Section 1240.60 (d) Specific Administrative Decisions Regarding Interstate Shipments. Molluscan shellfish.
- If a place is provided on the harvester's tag or label for a molluscan shellfish dealer's name, address, and <u>(C)</u> certification number, the dealer's information must be listed first.
- <u>If 3-202.19 SHELLSTOCK the harvester's tag or label is designed to accommodate each molluscan shellfish</u> <u>(D)</u> dealer's identification as specified under Subparagraphs (A)(2)(a) and (b) of this section, individual dealer tags or labels need not be provided.

## 3 202.73-202.9 Shellstock, Condition

When received by a FOOD ESTABLISHMENT, SHELLSTOCK shall be-

A food establishment may offer shellstock for sale or service only when the shellstock was received reasonably free of mud, dead shellstock, and shellstock with broken shells. Dead SHELLSTOCKshellfish or shellstock with badly broken shells shallmust be discarded.

<u>3-202.</u>	10 Juice Treated	
<u>Pre-pa</u>	ackaged juice must:	
<u>(A)</u>	Be obtained from a processor with a HACCP system as specified in 21 CFR Part 120 Hazar Critical Control (HACCP) Systems, <sup>pf</sup> and	<u>d Analysis and</u>
<u>(B)</u>	Be obtained pasteurized or otherwise treated to attain a 5-log reduction of the most resise ————microorganism of public health significance as specified in 21 CFR Part 120.24 Pro-	
3-203 <u>3-203.</u>	5	
<u>(A)</u>	Except as specified in ¶¶ (B)—(D) of this section, molluscan shellfish must not be remove in which they are received other than immediately before sale or preparation for service.	
<u>(B)</u>	For display purposes, shellstock may be removed from the container in which they are redrained ice, or held in a display container, and a quantity specified by a consumer may be display or display container and provided to the consumer only when:	
	(1) The source of the shellstock on display is identified as specified under § 3-202.8 a specified under § 3-203.2, and	ind recorded as
	(2) The shellstock are protected from contamination.	
<u>(C)</u>	Shucked shellfish may be removed from the container in which they were received and h container from which individual servings are dispensed upon a consumer's request only w	
	(1) The labeling information for the shellfish on display as specified under § 3-203.11 retained and correlated to the date when, or dates during which, the shellfish are	
	(2) The shellfish are protected from contamination.	
<u>(D)</u>	Shucked shellfish may be removed from the container in which they were received and re	epacked in consumer
	self-service containers only when:	
	(1) The labeling information for the shellfish is on each consumer self-service contain under § 3-202.7 and ¶¶ 3-602.1(A) and (B)(1)-(5),	<u>ner as specified</u>
	(2) The labeling information as specified under § 3-202.7 is retained and correlated w or dates during which, the shellfish are sold or served,	vith the date when,
	(3) The labeling information and dates specified under Subparagraph (D)(2) of this see for 90 calendar days, and	ection are maintained
	(4) The shellfish are protected from contamination.	
<del>3 203.</del>	13-203.2 Shellstock, Maintaining SHELLSTOCK-Identification	

(A) Except as specified under Subparagraph (C)(2) of this section, shellstock tags shallor labels must remain attached to the container in which the shellstock wasare received by the FOOD ESTABLISHMENT until the container is empty-or remain with the product while in storage...<sup>pf</sup>

<u>(B)</u>	The da	ate when the last shellstock from the container is sold or served must be recorded on the tag or label. <sup>Pf</sup>				
······································		lentity of the source of <del>Tags or labels, from</del> shellstock that <del>have beenare</del> sold or served <del>, shall must</del> be ained <u>by retaining tags or labels</u> for <del>a minimum of</del> 90 calendar days from the date that is recorded on g or label <u>, as specified under ¶ (B) of this section, by: <sup>pr</sup></u>				
	(1)	<u>Using</u> A <u>an approved</u> record keeping system that keeps the tags or labels in chronological order, correlated to the date <del>when or dates during, which<u>that</u> is recorded on</del> the <del>SHELLSTOCK are sold or served shall be maintained, tag or label, as specified under ¶ (B) of this section, <sup>pr</sup> and</del>				
The	(2)	If shellstock isare removed from itsthe tagged or labeled container:				
the		(a) <u>Preserving</u> source identification shall be preserved by using a record keeping system as specified in Paragraph Bunder Subparagraph (C)(1) of this section, <sup>Pf</sup> and				
		(b) The SHELLSTOCK shall not be Ensuring that shellstock from one tagged or labeled container are not commingled with shellstock from another container, unless and until, with different certification numbers; different harvest dates; or different growing areas as identified on the tag or label before being ordered by the consumer. <sup>Pf</sup>

			04			

 with or above frozen, commercially processed and PACKAGED, READY-TO-EAT FOOD.

 (4) \_\_\_\_\_3-302.12 being cooled as specified under Subparagraph 3-501.5(B)(2), or

(5) Shellstock.

### 3-302.2 Food Storage Containers, Identified with Common Name of Food

Except for containers holding food that can be readily and unmistakably recognized including but not limited tosuch as dry pasta, working containers holding food, or food ingredients that are removed from their original packages for use in the food establishment, including but not limited tosuch as cooking oiloils, flour, herbs, potato flakes, salt, spices, and sugar shall<u>must</u> be identified, in English, with the common name of the food. Other applicable languages may be used in addition to the English name.

## 3-302.3 3-302.13 Pasteurized Eggs, Substitute for Raw Shell-Eggs for Certain Recipes

Pasteurized eggs or egg products shall <u>must</u> be substituted for raw shell eggs in the preparation of FOOD including but
not limited to <u>foods such as</u> Caesar salad, hollandaise or Béarnaise sauce, mayonnaise, meringue, eggnog, ice cream,
and egg-fortified beverages that are not- <del>cooked unless</del> :

- (A) A management system is in place, and documented, to ensure that FOOD is discarded if not served ordispensed within three hours after preparation.
- A CONSUMER advisory is included on the menu

(A) <u>Cooked</u> as specified in Paragraphunder Subparagraphs 3-401.11 (C) of this Chapter.1(A)(1) or (2), <sup>p</sup> or

# (B) Included in ¶ 3-302.14-401.1(D). P

## 3-302.4 Protection from Unapproved Additives

s specified in Paragraph 3-202.12 of this Chapter, FOOD shall

(A) <u>Food must</u> be protected from contamination that may result from the addition of, as specified in § 3-202.2:

- (1) Unsafe or unapproved food or color additives., <sup>P</sup> and
- (2) Unsafe or unapproved levels of approved food and color additives.<sup>P</sup>
- (B) A food handler shallmust not:
  - (1) Apply sulfiting agents to fresh fruits and vegetables intended for raw consumption or to a food considered to be a good source of vitamin  $B_{1,r}^{\rho}$  or
  - (2) Except for grapes, serve or sell food specified under Subparagraph (B)(1) of this section that is treated with sulfiting agents before receipt by the food establishment.<sup>p</sup>

# 3-302.5 Washing Fruits and Vegetables

(A) Except as specified in ¶ (B) of this section and except for whole, raw fruits and vegetables that are intended for raw consumptionwashing by the consumer before consumption, raw fruits and vegetables must be thoroughly washed in water to remove soil and other contaminants before being cut, combined with other ingredients, cooked, served, or offered for sale in ready-to-eat form.

(B) Fruits and vegetables may be washed by using chemicals as specified under § 7-204.2.

<u>(C)</u>	Devices used for on-site generation of chemicals meeting the requirements specified in 21 CFR 173.315, Chemicals used in washing or to assist in the peeling of fruits and vegetables, for the washing of raw, whole fruits and vegetables must be used in accordance with the manufacturer's instructions. <sup>Pf</sup>				
3-303 3-303	0				
PACK/	After use as a medium for cooling, the exterior surfaces of food including but not limited to such as melons or fish, and PACKAGED FOOD including but not limited to packaged foods such as canned beverages, or bottled BEVERAGEs, cooling coils, and tubes of equipment, and ice shallmust not be used as food. <sup><math>P</math></sup>				
3-303	.2 3-303.12 Storage or Display of Food in Contact with Water or Ice				
(A)	Packaged food must not be stored in direct contact with ice or water if the food is subject to the entry of water, because of the nature of its packaging, wrapping, <u>or</u> container, or <del>positionits positioning</del> in the ice, PACKAGED FOOD may be stored in direct contact with ice water.				
(B)	Except as specified in UnPACKAGED FOOD may [] (C)—(E) of this section, unpackaged food must not be stored in direct contact with <u>undrained</u> ice that is not self draining, except that.				
(C)	Whole, raw fruits, <u>herbs</u> or vegetables; cut, raw vegetables including but not limited tosuch as celery or carrot sticks; or cut potatoes; and tofu may be immersed in water or covered with ice or water.				
(D)	Raw chickenpoultry and raw fish, that are received immersed in water or covered with ice in shipping containers, may remain in that condition while in storage awaiting preparation, display, service, or sale.				
<u>(E)</u>	Raw fish may be immersed in ice for storage.				
3-304 3-304 <del>FOOD</del>	.1 3-304.11 Food Contact with Equipment and Utensils				
	— · · ·				
(A)	Equipment and utensils that are properly cleaned as specified under Part 4-6 of these regulations and sanitized, as specified under Part 4-7 of these regulations, <sup>P</sup>				
<del>3 304</del> (В)	Single-service and single-use articles, <sup>P</sup> or				
<u>(C)</u>	Linens, such as cloth napkins, as specified under § 3-304.3 that are laundered as specified under Part 4-8 of these regulations. <sup>P</sup>				
3-304	.2 In-Use Utensils, Between-Use Storage				
Durin	g pauses in food preparation or dispensing, food preparation and dispensing utensils shall <u>must</u> be stored:				
(A)	Except as In PHF (TCS) specified under $\P$ (B) of this section, in the food with their handles above the top of the food and the container $\tau_z$				
(B)	In <del>FOOD that is not PHF (non_</del> TCS <del>) food</del> with their <del>clean</del> handles above the top of the food, within containers or equipment that can be closed, including but not limited to <u>such as</u> bins of sugar, flour, or cinnamon-2				
(C)	On a clean FOOD-CONTACT SURFACE, including but not limited to a portion of athe food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or				

	cooking equipment, which has been properly are cleaned and sanitized at an APPROVEDa frequency. specified under §§ 4-602.1 and 4- 702.1,
(D)	In <del>water r</del> unning <del>atwater of</del> sufficient velocity to flush particulates to the drain, if used with moist food including but not limited to <u>such as</u> ice cream or mashed potatoes <sub>"</sub>
(E)	In a clean, protected location if the utensils <del>including but not limited to, such as</del> ice scoops, are used only with a <u>food that is not a TCS food</u> .
FO	OD that is not PHF (TCS).
(F)	In a container of water, if the water is maintained at a temperature of $41^{\circ}F\pm2^{\circ}$ or below, or at least 135°F $\pm2^{\circ}$
	or above, <u>(57°C)</u> and the UTENSILs and container are cleaned at least every four hours, or more often if necessary to preclude accumulation of FOOD residue.is cleaned at a frequency specified under Subparagraph
	<u>4-602.1(D)(7), or</u>
	.13 Use Limitations, LINEN
<u>(G)</u>	In a container of ice or water maintained at a temperature of 41°F (5°C) or lower, if the in-use utensils are only used for non-TCS foods and the container is cleaned at a frequency specified under Subparagraph 4-
	<u>602.1(D)(6).</u>
3-304 <del>LINE</del> P	
	s, such as cloth napkins-may, must not be used in contact with food unless they are used to line or cover a

<del>(В)</del> (С)	D <del>ry or wet cloths that are usedwiping surfaces in contact</del> with raw animal <del>FOOD shall<u>f</u>oods must</del> be kept separate from cloths used for other purposes.
<del>(B)</del>	<u>DryWet cloths used with raw animal FOOD shall be kept in a separate wiping cloths and the chemical</u> sanitizing solution at a concentration assolutions specified by manufacturer's instructions.
<del>(C)</del> (D)	<u>Wet wiping cloths used with a freshly made sanitizing solution, and dryin Subparagraph (B)(1) of this section</u> <u>in which wet</u> wiping cloths <del>shall</del> are held between uses must be free of food debris and visible soil.
In use	wiping cloths shall be maintained at the sanitizer concentrations as specified in Paragraph (A) (2) of this Section.
(E)	Containers of chemical sanitizing solutions specified in Subparagraph (B)(1) of this section in which wet wiping
	cloths are held between uses must be stored and used in a manner that prevents contamination of food,
	equipment, utensils, linens, single-service, or single-use articles.
<u>(F)</u>	Single-use disposable sanitizer wipes must be used in accordance with EPA-approved manufacturer's label use instructions.
<del>(C)</del>	Wiping Cloths shall be LAUNDERed, or removed from service, daily.
<del>(D)</del>	A WAIVER documenting an alternative operational procedure for wiping cloth usage may be submitted to-
	the HEALTH AUTHORITY for consideration.
3-304	5 3-304.15 Use Limitations; Gloves, Use Limitation
(A)	If used, single-use gloves shall <u>must</u> be used for only one task including but not limited tosuch as working with ready-to-eat food or with raw animal food. They shall be, used for no other task or purpose, and shall be- discarded when damaged or soiled, or when interruptions occur in the operation. <sup>P</sup>
(B)	Except as specified in Paragraph¶ (C) of this section, slash-resistant gloves, which <u>that</u> are used to protect the hands during operations requiring cutting, <u>shall must</u> be used in direct contact only with food that is subsequently cooked, <u>including but not limited to as specified under Part 3-4 of these regulations such as</u> frozen food or a primal cut of meat-as specified in Section 3-4 of this Chapter.
(C)	Slash-resistant gloves may be used with ready-to-eat food that will not be subsequently cooked, if the slash- resistant gloves have a smooth, durable, and non-absorbentnonabsorbent outer surface, or if the slash- resistant gloves are covered with a smooth, durable, non-absorbentnonabsorbent glove, or with a single-use glove.
(D)	Cloth gloves <del>, which may be a source of CROSS-CONTAMINATION, shall <u>must</u> not be used in direct contact with food<sub>7</sub> unless the food <del>such as FROZEN FOOD or a PRIMAL CUT of MEAT</del> is subsequently cooked <del>to theas</del> required temperature. Cloth gloves are to be properly LAUNDERed or discarded at the end of each shift<u>under</u> Part 3-4 of these regulations such as frozen food or a primal cut of meat.</del>
3-304	6 3-304.16-Using Clean Tableware for Second Portions and Refills
(A)	Except for refilling a consumer's drinking cup or container, without contact between the pouring utensil and the lip-contact area of the drinking cup or container, food handlers maymust not use tableware, including single-service articles, soiled by the consumer, to provide second portions or refills.
(B)	Except as specified in ¶ (C) of this section, self-service consumers shallmust not be allowed to use soiled tableware, including single-service articles, to obtain additional food from the display and/or the serving equipment.
<u>(C)</u>	Drinking cups and containers may be <u>re-usedreused</u> by self-service consumers, if <u>the</u> _refilling is a contamination-free process, as specified in <u>Chapterunder ¶¶</u> 4-409.11 of these Regulations. 204.3-304.17 (A), (B), and (D).

<u>(A)</u>	establi	as specified in <del>Paragraph (D<b>]1</b> (B)—(E</del> ) of this section, <u>empty containers returned to a food</u> shment for cleaning and refilling with food must be cleaned and refilled in a regulated food shment. <sup>P</sup>
A take- (B)	Except	bod container returned to a food establishment <del>shall not be refilled with a PHF (TCS).may be as specified in Paragraph (C) of this Section, a take home FOOD container refilled <u>at a food</u> shment with food <u>if the food container is:</u></del>
	<u>(1)</u>	<u>Designed and constructed for reuse and in accordance with the requirements specified under Parts 4-</u> 1 and 4-2 of these regulations; <sup>P</sup>
	<u>(2)</u>	One that was initially provided by the food establishment to the consumer, either empty or filled with food by the food establishment, for the purpose of being returned for reuse,
	<u>(3)</u>	Returned is not PHF (TCS) shall be to the food establishment by the consumer after use,
	<u>(4)</u>	Subject to the following steps before being refilled with food:
		<ul> <li>(a) Cleaned as specified in <u>Chapter under Part</u> 4-409.116 of these regulations<sub>7</sub>.</li> <li>(b) Sanitized as specified under Part 4-7 of these regulations, <sup>P</sup> and</li> <li>(c) Visually inspected by a food handler to verify that the container, as returned, meets the requirements specified under Part 4-1 and 4-2 of these regulations. <sup>P</sup></li> </ul>
<u>(C)</u>	<u>A take</u> bevera	home food container returned to a food establishment may be refilled at a food establishment with ge if:
	<u>(1)</u>	The beverage is not a TCS food,
	<u>(2)</u>	<u>The design of the container and of the rinsing equipment and the nature of the beverage, when</u> considered together, allow effective cleaning at home or in the food establishment,
	<u>(3)</u>	Facilities for rinsing before refilling returned containers with fresh, hot water that is under pressure and not recirculated are provided as part of the dispensing system,
	<u>(4)</u>	The consumer-owned container returned to the food establishment for refilling is refilled for sale or service only to the same consumer, and
	<u>(5)</u>	The container is refilled by:
		<ul> <li>(a) A food handler of the food establishment, or</li> <li>(b) The owner of the container if the beverage system includes a contamination-free transfer process as specified under ¶¶ 4-204.3(A), (B), and (D) that cannot be bypassed by the container owner.</li> </ul>
	insulat the cor <del>Regula</del>	mer-owned, personal take-out beverage containers-including but not limited to, such as thermally ed bottles, non-spill coffee cups, and promotional beverage glasses, may be refilled by food handlers or nsumer, if refilling is a contamination-free process as specified in Chapterunder ¶¶ 4-409.11 of these tions-204.3(A), (B), and (D).

(C)(E) Consumer-owned containers with that are not food-specific may be filled at a PHF (TCS), the following criteriamust be met:water vending machine or system.

	Return	hable containers to be refilled with a PHF (TCS) shall meet all requirements as specified in Chapter 4- 301.11 (A) of these Regulations.
	(1)	The product contact surfaces of the returnable container shall be effectively cleaned and sanitized
		before each use and shall be re sanitized whenever any non sanitized product has contaminated
3-305 3-305.		it. Preventing Contamination from the Premises <del>3-305.11</del> -Food Storage
(A)		t as specified in Paragraphs¶¶ (B) and (C) of this section, food <del>shall<u>must</u> be protected from nination by storing the food:</del>
	(1)	In a clean, dry location-where it is not exposed to dust or other contamination,
	(2)	Where it is not exposed to splash <del>, dust, or other CONTAMINATION.</del> or is protected from splash using a physical barrier or distance provided that,
		(a) If a splash guard is used as a physical barrier, it must be tall enough to prevent splash but no
		less than 12 inches, and         (b)       If distance is used as a means of protection from splash, the source of potential         contamination must be a horizontal distance of no less than 18 inches from the food handling or storage area, and
	(3)	At least <u>six inches (</u> 15 cm <del> (6-</del> ) above the floor.
(B)	case lo <del>by har</del>	n packages and working containers may be stored less than <u>six inches (</u> 15 cm <del>.(6</del> -) above the floor, on ot handling equipment including but not limited to dollies, pallets, racks, and skids designed to be moveded or by conveniently available apparatuses, including but not limited to hand trucks and forklifts <u>as</u> ed under § 4-204.23.
(C)	comm	rrized beverage containers, cased food in waterproof containers <del>, including but not limited to ercially SEALED such as</del> bottles or cans, including liquor and milk containers in plastic crates, may be on a floor that is clean and <del>does</del> not expose the containers <u>exposed</u> to floor moisture.
3-305.	.2	3-305.12 Food Storage, Prohibited Areas

------------------------------

<u>TCS food dispensed through a vending machine must be in the package in which it was placed at the food</u> establishment or food processing plant at which it was prepared.

## 3-305.33-305.4 Food Preparation

During preparation <u>unPACKAGED FOOD shall, unpackaged food must</u> be protected from environmental sources of contamination.

3-306	Preventing Contamination by Consumers
-------	---------------------------------------

3-306.1 3-306.11 Food Display

Except FOOD on display shall be protected from CONTAMINATION by the use of packaging, counter service line, or salad bar FOOD/sneeze guards, display cases, or other effective means except that such protection is not required for nuts in the shell<sub>7</sub> and whole<sub>2</sub> raw fruits and vegetables that are intended for hulling, peeling, or washing by the consumer before consumption<sub>7,</sub> food on display must be protected from contamination by the use of:

# (A) Packaging,

(B) Food shields 3-306.12 CONDIMENT that meet the NSF/ANSI 2 standard,

- (C) Counters with a horizontal setback of no less than 24 inches,
- (D) Enclosed display cases,
- (E) Scupper drains where open ice bins are installed,
- (F) Drink rails at bar tops used for dining and open food is stored below, or
- (G) Other effective means. P

## 3-306.2 <u>Condiments</u>, Protection

# CONDIMENTs shall

(A) <u>Condiments must</u> be protected from contamination by being kept in dispensers that are designed to provide protection <u>including but not limited to</u>, protected food displays provided with <u>the</u> proper utensils, original containers designed for dispensing, or individual packages or portions.<u>Commercially PACKAGED CONDIMENT</u><u>containers are for single-service and shall not be refilled.</u>

# 3-306.13

(B) Condiments at a vending machine location must be in individual packages or provided in dispensers that are filled at an approved location, such as the food establishment that provides food to the vending machine location, a food processing plant, or a properly equipped facility that is located on the site of the vending machine location.

### 3-306.3 Consumer Self-Service Operations.

(A) Raw<sub>2</sub> unpackaged animal food including but not limited to, such as beef, lamb, pork, poultry, and fish shallmust not be offered for consumer self-service. <sup>P</sup><sub>2</sub>This paragraph does not apply to:

- Consumer self-service of ready-to-eat FOOD foods at buffets or salad bars that serve FOOD includingbut not limited tofoods such as sushi or raw SHELLSTOCK-shellfish,
- (2) Ready-to-cook FOOD in individual portions, for immediate cooking and consumption on the premises, including but not limited to such as consumer-cooked MEAT,meats or consumer\_selected ingredients for Mongolian barbecue, or
- (3) Raw, frozen, shell-on shrimp, or lobster.
- (B) Consumer self-service operations for ready-to-eat FOOD shallfoods must be provided with suitable utensils or effective dispensing methods that protect the food from contamination.<sup>Pf</sup>
- (C) Consumer self-service operations including but not limited to, such as buffets and salad bars-shall, must be monitored by food handlers trained in safe FOOD handlingoperating procedures.<sup>Pf</sup>
- (D) A sign shallmust be conspicuously posted to notify consumers to use a clean plate or container each time they serve themselves. The sign must also state that no eating is allowed while self-serving food and that consumers shallmust only use the utensils provided for handlingto handle the food.

### 3-306.4 3-306.14 Returned Food and Re-Service of Food

- (A) Except as specified in ¶ (B) of this section, after being served or sold<sub>7</sub> and in the possession of a consumer, food that is unused or returned by the consumer maymust not be <u>used, sold</u>, offered as FOOD<u>or displayed</u> for human consumption, exceptsale, or served.<sup>p</sup>
- (A)(B) Except as specified under ¶ 3-801(G), a container of food that is non\_POTENTIALLY HAZARDOUSnot TCS food may be transferredre-served from one consumer to another if:
  - (1) The food is dispensed so that it is protected from contamination, and the container including but notlimited to closed between uses, such as a narrow-neck bottle containing ketchupcatsup, steak sauce, or wine is closed between uses., or
  - (2) The food including but not limited to, such as crackers, salt, or pepper, is in an unopened original package and is maintained in sound condition.

3-307 Preventing Contamination from Other Sources 3-307.11 Miscellaneous Sources of Contamination FOOD shall not be prepared or stored in unAPPROVED areas of the FOOD ESTABLISHMENT. FOOD shall Food must be protected from contamination that may result from a factor or source not specified in Sectionsunder Subparts 3-301 through\_ 3-306.

(A)	-	as specified in Paragraph-1 (B) of this section, before service or sale in ready-to-eat form, raw, raw- ated, partially cooked, or marinated_partially cooked fish shallmust be:
	(1)	Frozen solid and stored at a temperature of -4°F $\pm$ 2° (-20°C) or below for a minimum of 168 hours (seven7 days) in a freezer, $\frac{p}{2}$
	(2)	Frozen solid at -31°F $\pm$ 2° (-35°C) or below until solid and stored at -31°F $\pm$ 2° (-35°C) or below for a minimum of 15 hours-, <sup>p</sup> or
	<u>(3)</u>	_Frozen <del>solid</del> at -31°F <u>±2° (-35°C)</u> or below until solid and stored at -4°F <u>±2° (-20°C)</u> or below for a minimum of 24 hours. <sup>2</sup>
(B)	Paragr	aph (A) of this section does not apply to:

#### (1) MOLLUSCAN SHELLSTOCK.

(1) Molluscan shellstock,

## (2) A scallop product consisting only of the shucked adductor muscle,

- (1)(3) Tuna of the species Thunnus alalunga, Thunnus albacares (Yellowfin tuna), Thunnus altanticusatlanticus, Thunnus maccoyii (Bluefin tuna, Southern), Thunnus obesus (Bigeye tuna), or Thunnus thynnus (Bluefin tuna, Northern), or
  - (2) Aquaculture-raised FISH including but not limited to salmon if:
- (4) Aquacultured fish, such as salmon, that:
  - (a) If raised in open water-or, are raised in net-pens-, or
  - (b) Are raised in land-based operations including but not limited to such as ponds or tanks-, and
  - (c) Are fed formulated feed, including but not limited to such as pellets, which contain that contains no live parasites infective to the aquacultured fish.

### 3 402.12

(5) Fish eggs that have been removed from the skein and rinsed.

### 3-402.2 Records<sup>†</sup><sub>L</sub> Creation and Retention

- (A) Except as specified in Paragraph¶ 3-402.111(B) and ¶ (B) of this Chapter, section, if raw, raw-marinated, partially cooked, or marinated\_partially cooked fish, that are served or sold in ready-to-eat form, the PERSON-IN CHARGE shallPIC must record the freezing temperature and time to which the fish wereare subjected, and shallmust retain the records atof the food establishment for 90 calendar days beyond the time of service or sale of the fish.<sup>Pf</sup>
- (B) If the fish are frozen solid-by a supplier, a written agreement or statement from the supplier stipulating that the fish supplied wereare frozen solid to a temperature, and for a time as specified in Chapterunder § 3-402.11 of this Chapter, 1 may substitute for the records as specified in Paragraphunder ¶ (A) of this section.
- (C) If raw, raw-marinated, partially cooked, or marinated\_partially cooked fish are served or sold in ready-to-eat form, and the fish were raised and fed as specified in ParagraphSubparagraph 3-402.11-1(B) (3) of this. Chapter,](4), a written agreement or statement from the supplier or aquaculturist stipulating that the fish were raised and fed as specified in ParagraphSubparagraph 3-402.11-1(B) (3) of this Chapter, shall)(4) must be obtained by the PERSON IN CHARGEPIC and retained at the food establishment for 90 calendar days beyond the time of service or sale of the fish.<sup>Pf</sup>

## 3-402.3 3-402.13 Preparation for Immediate Service

Cooked and refrigerated food whichthat is prepared for immediate service in response to an individual consumer order, including but not limited tosuch as a roast beef sandwich au jus, may be served at any temperature.

<mark>3-40</mark>	0 <mark>3 Reheating</mark>
3-403	3-403.11 Reheating for Hot Holding
(A)	Except as specified in Paragraphsunder ¶¶ (B), (C), and (C) and in ¶ (E) of this section, PHF (TCS) food that is cooked, cooled, and reheated for hot holding shallmust be reheated heated so that all parts of the food reach a temperature of at least 165°F $\pm 2^{\circ}$ (74°C) for 15 seconds. <sup>P</sup>

(B) Except as specified in Paragraphunder ¶ (C) of this section, PHF (TCS) that is food reheated in a microwave oven for hot holding, shall must be heated so that all parts of the food reach a temperature of at least

165 °F $\pm$ 2°. The FOOD shall be (74 °C) and the food is rotated or stirred, covered, and allowed to stand covered for two minutes after reheating.<sup>P</sup>

- (C) <u>ReadyREADY TO EAT FOOD taken from a-to-eat TCS food that has been commercially processed,-HERMETICALLY SEALED CONTAINER, or from an intact package from and packaged in a food processing ESTABLISHMENTplant that is inspected by the HEALTH AUTHORITY havingregulatory authority that has jurisdiction over the ESTABLISHMENT, shallplant, must be heated to a temperature of at least 135°F±2°\_(57°C) when being reheated for hot holding.<sup>p</sup></u>
- (D) Reheating for hot holding, as specified in Paragraphsunder ¶¶ (A), (B), and ()-(C) of this section, shall must be done rapidly withand the time the food is between 41°F (5°C) and the temperaturetemperatures specified in Paragraphsunder ¶¶ (A), (B), and ()-(C) of this section must not to exceed two hours.<sup>p</sup>
- (E) Remaining unsliced portions of <u>MEAT meat</u> roasts, that are cooked as specified <u>in Paragraphunder ¶</u> 3-401.111(B).of this Chapter, may be reheated for hot holding using the oven parameters and minimum time and temperature conditions specified <u>in Paragraphunder ¶</u> 3-401.111(B) of this Chapter.).

3-404 Other Methods

3-404 3-404.11 Treating Juice JUICE processed and Juice packaged in a food establishment shallmust be:
(A) Treated under a HACCP plan as specified in <u>Chapter ¶¶ 8-201.</u> 4-101.14 and <u>Chapter 4-101.15(B)-(E)</u> to attain a <u>5-log reduction</u> of these Regulations or as <u>APPROVED</u> by the <u>HEALTH AUTHORITY or AGENCY OF</u> . <u>JURISDICTION-most resistant microorganism of public health significance; <sup>p</sup> or</u>
<ul> <li>(A) Labeled, If not treated to yield a 5-log reduction of the most resistant microorganism of public health significance-shall be, labeled as:         <ul> <li>(1) Specified in Paragraph specified under § 3-602.110f this Chapter.</li> <li>(B) 1, and as specified in 21 CFR 101.17(g)-of Food labeling, warning, notice, and safe handling statements. Juices that have not been specifically processed to prevent, reduce, or eliminate the presence of pathogens shall belabeled as follows: with the following, "WARNING: This product has not been pasteurized and, therefore, may contain harmful bacteria that can cause serious illness in children, the elderly, and persons with weakened immune systems.", ", "!</li> </ul> </li> </ul>

3-501.2 TCS Food, Slacking
Frozen PHF {TCS} food that is slacked to moderate shall the temperature must be held:
(A) Under refrigeration that maintains the food temperature at 41°F $\pm 2^{\circ}$ , (5°C) or below-, or
(A)(B)At any temperature if the food remains frozen.
3-501.13-501.3 3-501.13 Thawing FROZEN PHF ( Except as specified in ¶ (D) of this section, TCS) shall food must be thawed by one of the following methods:
(A) Under refrigeration or conditions that maintainmaintains the food temperature at 41°F±2°.(5°C) or below-, or

<u>(B)</u>	Compl	etely submerged under running water having:
	<u>(1)</u>	At a water temperature of 70°F (21°C) or below,
	<u>(2)</u>	With sufficient water velocity to agitate and float off loose particles in an overflow without allowing. and
	<del>(1)</del> (3)	For a period of time that does not allow thawed portions of ready-to-eat food to rise above 41 °F $\pm 2^{\circ}$ for more than four hours. (5 °C), or
	<del>part<u>pe</u></del>	a microwave oven, if the FOOD will be immediately transferred to a convention cooking process, as- riod of a continuous operation or where the entire uninterrupted cooking process takes place in the- wave oven.time
		<u></u>
		(a) The time the food is exposed to the running water and the time needed for preparation for cooking, or
		(b) The time it takes under refrigeration to lower the food temperature to 41 °F (5 °C),
<u>(C)</u>	_As par	t of the a cooking process if the food that is frozen is:
	<u>(1)</u>	<u>Cooked as specified under ¶¶ 3-401.1(A) or (B) or § 3-401.2, or</u>
	<del>(3)</del> (2)	<u>Thawed in a microwave oven and immediately transferred to</u> conventional cooking process.equipment; or
<u>(D)</u>		any procedure if a portion of frozen ready-to-eat food is thawed and prepared for immediate service in use to an individual consumer's order.
<u>3-501.</u>	3.1	Thawing Reduced Oxygen Packaged Fish
		en packaged fish that bears a label indicating that it is to be kept frozen until time of use must be the reduced oxygen environment:
<u>(A)</u>	Prior t	o its thawing under refrigeration as specified in $\P$ (A) of section 3-501.3, or
<u>(B)</u>	Prior t 501.3.	o, or immediately upon completion of, its thawing using procedures specified in $\P$ (B) of section 3-
<u>3-501.</u> <del>3-501.</del>		<u>Cooling</u> <del><u>1-3-501.14 Cooling</u></del>
(A) (A)		- <del>hot FOOD may be cooled at ambient air temperature until it drops to 135°F±2°.</del> d <del>PHF (</del> TCS <del>) shall <u>food must</u> be cooled:</del>
	(1)	Within two hours from $135^{\circ}F \frac{+2^{\circ}}{(57^{\circ}C)}$ to $70^{\circ}F \frac{+2^{\circ}}{(21^{\circ}C)}$ , $p^{\circ}$ and,
	<u>(2)</u>	Within a total of six hours from 135°F (57°C) to 41°F (5°C) or below. <sup>P</sup>
	(1)-	—— <u>TCS food must be cooled</u> within four hours <del>from 70°F±2°</del> to 41°F <del>±2°.</del>

(B)		or below if prepared from ingredients at ambient temperature <del>PHF (TCS) shall be cooled within four-</del> to 41°F±2°, or below. READY-TO-EAT PHF (TCS) shall be prepared from chilled ingredients-, such as
	recons	tituted foods and canned tuna. <sup>P</sup>
Raw fro	<del>esh who</del>	le shell EGGS shall be
<u>(C)</u>		as specified under ¶ (D) of this section, a TCS food received in compliance with laws allowing a
		rature above 41°F (5°C) during shipment from the supplier as specified in ¶ 3-202.1(B), must be cooled
	within	four hours to 41°F (5°C) or below. <sup>P</sup>
<del>(C)</del> (D)		and stored in refrigerated under $\P$ 3-202.1(C) and stored immediately placed in refrigerated nent that maintains an ambient air temperature of 45°±2°F (7°C) or less below. <sup>P</sup>
3-501.	5	Cooling Methods
<del>(B)</del>	Cut	leafy greens shall be received and stored in refrigerated EQUIPMENT that maintains an ambient air-
		perature of 41°±2° or less.
3-501.	3 <u>3-501.:</u>	L-3-501.15 Cooling Methods
(A)	Section	g <del>shall<u>must</u> be accomplished in accordance with the time and temperature criteria specified in- n<mark>under §</mark> 3-501.<del>14 of this Chapter,4</del> by using one or more of the following methods <del>dependingbased</del> on be of food being cooled:</del>
	(1)	Placing the food in shallow pans-or trays., <sup>Pf</sup>
	(2)	Separating the food into smaller or thinner portions- <sup>Pf</sup>
	(3)	Using rapid cooling equipment- <del>such as blast chillers, <sup>pr</sup></del>
	(4)	Stirring the food in a container placed in an ice -water bath, $\frac{Pf}{L}$
	(5)	Using containers that facilitate heat transfer $\frac{p_f}{r_L}$
	(6)	Adding ice as an ingredient, <sup>pf</sup> or
	(7)	Other effective methods-as APPROVED by the HEALTH AUTHORITY
(B)	<u>When</u> be:	<sup>£</sup> placed in cooling or cold <u>-</u> holding equipment, food containers in which food is being cooled <del>shall<u>must</u></del>
	(1)	Arranged in the equipment to provide maximum heat transfer through the container walls-, and
	(2)	Loosely covered or uncovered if protected from overhead contamination, as specified in-
	(-)	Paragraphunder Subparagraph 3-305.11-1(A)- $(2)$ of this Chapter,), during the cooling period to
		facilitate heat transfer from the surface of the food.
<del>3-501.</del>	4 <u>3-501.(</u>	5-3-501.16 POTENTIALLY HAZARDOUS FOOD (TCS <del>), Food,</del> Hot and Cold Holding
Exce PHF	ept durir	ng <u>active</u> preparation, cooking, or cooling, or when time is used as the means of public health control,
(A)	(TCS) s	hall be maintained at 135°F±2° or above, or at 41°F±2° or below, as specified under § 3-501.9, and
		The boundary of the section $TCS$ for a section $TCS$ for a must be maintained.

(1) <u>At Roast beef that is properly135°F (57°C) or above, except roasts</u> cooked to a temperature and for a time specified in ¶ 3-401.1(B) or reheated as specified in ¶ 3-403.1(E) may be held at a temperature of 130°F (54°C) <sup>p</sup> or above, or

# (2) <u>At shall41°F (5°C) or below.</u><sup>P</sup>

<u>(B)</u>	Raw shell eggs must be stored in refrigerated equipment that maintains an ambient air temperature of 45°F (7°C) or below. <sup>P</sup>
<del>(B)</del> (C)	TCS food in a homogenous liquid form may be maintained at 130°F±2° or above for 112 minutes.outside of the temperature control requirements, as specified under ¶ (A) of this section, while contained within specially designed equipment that complies with the design and construction requirements specified under ¶ 4-
FOOD	204.3(E). that is cooked or served within 72 hours after the time when its temperature is between 41°F±2° to 45°F±2°. FOOD shall be labeled with the appropriate date and time.
<u>3-501.</u>	7 Ready-to-Eat, TCS Food, Date Marking
(A) (B)	Cut-melons shall be maintained at 41°F±2°or below. Reduced oxygen PACKAGED raw FOOD shall be maintained at 41°F±2°, or below. Fresh FISH is-
	prohibited from REDUCED OXYGEN PACKAGING.
<del>501.17</del> (A)	<b>READY TO EAT POTENTIALLY HAZARDOUS FOOD (TCS)</b> Except when packaging food using a reduced oxygen packaging method, as specified in Paragraphunder § 3- 502.42 of this Chapter2, and except as specified in Paragraphs (D¶¶ (E) and (E) of this section, refrigerated- READY-TO-EAT, PHF (, ready-to-eat, TCS) food prepared and held in a food establishment for more than 24 hours, shall must be clearly marked to indicate the date or day by which the food shallmust be consumed on the premises, sold, or discarded within when held at a temperature of 41°F (5°C) or below for a maximum of seven <u>calendar</u> days-from preparation, if held at 41°F±2° or below. The day of preparation shallmust be counted as day one, <u>P</u>
<u>(B)</u>	Except as specified in Paragraphs (D),¶¶ (E), and (F)—(G) of this section, refrigerated-READY-TO-EAT, PHF (, ready-to-eat_TCS) food prepared and packaged by a food processing ESTABLISHMENT shallplant must be clearly marked to show, at the date and time when the original container wasis opened in a food establishment, and if the food is held for more than 24 hours, to indicate the date or day by which the food shallmust be consumed on the premises, sold, or discarded, based on the temperature and time combinations, as specified in Paragraph¶ (A) of this section, and: Pr
	(1) The day or date the original container wasis opened in the food establishment shallmust be counted as day one, with a discard date of day seven, except that _ pf and
	(1)[2] The day or date marked by the food establishment shallmust not exceed a manufacturer's "use-by" date, if the manufacturer determined the "use-by" date based on food safety. Pr
<del>(B)</del> (C)	_A refrigerated, ready-to-eat PHF {TCS} food ingredient or a portion of a refrigerated, ready-to-eat PHF {_TCS}_ food that is subsequently combined with additional ingredients or portions of food shallmust retain the date marking of the earliest_prepared or first_ prepared ingredient. <sup>Pf</sup>
( <del>C)</del> (D)	_A date marking system that meets the requirementscriteria stated in Paragraphs¶¶ (A) and (B) of this section may include:
	(1) Using aan approved method APPROVED by the HEALTH AUTHORITY or AGENCY OF JURISDICTION. for refrigerated, ready-to-eat PHF (TCS) food that is frequently re-wrapped including but not limited to-luncheon MEAT, rewrapped, such as lunchmeat or a roast, or for which date marking is impractical-including but not limited to, such as soft -serve mix, or milk in a dispensing machine.
	(2) Marking the container with the date or day of preparation, in combination with a procedure to discard the food on or before the last date or day by which the food shallmust be consumed on the premises, sold, or discarded as specified in Paragraphunder ¶ (A) of this section.

(3)	Marking the date or day when the original container is opened in a food establishment, in
	combination with a procedure to discard the food on or before the last date or day by which the food
	shall <u>must</u> be consumed on the premises, sold, or discarded as specified in Paragraphunder ¶ (B) of
	this section-, or

(4) Using calendar dates, days of the week, color-coded <u>markingsmarks</u>, or other effective marking methods, provided that the marking system is disclosed to the Health Authority upon request.

#### Paragraphs

(D)(E) <u>¶</u>(A) and (B) of this section do not apply to individual meal portions served or re-packaged for sale from a bulk container upon <u>a consumer's</u> request<u>by the CONSUMER</u>.

## (F) Paragraph¶¶ (A) and (B) of this section do not apply to shellstock.

- (E)(G) ¶ (B) of this section does not apply to the following FOOD foods prepared and packaged by a food processing ESTABLISHMENT and plant inspected by the HEALTH AUTHORITY or othera Regulatory Authority:
  - (1) Deli salads including but not limited to, such as ham salad, seafood salad, chicken salad, egg salad, pasta salad, potato salad, and macaroni salad, manufactured in accordance with 21 CFR 110, Current Good Manufacturing Practice in Manufacturing, Packing, or Holding Human Food.
  - (2) Hard cheeses containing not more than 39% moisture, as defined in 21 CFR 133, Cheeses and Related Cheese Products, such as cheddar, gruyere, parmesan, Reggiano, and Romano, reggiano, and romano,
  - (3) Semi-soft cheesecheeses containing more than 39% moisture, but nonot more than 50% moisture, as defined in 21 CFR 133 *cheeses and Related Cheese Products*, such as blue, edam, gorgonzola, gouda, and monterey jack.
  - (4) Cultured dairy products as defined in 21 CFR 131<sub>7</sub> Milk and Cream, such as yogurt, sour cream, and buttermilk<sub>r</sub>
  - (5) Preserved fish products including but not limited to, such as pickled herring, and dried or salted cod, and other acidified fish products as defined in 21 CFR 114, Acidified Food. Foods,
  - (6) Shelf stable, dry fermented sausages including but not limited to, such as pepperoni and Genoasalami that are not labeled "Keep Refrigerated" as specified in 9 CFR 317, Labeling, Marking Devices, and Containers, and which retain the original CASING on the product, and
  - (7) Shelf stable salt-cured products including but not limited to such as prosciutto and Parma (ham) that are not labeled "Keep Refrigerated" as specified in *9 CFR 317, Labeling, Marking Devices, and Container.*).

# 3-501.18 READY-TO-EAT, POTENTIALLY HAZARDOUS FOOD (

3-501.53-501.8 Ready-to-Eat, TCS<del>}, Food,</del> Disposition

FOOD

- (A) <u>A food</u> specified in Paragraph¶ 3-501.<u>17-7</u>(A) of this Chapter shallor (B) must be discarded if it:
  - (1) Exceeds <u>either</u> the temperature and time <u>combinations as</u> <u>combination</u> specified in <u>Section</u> 3-501.17-7(A) of this <u>Chapter</u>, <u>excluding any</u>), <u>except</u> time that the product remainsis frozen;
  - (2) Is in a container or package that does not bear a date or  $day_{\tau, \frac{p}{r}}$  or

(B)	Pofrigo	rated, ready-to-eat, TCS food prepared in a food establishment and dispensed through a vending
		e with an automatic shutoff control must be discarded if it exceeds a temperature and time
		ation as specified in <u>¶</u> 3-501. <del>19</del> –7(A). <sup>P</sup>
<b>3-501.6</b> 3 If time o		_Time as a Public Health Control
		as specified under ¶ (D) of this section, if time without temperature control is used as the means of
		nealth control for a working supply of PHF (TCS) food before cooking, or for ready-to-eat PHF (TCS) food
1	that is	peing sold, offered or displayed or held for sale, or service for immediate consumption:
	(1)	Written procedures, using time as a means of public health control, shall be must be prepared in
		advance, maintained in the food establishment, and made available to the Health Authority upon
		request <del>. These, and</del>
(	<del>(1)</del> (2)	Written procedures shall include: must specify: Pf
		(a) Methods of compliance with <u>Paragraphs Subparagraphs</u> (B) ()(1), (B) (2), and (B) ()-(3) or -
		Paragraphs (C <del>) {)(1}, (C) (2), (C) (3), (C) (4), and (C) ()-(</del> 5) of this section, <sup>Pf</sup> and
		(b) Methods of compliance with Paragraph§ 3-501.14 of this Chapter4 for food that is prepared,
		cooked, and refrigerated before time is used as a public health control. Pf
(B)	<u>If mear</u>	s of time without temperature control is used as the public health control- up to a maximum of four
	hours:	
		ather than time
1	Except	as specified in conjunction with temperature control up to a maximum of four hours, is used as ¶(B)(2), the means of public health control: food must
	(1)	The FOOD shall have an initial temperature of $41^{\circ}F \pm 2^{\circ} (5^{\circ}C)$ or belowless when removed from cold
	(-)	holding temperature control, or $135^{\circ}F^{\pm 2^{\circ}}(57^{\circ}C)$ or above greater when removed from hot holding
		temperature control <sub>7,</sub> <sup>p</sup>
1	(2)	The food may have an initial temperature of 21°C (70°F) or below if;
		(a) It is a ready-to-eat fruit or vegetable that upon cutting is rendered a TCS food as defined in
		<u>¶1-201.10(B), or</u>
		(b) It is a ready-to-eat hermetically sealed food that upon opening is rendered a TCS food a
		<u>defined in ¶1-201.10(B),</u>
		(c) The food shall betemperature does not exceed 21°C (70°F) within a maximum time period of
		<ul> <li><u>4 hours from the time it was rendered a TCS food; and</u></li> <li>(d) The food is marked, or otherwise identified, to indicate the time that is 4 hours past the point</li> </ul>
		in time when the food is rendered a TCS food as specified in sub¶¶'s (B)(2)(a) and (b) of this
		section.
	(2)(3)	The food must be marked or otherwise identified to indicate the time that is four (4) hours past the
	(-7 <u>197</u>	point in time when the food is removed from temperature control-; <sup>Pf</sup>
	(2)(4)	The food shallmust be cooked and served, or served at any temperature if ready-to-eat, or discarded,
'	(	within four (4) hours <del>from the time when the FOOD was removed</del> from the point in time when the
		food is removed from temperature control-; <sup>P</sup> and

Is appropriately marked with a date or day that exceeds a temperature and time combination as specified in Paragraph¶ 3-501. $\frac{177}{2}$ (A) of this Chapter.).<sup>P</sup>

(3)

hour limit- <u>, must be discarded. <sup>P</sup></u>
(C) If time only, rather than time in conjunction with without temperature control is used as the public health control up to a maximum of six hours, is used as the means of public health control:
(1) The food shallmust have an initial temperature of 41°F±2° (5°C) or below when removed from temperature control and the food temperature maymust not exceed 70°F±2° (21°C) within a maximum time period of six-hour maximum time period. hours, <sup>p</sup>
(2) The food shall <u>must</u> be monitored to ensure that the warmest portion of the food does not exceed 70°F±2°(21°C) during the six -hour period, unless an ambient air temperature is maintained that ensures that the food shalldoes not exceed 70°F±2°(21°C) during the six -hour holdholding period <sub>7</sub> , <sup>Pf</sup>
(3) The food shallmust be marked or otherwise identified to indicate: <u>Pf</u>
(a) The time when the food is removed from 41°F <u>±2° (5°C)</u> or below cold holding temperature control-, <u>P<sup>r</sup> and</u>
(b) The time that is six hours past the <u>point in</u> time when the food <u>wasis</u> removed from cold holding temperature control., <sup>pf</sup>
(4) The food shall <u>must</u> be:
(a) Discarded if the temperature of the food <del>at any time during the six-hour period</del> exceeds 70°F <u>±2°. (21°C), <sup>p</sup> or</u>
(b) Cooked and served, served <u>at any temperature</u> if ready-to-eat, or discarded within a maximum of six hours from the <u>point in</u> time when the food is removed from 41°F <u>±2°_(5°C)</u> or below cold holding temperature control-, <u>P and</u>
(5) The food in unmarked containers or packages, or marked with a time that exceeds the six hour limit, must be discarded. <sup>p</sup>
(D) A food establishment that serves a highly susceptible population shallmust not use time as a means- ofspecified under ¶¶ (A), (B) or (C) of this section as the public health control for raw eggs.
3-502     3-502 Specialized Processing Methods 3-502.11     WAIVER Requirements       3-502.1     Waiver Requirement
A food establishment shall <u>must</u> obtain a waiver from the Health Authority as specified in Chapter 4-101.13 of these Regulations prior to:§ 8-103.1 and under § 8-103.2 before: <sup>Pf</sup>
(A) Smoking food as a method of food preservation rather than as a method of flavor enhancement $\frac{p_f}{r_f}$
(B) Curing food <sub><math>\tau_{L}</math></sub> Pf
(C) Using food additives or adding components: <u>such as vinegar</u> : <sup>Pf</sup>
(1) As a method of food preservation rather than as a method of flavor enhancement, $\frac{p^{p}}{r}$ or
<ol> <li>As a method of food preservation rather than as a method of flavor enhancement<sub>7</sub>, <sup>pf</sup> or</li> <li>To render a food so that it is not <u>PHF (TCS), food</u>, <sup>pf</sup></li> </ol>

## Appendix D.

- (D) Packaging <u>TCS</u> food using a reduced oxygen packaging method, except <u>wherea waiver is not required when</u> the growth of and toxin formation by *Clostridium botulinum* and the growth of *Listeria monocytogenes* are controlled as specified in <u>Sectionunder</u> § 3-502.<u>12 of this Chapter-2</u>; <sup>pf</sup>
- (E) Operating a molluscan shellstock life-support system display tank used to store or display shellstock that are offered for human consumption,<sup>Pf</sup>
- (F) Custom processing animals that are for personal use as food and notare not sold, offered or displayed for sale, or service in a food establishment, P<sup>f</sup>
- (G) Preparing food by another method that is determined by the Health Authority to require a waiver, <sup>pf</sup> or
- (H) Sprouting of seeds or beans.<sup>Pf</sup>
- (B) Existing facilities currently utilizing any method as specified in A-I of this Section shall submit the required WAIVER, HACCP PLAN, all supporting information and pay applicable fees to the HEALTH AUTHORITY within two years of approval of these Regulations.

### 3-502.13-502.2 3-502.12 Reduced Oxygen Packaging Without a Waiver, Criteria

- (A) Except for a food establishment; that obtains a waiver as specified in Sectionunder § 3-502.11 of this Chapter1, a food establishment that packages PHF (TCS) food using a reduced oxygen packaging method shallmust control the growth and toxin formation of Clostridium botulinum and the growth of Listeria monocytogenes, by;. P
- (B) Except as specified under ¶ (F) of this section, a food establishment that packages PHF (TCS) food using a reduced oxygen packaging method shall havemust implement a HACCP plan that contains the information specified in Chapter under ¶¶ 8-201.4 101.14 (B) and Chapter 4 101.15 of these Regulations(D) and that:<sup>Pf</sup>

(1) Identifies the food to be packaged, Pf

The PACKAGED FOOD shall

- (2) Except as specified under ¶¶ (C)—(E) of this section, requires that the packaged food must be maintained at 41°F±2° (5°C) or below and shall-meet at least one of the following criteria: Pf
  - (a) Has an  $a_w$  of 0.91 or less, Pf
  - (b) Has a pH of 4.6 or below.less, <sup>Pf</sup>
  - (c) Is a meat or poultry product, cured at a food processing ESTABLISHMENTplant regulated by the USDA using substances specified in 9 CFR 424.21, Use of Food Ingredients and Sources of Radiation, and is received in an intact package., <sup>Pf</sup> or
  - (a) Is a food with a high level of competing organisms including but not limited tosuch as raw
     (d) MEAT or meat, raw poultry, or raw vegetables, Pf
- (3) Describes how the package shallmust be prominently and conspicuously labeled on the principal display panel in bold type, on a contrasting background, with instructions to: <sup>Pf</sup>
  - (a) Maintain the food at  $41^{\circ}F_{\pm 2^{\circ}}(5^{\circ}C)$  or below<sub>-, <sup>Pf</sup> and</sub>
  - (b) Discard the food if within <u>1430</u> calendar days of its packaging if it is not served for on-premisepremises consumption, or consumed if served or sold for off-premises consumption<sub>7</sub>.
- (4) Limits the refrigerated shelf life to no more than 1430 calendar days, from packaging to consumption, except the time the product is maintained frozen, or the original manufacturer's "sell -by" or "use by" date, whichever occurs first, p

# (4)(5) Includes operational procedures that:

	(a)	Prohibit <del>bare hand contact</del> <u>contacting ready-to-eat food</u> with FOOD- <u>bare hands as specified</u> under ¶ 3- 301.1(B), <sup>pf</sup>
	(b)	Identify a designated work area and the method by which: Pf
		(i) Physical barriers or methods of separation of raw FOOD <u>foods</u> and ready-to-eat
		(i) <u>foods</u> minimize cross-CONTAMINATION, contamination, <sup>Pf</sup> and
		(ii) Access to the processing equipment is limited to responsible trained personnel
		familiar with the potential hazards of the operation-, <sup>pf</sup> and
	<del>(b</del> )	Delineate cleaning and sanitization procedures for food-contact surfaces-
		scribes the training program that ensures that the individual responsible for the REDUCED
	OX OX	(YGEN PACKAGING operation understands the:
	<del>(a)</del>	Concepts required for safe operations.
	(c)	EQUIPMENT, Pr and facilities.
	(b)	Procedures as specified in Paragraph (A) (5) of this Section and Chapter 4-
	(७)	101.15 (D) of these Regulations.
<del>(B)</del>	Existing for	clitics currently utilizing any method as specified in Paragraph A of this Section shall submit the
(D)		ACCP PLAN, all supporting information, and pay applicable fees to the REGULATORY AUTHORITY
		vears of approval of these regulations.

monitoring devices.

502.13

Labeled with the product name and the date PACKAGED.

(2) The records to confirm that cooling and cold holding refrigeration time/temperature parameters are as required by the HACCP PLAN, and that these records are maintained and made available to the HEALTH AUTHORITY upon request and held for six months. (3) Written operational procedures as specified in Paragraph (B) (5) of this Section, and a training program as specified in Paragraph (B) (6) of this Section.

(B) A FOOD ESTABLISHMENT that packages cheese using a REDUCED OXYGEN PACKAGING method shall obtain a WAIVER if it:

Limits the cheeses PACKAGED to those that are commercially manufactured in a FOOD PROCESSING ESTABLISHMENTwith no ingredients added in the FOOD ESTABLISHMENT and that meet 21 CFR 133.15 Standards of Identity-Hard Cheeses, CFR 133.169 Standards of Identity Pasteurized Process Cheese, or CFR 133.187 Standards of Identity Semi Soft Cheeses.

Has a HACCP PLAN that contains the information specified in Chapter 4-101.15 (D) of these Regulations. (1) Identifies the FOOD to be PACKAGED.

Describes how the package shall be prominently and conspicuously labeled on the principal display panel in bold type, on a contrasting background, with instructions to:

(a) Maintain the FOOD at 41°F±2° or below

### Includes operational procedures that:

(d)

- (b) Prohibit-bare hand contact with FOOD.
- (c) Identify a designated work area and the method by which:
  - (i) Physical barriers or methods of separation of raw FOOD and READY-TO-EAT FOOD minimize CROSS-CONTAMINATION.
    - (ii) Access to the processing EQUIPMENT is limited to responsible trained PERSONnel familiar with the potential HAZARDs of the operation.
  - Delineate cleaning and SANITIZATION procedures for FOOD CONTACT SURFACEs.

(5)(6) Describes the training program that ensures that the individual responsible for the reduced oxygen packaging operation understands the <sup>Pf</sup>:

- (a) Concepts required for <u>a</u> safe <u>operations.operation</u>, <sup>Pf</sup>
- (b) Equipment and facilities-, <sup>Pf</sup> and

 Section
 section
 and Chapter ¶¶ 8-201.4 (C) and (E).
 Pf

- (7) Is provided to the Health Authority prior to implementation as specified under ¶ 8- 201.3(B).
- (C) Except for fish that is frozen before, during, and after packaging and bears a label indicating that it is to be kept frozen until time of use, a food establishment must not package fish using a reduced oxygen packaging method.<sup>p</sup>
- (D) Except as specified under ¶ (C) and ¶ (F) of this section, a food establishment that packages TCS food using a cook-chill or sous vide process must:
  - (1) Provide -101.15a HACCP plan that contains the information as specified under ¶¶ 8-201.4(C) and (D) to the Health Authority prior to implementation, <sup>pf</sup>
  - (2) Ensure the food is:
    - (a) Not distributed wholesale, Pf
    - (b) Cooked to heat all parts of the food to a temperature and for a time as specified under ¶¶ 3-401.1(A), (B), and (C), <sup>p</sup>
    - (a)(c) Protected from contamination before and after cooking as specified under Parts 3-3 and 3-4 of these regulations,<sup>p</sup>
    - (d)
       Placed in a package with an oxygen barrier and sealed before cooking, or placed in a package

       and sealed immediately after cooking and before reaching a temperature below 135°F (57°C)

       (e)
       Cooled to 41°F (5°C) in the sealed package or bag as specified under § 3-501.4 and: <sup>p</sup>

- (i) Cooled to 34°F (1°C) within 48 hours of reaching 41°F (5°C) and held at that temperature until consumed or discarded within 30 calendar days after the date of packaging, <sup>P</sup>
- (ii) Held at 41°F (5°C) or below for no more than seven calendar days, at which time the food must be consumed or discarded, <sup>p</sup> or
- (iii) Cooled to 34°F (1°C) within 48 hours of reaching 41°F (5°C) and then may be slacked back to 41°F (5°C) or below for no more than 7 days, at which time the food must be consumed or discarded. The total shelf-life of the food must not exceed 30 days from its date of packaging, <sup>P</sup> or
- (iv) Held frozen with no shelf-life restriction while frozen until consumed or used.<sup>P</sup>
- (f)
   Held in a refrigeration unit that is equipped with an electronic system that continuously

   monitors time and temperature and is visually examined for proper operation twice daily, <sup>pr</sup>

   (g)
   Monitored with verifiable time and food temperature electronic monitoring devices if
- transported off-site to a satellite location for retail sale by the same person, , <sup>Pf</sup> and
   Labeled with the product name and the date packaged, and
- (3) Maintain the records required to confirm that cooling and cold holding refrigeration time/temperature parameters are required as part of the HACCP plan and:
  - (a) <u>Make such records available to the Health Authority upon request</u>, <sup>pf</sup> and
  - (b) Hold such records for at least six months, <sup>Pf</sup> and
- (4)
   Implement written operational procedures as specified under Subparagraph (B)(5) of this section and a training program as specified under Subparagraph (B)(6) of this section. <sup>Pf</sup>
- (E) Except as specified under ¶ (F) of this section, a food establishment that packages cheese using a reduced oxygen packaging method must:
  - (1) Limit the cheeses packaged to those that are commercially manufactured in a food processing plant with no ingredients added in the food establishment and that meet the Standards of Identity as specified in 21 CFR 133.150 Hard Cheeses, 21 CFR 133.169 Pasteurized Process Cheese or 21 CFR 133.187 Semisoft Cheeses, <sup>p</sup>
  - (2) Have Labelsa HACCP plan that contains the information specified under ¶¶ 8-201.4(C) and (E) and as specified under ¶¶ (B)(1), (B)(3)(a), (B)(5) and (B)(6) of this section, <sup>pf</sup>
  - (2)(3) Label the package on the principal display panel with a <u>"use-by date that does not exceed 30 calendar</u> <u>days from its packaging or the original manufacturer's sell-by</u> or <u>"use-by</u>" date, whichever occurs first<sub>z</sub>, <u>pr</u> and
  - (3)(4) Discards the reduced oxygen packaged cheese if it is not sold for off-premises consumption or consumed within 30 calendar days of its packaging.<sup>Pf</sup>

A FOOD ESTABLISHMENT that packages FISH using

<u>A HACCP plan is not required when a food establishment uses</u> a reduced oxygen packaging method shall:<u>to</u>

Implement a HACCP PLAN that contains the information as specified in Chapter 4-101.14 of these Regulations. Provide written validation of the HACCP PLAN and process from a Processing Authority which utilizes the National Advisory Committee on Microbiological Criteria for Foods (NACMCF) protocols for inoculation studies for Clostridium botulinum and Listeria monocytogenes.

(D)(F) Ensure that FISH be maintained FROZEN until thawed and prepared for consumption. Before thawing, the package must be opened and shall be held at 41°F±2° or below for no more than 72 hours before consumption or product shall be discarded. TCS food that is always:

(1) Labeled with the production time and date,

(2) Held at 41°F (5°C) or below during refrigerated storage, and

(3) Removed Except that FISH that is frozen before, during and after REDUCED OXYGEN PACKAGING shallrequire submission of a HACCP PLAN for review and approval by the HEALTH AUTHORITY, but shall notrequire a WAIVER-from its package in the food establishment within 48 hours after packaging.

(B) FOOD that is MISBRANDED shall be discarded or removed from sale until properly labeled.

### Special Requirements for Highly Susceptible Populations t 01 Additional Safeguards 3-801 Additional Safeguards 3-801.11 PASTEURIZED FOOD

#### 3-8 Special Requirements for Highly Susceptible Populations

 Subpart

 3-801
 Pasteurized Foods, Prohibited Re-Service, and Prohibited Food

#### 3-801 Pasteurized Foods, Prohibited Re-Service, and Prohibited Food

In a food establishment that serves a highly susceptible population:

- (A) The following criteria shall apply to juice:
  - (1) For the purposes of this Paragraphparagraph (A) only, children who are age 9 or under, less and who-receive food in a school, day care settingdaycare, or similar facility that provides custodial care are defined included as highly susceptible populations.

#### PRE PACKAGED JUICE, or PRE PACKAGED

- (2) Prepackaged juice or a prepackaged beverage containing juice, that bears a warning label as specified in 21 CFR<sub>1</sub> 101.17(g) Food Labeling, Warning, Notice, and Safe Handling Statements, JUICEJuices that hashave not been specifically processed to prevent, reduce, or eliminate the presence of pathogens<sub>7</sub> must not be sold, offered or displayed for sale, or served, <sup>p</sup>
- (2)(3) Packaged juice or a packaged JUICE or beverage containing juice, that bears a warning label as specified in Paragraphunder ¶ 3-404.11 (B) of this Chapter shallmust not be served or sold, offered or displayed for sale<sub>7</sub>, or served, <sup>p</sup> and

<sup>(</sup>A) FOOD that has been returned by a CONSUMER shall be discarded unless it is in unopened, tamper-evident commercial wrapping or packaging.

 (3)(4)
 Unpackaged juice that is prepared on the premises, for service or sale in a ready-to- eat form, shall\_

 must be processed under a HACCP plan that contains the information specified in Chapter-under ¶¶ 8 

 201.4-101.15
 (B) and
 (D) of these Regulations, (C)—(E) and as specified in 21 CFR

 Part 120 Hazard Analysis and Critical Control Point Plan-(HACCP) Systems, including, without
 limitation, Subpart B Pathogen Reduction, and 21 CFR

# (B) Pasteurized eggs or egg products shallmust be substituted for raw eggs in the preparation of:<sup>P</sup>

#### FOOD including but not limited to

- (1) Foods such as Caesar salad, hollandaise or Béarnaise sauce, mayonnaise, meringue, eggnog, ice cream, and egg-fortified beverages, and
- (2) Except as specified in ¶ (F) of this section, recipes in which more than one egg is broken and the eggs are combined except as specified in Paragraph F of this Section, <sup>p</sup>
- (C) The following FOOD shall<u>foods must</u> not be served or sold, offered or displayed for sale, or served in a readyto-eat form: <sup>P</sup>
  - (1) Raw animal FOOD including but not limited to foods such as raw fish, raw\_marinated fish, raw molluscan SHELLSTOCKshellfish, and steak tartar.tartare, <sup>p</sup>
  - (2) A partially cooked animal food including but not limited to-such as lightly cooked fish, rare meat, softcooked eggs that are made from raw eggs, and meringue, <sup>p</sup> and
  - (3) Raw seed sprouts.<sup>P</sup>
- (D) <u>Food handlers must not contact ready-to-eat food as specified in Paragraph under ¶¶</u> 3-301.11 (A) of this-Chapter, FOOD HANDLERs shall not make bare hand contact with READY TO EAT FOOD.1(B) and (E).<sup>P</sup>
- (E) Time only, as the means of public health control; as specified in Paragraphunder ¶ 3-501.19 (C) (5) of this Chapter shall9(D), must not be used for raw eggs.<sup>P</sup>

#### Paragraph

- (F) <u>Subparagraph</u> (B)-()(2) of this section does not apply if:
  - (1) The raw eggs are combined immediately before cooking for one CONSUMERconsumer's serving at a single meal, cooked as specified in Paragraphunder Subparagraph 3-401.11 (A) (1) (f) of this-Chapter1(A)(1), and served immediately including but not limited to, such as an omelet, soufflé, or scrambled eggs<sub>74</sub>
  - (2) The raw eggs are combined as an ingredient immediately before baking, and the eggs are thoroughly cooked to a ready-to-eat form including but not limited to, such as a cake, muffin, or bread, or

(2)(3) The preparation of the food is conducted under a HACCP plan that:

- (a) IdentifiesIdentified the food to be prepared.
- (b) Prohibits contact of contacting ready-to-eat food with bare hands-
- (c) Includes specifications and practices that ensure:
  - (i) Salmonella Enteritidis growth is controlled before and after cooking, and
  - Salmonella Enteritidis is destroyed by cooking the eggs according to the temperature and time as specified in ParagraphSubparagraph 3-401.11 (A) (1) (e) of this-Chapter.1(A)(2),
- (d) Contains the information as specified in Chapter under ¶ 8-201.4-101.14 of these Regulations,(D) including procedures that:

- (i) Control cross-contamination of ready-to-eat food with raw eggs-, and
- (ii) Ensure properDelineate cleaning and sanitization procedures for food-contact surfaces, and
- (e) Describes how the FOOD HANDLER, training program that ensures that the food handler responsible for the preparation of the food is trained to ensure full understanding of understands the procedures to be used.
- (G) Except as specified in Paragraph<sup>¶</sup> (H) of this section, food may be re-served as specified in Paragraph<u>under</u> Subparagraph 3-306.14 of this Chapter.4(B)(1) and (2).

FOOD may

# (H) <u>Food must</u> not be re-served under the following conditions:

- (1) Any food served to patients or clients who are under contact precautions in medical isolation or quarantine, or protective environment isolation shallmust not be re-served to others outside.
- (2) Packages of food from any patients, clients, or other consumers shallshould not be re-served to persons in a-protective environment isolation.

202.2483, shall be submitted at the time of application along with a copy of the appropriate gaming or business license.

- (E) Other information that may be required by the HEALTH AUTHORITY for the proper review of the proposed construction, conversion, or modification, including procedures for operating a FOOD ESTABLISHMENT.
- (F) A statement signed by the applicant declaring exempt or non-exempt status of the facility as specified in the Nevada Clean Indoor Air Act, NRS 202.2483.

#### 4-101.13 WAIVER Modifications

The Health Authority may grant a waiver by modifying the requirements of these regulations, if in the opinion of the HEALTH AUTHORITY a health HAZARD or nuisance will not result from the WAIVER. During the WAIVER process, the HEALTH AUTHORITY may impose conditions upon the WAIVER. If a WAIVER is granted, the HEALTH AUTHORITY shall retain the information in its records for the FOOD ESTABLISHMENT. Failure to meet conditions of the WAIVER may result in immediate revocation of the WAIVER.

#### -101.14 When a HACCP PLAN is Required

- (A) Prior to implementing a HACCP PLAN required by the HEALTH AUTHORITY, a PERMIT applicant or PERMIT HOLDER shall pay applicable fees and submit to the HEALTH AUTHORITY for approval a properly prepared HACCP PLAN as specified in Section 4-101.15 of this Chapter and the relevant provisions of these Regulations if:
  - (1) Submission of a HACCP PLAN is required according to LAW.
  - (2) A WAIVER is required as specified in Chapter 3 502.11 of these Regulations.

- The HEALTH AUTHORITY determines that a FOOD preparation or processing method requires a WAIVER based on a plan submitted as specified in Section 4 101.13 of this Chapter, an inspectional finding, or a WAIVER request.
- A FOOD ESTABLISHMENT packages PHF (TCS) using a REDUCED OXYGEN PACKAGING method as specified  $(\mathbf{R})$ in Chapter 3-502.13 of these Regulations.

#### 4-101.15 Contents of HACCP PLAN

For a FOOD ESTABLISHMENT that is required to have a HACCP PLAN, as specified in Section 4 101.13 of this Chapter, the plan shall include:

A categorization of the types of PHF (TCS) that are specified in the menus including but not limited to soups, sauces, salads, and bulk solid FOOD including but not limited to MEAT roasts, or other FOOD that is specified by the-HEALTH AUTHORITY.

#### A flow diagram by specific FOOD, or FOOD category type, identifying CRITICAL CONTROL POINTs and (A)providing information on:

(1) Ingredients, materials, and EQUIPMENT used in the preparation of that FOOD or FOOD category. —Formulations or recipes which incorporate methods and procedural controls that address the FOOD (2)

#### safety concerns.

- The FOOD HANDLER and supervisory training plan that addresses the FOOD safety concerns. (B)

#### The standard operating procedures under the plan, which shall clearly identify:

- Each-CRITICAL CONTROL POINT. (1)
- The CRITICAL LIMITS for each CRITICAL CONTROL POINT. (2)
- (3) The method and frequency of monitoring and controlling each CRITICAL CONTROL POINT by the FOOD HANDLER designated by the PERSON IN CHARGE.
- (4)
- -The method and frequency for the PERSON IN CHARGE to routinely verify that the FOOD HANDLER is following standard operating procedures and monitoring CRITICAL CONTROL POINTs.
- Action to be taken by the PERSON IN CHARGE if the CRITICAL LIMITs for each CRITICAL CONTROL. (5)POINT is not met.

Records to be maintained by the PERSON IN CHARGE to demonstrate that the HACCP PLAN is properly adhered to,operated, and managed.

#### 4-102 **Construction Inspection and Approval**

#### 4-102.11 Pre-Operational Inspections

The HEALTH AUTHORITY shall conduct one or more pre-operational inspections to verify that the FOOD ESTABLISHMENT is constructed and equipped in accordance with the APPROVED plans and APPROVED modifications of those plans, and that established standard operating procedures as specified in Section 4-101.12 (E) of this Chapter are followed and are in compliance with these Regulations.

#### 4 103 UNCATEGORIZED FOOD ESTABLISHMENT

#### 4 103.11 Requirements

UNCATEGORIZED FOOD ESTABLISHMENTs may deviate from certain structural and/or operationalrequirements of these Regulations, upon approval of the HEALTH AUTHORITY if:

-The design, construction, and operation are within the limits of sound engineering and SANITIZATION (A)practices, and as long as there is no public health or safety HAZARD to employees or customers

- The deviation is necessary because of the limitations of the proposed unique design or business (1)plan.
- <del>ch design and operational deviations or special conditions are provided to the HEALTH</del> (2)AUTHORITY in writing, and the HEALTH AUTHORITY approves the plan.
- The operating PERMIT issued for an UNCATEGORIZED FOOD ESTABLISHMENT must denote that such PERMIT is constrained and limited to the APPROVED design and operational plans, and that any deviation may result in immediate suspension of the health PERMIT.
- The HEALTH AUTHORITY shall require such measures as it deems necessary to ensure the health and safety of the public including but not limited to, Standard Operating Procedures (SOPs), a HACCP PLAN, monitoring logs, WAIVERs, and/or VARIANCEs.

Modification of any existing restaurant into a stand-alone bar, tavern or saloon with a physically segregated (B)nt under the same roof or in the same building must be first APPROVED by the HEALTH AUTHORITY through the HEALTH AUTHORITY's plan review process. For this section, "physically segregated" means:

Smoking and nonsmoking areas must be separated by a complete partition or by solid doors which fit tightly, close automatically and remain closed except during use.

	(2) Separate entrances to the non smoking FOOD ESTABLISHMENT and areas where smoking is
	allowed, either from outside the establishments or accessible via a non smoking foyer or corridor.
Non sn	noking access to restrooms shared in common between non smoking FOOD ESTABLISHMENTs and areas where
	smoking is allowed.
	To-prevent smoke infiltration into the restaurant, the ventilation system for the stand-alone bar, tavern or-
	saloon must be independent from the restaurant ventilation system.
	(3) Food-sales within the stand alone bar is RESTRICTed to incidental FOOD service items such as
	<del>peanuts, popcorn, chips, pretzels or any other incidental FOOD items that are exempt from FOOD</del> licensing requirements pursuant to <i>Subsection 2 of NRS 446.870</i> .
	incensing requirements pursuant to subsection 2 of this trib.ord.
<del>ts</del>	<del>pment</del>
01 N	<b>Naterials, Design, and Construction for Approvals of Equipment for Sanitation 4-202</b>
<u> </u>	Equipment Design and Capacities for Functionality
	-203 Equipment Location and Installation
1	204 Equipment Maintenance, Repair, and/or Replacement
4- <del>20</del> 1.11	
	General Design and Construction of EQUIPMENT EQUIPMENT shall be designed and constructed to be durable and to maintain its characteristics under-
(11)	normal use conditions.
FOOD (	CONTACT SURFACEs of EQUIPMENT, except cooking oil storage tanks, distribution lines for cooking oils, or-
	BEVERAGE syrup lines or tubes shall be:
	Finished to have SMOOTH, EASILY CLEANABLE surfaces.
	Free of rough welds or joints, breaks, open seams, cracks, chips, inclusions, pits, and similar imperfections.
Free of	-"V" type threads, and sharp internal angles, corners, and crevices.
	(1) Accessible, without requiring disassembly by use of power tools or specialized hand tools, for-
	cleaning and inspection.
	<del>of materials that do</del> not allow the migration of <del>harmful<u>deleterious</u> substances or impart colors, odors, or tastes I<del>, and that are: and under normal use conditions must be: <sup>P</sup></del></del>
(A)	Safe-, <sup>P</sup>
	(a)
<u>(B)</u>	_Durable, corrosion-resistant, and nonabsorbent,
<del>(B)</del> (C)	<u>Sufficient</u> and of sufficientin weight and thickness to withstand repeated WARE WASHING warewashing,
(D)	<u>Finished to have a smooth, easily cleanable surface, and</u>
<del>(C)</del> (E)	_Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition.
<u>4-101.2</u>	2 <u>Cast Iron, Use Limitation</u>
<u>(A)</u>	Except as specified in ¶¶ (B) and (C) of this section, cast iron must not be used for utensils or food-contact
	surfaces of equipment.
<u>(B)</u>	<u>Cast iron may be used as a surface for cooking.</u>
<u>(C)</u>	Cast iron may be used as utensils for serving food if the utensils are used only as part of an uninterrupted process from cooking through service.
4-101.3	Lead, Use Limitation
<del>(B)</del> -	Ceramic, chinaNON FOOD CONTACT SURFACEs of EQUIPMENT and crystal utensils, including, without

limitation, hand painted ceramic or china that are exposed to splash, spillage, or other FOOD soiling, or that require frequent cleaning shall be constructed of a CORROSION-RESISTANT MATERIAL, and be SMOOTH and non absorbent.

(C) All NON FOOD-CONTACT SURFACEs of EQUIPMENT shall be used in contact with food must be lead-free of unnecessary ledges, projections and crevices, and be designed and constructed to allow easy cleaning and to facilitate maintenance.

#### 4-201.12 Standards for Sanitation

QUIPMENT used in a Clark County FOOD ESTABLISHMENT shall meet or exceed the standards for sanitation established by the AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI), the Baking Industry Sanitation Standards Committee (BISSC) and/or the National Sanitation Foundation International (NSF), including NSF/ANSI Install Standards except that standards for construction of EQUIPMENT required to be present in a FOOD ESTABLISHMENT may not apply to a child care facility with a limited menu as specified in NRS 446.941.

#### 4 201.13 Third Party Certifications for Sanitation

QUIPMENT that is<u>contain levels of lead</u> not factory certified as meeting ANSI or BISSC standards, but for which ANSI or BISSC Standards exist, must be examined at the expense of the FOOD ESTABLISHMENT by one of <u>exceeding the</u> limits in the following testing services before being APPROVED for use:

(A) National Sanitation Foundation (NSF), Ann Arbor, Michigan

(B) Underwriters Laboratory, Classified Inc. (UL/EPH) Classified), Northbrook, Illinois.

(C) Intertek Testing Services (ETL Sanitation), Cortland, New York.

(D) Other entities APPROVED by ANSI or BISSC.

4-201.14 EQUIPMENT in Categories Not Covered by Sanitation Standards

(A)	As per NAC 446.275 EQUIPMENT in-utensil categories not covered by ANSI or BISSC Sanitation Standards,
	including but not limited to some Tandori and pizza ovens, candy processing, commercial manufacturing,-
	BARBECUE, and MOBILE VENDOR EQUIPMENT shall:: <sup>P</sup>
Compl	wwith all general design and construction criteria as specified in Section 4, 201, 11 of this Chapter

Utensil Category	Ceramic Article Description	Maximum Lead mg/L
<u>Beverage Mugs, Cups,</u> <u>Pitchers</u>	Coffee Mugs	<u>0.5</u>
Large Hollowware (excluding pitchers)	<u>Bowls</u> <u>&gt; 1.1 Liter (1.16 Quart)</u>	<u>1</u>
Small Hollowware (excluding cups & mugs)	<u>Bowls</u> < 1.1 Liter (1.16 Quart)	<u>2.0</u>
Flat tableware	Plates, Saucers	<u>3.0</u>

(A) Be used only with written approval by the HEALTH AUTHORITY. Additional information may be requiredfor approval, which may include but not be limited to:

(1) Requirements for laboratory or field testing as a basis for approval.

(2) Specific use limitations based on identified RISK factors.

(3) Written proof of approval by a governmental agency, including but not limited to the FDA or USDA.

#### 4-201.15 Limited Uses of Materials Not Compliant with ANSI or BISSC Standards

EQUIPMENT with materials that do not comply with general ANSI or BISSC standards may be used in a FOOD-ESTABLISHMENT only for the following limited uses:

Cast Iron may be used in EQUIPMENT only:

As a surface for cooking, then serving and,

If-maintained clean and in a rust free condition.

(A) Lead may be present in a FOOD CONTACT SURFACE only in:

- (B) Pewter alloys containing less than lead in excess of 0.05% lead-must not be used as a food-contact surface.<sup>P</sup>
- (C) Solder and flux containing less than 0.2% lead.lead in excess of 0.2% must not be used as a food-contact surface.

#### 4-101.4 Copper, Use Limitation

- (B) Except as specified in ¶ (B) of this section, copper and copper alloys, including but not limited to such as brass:
- (A) Shall must not be used in contact with a food that has a pH below 6 such as vinegar, fruit juice, or wine, or for a fitting or tubing installed between a carbonator and a testable backflow prevention device or assembly.and a carbonator.<sup>P</sup>

(1) <u>Copper and copper alloys</u> May **not** be used as a FOOD CONTACT SURFACE for highly acidic FOODincluding but not limited to vinegar, fruit JUICE, or wine.

(B) may be used in contact with beer brewing ingredients <u>that have a pH below 6</u> in the pre-fermentation and fermentation steps of <u>a beer</u> brewing <u>beer in a brew puboperation such as a brewpub</u> or microbrewery.

4-101.5 Galvanized Metal, Use Limitation

(C) Galvanized metal:

Shall <u>must</u> not be used for EQUIPMENT FOOD-CONTACT SURFACEs involving-<u>utensils or food-contact surfaces of</u> equipment that are used in contact with highly acidic <u>food</u>.<sup>p</sup>

4-101.6 Sponges, Use Limitation

	Sponges_FOOD including but not limited to vinegar, fruit JUICE, or wine. tilation hood canopies shall <u>must</u> not be used in any new or re-modeled FOOD service areas.contact xisting hood systems, which includes the back flashes and filters, shall be replaced withsanitize food-contact surfaces.	
APPRO	ROVED, non galvanized materials when any of their components are:	
	(a) In-disrepair.	
	(b) Damaged or not protected by an intact zinc coating.	
	(c)     Corroded or rusted.       (d)     Illegally modified.	
4-101.		
(A)	Except as specified in ¶¶ (B)-(D) of this section, wood wicker shallmust not be used as a food-content of EQUIPMENT except that:.	ontact surface-
<u>(B)</u>	Sealed wood may be used for non-food contact surfaces that are not regularly exposed to moi	sture and have
	no wet-line penetrations. Examples include, but are not limited to, bar tops, dining tables, or o	cabinets in a
	customer interface area that are not used for open food storage or preparation.	
<del>(B)</del> (C)	C) Hard maple, or an equivalently hard, close-grained wood, maintained SMOOTH and easily clear used for:	<del>nable,</del> may be
	(1) Cutting boards; cutting blocks and bakers'; bakers' tables-; and utensils such as rolling	pins, doughnut
	dowels, salad bowls, and chopsticks, and	
	(e) Large spatulas for use at a bakery oven or pizza oven.	
	(2) Wooden paddles used in confectionery operations for pressure scraping kettles when preparing confections at a temperature of $230^{\circ}F \pm 2^{\circ}$ , (110 °C) or above.	manually
	Bamboo steamer baskets used for cooking shall be SMOOTH and easily cleanable-	
	(f) Whole, uncut, raw fruits and vegetables, and maintained clean. Single servi	<del>ce liners shall</del>
	be placed between the basket and FOOD.	
Traditi	itional ethnic UTENSILs including but not limited to sushi mixing bowls and tortilla presses, which a	re maintained
	and used as specified by manufacturer instructions. Round soft nuts in the shell may be kept in	<u>the</u> wood <del>or</del>
	coated wood cutting blocks are prohibited.	
<del>(C)</del> (D)	D) <u>Untreated wooden shipping containers in which whole, uncut raw fruits and vegetables, or nut</u>	
	they were received may be used for storage, until the FOOD is fruits, vegetables, or nuts are us	sed.
(D)(E)	E) If Wooden containers, either untreated or treated with an APPROVED wood preservative, may	bo used for
	storage the nature of whole, uncut raw FOOD, which the food requires removal of rinds, peels,	
	before consumption, the whole, uncut, raw food may be kept in:	
	(1) <u>Untreated wood containers, or</u>	
	(2) Treated wood containers if the containers are treated with a preservative that meets t	<u>he</u>
	requirements specified in 21 CFR 178.3800 Preservatives for wood.	
<u>4-101.</u>	01.8 Nonstick Coatings, Use Limitation	
Multiu	tiuse kitchenware such as frying pans, griddles, saucepans, cookie sheets, and waffle bakers that h	ave a
-	fluorocarbon resin coating must be used with non-scoring or non-scratching utensils and cleaning a	
<u>4-101.</u>		_

	act surfaces that are exposed to splash, spillage, or other food soiling or that require frequent cleaning ructed of a corrosion-resistant, nonabsorbent, and smooth material.
<u>4-102</u>	Single-Service and Single-Use Characteristics
Materials that	are used to make single-service and single-use articles:
(A) May n	<u>ot:</u>
<u>(1)</u>	Allow the migration of deleterious substances, <sup>P</sup> or
<u>(2)</u>	Impart colors, odors, or tastes to food, and
(B) Must b	De:
<u>(1)</u>	Safe, <sup>P</sup> and
<u>(2)</u>	<u>Clean.</u>

Glas

Standard 14.

#### (4) 4-201.16 welds and joints, <sup>Pf</sup> and

 Except as specified in ¶ (B) of this section, accessible for cleaning and inspection by one of the following methods:

(a) Without being disassembled, Pf

- (b) By disassembling without the use of tools, <sup>Pf</sup> or
- (c) By easy disassembling with the use of handheld tools commonly available to maintenance
  - and cleaning personnel such as screwdrivers, pliers, open-end wrenches, and Allen wrenches.
- (B) Subparagraph (A)(5) of this section does not apply to cooking oil storage tanks, distribution lines for cooking oils, or beverage syrup lines or tubes.

#### 4-202.14-202.2 CIP Equipment

- (A) CIP equipment shall<u>must</u> meet the characteristics specified in Sectionunder § 4-201.11 (B) of this Chapter,202.1 and shall<u>must</u> be designed and constructed so that:
  - Cleaning and sanitizing solutions circulate through, throughout a fixed system and contact all, fixed interior food-contact surfaces, <sup>pf</sup> and
  - (2) The system is self-draining, or capable of being completely drained of cleaning and sanitizing solutions, and

#### Units which cannot

(B) <u>CIP equipment that is not designed to</u> be disassembled for cleaning, must be designed with inspection access points are present to allow inspection to ensure that all interior food-contact surfaces are throughout the fixed system are being effectively cleaned.

4-201.17

4-202.3 V Threads, Use Limitation

Except for hot oil cooking or filtering equipment, V type threads must not be used on food- contact surfaces.

# 4-202.24-202.4 Hot Oil Filtering Equipment

Hot oil filtering equipment shall<u>must</u> meet the characteristics specified in Sectionunder § 4-201.11 of this Chapter202.1 or shall§ 4-202.2 and must be readily accessible for filter replacement and cleaning of the filter. This requirement does not apply to Section 4-

201.11 (B) (3), to Sections 4-201.12, and 4-201.13 of this Chapter. 4-202.34-202.5 4-201.18 Can Openers

Cutting or piercing parts of can openers shall<u>must</u> be readily removable or replaceable<u>for cleaning and for</u> replacement.

4 201.19 EQUIPMENT Compartments that are Subject to Moisture Accumulation

EQUIPMENT compartments that are subject to moisture accumulation due to conditions including but not limited to condensation, FOOD or BEVERAGE drip, or water from melting ice shall be sloped to an outlet that allows complete and continuous draining.

# EQUIPMENT Design and Capacities for-

4-202.6 Nonfood-Contact Surfaces

Nonfood-contact surfaces must be free of unnecessary ledges, projections, and crevices, and designed and constructed to allow easy cleaning and to facilitate maintenance.

4-201 Functionality
4-202.11 EQUIPMENT for Cooling, Heating, and/or Holding Temperature Controlled FOOD
(A) EQUIPMENT for cooling and heating FOOD, and/or holding cold and hot FOOD, shall be sufficient in number
and capacity to ensure FOOD temperatures as specified in Chapter 3 of these Regulations.
(B) Cold or hot holding EQUIPMENT used for PHF (TCS) shall be equipped with at least one integral or
permanently affixed TEMPERATURE MEASURING DEVICE located to allow easy viewing of its temperature
display. This Section does not apply to EQUIPMENT for which the placement of a TEMPERATURE
MEASURING DEVICE is not a practical means for measuring the ambient air surrounding the FOOD because
of the design, type, and use of the EQUIPMENT including but not limited to calrod units, heat lamps, cold
plates, bain maries, steam tables, insulated FOOD transport containers, and salad bars.
A TEMPERATURE MEASURING DEVICE in FOOD EQUIPMENT shall:
(1) Have its sensor located to measure the air temperature or a simulated product temperature in:
(a) The warmest part of a mechanically refrigerated unit.
(b) The coolest part of a hot FOOD storage unit.
4-202.7 Be accurate to ±2°F in the intended range Kick Plates, Removable
(2) of use for monitoring the temperature of FOOD.
(3) <u>Kick plates must</u> be designed to be easily readable.
4 202.12 Three Compartment Sinks
A three compartment sink shall be installed in an areaso that has been APPROVED by the HEALTH AUTHORITY in each
FOOD ESTABLISHMENT in which WARE WASHING and sanitizing of UTENSILs is required, and shall: the
Have an integral, self-draining drain board on each end.
Be-indirectly plumbed to a floor sink, and be supplied with hot and cold water tempered water by a mixing
valve, or a combination faucet.
Have sink compartments large enough to accommodate ½ immersion of the largest EQUIPMENT and UTENSILs that are-
not to be cleaned and sanitized by alternate, APPROVED methods including but not limited to high pressure detergent
sprayers, low or line pressure spray detergent foamers, other task specific cleaning EQUIPMENT, brushes, or other-
<del>implements.</del>
<del>To accommodate all soiled and cleaned items which may accumulate during hours of operation, drain boards,</del>
UTENSIL racks, or tables, in adequate size and number, shall be provided for UTENSIL holding before-
cleaning and after sanitizing.
(A) In areas that process or prepare raw FOOD of animal origin for consumption as READY TO EAT FOOD, a
separate three compartment sink shall be provided for the sole use of that operation.
(B) PERMITted satellite areas, including bars, operating in conjunction with a main WARE WASHING facility,
owned, leased, or managed by the same PERMITee, may operate without a three compartment sink
provided that a glass washer is provided at the bar, and in all cases, WARE WASHING procedures must be
APPROVED by the HEALTH AUTHORITY.
02.13 WARE WASHING Machines

<del>Data Pl</del> i	te Operating Specification: A WARE WASHING machine shall have an easily- <u>behind them are</u> accessible and readable data plate, affixed to the machine by the manufacturer, stating its design and operating
	and readable data plate, amixed to the machine by the manufacturer, stating its design and operating- specifications which include:
(1)	
(1)	Temperatures required for washing, rinsing, and sanitizing.
(2)	
	only a pumped sanitizing rinse.
	The conveyor speed for conveyor machines or the cycle time for stationary rack machines.
(4)	- A new manufacturer's data plate shall be installed reflecting any conversion if an APPROVED
	convertible WARE WASHING machine is converted from a high temperature sanitizing rinse to a
	chemical sanitizing rinse, or vice a versa.
	nal Baffles: WARE WASHING machines with wash and rinse tanks shall be equipped with baffles,
	ins, or other means to minimize CROSS-CONTAMINATION of the solutions in the wash and rinse tanks.
	MEASURING DEVICEs: A WARE WASHING machine shall be equipped with a TEMPERATURE
MEASU	RING DEVICE that indicates the temperature of the water with a numerical scale, printed record, or-
	eadout in increments no greater than ±2°F in the intended range of use:
(1)	In each wash and rinse tank.
(2)	— As the water enters the hot water sanitizing final rinse manifold or in the chemical sanitizing solution tank.
Automatic Disp	ensing of Detergents and Sanitizers: A WARE WASHING machine shall be designed and equipped to:for
	on and cleaning by
	ispense detergents and sanitizers.
	sual means to verify that detergents and sanitizers are delivered, or a visual or audible alarm to signal
	detergents and sanitizers are not being delivered during the respective washing and sanitizing.
	emovable by
	E-Regulation for Hot Water (high temperature) Sanitizing: A WARE WASHING machine that provides a
<del>r i cəəur</del>	fresh hot water sanitizing rinse shall:
Ro-equipped wi	the pressure gauge or a similar device, including but not limited to a transducer which measures and
displays the wa	
· · · · ·	er pressure. St greater than one pound per square inch (psi).of the methods specified under Subparagraph 4-
	capable of being rotated open, without unlocking equipment doors.
202.1(A)(3), 01	apable of being rotated open, without unlocking equipment doors.
With an accura	y of ±2 psi in the operational range of 15-25 psi as measured in the water line immediately downstream
	e fresh hot water sanitizing rinse control valve.
	If the pressure measuring device is located upstream of the fresh hot water sanitizing rinse control
(3)	
	valve, the device shall be mounted on a <sup>1</sup> / <sup>4</sup> / <sup>4</sup> iron pipe size (IPS) valve.
( )	ral drain boards: A WARE WASHING machine shall have integral self-draining, drain boards.
	ssory Draining EQUIPMENT: Drain boards, UTENSIL racks, or tables large enough to accommodate all
	d or cleaned items that may accumulate during hours of operation, shall be provided for necessary
	ISIL holding before cleaning, and after sanitizing.
	VARE WASHING Machine/Sink Combination Units
(A) Sinks WARE WASHIN	that are an integral part of a WARE WASHING machine unit shall be used for no other purpose than G
(B) Whe	a WARE WASHING machines and three-compartment sink units share an integral drain board,
proc	edures shall be in place to ensure that CONTAMINATION of clean UTENSILs does not occur.
	/entilation Hood <del>System</del>
(A) Adec	
	A ventilation hood shall be installed:
	(a) Over cooking EQUIPMENT that releases grease laden vapors.
Where	required by local building and safety authorities. Systems,
	tion of greasy residue on walls or ceiling indicates that grease laden vapor is not being properly-
remove	
	Ventilation hood systems and devices shall be sufficient in number and capacity to prevent grease
(2)	or condensation from accumulation on walls and/or ceilings.

 
 or condensation from accumulation on walls and/or ceilings.

 (3)
 Sunday brunches, temporary set-ups, table-side cooking, sampling, and demonstrations may be
 exempt, provided grease does not accumulate in the immediate area, as determined by the

HEALTH AUTHORITY.

(B) Drip Prevention: Exhaust ventilation hood systems in FOOD preparation or WARE WASHING areasincluding but not limited to hoods, fans, guards, and ducts shall be designed to prevent grease or condensation from draining or dripping onto FOOD HANDLERS, FOOD, EQUIPMENT, UTENSILS, LINEN, and/or-SINGLE-SERVICE ARTICLES and SINGLE-USE ARTICLES.

#### 4-202.44-202.8 Filters

+Filters or other grease extracting equipment shall<u>must</u> be designed to be readily removable for cleaning and replacement, <u>unless if not</u> designed to be cleaned in place the filter shall be made of the same metal as the hood system.

#### 4-202.16 Clothes Washers and Dryers

A mechanical clothes washer and dryer shall be provided and used if work clothes or LINEN are LAUNDERed onthe PREMISES. Their location in the facility shall be authorized by the HEALTH AUTHORITY.

#### 4-202.54-202.1\_4-202.17 EQUIPMENT Kick Plates, Removable

Kick plates shall be designed so that the areas behind them are accessible for inspection and cleaning by being: (A) Capable of being rotated open without unlocking EQUIPMENT or doors.

#### Removable:

- (1) Without disassembly or,
- (2) By disassembling without the use of tools or,

(3) By disassembling with the use of simple hand-held tools including but not limited to screwdrivers, pliers, open ended wrenches, or Allen wrenches.

#### 4-202.18 EQUIPMENT Openings, Closures, and Deflectors

- (A) A cover or lid for EQUIPMENT shall overlap the opening and be sloped to drain.
- (B) An opening located within the top of a unit of EQUIPMENT, which is designed for use with a cover or lid, shall have an upward flange of at least 2/10".
- (C) Fixed piping, TEMPERATURE MEASURING DEVICEs, rotary shafts, and other parts extending into
- (A) EQUIPMENT shall have a watertight joint at the point where the item enters the EQUIPMENT. If a watertight joint is not provided:
  - (1) The fixed piping, TEMPERATURE MEASURING DEVICEs, rotary shafts, and other parts extending through the openings shall be equipped with an apron designed to deflect condensation, drips, and dust from openings into FOOD.
  - (2) The opening shall have an upward flange of at least 2/10".

### 4-202.64-202.9 4-202.19 Shelving

(A) Shelves that are located in an area areas subject to moisture, including where food is prepared, or in-standing refrigerators and freezers, or where utensils are washed shallmust be made of metal, plastic, or plastic coated corrosion-resistant material, and be easily cleanable.

# All-Shelves located in walk-in-refrigerators or freezers used in direct support of FOOD preparation, including but not limited to kitchens and pantries shall:must

(1) Be-made of metal, plastic, or plastic coated CORROSION-RESISTANT MATERIAL, and EASILY CLEANABLE.

- (B) be maintained in a manner that does not restrict the circulation of air<sub>1</sub>
- (C) Shelves located in separate dry storage areas shallmust be made of corrosion-resistant material, and made of metal, plastic, plastic coated materials, or other durable easily cleanable materials, including wood products that have a smooth finish that is resistant to damage by spills of food, water, or alcoholother leaks.
- (D) Shelves constructed of pressure-treated wood products which are impregnated or otherwise treated with chemicals to inhibit rotting or insect infestation must not be used in a food establishment, and
- (E) Shelves may not be lined with cardboard, aluminum foil, contact paper or other non-durable material.

#### 4-203 Accuracy

4-203.1 Temperature Measuring Devices, Food

(A) Food temperature measuring devices that are scaled only in Celsius or dually scaled in Celsius and Fahrenheit
must be accurate to ±1°C in the intended range of use. <sup>Pf</sup>
(B) Food temperature measuring devices that are scaled only in Fahrenheit must be accurate to ±2°F in the intended range of use. <sup>Pf</sup>
4-203.2 Temperature Measuring Devices, Ambient Air and Water
(A) Ambient air and water temperature measuring devices that are scaled in Celsius or dually scaled in Celsius and Fahrenheit must be designed to be easily readable and accurate to ±1.5°C in the intended range of use. <sup>Pf</sup>
(B) Ambient air and water temperature measuring devices that are scaled only in Fahrenheit must be accurate to ±3°F in the intended range of use. <sup>Pf</sup>
4-203.3 Pressure Measuring Devices, Mechanical Warewashing Equipment
Pressure measuring devices that display the pressures in the water supply line for the fresh hot water sanitizing rinse must have increments of 1 pound per square inch (7 kilopascals) or smaller and must be accurate to ±2 pounds per square inch (±14 kilopascals) in the range indicated on the manufacturer's data plate.
4-204     Functionality       4-204.1     Ventilation Hood Systems, Drip Prevention
Exhaust ventilation hood systems in food preparation and warewashing areas including, without limitation, components such as hoods, fans, guards, and ducting must be designed to prevent grease or condensation from draining or dripping onto food, equipment, utensils, linens, and single-service and single-use articles.
4-204.2 Equipment Openings, Closures and Deflectors
(A) A cover or lid for equipment must overlap the opening and be sloped to drain.
(B) An opening located within the top of a unit of equipment that is designed for use with a cover or lid must be flanged upward at least two-tenths of an inch (5 millimeters).
(C) Except as specified under ¶ (D) of this section, fixed piping, temperature measuring devices, rotary shafts, and other parts extending into equipment must be provided with a watertight joint at the point where the item enters the equipment.
(D) If a watertight joint is not provided:
(1) The piping, temperature measuring devices, rotary shafts, and other parts extending through the openings must be equipped with an apron designed to deflect condensation, drips, and dust from openings into the food, and
(2) The opening must be flanged as specified under ¶ (B) of this section.
4-204.3 Dispensing Equipment, Protection of Equipment and Food
In equipment that dispenses or vends liquid food or ice in unpackaged form:

<u>(B)</u>	The de	livery tube, chute, and orifice must be protected from manual contact such as by being recessed,
(C)	Tho do	livery tube or chute and orifice of equipment used to vend liquid food or ice in unpackaged form to
<u>(C)</u>		ervice consumers must be designed so that the delivery tube or chute and orifice are protected from
		nsects, rodents, and other contamination by a self-closing door if the equipment is:
	<u>(1)</u>	Located in an outside area that does not otherwise afford the protection of an enclosure against the
		rain, windblown debris, insects, rodents, and other contaminants that are present in the
		<u>environment, or</u>
	(2)	Austichte fan eelf een dee duwien heuweurken is is nes under ster fuil sine euwem isien, ef e fan dien dien
	<u>(2)</u>	Available for self-service during hours when it is not under the full-time supervision of a food handler, and
(D)	The dis	spensing equipment actuating lever or mechanism and filling device of consumer self-service beverage
		sing equipment must be designed to prevent contact with the lip-contact surface of glasses or cups that
	<u>are ref</u>	filled.
<u>(E)</u>		ising equipment in which TCS food in a homogenous liquid form is maintained outside of the
	tempe	rature control requirements as specified under §3-501.6(A) must:
	(1)	Be specifically designed and equipped to maintain the commercial sterility of aseptically packaged
	1=1	food in a homogenous liquid form for a specified duration from the time of opening the packaging
		within the equipment, <sup>P</sup> and
	<u>(2)</u>	Conform to the requirements for this equipment as specified in NSF/ANSI 18 Manual Food and
		Beverage Dispensing Equipment. <sup>P</sup>
<u>4-204.</u>	4	Beverage Tubing, Separation
Except	for cold	I plates that are constructed integrally with an ice storage bin, beverage tubing and cold-plate beverage
		s must not be installed in contact with stored ice.
<u>4-204.</u>	5	Ice Units, Separation of Drains
Durted		
<u>Drain I</u>	ines mu	st not pass through an ice machine or ice storage bin.
4-204.	6	Condenser Unit, Separation
4 204.	•	
<u>If a cor</u>	ndenser	unit is an integral component of equipment, the condenser unit 4-must be separated from the food
and fo	od stora	ge space by a dustproof barrier.
<u>4-204.</u>	7	Molluscan Shellfish Tanks
(		and a standard of the standard standard and the standard standard standard standard standard standard standard
<u>(A)</u>		: as specified under ¶ (B) of this section, molluscan shellfish life support system display tanks must not d to store or display shellfish that are offered for human consumption and must be conspicuously
	-	d so that it is obvious to the consumer that the shellfish are for display only. <sup>P</sup>
	marke	
(B)	Mollus	scan shellfish life-support system display tanks that are used to store or display shellfish that are offered
	<u>for hu</u>	man consumption must be operated and maintained in accordance with a waiver granted by the Health
	<u>Author</u>	rity as specified in § 8-103.1 and a HACCP plan that <sup>Pf</sup> :
	(4)	
	<u>(1)</u>	Is submitted by the permit holder and approved as specified under § 8-103.2, <sup>Pf</sup> and
	(2)	Ensures that:
	141	
		133

- (a) Water used with fish other than molluscan shellfish does not flow into the molluscan tank, <sup>pf</sup>
   (b) The safety and quality of the shellfish as they were received are not compromised by the use of the tank <sup>pf</sup>, and
- (c) The identity of the source of the shellstock is retained as specified under § 3- 202.9. Pf

#### 4-204.8 Temperature Measuring Devices

- (A) In a mechanically refrigerated or hot food storage unit, the sensor of a temperature measuring device must be located to measure the air temperature or a simulated product temperature in the warmest part of a mechanically refrigerated unit and in the coolest part of a hot food storage unit.
- (B) Except as specified in ¶ (C) of this section, cold or hot holding equipment used for TCS food must be designed to include and must be equipped with at least one integral or permanently affixed temperature measuring device that is located to allow easy viewing of the device's temperature display.
- (C) Paragraph (B) of this section does not apply to equipment for which the placement of a temperature measuring device is not a practical means for measuring the ambient air surrounding the food because of the design, type, and use of the equipment, such as calrod units, heat lamps, cold plates, bainmaries, steam tables, insulated food transport containers, and salad bars.
- (D) Temperature measuring devices must be designed to be easily readable.
- (E)
   Food temperature measuring devices and water temperature measuring devices on warewashing machines

   must have a numerical scale, printed record, or digital readout in increments no greater than 2°F or 1°C in the intended range of use.
   Pf

#### 4-204.9 Warewashing Machine, Data Plate Operating Specifications

<u>A warewashing machine must be provided with an easily accessible and readable data plate affixed to the machine by</u> the manufacturer that indicates the machine's design and operation specifications including the:

- (A) Temperatures required for washing, rinsing, and sanitizing,
- (B) Pressure required for the freshwater sanitizing rinse unless the machine is designed to use only a pumped sanitizing rinse, and

(C) Conveyor speed for conveyor machines or cycle time for stationary rack machines.

#### 4-204.10 Warewashing Machines, Internal Baffles

Warewashing machine wash and rinse tanks must be equipped with baffles, curtains, or other means to minimize internal cross-contamination of the solutions in wash and rinse tanks.

#### 4-204.11 Warewashing Machines, Temperature Measuring Devices

A warewashing machine must be equipped with a temperature measuring device that indicates the temperature of the water:

(A) In each wash and rinse tank, <sup>Pf</sup> and

(B) As the water enters the hot water sanitizing final rinse manifold or in the chemical sanitizing solution tank.<sup>Pf</sup>

4-204.12 Manual Warewashing Equipment, Heaters and Baskets
If hot water is used for sanitization in manual warewashing operations, the sanitizing compartment of the sink must be:
(A) Designed with an integral heating device that is capable of maintaining water at a temperature not less than <u>171°F (77.2°C)</u> , <sup>Pf</sup> and
(B) Provided with a rack or basket to allow complete immersion of equipment and utensils into the hot water. <sup>Pf</sup>
4-204.13 Warewashing Machines, Automatic Dispensing of Detergents and Sanitizers
A warewashing machine that is installed after adoption of these regulations by the Health Authority, must be equipped to:
(A) <u>Automatically dispense detergents and sanitizers</u> , <sup>Pf</sup> and
(B) Incorporate a visual means to verify that detergents and sanitizers are delivered or a visual or audible alarm to signal if the detergents and sanitizers are not delivered to the respective washing and sanitizing cycles. <sup>Pf</sup>
4-204.14 Warewashing Machines, Flow Pressure Device
(A) Warewashing machines that provide a fresh hot water sanitizing rinse must be equipped with a pressure gauge or similar device such as a transducer that measures and displays the water pressure in the supply line immediately before entering the warewashing machine, and
(B) If the flow pressure measuring device is upstream of the fresh hot water sanitizing rinse control valve, the device must be mounted in a one-fourth inch (6.4 millimeter) Iron Pipe Size (IPS) valve.
(C) Paragraphs (A) and (B) of this section do not apply to a machine that uses only a pumped or recirculated sanitizing rinse.
4-204.15 Warewashing Sinks and Drainboards, Self-Draining
Sinks and drainboards of warewashing sinks and machines must be self-draining.
4-204.16 Equipment Compartments, Drainage
(A) Equipment and equipment compartments that are subject to accumulation of moisture due to conditions such as condensation, food or beverage drip, or water from melting ice must be sloped to an outlet that allows complete draining.
4-204.17 Vending Machine, Vending Stage Closure
The dispensing compartment of a vending machine including a machine that is designed to vend prepackaged snack food that is not TCS food such as chips, party mixes, and pretzels must be equipped with a self-closing door or cover if the machine is:
(A) Located in an outside area that does not otherwise afford the protection of an enclosure against the rain, windblown debris, insects, rodents, and other contaminants that are present in the environment, or
(B) Available for self-service during hours when it is not under the full-time supervision of a food handler.
4-204.18 Vending Machines, Automatic Shutoff

<u>(A)</u>	A machine	vending TCS food must have an automatic control that prevents the machine from vending food:
		there is a power failure, mechanical failure, or other condition that results in an internal machine mperature that cannot maintain food temperatures as specified under Chapter 3, <sup>P</sup> and
		a condition specified under Subparagraph (A)(1) of this section occurs, until the machine is serviced d restocked with food that has been maintained at temperatures specified under Chapter 3. $^{P}$
<u>(B)</u>	When the	automatic shutoff within a machine vending TCS food is activated:
		a refrigerated vending machine, the ambient air temperature must not exceed 41°F (5°C) for more an 30 minutes immediately after the machine is filled, serviced, or restocked, <sup>P</sup> or
		a hot holding vending machine, the ambient air temperature must not be less than 135°F (57°C) for one than 120 minutes immediately after the machine is filled, serviced, or restocked. <sup>P</sup>
<u>4-204.</u>	19 Ve	nding Machines, Liquid Waste Products
<u>(A)</u>		achines designed to store beverages that are packaged in containers made from paper products quipped with diversion devices and retention pans or drains for container leakage.
<u>(B)</u>	Vending m	achines that dispense liquid food in bulk must be:
		ovided with an internally mounted waste receptacle for the collection of drip, spillage, overflow, or her internal wastes, and
		uipped with an automatic shutoff device that will place the machine out of operation before the aste receptacle overflows.
<u>(C)</u>	<u>continuou</u>	vices specified under Subparagraph (B)(2) of this section must prevent water or liquid food from sly running if there is a failure of a flow control device in the water or liquid food system or waste ion that could lead to overflow of the waste receptacle.
<u>4-204.</u>	20 Ve	ending Machine Doors and Openings
<u>(A)</u>	so that the	achine doors and access opening covers to food and container storage spaces must be tight fitting e space along the entire interface between the doors or covers and the cabinet of the machine, if or covers are in a closed position, is no greater than one-sixteenth inch (1.5 millimeters) by:
	tha	ing covered with louvers, screens, or materials that provide an equivalent opening of not greater an one-sixteenth inch or 1.5 millimeters. Screening of 12 or more mesh to 1 inch (12 mesh to 2.5 ntimeters) meets this requirement,
	(2) <u>Be</u>	ing effectively gasketed,
	<mark>(3)</mark> Ha	ving 20 interface surfaces that are at least one-half inch or 13 millimeters wide, or
	<u>(4)</u> Jar	mbs or surfaces used to form an L-shaped entry path to the interface.
<u>(B)</u>		achine service connection openings through an exterior wall of a machine must be closed by lamps, or grommets so that the openings are no larger than one-sixteenth inch or 1.5 millimeters.
<u>4-204.</u>	<u>21 Ca</u>	n Openers on Vending Machines

rodents, and other contamination.
4-204.14-204.22 Bearings and Gear Boxes, Leakproof
Equipment containing bearings and gears that require lubricants shall <u>must</u> be designed and constructed so that the lubricant cannot leak, drip, or be forced into food or onto food-CONTACT-contact surfaces.
4-204.23 Case Lot Handling Apparatuses, Movability
Apparatuses such as dollies, pallets, racks, and skids used to store and transport large quantities of packaged foods received from a supplier in a cased or overwrapped lot, must be designed to be moved by hand or by conveniently available apparatuses such as hand trucks and forklifts.
4-205 Acceptability of Food Equipment, Certification and Classification
(A) Food equipment must meet the standard for sanitation set by an American National Standards Institute accredited certification program. Upon request of the Health Authority, the PIC must provide verification that the equipment meets the sanitation standard in the form of:
(1) Documentation of a sanitation certification marking from an ANSI accredited certification program.
(2) A field evaluation of the equipment by an ANSI accredited certification program with correction of deficiencies, or
(3) Other evidence that the equipment has been approved for use by a regulatory authority such as the USDA or FDA and is in compliance with Subparts 4-201 and 4-202 of these regulations.
(B) Specialized food equipment such as barbecue grills or smokers, brick ovens, and processing equipment that does not have documentation of sanitation certification will be evaluated by the Health Authority to determine whether a field evaluation is required to verify compliance with Subparts 4-201 and 4-202.
4-3 Numbers and Capacities
Subparts         4-301       Equipment         4-302       Utensils, Temperature Measuring Devices, and Testing Devices         4-303       Availability of Cleaning Agents and Sanitizers
4-301     Equipment       4-301.1     Cooling, Heating, and Holding Capacities
Equipment for cooling, heating, and holding cold and hot food, must be sufficient in number and capacity to provide food temperatures as specified under Chapter 3. <sup>Pf</sup>
4-301.2 Manual Warewashing, Sink Compartment Requirements
(A) Except as specified in ¶¶ (C) and (D) of this section, a sink with at least three-compartments and an integral self-draining drainboard on each end, must be provided in each food establishment in which warewashing and sanitizing equipment and utensils is required. <sup>Pf</sup>

Cutting or piercing parts of can openers on vending machines must be protected from manual contact, dust, insects,

- (B) Sink compartments must be large enough to accommodate immersion of the largest equipment and utensils. If equipment or utensils are too large for the warewashing sink, a warewashing machine or alternative equipment as specified in ¶ (C) of this section must be used. <sup>Pf</sup>
- (C) Alternative manual warewashing equipment may be used when there are special cleaning needs or constraints and its use is approved. Alternative manual warewashing equipment may include:
  - (1) High-pressure detergent sprayers,
  - (2) Low- or line-pressure spray detergent foamers,
  - (3) Other task-specific cleaning equipment,
  - (4) Brushes or other implements,
- (D) Satellite areas operated by the same person within a food establishment may operate without a threecompartment sink if there is a three-compartment sink available for use within 600 feet of the satellite area and the satellite area:

#### (1) Has a warewashing machine,

(2) Is a low-risk food establishment and uses disposable service wares, or

(3) Is a low-risk food establishment and no soiled service wares are returned to the satellite area after consumer use.

#### 4-301.3 Drainboards

Drainboards, utensil racks, or tables large enough to accommodate all soiled and cleaned items that may accumulate during hours of operation must be provided for necessary utensil holding before cleaning and after sanitizing. Drainboards, utensil racks, and tables must be designed to prevent the accumulation of standing water.

#### 4-301.4 Ventilation Hood Systems, Adequacy

Ventilation hood systems and devices must be sufficient in number and capacity to prevent grease or condensation from collecting on walls and ceilings.

### 4-301.5 Clothes Washers and Dryers

 (A)
 Except as specified in ¶ (B) of this section, if work clothes or linens are laundered on the premises, a

 mechanical clothes washer and dryer must be provided and used.

### 4-202.21 BEVERAGE Tubing

BEVERAGE tubing and BEVERAGE cooling devices, including but not limited to cold plates, and cooling coils shall not be installed in contact with ice used for human consumption, except for cold plates that are constructed integrally with an ice storage bin.

4 202.22 Ice Unit Drains

Liquid waste drain lines shall not pass through an ice machine or ice storage bin.

- (B)
   4-202.23
   Condenser Units in FOOD Storage EQUIPMENT
   on-premises laundering is limited to wiping

   cloths intended to be used moist, or wiping cloths are air-dried as specified under § 4-901.2, a mechanical clothes washer and dryer need not be provided.
   clothes washer and dryer need not be provided.
- 4-302
   Utensils, Temperature Measuring Devices, and Testing Devices

   4-302.1
   Utensils, Consumer Self-Service

<u>A food dispensing utensil must be available for each container displayed at a consumer self- service unit such as a buffet or salad bar.<sup>Pf</sup></u>

4-302.2 Food Temperature Measuring Devices

Food temperature measuring devices must be provided and readily accessible for use in ensuring attainment and maintenance of food temperatures as specified under

If a condenser unit is an integral component of equipment, the condenser unit-shall be separated from any FOOD, and FOOD storage space, by a dust proof barrier.

MOLLUSCAN SHELLSTOCK/Crustacean/Finfish Life Support System Tanks
 Life support system tanks that are used:

(A) Only to display aquatic life, which is not offered for human consumption, shall be conspicuously marked so	
that it is obvious to the CONSUMER that the aquatic life is for display only. (B) To store SHELLSTOCK/Crustacean/Finfish that is offered for human consumption, shall meet the	
requirements as specified in Chapter 9-201.12 of these Regulations, and be operated and maintained to	
ensure that:	
Water from finfish tanks shall not be COMMINGLEd between any molluscan shellfish tanks.	
(A) <u>The identity of the source of the SHELLSTOCK is retained as specified in</u> Chapter 3. <sup>Pf</sup>	
(B) A food temperature measuring device with a suitable small-diameter probe that is designed to measure the	
temperature of thin masses must be provided and readily accessible to accurately measure the temperature	
in thin foods such as meat patties and fish filets. <sup>Pf</sup>	
4-302.3 Temperature Measuring Devices, Manual and Mechanical Warewashing	
(A) In manual warewashing operations, a temperature measuring device must be provided and readily accessible	
for frequently measuring the washing and sanitizing temperatures. <sup>Pf</sup>	
to negocity neoduling the washing and samating emperatures.	
(B) In -203.11 of hot water mechanical warewashing operations, an irreversible registering temperature indicator	
must be provided and readily accessible for measuring the utensil surface temperature. Pf	
4-302.4 Sanitizing Solutions, Testing Devices	
A test kit or other device that accurately measures the concentration in mg/L (ppm) of sanitizing solutions must be	
provided. <sup>pf</sup>	
4-303 Availability of Cleaning Agents and Sanitizers	
(A) Cleaning agents that are used to clean equipment and utensils as specified under Part 4-6 of these	
regulations, must be provided and available for use during all hours of operation. <sup>Pf</sup>	
(1) Filtration and disinfection systems or programs shall be APPROVED by the HEALTH AUTHORITY	
and followed to maintain the safety and quality of the SHELLSTOCK.	
EQUIPMENT	
(B) Except for those that are generated on-site at the time of use, chemical sanitizers that are used to sanitize	
equipment and utensils as specified under Part 4-7 of these regulations, must be provided and available for	
use during all hours of operation. <sup>Pf</sup>	
4.4 Leastien and Installation	
4-4 Location and Installation	
Subparts	
4-401 Location of Equipment, Clothes Washers and Dryers, and Storage Cabinets, Contamination	
Prevention	
4-402 Installation	
4-401 Location of Equipment, Clothes Washers and Dryers, and Installation 4-203.11 Storage	
4-401 Location of Equipment, Clothes washers and Dryers, and Installation 4-203-11-Storage	
EQUIPMENT	
(A) Except as specified in ¶ (B) of this section, equipment, a cabinet used for the storage of food, or a cabinet that	
is used to store cleaned and sanitized equipment, utensils, laundered LINEN, and linens, and single-service and	
single-use articles must not be located:	
GLE-SERVICE ARTICLES and SINGLE-USE ARTICLES may not be stored:	

(1) In locker rooms<sub>7</sub>

	(2)	In <del>toilet rooms.</del> restrooms,
	(3)	In garbage rooms <sub>72</sub>
	(4)	In mechanical rooms-,
	(5)	Under sewer lines that are not shielded to intercept potential drips ${\bf r}_{{\bf z}}$
	(6)	Under leaking water lines, including leaking automatic fire sprinkler heads, or under lines whereon which water has condensed.
	<u>(7)</u>	_Under open stairwells- <del>containing steps which are not fully enclosed with backs and sides to prevent</del> debris from falling onto the items stored below the open stairwell. <u>, or</u>
	<del>(7)</del> (8)	_Under other sources of contamination.
<u>(B)</u>	A stor	age cabinet used for linens or single-service or single-use articles may be stored in a locker room.
<u>(C)</u>	protec	echanical clothes washer or dryer is provided, it must be located so that the washer or dryer is ted from contamination and only where there is no exposed food; clean equipment, utensils, and and unwrapped single-service and single-use articles.
<u>4-402</u>	1	– Fixed Equipment, Spacing or Sealing

Automated dispensing systems shall be located and maintained to prevent CONTAMINATION of clean items from leaks, dripsfoods, or spills of cleaning agentslaundering wiping cloths; and drainboards or other dispensed chemicals.equipment used to substitute for drainboards as specified under § 4-301.3 must be cleaned:

#### (A) Before use,

Throughout the day at a frequency necessary to prevent 4-204.12 Three Compartment Sinks for WARE WASHING (A) Monitoring water temperature and sanitizer concentration:

- (1) A TEMPERATURE MEASURING DEVICE shall be provided and readily accessible for frequently measuring the temperature of water used for washing and sanitizing.
- (2) Sanitizer test strips, a test kit, or other device that accurately measures the concentration in ppm of chemical sanitizers, shall be provided and readily accessible for frequently measuring the concentration of chemical sanitizing solutions.
- (B) Wash solution temperature: The temperature of the wash solution in manual WARE WASHING EQUIPMENT shall be maintained at not less than 110°F±2°, or at a temperature as specified by the manufacturer of the cleaning agent.
- (C) Hot water SANITIZATION temperature: If immersion in hot water is used for sanitizing in a manual operation, the temperature of the water shall be maintained at 171°F±2° or above.
- (B) Use of a three compartment sink for cleaning and sanitizing: Cleaning and sanitizing of EQUIPMENT and UTENSILs, by means of recontamination of equipment and utensils and to ensure that the equipment performs its intended function, and
- (C) If used, at least every 24 hours.
  - (D) WarewashingA three-compartment sink, shall be accomplished by following the procedures listed in Section 4-404 of this Chapter for pre cleaning, washing, rinsing, sanitizing, and air drying. 4-204.13 Hand Held, Wand Type, High Pressure Cleaning and Sanitizing Devices

For high pressure systems with wand type, hand held spraying devices used for the in place cleaning and hightemperature sanitizing of EQUIPMENT, including but not limited to MEAT saws, the temperature of the fresh hot water sanitizing rinse, as it enters the manifold, shall be at least 180°F±2°.

- 4-501.24-501.5 4-204.14 WARE WASHING Machines, Manufacturers' Operating Instructions
  - (A) Operation according to manufacturer's instructions and data plate:
- (A) A WARE WASHINGwarewashing machine; and its auxiliary components, shall must be operated in accordance with the machine's machine's data plate and other manufacturer'smanufacturer's instructions, including, butnot limited as follows:
- (B) A WARE WASHING machine's warewashing machine's conveyor speed or automatic cycle times shallmust be maintained accurately timed in accordance with the manufacture's manufacture's specifications.
- A WARE WASHING machine shall be repaired using factory authorized parts. All repairs shall restore the machine's operation to its original design, according to manufacturer's specifications. Factory authorized convertiblemachines shall be converted by factory authorized technicians, using the manufacturer's recommendedprocedures and parts.
- 4-501.6 Warewashing Sinks, Use Limitation
- (A) A warewashing sink must not be used for handwashing as specified under § 2-301.4.
- (B) If a warewashing sink is used to wash wiping cloths, wash farm products, or thaw food, the sink must be cleaned as specified under § 4-501.4 before and after each time it is used to wash wiping cloths or wash farm products or thaw food. Sinks used for food preparation must be sanitized as specified under Part 4-7 of these regulations before and after using the sink to prepare food.

Warewashing Equipment,

If an APPROVED chemical sanitizing machine is converted to an APPROVED high temperature sanitizing machine, adequate ventilation shall be provided to facilitate removal of steam and condensation.

- (a) If an APPROVED high temperature sanitizing machine is converted to a chemical sanitizing machine, factory authorized pumps shall be installed to deliver the adequate amount of sanitizer.
- (b) Adequate orifice size and construction material of spray nozzles shall be verified on every conversion or repair.
- (c) The wash solution shall be maintained at the temperatures required in this section and free of excessive build up of debris.
- (d) The sanitizer solutions shall be maintained clean and at required temperatures.

(B) Drain boards and draining EQUIPMENT:

A WARE WASHING machine and its drain boards, or other EQUIPMENT used to supplement integral drainboards, shall be cleaned:

#### Before use.

(1) Throughout the day at a frequency necessary to prevent re CONTAMINATION of EQUIPMENT and UTENSILs, and to ensure that the EQUIPMENT performs its intended function.

(C) Wash solution temperature:

(1) The temperature of the wash solution for spray-type ware washers, that use hot water tosanitize, shall not be less than:

(a) 165°F±2° for a stationary rack, single temperature machine.

- (b) 150°F±2° for a stationary rack dual temperature machine.
- (c) 160°F±2° for a single tank, conveyor dual temperature machine.
- (d) 150°F±2° for a multi tank, conveyor multi temperature machine.
- (2) The temperature of the wash solution in spray type ware washers that use chemicals to sanitizemay not be less than 120°F±2°.

#### 4-501.34-501.7 Cleaning Agents:

When used for WARE WASHING, thewarewashing, the wash compartment of a sink, mechanical ware washershallwarewasher, or wash receptacle of alternative manual warewashing equipment as specified in ¶ 4-301.2(C), must contain a wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent according to the cleaning agent manufacturer'smanufacturer's label instructions.<sup>Pf</sup>

(D) Hot water SANITIZATION temperature and pressure:

#### 4-501.8 Warewashing Equipment, Clean Solutions

The wash, rinse, and sanitize solutions must be maintained clean.

4-501.9 Manual Warewashing Equipment, Wash Solution Temperature

The temperature of the <u>wash solution in manual warewashing equipment must be maintained at not less than 110°F</u> (43°C) or the temperature specified on the cleaning agent manufacturer's label instructions. <sup>Pf</sup>

## 4-501.10 Mechanical Warewashing Equipment, Wash Solution Temperature

- (A) The temperature of the wash solution in spray type warewashers that use hot water to sanitize must not be less than:
  - (1) For a stationary rack, single temperature machine, 165°F (74°C), Pf
  - (2) For a stationary rack, dual temperature machine, 150°F (66°C), Pf
  - (3) For a single tank, conveyor, dual temperature machine, 160°F (71°C), <sup>Pf</sup> or
  - (4) For a multitank, conveyor, multitemperature machine, 150°F (66°C). <sup>Pf</sup>
- (B) The temperature of the wash solution in spray-type warewashers that use chemicals to sanitize must not be less than 120°F (49°C) unless otherwise specified by the equipment manufacturer. <sup>Pf</sup>

### 4-501.11 Manual Warewashing Equipment, Hot Water Sanitization Temperatures

If immersion in hot water is used for fresh hot water sanitizing rinse, in a manual operation, the temperature of the water must be maintained at 171°F (77°C) or above.<sup>P</sup>

### 4-501.12 Mechanical Warewashing Equipment, Hot Water Sanitization Temperatures

- (A) Except as specified in ¶ (B) of this section, in a mechanical operation, the temperature of the fresh hot water sanitizing rinse as it enters the manifold of a WARE WASHING machine, shallmust not be more than 194°F±2°, (90°C), or less than:<sup>ef</sup>
  - (1) 165°F±2° For a stationary rack, single temperature machine., 165°F (74°C), <sup>pf</sup> or
  - (2) 180°F±2° For all other machines. 180°F (82°C). <sup>Pf</sup>

	Utensils and Devices for Measuring or-
	Standards for Sanitation, and General Design and Construction
	Criteria Use of Utensils, Temperature Measuring Devices,
4-301	Standards for Sanitation, and General Design and Construction Criteria
1-301.11	General Design and Construction of UTENSILs,
1-502	Utensils and Measuring and Testing Devices
	and measuring and testing devices shall meet the following criteria:
1-502.1	Multi-use UTENSILs, and measuring and testing devices, shall be: Good Repair and Calibration
<u>Ute</u>	nsils must
(	<ol> <li>Finished to have smooth, EASILY CLEANABLE surfaces.</li> </ol>
(	2) Free of rough welds or joints, breaks, open seams, cracks, chips, inclusions, pits, and similar-
	imperfections.
(	3) Free of "V" type threads, and sharp internal angles, corners, and crevices.
é	4) Accessible, without requiring disassembly by use of power tools or specialized hand tools, for
	cleaning and inspection.
6	5) Made of materials that do not allow the migration of harmful substances, impart colors, odors, or
	tastes to FOOD and materials that are:
	<del>(a) Safe.</del>
Von absorb	ent and made of CORROSION RESISTANT MATERIAL.
	(b) — Durable and sufficient in weight and thickness to withstand repeated WARE WASHING.
	(c) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition.
	ARTICLES and SINGLE SERVICE UTENSILs shall be:
	6) Safe and clean.
è	7) Made of materials that do not allow the migration of harmful substances or impart colors, odors,
(	or tastes to FOOD.
1 201 12	Standards for Sanitation
	, and measuring and testing devices, that meet or exceed the standards for sanitation established by the
	And measuring and testing devices, that meet of execced the standards for sumation established by the DNAL STANDARDS INSTITUTE (ANSI), shall be used in a Clark County FOOD ESTABLISHMENT.
	UTENSILs, and Measuring and Testing Devices not Certified for Sanitation
	, and measuring and testing devices, not certified as meeting NSF/ANSI sanitation standards shall:
	apply with all general design and construction criteria as listed in Section 4-201.11 of this Chapter, or:
	lot be used without prior written approval from the HEALTH AUTHORITY, which may include:
1 N N N N N N N N N N N N N N N N N N N	<ol> <li>Requirements for, and results of, laboratory field testing.</li> </ol>
	2) Specific use limitations based on identified RISK factors.
× *	Limited Uses of Materials not Compliant with NSF/ANSI Standards
	ade with materials that do not comply with general <i>NSF/ANSI</i> standards shall only be used in a FOOD-
	ABLISHMENT for the following limited uses:
	tiron may be present in a FOOD CONTACT SURFACE of a UTENSIL that can be maintained clean, and in a
	-freestate of repair or condition that complies with the requirements specified under Parts 4-1 and 4-2 or
	the discarded.
mus	<u>it be discarded</u> .
(D)	
	d temperature measuring devices must be calibrated in accordance with manufacturer's specifications as
nec	essary to ensure their accuracy. <sup>Pf</sup>
-	
	bient air temperature, water pressure, and water temperature measuring devices must be maintained in
goo	d repair and be accurate within the intended range of use.
1-502.2	Single-Service and Single-Use Articles, Required Use
	plishment without facilities specified under Parts 4-6 and 4-7 for cleaning and sanitizing kitchenware and
tableware n	nust provide only single-use kitchenware, single-service articles, and single-use articles for use by food

tableware must provide only single-use kitchenware, single-service articles, and single-use a handlers, and single-service articles for use by consumers.<sup>P</sup>

<u>(B)</u>	The bulk milk container dispensing tube must be cut on the diagonal leaving no more than one inch protruding from the chilled dispensing head.
<u>4-502.</u>	4 Shells, Use Limitation
Mollus	sk and crustacea shells must not be used more than once as serving containers.
<u>4-6</u>	Cleaning of Equipment and Utensils
<u>Subj</u> <u>4-60</u> <u>4-60</u> <u>4-60</u>	Utensils 12 Frequency
<u>4-601</u>	Cleaning Objective for Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils
<u>(A)</u>	Equipment, food-contact surfaces, and utensils must be clean to sight and touch. Pf
<u>(B)</u>	The food-contact surfaces of cooking equipment and pans must be kept free of encrusted grease deposits and other soil accumulations.
<u>(C)</u>	Nonfood-contact surfaces of equipment must be kept free of an accumulation of dust, dirt, food residue, and other debris.
<u>4-602</u> <u>4-602.</u>	
<u>(A)</u>	Equipment, food-contact surfaces, and utensils must be cleaned:
	(1) Except as specified in ¶ (B) of this section, before each use with a different type of raw animal food such as beef, fish, lamb, pork, or poultry. <sup>P</sup>
	(2) Each time there is a change from working with raw foods to working with ready-to-eat foods, <sup>P</sup>
	(3) Between uses with raw fruits and vegetables and with TCS food, <sup>P</sup>
	(4) Before using or storing a food temperature measuring device, <sup>P</sup> and
	(5) At any time during the operation when contamination may have occurred. <sup>P</sup>
<u>(B)</u>	Subparagraph (A)(1) of this section does not apply if the utensils and food-contact surfaces of equipment are in contact with a succession of different types of raw meat and poultry each requiring a higher cooking temperature as specified under § 3-401.1 than the previous type.
<u>(C)</u>	Except as specified in <b>1</b> (D) of this section, if used with TCS food, utensils and food-contact surfaces of equipment must be cleaned throughout the day at least every four hours. <sup>P</sup>

## 4-502.3 Single-Service and Single-Use Articles, Use Limitation

(A) Single-service and single-use articles must not be reused.

<u>(D)</u>	Surfac	ces of utensils and equipment contacting TCS food may be cleaned less frequently than every four hours
	<u>if:</u>	
	<u>(1)</u>	In storage, containers of TCS food and their contents are maintained at temperatures specified under Chapter 3 and the containers are cleaned when they are empty.
	<u>(2)</u>	Utensils and equipment are used to prepare food in a refrigerated room or area that is maintained at one of the temperatures in the following chart and:
<del>(A)</del>		e utensils and equipment are cleaned at the frequency Lead may be present in a FOOD-CONTACT- RFACE of a UTENSIL in:
	(1)	Pewter alloys containing lead not in excess of 0.05%.
		(a) Solder and flux containing lead not in excess of 0.2%. in the following chart that corresponds to the temperature, and

#### Ceramic, china, crystal UTENSILs, and decorative UTENSILs including but not limited to hand-(2) painted ceramic, or china with levels of lead not exceeding those listed in the following table.

UTENSIL Category Temperature	1	Description or	Maxin	Deleted Cells

(1) At any time when contamination may have occurred,

- (5)(2) At least every 24 hours for iced tea dispensers and consumer self-service utensils including but notlimited to-such as tongs, scoops, or ladles-
- (6)(3) Before restocking consumer self-service equipment and utensils including but not limited tosuch as condiment dispensers and display containers-, and
- (7)(4) In EQUIPMENT including but not limited to ice bins and equipment such as beverage dispensing nozzles, and enclosed components of equipment including but not limited to ice makers, such as cooking oil storage tanks and distribution lines, beverage and syrup dispensing lines or tubes, and coffee bean grinders:
  - (a) At a frequency specified by the manufacturer, or
  - (b) Absent manufacturer specifications, At a frequency necessary to preclude accumulation of soil, scale, or microbial growth.
    - (i) Equipment such as ice bins, ice makers, and water vending machines must be cleaned at a frequency necessary to preventpreclude accumulation-of soil or mold.
- (8)(5) The FOOD-CONTACT SURFACEs of baking EQUIPMENT, and cooking EQUIPMENT and pans, shall be cleaned at least every 24 hours or more frequently if necessary to prevent development of encrustedgrease deposits and other soil accumulationssoil, scale, or microbial growth.
- (F) To verify that the frequency of cleaning for ice bins, ice makers, and water vending machines is adequate, a food establishment that is packaging ice for human consumption must submit to an approved laboratory, once every six months, a sample of each type of finished product for microbiological analysis. The analysis must include testing for fecal coliform and total coliform organisms, and:
  - (1) If the test results in a positive sample, the unit must be taken out of service until such time a follow up test confirms the absence of total coliform.
  - (2) Records of sampling and analyses must be maintained for a period of not less than 2 years and made available to the Health Authority upon request.

#### 4-602.2 Cooking General and Baking Equipment

- (A) The food-contact surfaces of cooking and baking equipment must be cleaned at least every 24 hours. This section does not apply to hot oil cooking and filtering equipment if it is cleaned as specified in Subparagraph 4-602.1(D)(6).
- (B) The cavities and door seals of microwave ovens must be cleaned at least every 24 hours by using the manufacturer's recommended cleaning procedure.

#### 4-602.3 Nonfood-Contact Surfaces

Nonfood-contact surfaces of equipment must be cleaned at a frequency necessary to preclude accumulation of soil residues.

4-603	Methods
<u>4-603.1</u>	4-402.11Dry Cleaning

(A) If used, dry cleaning methods such as brushing, scraping, and Sanitizing FOOD-CONTACT SURFACEs – This-Section mirrors the Food Codevacuuming must contact only surfaces that are soiled with dry food residues that are not TCS food. Sponges and Abrasive Cleaning Articles: equipment used in dry cleaning food-contact surfaces must

- (B) Sponges shall not be used for cleaning FOOD-CONTACT SURFACEs, EQUIPMENT, or UTENSILs in aging other purpose.
  - FOOD ESTABLISHMENT.
  - (1) Abrasive articles shall not be used to clean non stick cook ware or KITCHENWARE that has a nonstick resin coating, including but not limited to frying pans, griddles, sauce pans, cookie sheets, and waffle bakers.
  - (B) EQUIPMENT, FOOD-CONTACT SURFACEs, and UTENSILs shall be effectively washed, rinsed, sanitized, andair-dried by using manual or mechanical means as follows:
    - (1) Pre-cleaning and washing of soiled EQUIPMENT and UTENSILs:

#### 4-603.2 Precleaning

- (A) Food debris on equipment and utensils shallmust be scraped over a waste separator unit or garbage receptacle, or shallmust be removed in a WARE WASHINGwarewashing machine with a pre-washprewash cycle.
- (B) If necessary for effective cleaning, soiled-utensils and equipment shallmust be pre-flushed, presoakedpreflushed, presoaked, or scrubbed with abrasives-that will not damage the surface.

	f detergents containing watting agents and an while from and all all all a branches in the second ball
water. brushes. scourin	f detergents containing wetting agents and emulsifiers, acid, alkaline, or abrasive cleaners, hot
	g pads, high pressure sprays, or ultrasonic devices that are appropriate for the type of soil to be
removed, and for the ty	rpe and purpose of the EQUIPMENT or UTENSIL.
Rinsing of washed EQU	
(a)	Washed utensils and EQUIPMENT shall be rinsed so that abrasives and cleaning chemicals
	are removed.
<del>(b)</del>	Water used for rinsing shall be changed at a frequency that prevents grease, cleaning
	agents, or FOOD debris from remaining on the rinsed items.
<del>(2) Sani</del>	tizing of washed and rinsed EQUIPMENT and UTENSILs:
	vashed and rinsed, FOOD CONTACT SURFACES of EQUIPMENT and UTENSILs shall be sanitized
by A	PPROVED manual or mechanical methods, using one of the sanitizers listed in 21 CFR 178.1010,
Sani	tizing Solutions, and used as follows:
<del>(a)</del>	Chlorine sanitizers: A chlorine sanitizing solution shall be applied at a concentration of at
	least 50 ppm or a concentration as specified by the manufacturer.
<del>(b)</del>	Iodine Sanitizers: An iodine sanitizing solution shall have a:
	(i) Concentration of at least 12.5 ppm, and not more than 25 ppm.
	(ii) pH and temperature as specified by the manufacturer.
Quaternary Ammoniun	Sanitizers: A quaternary ammonium compound shall:
	(iii) Be applied at a concentration as specified by the manufacturer.
	(iv) Be used only within the water temperature and water hardness limits as specified
	by the manufacturer.
	(v) Not be used in a WARE WASHING machine unless the manufacturer's label
	specifies such use.
<del>(c)</del>	<ul> <li>Applied at the concentration as specified in the current Food Code.</li> </ul>
<del>(d)</del>	Detergent Sanitizers: If a detergent sanitizer is used without a distinct water rinse between
	the washing and sanitizing steps, the agent applied in the sanitizing step shall be the same
	detergent sanitizer that is used in the washing step.
	actor period and the property of the maximing step.

(D)	Cleaning EQUIPMENT, used in dry cleaning FOOD-CONTACT SURFACEs, shall not be used for any other-
	<del>purpose.</del>
	e-Compartment Sinks
<b>4.11</b>	Cleaning and Sanitizing Procedures
× 2	Use Limitations: compartment sink shall not be used at any time for hand washing.
Atmee	(1) + If a three compartment sink is used for WARE WASHING, as well as to wash produce or to thaw
	FOOD, the sink shall be:
	(a) Cleaned at least every 24 hours, and before each use for WARE WASHING, and throughout
	the day at a frequency necessary to prevent re CONTAMINATION of EQUIPMENT and
	UTENSILs, and to ensure that the EQUIPMENT performs its intended function.
	Sanitized as specified in Section 4 402.11 (B) (3) of this Chapter before and after using the sink to thaw FOOD-
	or to wash produce.
	(b) For-WARE WASHING;
	(i) The wash solution shall be maintained at the temperatures required in this section
	and free of excessive build up of debris.
The san	itizer solutions shall be maintained clean and at required temperatures.
<del>(B)</del>	
	FOOD, all compartments and drain boards must be cleaned and sanitized prior to use. During the time a
	three-compartment sink is being used for FOOD preparation, it may not be used for any other purpose.
<del>(C)</del>	
	three-compartment sink shall be accomplished using methods in Section 4-402.11 of this Chapter.
<del>(D)</del> –	Maintaining clean wash, rinse, and sanitizing solutions: The wash and rinse compartments in a three-
	compartment sink shall be changed when substantial amounts debris and grease have accumulated. The
	sanitizing solutions in a three-compartment sink shall be maintained clean for WARE WASHING.
	ature of wash and sanitizing solutions:
The tem	perature of the wash solution for manual WARE WASHING shall be maintained at not less than 110°F±2°, or at
	a temperature specified on the manufacturer's label of the cleaning agent.
	(1) If immersion in hot water is used for sanitizing, the temperature of the sanitizing water shall be maintained at 171°E+2° or above.
<del>(E)</del>	<ul> <li>Air drying of cleaned and sanitized EQUIPMENT and UTENSILs: EQUIPMENT or UTENSILs that have been properly sanitized, as specified in Section 4 402.11 (B) of this Chapter:</li> </ul>
Chall ha	
	air dried, or may be used after adequate draining has occurred, before contact with FOOD. May not be cloth dried except that utensils that have been air dried may be polished with cloths that are-
. ,	may not be cloth uneu except that atensiis that have been an uneu may be polished with cloths that are maintained clean and dry.
	<del>maintaineu orean anu ury.</del>
	(1) Clean TABLEWARE may be polished with a clean damp cloth used solely for that purpose.
	RE WASHING Machines
4-40	5.11 Cleaning and Sanitizing Procedures
Pre clea	ning of soiled EQUIPMENT and UTENSILs:
	(1) <b>For</b> -cleaning and sanitizing EQUIPMENT and UTENSILs by use of a WARE WASHING machine,
	FOOD debris shall be:
	Scraped into a waste separator unit or a garbage receptacle.
	(a) Removed in a pre-wash cycle of the WARE WASHING machine.
	(2) If necessary for effective cleaning, soiled UTENSILs and EQUIPMENT shall be pre-flushed, pre-
	soaked, or scrubbed with abrasives that will not damage the surface.
4-603.3	Loading of Soiled Items+, Warewashing Machines

Soiled items to be cleaned in a WARE WASHING ware washing machine shall must be loaded into racks, trays, or baskets, or onto conveyors in a position that:

(A) Exposes the items to the unobstructed spray from all cycles, and

(B) Allows the items to drain.

Maintenance of	e of wash solution temperature: Wash solution temperature	e shall be maintained as specified for the type
<del>of mad</del>	achine being used:	
4-603.4	Wet Cleaning	

Utensils and food-contact surfaces of equipment must be effectively washed to remove or completely loosen <u>(A)</u> soils by using the manual or mechanical means necessary such as the application of detergents containing wetting agents and emulsifiers; acid, alkaline, or abrasive cleaners; hot water; brushes; scouring pads; highpressure sprays; or ultrasonic devices.

The washing procedures selected must be based on the type and purpose

In-spray type ware washers that use hot water to sanitize, the temperature of the wash solutionshall not be less than:

<del>(a)</del>

(3)

(b) 150°F±2° for a stationary rack, dual temperature machine.

(c) 160°F±2° for a single tank, conveyor, dual temperature machine.

(d) 150°F±2° for a multi tank, conveyor, multi temperature machine.

(4) In spray type ware washers that use chemicals to sanitize, the temperature of the wash solution shall not be less than 120°F±2°.

(B) Maintenance of fluid reservoirs and pumping/tubing systems: Reservoirs and pumping/tubing systems shall be maintained to deliver whatever water conditioners, cleaning agents, and chemical sanitizers as specified by the WARE WASHING machine manufacturer, and at concentrations as specified in these Regulations, or on the product's label.

C) Temperature and pressure of water for hot water SANITIZATION:

Cycling time, and water temperature, shall result in the surfaces of UTENSILs reaching at least 160°F±2°, as measuredby an irreversible registering thermometer, or temperature-sensitive tape, which has traveled through thecleaning and sanitizing cycle with the UTENSILs.

(1) The temperature of the fresh hot water sanitizing rinse, as it enters the manifold, shall not be more than 194°F±2°, nor less than:

(a) 165°F±2° for a stationary rack, single temperature machine.

(b) 180°F±2° for all other machines.

The flow pressure of the fresh hot water sanitizing rinse in a WARE WASHING machine may not be less than 15psi nor more than 25 psi as measured with a pressure gauge or similar device including but not limited to a transducer that measures and displays the water pressure:

(c) In increments not greater than 1 psi.

With an accuracy of ±2 psi in the operational range (15 25 psi), as measured in the water line immediately downstreamfrom the fresh hot water sanitizing rinse control valve.

> (d) If the flow pressure measuring device is upstream of the fresh hot water sanitizing rinse control valve, the device shall be mounted in a 1/4"\_Iron Pipe Size (IPS) valve.

(D) Concentration of Chemical Sanitizer: Chemical sanitizer concentrations shall be maintained as specified on the product label or as specified in Section 4-402.11 (B) of this Chapter.

(A)(B) Air drying of cleaned and sanitized EQUIPMENT and UTENSILs: equipment or UTENSILs that have been properly sanitized as specified in Section 4-402.11 (B) (3) of this Chapterutensil, and on the type of soil to be removed.
(1) Shall be air dried, or may be used after adequate draining has occurred, before contact with FOOD.

Shall not be cloth dried except that UTENSILs that have been air dried may be polished with cloths that are maintained clean and dry.

#### Washing,

(2) Clean TABLEWARE may be polished with a clean damp cloth used solely for that purpose.

Other WARE WASHING EQUIPMENT

4 603.14-603.5 4 406.11 Cleaning and Sanitizing Procedures for Alternative Manual Warewashing Equipment

If washing in sink compartments or a WARE WASHINGwarewashing machine is impractical, including but not limited to such as when the equipment is fixed, or the utensils are too large, washing shallmust be done by using alternative manual WARE WASHING EQUIPMENTwarewashing equipment as specified in ¶ 4-301.2(C) in accordance with the following procedures:

EQUIPMENT shall

- (A) Equipment must be disassembled as necessary to allow access of the detergent solution to all FOOD-CONTACT SURFACEs.parts,
- (B) Equipment components and utensils <u>shallmust</u> be scraped or rough cleaned to remove food particle accumulation<sub>v</sub>, and

(A) Equipment and utensils shall<u>must</u> be washed as specified in Sectionunder <u>1</u> 4-402.11 of this Chapter. FOOD Contact EQUIPMENT and UTENSILS

(C) 603.4(A).

#### 4-603.24-603.6 Rinsing-407.11 Sanitizing Procedures

(A) <u>Washed utensils</u>EQUIPMENT and UTENSILs that are used repeatedly for contact with FOOD shallequipment must be:

(1) Replaced, or washed, rinsed, sanitized, so that abrasives are removed, and air dried, at a

frequency as specified in Section 4-401.11 of this Chapter.

(2) Wiped with a clean, sanitized cloth whenever time does not permit effective air drying before the next use. Sanitized cloths shall test at APPROVED concentrations when not stored in a cleaning chemicals are removed or diluted, through the use of water or a detergent-sanitizer solution. Sanitizer solutions for use with in use EQUIPMENT and UTENSILs shall be:

Prepared at a frequency that maintains APPROVED sanitizer concentrations as verified by the use<u>using one</u> of the appropriate test strip.<u>following procedures:</u>

#### (A) Use of a distinct, separate water rinse after washing and before sanitizing if using:

(3) <u>A three-compartment sink</u>, Held in a working containers that are clearly and durably labeled in English with the common name of the material in accordance with Chapter 7-102.11 of these Regulations. Other applicable languages may be used in addition to the English name.

	<u>(1)</u>	<del>Stored:</del>
	<u>(2)</u>	Alternative manual warewashing equipment equivalent to a three-compartment sink as specified in ¶ <u>4-301.2(C), or</u>
	<u>(3)</u>	A three-step washing, rinsing, and sanitizing procedure in a warewashing system for CIP equipment,
<u>(B)</u>	Use o	f a detergent-sanitizer as specified under § 4-501.15 if using:
		hative warewashing equipment         (a)       In APPROVED buckets or spray bottles.         (b)       Where spills, splashes, and sprays will not cause CONTAMINATION of FOOD or FOOD         CONTACT SURFACES.       CONTACT SURFACES.         Used in accordance with exposure times as specified in Section 4-402.11 (B) (¶ 4) of this Chapter.
FOO		ing or Measuring Devices
		obe or Measuring Device Sanitizing Procedures_301.2(C) that is approved for use with a detergent-
	(1)	Before and after each use, FOOD-contact probes or thermometers and other FOOD testing and measuring devices shall be wiped with an APPROVED sanitizer and air dried. For this purpose only, swabs containing 70% ethyl alcohol or isopropyl alcohol may be used as a sanitizer., or
	<u>(2)</u>	A warewashing system for CIP equipment,
<u>(C)</u>		ng a warewashing machine that does not recycle the sanitizing solution as specified under ¶ (D) of this on, or alternative manual warewashing equipment such as sprayers, use of a non-distinct water rinse that
	<u>(1)</u>	Integrated in the application of the sanitizing solution, and
	<u>(2)</u>	Wasted immediately after each application, or
<u>(D)</u>		ing a warewashing machine that recycles the sanitizing solution for use in the next wash cycle, use of a listinct water rinse that is integrated in the application of the sanitizing solution.

	4-409	rnables for Refilling •11 Cleaning and Sanitizing Proceduresbeing cleaned, utensils and ntainers that are to be refilled for the sale of non POTENTIALLY HAZARDOUS BEVERAGES:
		all be cleaned, rinsed, and sanitized in a FOOD PROCESSING ESTABLISHMENT if the container is to be EALED to make the FOOD PRE-PACKAGED. Examples include, but are not limited to, glass bottles to be
<del>(B)</del>		illed with beer, water, or soft drinks. It, if the container is free of visible dirt or FOOD residue, be refilled for immediate return to the customer,

provided that the act of refilling does not pose a RISK of CONTAMINATION in the FOOD service area. Examples include, but are not limited to:

(1) Cups to be refilled at customer request with coffee or soft drinks.

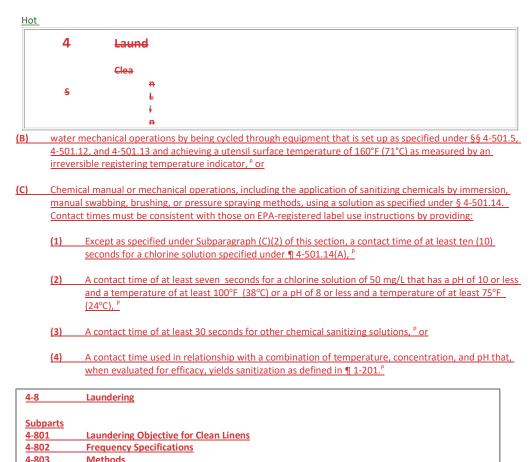

(2) "Growlers" or other containers to be refilled at customer request with beer.

(3) Containers provided by customers for refilling with water at self service VENDING MACHINES.

#### 4-410.11 Cleaning Procedures

NON-food-contact surfaces of equipment and UTENSILs shall be kept free of an accumulation of dust, dirt, FOODresidue, and other debris, and shall be cleaned at a frequency necessary to prevent accumulation of soil residues.must be sanitized in:

(A) Hot water manual operations by immersion for at least 30 seconds and as specified under § 4-501.11, P

4-8024-801 Laundering Objective for Clean LINENLinens

#### 4 501.11 Maintenance

Clean LINEN shall<u>linens must</u> be free from food residues and other soiling matter.

#### Soiled LINEN

#### 4-502.11 Handling

- (A) Wiping cloths shall be removed from use when they have become contaminated, visibly soiled, or sticky.
  - (B) Cloth gloves used as specified in Chapter 3-304.15 (D) of these Regulations shall not be used with more than one type of raw animal FOOD, including but not limited to beef, lamb, pork, or FISH before being discarded for LAUNDERing.
- LINEN and napkins that are used as specified in Chapter 3-304.13 of these Regulations and cloth napkins shall be usedonly once before being discarded for LAUNDERing.
  - (C) Soiled-LINEN shall be kept in clean, nonabsorbent receptacles or clean washable laundry bags, and stored and transported to prevent CONTAMINATION of FOOD, clean EQUIPMENT, clean UTENSILs, and SINGLE-SERVICE ARTICLES and SINGLE USE ARTICLES.

#### 4-8034-802 Frequency Specifications

#### 03.11 LAUNDERing

#### LINEN

- (A) Linens that doesdo not come in direct contact with food shallmust be laundered between operations when if they become wet, sticky, or visibly soiled.
- (B) Cloth gloves used as specified in Chapter 3-304.15 5(D) of these Regulations shallmust be laundered before being used with a different type of raw animal food including but not limited tosuch as beef, fish, lamb, pork, or -FISH poultry.

	and napkins	
(C)	Linens that are used, as specified in Chapterunder § 3-304.13 of these Regulations, 3 and cloth napkins shallmust be laundered between each use.	
(D)	Wet wiping cloths shall <u>must</u> be laundered daily.	
(E)	Dry wiping cloths shall <u>must</u> be laundered as necessary to prevent contamination of food and clean serving utensils.

	(D)	or inverted.
	$(\mathbf{C})$	Plastic tubing used to dispense BEVERAGEs directly into a CONSUMER's mouth, including but not limited
	(0)	to beer bongs at bars, shall be for SINGLE-SERVICE only, or shall be washed, rinsed, and sanitized between
		customers.
1 604	12 Ha	ndling Soiled TABLEWARE
		d TABLEWARE shall be removed from CONSUMER eating and drinking areas and handled so that clean
		is not contaminated.
		It is preset:
-170		Exposed, unused settings shall be removed when a CONSUMER is seated: or.
		Exposed, unused settings shall be cleaned and sanitized before further use if the settings are not removed
	(D)	when a customer is seated.
	1 60/ 1	4 Handling SINGLE SERVICE ARTICLES
	(A)	
	(11)	by employees and by CONSUMERs, if CONSUMER self-service is provided.
	<del>(B)</del>	
	<del>(B)</del>	that are intended for FOOD or lip contact, shall be furnished for CONSUMER self-service with the original
		individual wrapper intact or from an APPROVED dispenser.
		SINGLE SERVICE ARTICLES and SINGLE USE ARTICLES shall be kept in the original protective package or stored
1	<del>.</del>	by using other means that afford protection from contamination until removed for use <u>used</u> .
(	D)	Items that are kept in closed packages may be stored less than 6 inches (15 cm) above the floor on dollies,
		pallets, racks, and skids that are designed as specified under § 4- 204.23.
4	1-9 <mark>03.</mark> 2	<u>Prohibitions</u>
1	A)	Except as specified in ¶ (B) of this section, cleaned and sanitized equipment and utensils, laundered linens,
		and single-service and single-use articles must not be stored:
		(1) In locker rooms,
		(2) In restrooms,
		(3) In garbage rooms,
		(4) In mechanical rooms,
		<u>147 in nechanica rooms,</u>
		(5) Under sewer lines that are not shielded to intercept potential drips,
		<b>10</b> onder sewer nines that are not smelued to intercept potential unps,
		(6) Under leaking water lines including leaking automatic fire sprinkler heads or under lines on which
		water has condensed,
1		water has condensed,

Under open stairwells

TER 5	
	<u>(7)</u> , or
	(8) Under other sources of contamination.
<u>(B)</u>	Laundered linens and single-service and single-use articles that are packaged or in a facility such as a cabinet
	may be stored in a locker room.
4-904	Preventing Contamination
<u>4-904.</u>	Kitchenware and Tableware
(A)	Single-service and single-use articles and cleaned and sanitized utensils must be handled, displayed, and
<u></u>	dispensed so that contamination of food and lip-contact surfaces is prevented.
(D)	
<u>(B)</u>	<u>Knives, forks, and spoons that are not prewrapped must be presented so that only the handles are touched by</u> food handlers and by consumers if consumer self-service is provided.
<u>(C)</u>	Except as specified under ¶ (B) of this section, single-service articles that are intended for food or lip-contact
	must be furnished for consumer self-service with the original individual wrapper intact or from an approved dispenser.
<u>4-904.</u>	Soiled and Clean Tableware
Soiled	ableware must be removed from consumer eating and drinking areas and handled so that clean tableware is
-	taminated.
4-904.	Preset Tableware
4-904.	Preset rableware
<u>(A)</u>	Except as specified in ¶ (B) of this section, tableware that is preset must be protected from contamination by
	being wrapped, covered, or inverted.
(B)	Preset tableware may be exposed if:
	(1) Unused settings are removed when a consumer is seated, or
	(2) Settings not removed when a consumer is seated are cleaned and sanitized before further use.
4 004	Discise Equipment and Utanzile often Cleaning and Capitizing
<u>4-904.</u>	Rinsing Equipment and Utensils after Cleaning and Sanitizing
<u>After </u>	ing cleaned and sanitized, equipment and utensils must not be rinsed before air drying or use unless:
(A)	The rinse is applied directly from a potable water supply by a warewashing machine that is maintained and
	operated as specified under Subparts 4-204 and 4-501, and
(D)	
<u>(B)</u>	The rinse is applied only after the equipment and utensils have been sanitized by the application of hot water or by the application of a chemical sanitizer solution whose EPA-registered label use instructions call for
	rinsing off the sanitizer after it is applied in a commercial warewashing machine.
	This ing off the samtizer after it is applied in a commercial warewasting machine.

	moving barriers.
DEVEK	AGE and ice dispensing areas in new and extensively remodeled establishments shall have a separate and distinct wall have HAND WASHING SINK if:
	distinct wall hung HAND WASHING SINK, if:

(1) Located in a FOOD pick up area.
 (2) Bussing of soiled TABLEWARE or UTENSILs occurs in the area.

(3) Any open FOOD including but not limited to soup, toast, garnishes, salads, or salad dressings is placed in the area.

#### (4) Bagging ice.

(D) Additional HAND WASHING SINKs are not required in areas used solely for the bussing of soiled TABLEWARE

#### HABLEWARE.

- (E) All dish washing areas shall have convenient and easily accessible wall hung HAND WASHING SINKs to allow proper hand washing after loading soiled TABLEWARE, and prior to unloading clean TABLEWARE.
- (F) HAND WASHING SINKs shall be located in, or immediately adjacent to, rooms with toilets, or in toilet vestibules. Sinks used for preparing FOOD or for washing EQUIPMENT or UTENSILs may not be used for washing hands. The rinsing of FOOD and UTENSILs in HAND WASHING SINKs is prohibited.
- (G) Fixed dispensers of liquid soap or detergent for cleaning hands shall be available at all HAND WASHING SINKs. Interim portable soap dispensers may be temporarily used when repairs may be required for fixed dispensers.
- (H) A supply of sanitary, disposable towels for drying hands shall be conveniently located near each HAND WASHING SINK. Shared common towels are prohibited. Waste receptacles that are EASILY CLEANABLE shall be conveniently located near the HAND WASHING SINK. Cloth towels are prohibited at employee HAND WASHING SINKs.
- (I) HAND WASHING SINKs, dispensers for soap, towel dispensers, and all related fixtures shall be kept clean and in good repair. Hand blow dryers shall not be used at HAND WASHING SINKs as a sole means for drying hands in areas used by employees.

A HAND WASHING SINK may have a direct connection to a sewer line drain.

(J) In-areas that process or prepare raw FOOD of animal origin for consumption of as READY TO EAT FOOD, a separate HAND WASHING SINK shall be provided for the sole use of that operation.

#### -202.13 Using a HAND WASHING SINK

A HAND WASHING SINK shall be clean and maintained in good repair and shall be accessible at all times for employeeuse-

# (D) An-automatic hand washing system shall be used in accordance with manufacturer's instructions, and be.

#### APPROVED by the HEALTH AUTHORITY. 5-201 Service-Sinks

## 203.11 Requirements

- (A) All service sinks, including but not limited to mop sinks and can wash stations, and all FOOD handling sinks, including but not limited to dump sinks, blender stations, produce sinks, and other FOOD preparation sinks, shall be serviced with hot and cold running water through a mixing or combination faucet.
- (B) At least one service sink, or one curbed cleaning sink equipped with a floor drain, directly connected to sewer shall be provided and conveniently located for cleaning of mops or similar wet floor cleaning tools, and for the disposal of mop water and similar liquid waste. The faucets at this sink shall be protected by a backflow prevention device. This sink shall not be used for FOOD preparation, FOOD handling, or for hand washing. Toilets and Urinals may not be used as a service sink for the disposal of mop water and similar liquid waste.

#### 14-102.1 Toilet facilities

#### -204.11 Toilet Facilities Within FOOD ESTABLISHMENTs

- (A) Owner/operators of FOOD service facilities shall provide conveniently located toilet facilities for their employees. Public restrooms may be utilized for employees provided they are within the same building, are conveniently located to the FOOD ESTABLISHMENT, and are accessible to employees during all hours of the FOOD ESTABLISHMENT's operation.
- (B) Public access to toilet facilities shall not be allowed through a FOOD preparation, FOOD storage, or WARE WASHING area.
- (C) FOOD ESTABLISHMENTs, located within theme parks and entertainment complexes, may utilize centrally located restrooms that are reasonably accessible.
- (D) A FOOD ESTABLISHMENT that provides public seating shall have separate public restrooms for males and females when 10 or more public seats are provided. Only one restroom is required if there is less than 10 seats.
  - (1) Public seating includes seats, benches, stools and similar furniture provided by the owner or

operator of a building, mall, or similar operation for use by the FOOD ESTABLISHMENT and located within 25 of the ESTABLISHMENT.

- (2) FOOD ESTABLISHMENTS holding existing PERMITs that were APPROVED for customer seating with a single customer restroom shall be exempt from this requirement until the FOOD ESTABLISHMENT is extensively remodeled or the existing PERMIT lapses for greater than one billing cycle.
- (E) Water closets and urinals shall be of a sanitary design.
- (F) Exhaust fans shall be installed in all new construction and extensively remodeled restrooms.
- (G) Toilet facilities, including the toilet room and fixtures, shall be kept clean, in good repair, and free of objectionable odors.
- (II) Rooms with toilets must be completely enclosed and have solid doors which must fit tightly, close automatically and remain closed except during cleaning or maintenance. Doors from rooms with toilets must not open directly into any area used for the preparation of FOOD or for the washing or cleaning of EQUIPMENT, UTENSILS or SMOOTH as specified in Chapter 6 202.14 of these Regulations
- (I) A supply of toilet tissue shall be provided at each toilet at all times. EASILY CLEANABLE covered receptacles shall be provided for waste materials. Such receptacles shall be emptied at least once a day, and more frequently when necessary to prevent accumulation of waste material.
  - J) A toilet is not required within the facility if the lease agreement of the FOOD ESTABLISHMENT provides that the lessor will at all times provide clean and appropriately stocked and maintained toilet facilities for employees of the FOOD ESTABLISHMENT.

#### 5-202.25-202.3 Backflow and Back-Siphonage 5-205.11 Backflow Prevention, Air Gap

An air gap between the water supply inlet and the flood level rim of the plumbing fixture, equipment, or non-FOOD-EQUIPMENT shallfood equipment must be a minimum of two timesat least twice the diameter of the water supply inlet and maymust not be less than  $1^{\prime\prime}$ -inch (25 mm).<sup>P</sup>

#### 5-202.35-202.4 5-205.12 Backflow Prevention Device, Design Standard

A backflow or back -siphonage prevention device installed on a water supply system shallmust meet the American Society of Sanitary *Engineer (A.S.S.E.)*Engineering (ASSE) standards for construction, installation, maintenance, inspection, and testing for that specific application and type of device.<sup>P</sup>

#### 5-202.45-202.5 5-205.13 Conditioning Device, Design

A water filter, screen, and other water <u>conditionconditioning</u> device installed on water lines <u>shallmust</u> be designed to facilitate disassembly for periodic servicing and cleaning. A water filter element <u>shallmust</u> be of the replaceable type.

5-203 Numbers and Capacities

5-203.1 Handwashing Sinks

- (A) Except as specified in ¶¶ (B) and (C) of this section, each food establishment must have a number of handwashing sinks necessary for convenient use by employees, in areas specified under §5-204.1, and no less than the number of handwashing sinks required by the Uniform Plumbing Code. <sup>Pf</sup>
- (B) If approved and capable of removing the types of soils encountered in the food operations involved, <u>automatic handwashing facilities may be substituted for handwashing sinks in a food establishment that has</u> <u>at least one handwashing sink.</u>

#### 5-203.2 Toilets and Urinals

At least one toilet, and not fewer than the toilets required by the Uniform Plumbing Code, must be provided.

#### 5-203.3 Service Sink

(A) At least one service sink or one curbed cleaning facility equipped with a floor drain must be provided and conveniently located for the cleaning of mops or similar wet floor cleaning tools and for the disposal of mop water and similar liquid wastewater.

(B)	Toilets, urinals, or sinks normally used for preparing food or washing utensils or equipment may not be used as	
	a service sink for the disposal of commercial or industrial wastewater such as mop water.	
Ba	ckflow 5-205.14 Backflow Prevention Devices

5-204.25-204.3 5-205.17 Conditioning Device, Location

A water filter, screen, and other water condition devices conditioning device installed on water lines shallmust be located to facilitate disassembly for periodic cleaning and servicing and cleaning.

5-205Operation and Maintenance5-205.1Using a Handwashing Sink

<u>(A)</u>	A handwashing sink must be maintained so that it is accessible at all times for employee use. Pf
<u>(B)</u>	A handwashing sink must not be used for purposes other than handwashing. Pf
<u>(C)</u>	An 5-205-18automatic handwashing facility must be used in accordance with manufacturer's instructions.

## 5-205.15-205.2 Prohibiting a Cross -Connection

- (A) A person maymust not create a cross -connection by connecting a pipe or conduit between the drinking water system and either a non-drinking water system or a water system of unknown quality.<sup>P</sup>
- (B) The piping of a non-drinking water system shall<u>must</u> be durably identified so that it is readily distinguishable from piping that carries drinking water.<sup>Pf</sup>

### 5-202 Inspection and Service

### 5-205.25-205.3 5-206.11 Scheduling Inspection and Service for a Water System Device

Except as specified in Section 5-205.15 (B) of this Chapter, A device including but not limited to a backflow prevention device or such as a water treatment device, shall or backflow preventer must be scheduled for inspection and service in accordance with manufacturer'smanufacturer's instructions, and as necessary to prevent device failure based on local water conditions. Records -ofdemonstrating inspection and/or service shallmust be maintained or obtained by the PERSON IN CHARGE, and a copy shall be provided PIC and made available to the Health Authority upon request.<sup>Pf</sup>

## 5-205.35-205.4 5-206.12 Water Reservoir of Fogging Devices, Cleaning

(A) A reservoir that is used to supply water to a device, including but not limited to a produce\_such as a fogger, shall be constructed with an APPROVED backflow prevention device, and must be:

- (1) Maintained in accordance with manufacturer's manufacturer's specifications, <sup>P</sup> and
- (2) Cleaned in accordance with manufacturer'smanufacturer's specifications, or according to the procedures as specified in Paragraph under ¶ (B) of this section, whichever is more stringent.<sup>P</sup>
- (B) Cleaning procedures shallmust include at least the following steps, and shallmust be conducted at least once a week:
  - (1) Draining and complete disassembly of the water and aerosol contact parts  $\frac{p}{L}$
  - (2) Brush\_cleaning of the reservoir, aerosol <u>tubing</u>, and discharge nozzles with a suitable detergent solution<sub>7</sub>.
  - (3) Flushing the complete system with water to remove the detergent solution and particulate accumulations.accumulation, <sup>p</sup> and
  - (4) Rinsing by immersing, spraying, or swabbing the reservoir, aerosol tubing, and discharge nozzles with an APPROVED sanitizer at recommended strengths.at least 50 mg/L hypochlorite solution.<sup>p</sup>

	(A) 16	5 mesh <u>/ to 1</u> inch <u>(16 mesh to 25.4 mm)</u> screen or equivalent when the vent is in a protected area-, or				

I. Г

(A)(B) A protective filter when the vent is in an area that is not protected from windblown dirt and debris.	
5-302.5 5-302.15 Inlet and Outlet, Sloped to Drain	
(A) A water tank and its inlet and outlet shall <u>must</u> be sloped to drain.	
(B) A water tank inlet shallmust be positioned so that it is protected from contaminants including but not limited tosuch as waste discharge, road dust, oil, or grease.	
5-302.6 5-302.16 Hose, Construction and Identification	
A hose used for conveying drinking water <del>to<u>f</u>rom</del> a water tank <del>shall<u>must</u> be <del>constructed of FOOD GRADE materials</del>:</del>	
(A) Safe, <sup>P</sup>	
(B) <u>DurableAPPROVED by NSF/ANSI or equivalent, and shall be</u> ; corrosion-resistant, and nonabsorbent,	
<ul> <li>(A) Safe</li> <li>(B) Made of durable, non absorbent CORROSION RESISTANT MATERIALS.</li> <li>(A)(C) Resistant to pitting, chipping, crazing, scratching, scoring, distortion, and decomposition-2</li> </ul>	
(B)(D) Finished with a smooth interior surface <del>, and</del>	
(C)(E) Clearly and durably identified as to its use, <u>unless if not</u> permanently attached. 5-302.17	
5-302.17 5-303 Numbers and Capacities 5-303.1 Filter, Compressed Air	
A filter that does not pass <del>either</del> oil or oil vapors <del>shall<u>must</u> be installed in the air supply line between the compressor and the drinking water system when compressed air is used to pressurize the water tank system.</del>	
5-303.2 5-302.18 Protective Cover or Device	
A cap and keeper chain, closed cabinet, closed storage tube, or other approved protective cover or device <del>shall<u>must</u> be provided for <mark>thea</mark> water inlet, outlet, <u>and</u>hose<del>, and associated EQUIPMENT</del>.</del>	
5-303.3 Mobile Food Establishment Tank Inlet	
A mobile food establishment's water tank inlet must be:	
(A) Three-fourths inch (19.1 mm) in inner diameter or less, and	
(B) Provided with a hose connection of a size or type that will prevent its use for any other service.	
5-3035-304 Operation and Maintenance	
5-304.1 5-303.11 System Flushing and DisinfectionSanitization	
A water tank, pump, and hoses <del>shall<u>must</u> be flushed and sanitized before being placed in service after construction, repair, modification, and periods of <del>non-use.nonuse.<sup>P</sup></del></del>	
5-304.2 5-303.12 Using a Pump and Hoses, Backflow Prevention	

A person shall<u>must</u> operate a water tank, pump, and hoses so that backflow and <u>other</u> contamination of the water supply are prevented.

5-303.13

5-304.3 Protecting Inlet, Outlet, and Hose Fitting

If not in use, a water tank and hose inlet and outlet fitting must be protected using a cover or device as specified under § 5-303.2.

### 5-304.35-304.4 Tank, Pump, and Hoses, Dedication

(A)	Except as specified in ¶ (B) of this section, a water tank, pump, and hoses used for conveying drinking water
	<del>shall<u>must</u> be used for no other purpose.<sup>p</sup></del>

### Sewage, Other Liquid Waste, and Rainwater

ŧs

### 01 Mobile Holding Tank

### 02 Retention, Drainage, and Disposal 5 403

### 5 401

(B) Water tanks, pumps, and hoses approved for liquid foods may be used for conveying drinking water if they are cleaned and sanitized before they are used to convey water.

<u>5-4</u>	Sewage, Other Liquid Waste, and Rainwater
<u>Subparts</u>	
5-401	Mobile Holding Tank
<u>5-402</u>	Retention, Drainage, and Delivery
5-403	Disposal Facility

### 5-401 Mobile Holding Tank

5-401.1	5-401.11 Capacity and Drainage
<del>Any</del>	
<u>A</u> sewage h	olding tank present in a mobile FOOD ESTABLISHMENT shall be unit must be:

(A) Sized 15% percent larger in capacity than the water supply tank(s), and

- (B) Sloped to a drain pipe that has ais 1 or greater inch (25 mm) in inner diameter or greater and is equipped with a shut-off valve.
- 5-4025-402Retention, Drainage, and Disposal 5-402.11Delivery5-402.1Establishment Drainage System

Food establishment drainage systems, including grease traps, that convey sewage-shall, including grease interceptors, <u>must</u> be designed, constructed, and installed according to the requirements of the most current edition of the *Uniform*. *Plumbing Code* adopted by Southern Nevada and the Agency of Water Reclamation or the AGENCY OF JURISDICTION.as specified under ¶ 5-202.1(A).

### 5-402.2 5-402.12 Backflow Prevention

A-

(A) Except as specified in ¶¶ (B), and (C) of this section, a direct connection shallmust not exist between the sewage system and a drain receiving dischargesoriginating from equipment in which food, portable equipment, or utensils are placed. An air gap of at least 1" shall be provided<sup>P</sup>

- (B) Paragraph (A) of this section does not apply to floor drains that originate in refrigerated spaces that are constructed as an integral part of the building.
- (A)(C) If allowed by law, a warewashing machine may have a direct connection between the EQUIPMENT drain pipe and the flood level rimits waste outlet and a floor drain when the machine is located within 5 feet (1.5 m) of thea trapped floor drain. To reduce splash at the and the machine outlet is connected to the inlet side of a properly vented floor drain, the drain pipe may be cut at an angle, if adequate air gap is provided trap.

### 5-402.3 5-402.13-Grease TrapInterceptor

(A) As per the regulations adopted by the Southern Nevada Uniform Plumbing Code, one or more grease traps or grease interceptors shall be installed at any FOOD ESTABLISHMENT that generates grease that could enter a sewer system.

(B) Grease traps or grease interceptors shall be EASILY CLEANABLE.

### A grease trap or

(C) If present, a grease interceptor shall be located outside the FOOD ESTABLISHMENT whenever possible. A grease trap or grease interceptor shall not<u>must</u> be located in any area where FOOD is prepared, or where UTENSILs or TABLEWARE are washed or stored. Prior to installation the location shall be APPROVED by the HEALTH-AUTHORITY.to be easily accessible for cleaning, maintenance, and inspections.

(D) Alternative methods of grease disposal (grease machines) may be located within a FOOD\_ESTABLISHMENT with prior approval from the HEALTH AUTHORITY.

## 5-402.4 5-402.14 Conveying Sewage

### SEWAGE shall

<u>Sewage must</u> be conveyed to the point of disposal through an approved sanitary sewage system, or other approved system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated in an <u>APPROVED manner-according to law</u>.<sup>P</sup>

<del>(</del> A)—	Soil and waste lines shall not be installed over FOOD preparation, storage, or EQUIPMENT and UTENSIL
	cleaning areas, unless separated by the floor immediately above or by some other method APPROVED by
	the HEALTH AUTHORITY such as the installation of trough pans under roof drain lines, soil lines, and waste
	lines which are drained into floor sinks.
<del>5-402</del>	.15 Gravity Drainage of Liquid Waste Effluent from EQUIPMENT to Sewer
<del>(A)</del> —	Drainage of all liquid waste effluent from EQUIPMENT to sewer shall be accomplished by gravity at not less than 1 per "12 of fáll.
<del>(B)</del> sewei	Sump pumps and lift stations are not allowed for the purpose of draining FOOD service EQUIPMENT to r, except in the case of a lift station installed outside the FOOD ESTABLISHMENT that has been APPROVED by
	the building and sanitation REGULATORY AUTHORITY. In such a case, an alarm system with both audio
	and visual signals shall be installed within each FOOD ESTABLISHMENT serviced by the lift stations.
<del>(C)</del>	Evaporative waste water may be drained to a heated evaporative pan device APPROVED by the HEALTH AUTHORITY.
<del>(D)</del>	Secondary HVAC drains, within FOOD processing or storage areas, may not terminate at the ceiling or at
	any place that may be a source of FOOD or UTENSIL CONTAMINATION.
-402.5	5-402.16 Removing Mobile FOOD ESTABLISHMENTUNIt Waste
ewage	and other liquid waste shallwastes must be removed from a mobile FOOD ESTABLISHMENT onlyunit at an
pprove	d waste servicing DEPOTarea or by a permitted SEWAGE transport VEHICLE liquid waste hauler. The sewage
<u>nust be</u>	removed in such a way that a public health hazard or nuisance is not created. <sup>Pf</sup>
-403-	
-402.6	Flushing a Waste Retention Tank
tank fo	or liquid waste retention must be thoroughly flushed and drained in a sanitary manner during the servicing
peratio	<u>in.</u>
-403	Disposal Facility
-403.1	5-403.11 Approved Sewage Disposal System
EWAGE	- Shan
ewage	must be disposed through an approved facility that is:
A) /	A public sewage treatment plant-, <sup>P</sup> or
A) /	A public sewage treatment plant-, <sup>p</sup> or

(B) <u>A permitted</u> individual sewage disposal system that is properly-sized, constructed, maintained, and operated asaccording to law.<sup>p</sup>

APPROVED by the HEALTH AUTHORITY or AGENCY OF JURISDICTION.5-403.25-403.12Other Liquid Wastes and Rainwater

Condensate drainage and other non-sewage liquids and rainwater shall<u>must</u> be drained from the point of discharge to disposal<sub>7</sub> according to law.

### 5-501.115-501.13 5-501.21 Outside Storage Prohibitions

(A)	Except as specified in ¶ (B) of this section, refuse receptacles that do not meetmeeting the requirements
	specified in Sectionunder ¶ 5-501.14 4(A) of this Chapter, and that contain materials with FOOD residue, such
	as receptacles that are not rodent_resistant, unprotected plastic bags, and paper bags, or baled units shall <u>that</u>
	contain materials with food residue must not be stored outside.

(B) Cardboard or other packaging material that does not contain food residue, residues and that is awaiting regularly scheduled pick up and delivery to a recycling or disposal site, shall may be stored uncovered outside, if without being in a covered receptacle if it is stored so that it does not create a rodent harborage problem.

### 5-501.125-501.14 5-501.22 Covering Receptacles

Receptacles and waste handling units for refuse, recyclables, and returnables shallmust be kept covered:

- (A) Inside the food establishment, if the receptacles and units:
  - (1) Contain food residue and are not in continuous use, or
  - (2) After they are filled-, and
- (B) With tight-fitting lids or doors if placedkept outside the food establishment.

5-501.135-501.15 5-501.23 Using Drain Plugs

Drains in receptacles and waste handling units for refuse, recyclables, and returnables shall<u>must</u> have drain plugs in place.

### 5-501.145-501.16 5-501.24 Maintaining Refuse Areas and Enclosures

Storage areas and enclosures for refuse, recyclables, or returnables shall<u>must</u> be maintained clean and shall be free of unnecessary items, as specified in Chapterunder § 6-501.20 of these Regulations15.

### 5-501.155-501.17 5-501.25 Cleaning Receptacles

- (A) Receptacles and waste handling units for refuse, recyclables, and returnables shallmust be thoroughly cleaned in a mannerway that does not contaminate food, equipment, utensils, <u>LINENLinens</u>, or single-service <u>ARTICLESand single-use articles</u>, and <u>SINGLE-USE ARTICLES</u>, and waste water shallwastewater must be disposed of as specified in <u>Section under §</u> 5-402.14 of this Chapter<u>4</u>.
- (B) Soiled receptacles and waste handling units for refuse, recyclables, and returnables shallmust be cleaned at a frequency necessary to prevent them from developing a <u>build-upbuildup</u> of soil or from attractingbecoming attractants for insects, and rodents, and other vermin.

### 5-502 5-502 Removal

5-502.1 <u>5-502.11</u> Frequency

Refuse, recyclables, and returnables shallmust be removed from the premises at a frequency that will minimize the development of objectionable odors and other conditions that attract or harbor insects, and rodents and other vermin.

5-502.2 5-502.12 Receptacles or Vehicles

Refuse, recyclables, and returnables shallmust be removed from the premises by way of:

(A) Portable receptacles that are constructed and maintained according to law-, or

5-503

(B) A transport vehicle that is constructed, maintained, and operated according to law.

5-503 Community or Individual Facilities for Disposal and Recycling 5-503.11 Prohibitions

(A) FOOD waste grinders, garbage disposals, FOOD waste digestion systems, and other similar EQUIPMENTthat is designed to introduce FOOD waste into the sanitary sewer are prohibited.

Solid waste <u>shallmust</u> be recycled or disposed of in <u>a PERMITted public or private communityan approved</u> recycling or <u>Solid Wasterefuse</u> facility; or <u>disposed of in an individual refuse facility such as a landfill or incinerator</u> which is sized, constructed, maintained, and operated according to law.

### CHAPTER 6

Chapter 7Chapter 6 Physical Facilities Parts 61 Materials for Construction and Repair 6-1 6-2 62 -Design, Construction, and Installation 6-3 -Numbers and Capacities 6-3 5-2025-201 Location and Placement <u>6-4</u> **Location and Placement** Maintenance and Operation <del>6-4<u>6-5</u></del> **Special Facilities** 6-4 Materials for Construction and Repair 6-101 Indoor Areas 6-102 Outdoor Areas <u>6-1</u> **Materials for Construction and Repair** Subparts 6-101 Indoor Area Surface Characteristics **Outdoor Area Surface Characteristics** 6-102 6-101 -Indoor Areas 6-101 6-101.11 -Area Surface Characteristics (A) Except as specified in ¶ (B) of this section, materials for indoor floor, wall, and ceiling surfaces under conditions of normal use shallmust be: (1) Smooth, durable, and easily cleanable infor areas where food establishment operations are conducted. (2) \_Closely woven and easily cleanable carpet Non-absorbentwhere carpeted areas are allowed, and (2)(3) Nonabsorbent for areas subject to moisture including but not limited tosuch as food preparation areas, walk-in refrigerators, WARE WASHINGwarewashing areas, toilet roomsrestrooms, mobile FOOD ESTABLISHMENT SERVICING DEPOTsunit servicing areas, and areas subject to flushing or spray cleaning methods. In The floors, and coverings for floors, in all areas used in the preparation and storage of FOOD, and for-(B) washing UTENSILs and FOOD service EQUIPMENT, including walk in refrigerators and freezers, and in allrefrigerators, dressing rooms, locker rooms, and rooms with toilets and their vestibules shall be constructed of-SMOOTH, cleanable material, including but not limited to SEALED concrete, terrazzo, quarry tile, ceramic tile, or commercial grades of vinyl composition tile, or as APPROVED by the HEALTH AUTHORITY.a Temporary food establishment: If graded to drain, a floor may be concrete, machine-laid asphalt, dirt or gravel if it is covered with (1) mats, removable platforms, duckboards, or other approved materials that are effectively treated to control dust and mud, and (2) Walls and ceilings must be constructed of a material that protects the interior from the weather and windblown dust and debris.

<del>(A)</del> —	- Closely woven and easily cleanable carpet for carpeted areas. Carpeting is allowed in customer sales areas
	where safety is a concern, but only the carpet squares which are easily removable for cleaning and repair.
<del>(B)</del>	- Wood, wood laminates, particle board, medium density fiber (MDF), or other wood based products may
	not be used as structural support for EQUIPMENT in new or remodeled FOOD service areas. Wood or
	wood-base products may be used for structural support of FOOD EQUIPMENT in other FOOD service areas
	including but not limited to: back bars, and customer self-service areas provided that such wood-based
	support structure is fully encapsulated with stainless steel, FRP, or other material APPROVED by the HEALTH
	AUTHORITY. All external corners shall be radiused, all seams and edges shall be SEALED, and wood or wood-
	base structural support shall not be compromised with penetrations for plumbing, drainage, pipe chases,
	or electrical service. Wood or wood-based products may be used for non-structural cosmetic purposes in
	non FOOD ZONEs of customer interface areas. Wood or wood based products may be used for non-
	structural cosmetic purposes in non FOOD ZONEs of customer interface areas.
6-102	Outdoor Areas

### 6-102 6-102.11 Area Surface Characteristics

- (A) <u>The outdoor walking and driving areas shallmust</u> be surfaced with concrete, asphalt, gravel or other materials that have been effectively treated to minimize dust, facilitate maintenance, and prevent muddy conditions.-<u>Stagnant water shall not be allowed to accumulate.</u>
- (B) Exterior surfaces of buildings for FOOD ESTABLISHMENTs shall and Mobile Units must be of weather-resistant materials.
- (B)(C) Outdoor, and shall comply with all applicable federal, state, storage areas for refuse, recyclables, or returnables must be of materials specified under §§ 5-501.2 and local statutes, regulations, and ordinances5-501.3.
  - (A) Areas for housing rubbish for disposal shall be constructed of paved surface, with metal gates, to enclose the disposal container. Where allowed by the BUILDING AUTHORITY, drains shall be installed to facilitate cleaning of the area. Such drains shall be plumbed to the sanitary SEWER through a grease interceptor to prevent discharge of waste water to the environment.
  - (B) Waste water shall not be allowed to cause health HAZARDs or otherwise impair the environment.

	inc	wais of an roop preparation, or enore washing, and hand washing rooms of a cas, shar have light

(B) The walls of all FOOD preparation, UTENSIL washing, and hand washing rooms or areas, shall have light-colored, SMOOTH, EASILY CLEANABLE surfaces, and such surfaces shall be washable at least up to the highest level reached by splash or spray, up to 8 '\_or ceiling height, whichever is less. Walls in WARE WASHING areas are considered SPLASH ZONEs and shall be covered from the floor to a height of 8 '\_or ceiling height whichever is less, with an impervious material including but not limited to fiberglass-reinforced panels or stainless steel.

### Carpeting

### 6-201.7 6-201.17 Walls and Ceilings, Attachments

- (A) Except as specified in ¶ (B) of this section, attachments to walls and ceilings, including but not limited to such as light fixtures, mechanical room ventilation system components, vent covers, wall and ceiling mounted fans, and decorative items, shall be SMOOTH and EASILY CLEANABLE. Wall covering or ceiling covering materials including but not limited to sheet metal, linoleum, plastic, and similar materials, shall be attached and SEALED to the wall or ceiling as to leave no open spaces or cracks that would PERMIT accumulation of grease or debris, or provide harborage for vermindecorative items, and other attachments must be easily cleanable and secured with no gaps.
- (B) In a consumer area, wall and ceiling surfaces, and decorative items, and attachments that are provided for ambiance shall beneed not meet this requirement if they are kept clean. Areas built, such as catwalks and dance platforms, shall not be a source of CONTAMINATION in any FOOD service area.
  - (A) In transition areas between customer areas and food preparation area sound proofing materials, such as but not limited to durable, cleanable and non-absorbent textile or other material APPROVED by the HEALTH AUTHORITY shall be maintained clean.

### 6-201.8 6-201.18 Walls and Ceilings, Studs, Joists, and Rafters

Except for temporary food establishments, studs, joists, and rafters shallmust not be exposed in areas subject to moisture. If left exposed in other rooms or areas, they shall be suitably finished and kept clean and in good repair.

### 6-202 Functionality

- 6-202.1 6-202.11 Light Bulbs, Protective Shielding
- (A) Except as specified in ¶ (B) of this section, light bulbs shallmust be shielded, coated, enclosed in plastic tubing, or otherwise shatter-resistant, in areas where FOODthere is exposed, including ice machines, and ice bins, or where food, clean equipment, utensils, and <u>LINEN,linens</u>; or unwrapped single-service <u>ARTICLES</u> and single-use articles are stored.
- (B) Shielded, coated, or otherwise shatter-resistant bulbs need not be used in areas used only for storing food in unopened packages, if:

### in unopened packages, if:

- (1) The integrity of the packages cannot be affected by broken glass falling onto them-; and
- (2) The packages can be are capable of being cleaned of debris from broken bulbs before the packages are opened.
- (C) An infrared or other heat lamp shallmust be protected against breakage by a shield surrounding and extending beyond the bulb to ensureso that only the face of the bulb is exposed.

### 6-202.2 6-202.12 Heating, Ventilating, and Air Conditioning System Vents

Heating, ventilating, and air conditioning systems shall<u>must</u> be designed and installed to ensureso that make- up air intake, and exhaust vents, do not cause contamination of food, food-contact surfaces, equipment, or utensils.

(A) All rooms and areas shall be adequately ventilated, and ventilation facilities shall be maintained and operated to ensure that all rooms and areas are kept reasonably free from excessive heat, steam, condensation, vapors, smoke, or fumes. Effective air recovery systems may be used in the ventilation of these rooms and areas.

A vented hood or canopy shall be provided over and above any high temperature dish machine, stove, griddle, broiler, hot top, deep fryer, cheese melter, or other cooking device for FOOD preparation, unless other means of ventilation is-APPROVED by the HEALTH AUTHORITY. Sunday brunches, temporary set- ups, table-side cooking, sampling and-

actition.	stations, may be exempt provided Brease does not decamatice in the minied ate area as determined by the
HEALTH	IAUTHORITY.
<del>(B)</del>	Ventilation hoods, filters and devices shall be designed and maintained to prevent grease or condensate
	from dripping into FOOD, or onto FOOD preparation surfaces. Filters, where used, shall be properly
	installed, and made of appropriate material as specified in Chapter 4-202.15 (C) of these Regulations.
<del>(C)</del>	Where outside air intake ducts are used, they shall be designed and maintained so as to prevent the entry
	of dust, dirt, vermin, or other contaminating materials.
<del>(D)</del> –	Ventilation systems shall comply with local fire prevention requirements and, when vented to the outside,
	shall discharge air in a manner not to impair the environment.
6-202.3	6-202.13 Insect Control Devices, Design, and Installation
(A)	Insect control devices that <u>are used to</u> electrocute or stun flying insects shall <u>must</u> be designed to retain the insect within the device.
<u>(B)</u>	Insect control devices must be installed so that:
	(1) The devices shallare not be-located and/or installed:over a food handling or storage area, and
	(1) Over a FOOD preparation area or,
	(2) In a manner that Dead insects, or and insect fragments, may be thrown or fall onto are prevented
	from being impelled onto or falling on food-contact surfaces, exposed food <sub>72</sub> clean equipment,
	utensils, LINEN, and linens; and unwrapped single-service and single-use articles.

	poom located within a food preparation area must be completely enclosed and provided with a tight fitting and
	bsing door. The restroom must be adequately vented as required by the International Building Code.
6-202.	5 Outer Openings, Protected
(A)	Except as specified in ¶¶ (B), (C), and (E) and under ¶ (D) of this section, outer openings of a food
(,	establishment shallmust be protected against the entry of insects, and rodents, and other vermin by:
	, ,, , , , , , , , , , , , ,
	(1) Filling or closing holes and other gaps along floors, walls, and ceilings <sub>z</sub>
	(2) Closed, tight-fitting windows-, and
	(a)(a) Calid and classes table fitting dama
	(2)(3) Solid, self-closing, tight-fitting doors.
(B)	Paragraph (A) of this section does not apply to FOOD ESTABLISHMENTs that open if a food establishment
	opens into a larger structure including but not limited to, such as a mall, airport, or office building, or into an
	attached structure including but not limited to, such as a porch, and the outer openings from the larger or
	attached structure isare protected against the entry of insects <del>, and</del> rodents and other vermin.
(C)	Exterior doors, used as exits, need not be self-closing if they are:
(0)	
	(1) Solid and tight-fitting,
	(1)(2) Designated for use only when an emergency exists by the fire protection authority that has
	jurisdiction over the food establishment- <u>, and</u>
	(2) [imited use so they are not used for entrance or withfrom the building for numerous other than the
	(2)(3) Limited -use so they are not used for entrance or exit from the building for purposes other than the designated emergency exit use, and they are alarmed and only open with a panic bar.
	(1) Not to be used as a receiving door.
Iŧ	(-)
(D)	Except as specified in ¶¶ (B) and (E) of this section, if the windows or doors of a food establishment, or of a
	larger structure within which a food establishment is located, are kept open for ventilation or for other
	purposes or a temporary food establishment is not provided with windows and doors as specified under ¶ (A)
	of this section, the openings shallmust be protected against the entry of insects, and rodents and other
	<del>vermin</del> by:
	(1) Windows that are protected by 16 mesh/ to 1-inch per screen. (16 mesh to 25.4 mm) screens,
	(2) Properly designed and installed air curtains over doors to control flying insects, or
	(3) Other. The on/off switch shall be positioned outeffective means.

- (E) Paragraph (D) of normal reach and shall activate a micro-switch within two seconds of opening the doorthis section does not apply if flying insects and other pests are absent due to the location of the establishment or other limiting conditions.
- (B) Effective pest control methods shall be implemented in facilities that have open air dining. Open air dining facilities which are not able to comply with this section may be required to submit a RISK Control Plan and pay applicable fees to bring their facility into compliance. A guidance document is provided in Appendix J.
   6-202.16 Exterior Walls and Roofs, Protective BarriersBarrier

• 202.0 • • • EVENO Wais and Roots, Protective Barners<u>Barner</u>

Perimeter walls and roofs of a food establishment shallmust effectively protect the ESTABLISHMENT facilities from the weather and the entry of insects, rodents, and other animals.

6-202.7 Outdoor Food Vending Areas, Overhead Protection

Except for machines that vend canned beverages, if located outside, a machine used to vend food must be provided with overhead protection.

6-202.8 Outdoor 6-202.17 Servicing Areas, Overhead Protection

Servicing depot areas utilized for filling fresh water or the discharge of sewage or other liquid waste freshwater tanks must be provided with overhead protection unless otherwise protected using a closed system of hoses.

### 6-202.76-202.9 Outdoor Walking and Driving Surfaces, Graded to Drain

Exterior walking and driving surfaces shallmust be graded to drain.

### 6-202.86-202.10 Outdoor Refuse Areas, Curbed, and Graded to Drain

Outdoor refuse areas shall<u>must</u> be constructed in accordance with <u>local Building Authority regulations having</u> <u>jurisdiction,law</u> and <u>shallmust</u> be curbed and graded to <u>a</u> drain to <u>collectwhich collects</u> and <u>disposedisposes</u> of <u>liquid</u> <u>wastewastewater</u> that results from the refuse, and from cleaning the area and waste receptacles. If the Building Authority having jurisdiction PERMITs a cleaning station, hot and cold running water, and a drain plumbed to a greaseinterceptor are required for cleaning the station. the sanitary sewer or other approved sewer disposal system.

### 6-202.96-202.11 6-202.19 Private Homes and Living or Sleeping Quarters, Use Prohibition

A private home, a room(s) used as living or sleeping quarters, including bathing facilities and restrooms, or an area directly opening into a room used as living or sleeping quarters, shall must not be used for conducting food establishment operations.<sup>P</sup>

6-202.106-202.12 6-202.20 Living or Sleeping Quarters, and Separation

Living or sleeping quarters located on the premises of a food establishment including but not limited tosuch as those provided for lodging registration clerks or resident managers, shall must be separated from rooms and areas used for food establishment operations by complete partitioning and solid self-closing doors.

-601.1	2 Outdoor BARBECUEs
<del>An-</del> ou	utdoor BARBECUE shall meet the following requirements:
<del>(A)</del> -	Before a FOOD ESTABLISHMENT constructs or operates a BARBECUE, a plan shall be submitted to the
	HEALTH AUTHORITY for approval. The plan shall include a layout drawing showing placement of
	EQUIPMENT and finishes to be used. It shall also include a comprehensive list of all EQUIPMENT to be used,
	including specification sheets. The plan shall include the BARBECUE unit, tables, hot and cold holding
	EQUIPMENT, and FOOD transport EQUIPMENT.
narrat	ive describing the operation of the BARBECUE, including the flow of FOOD to and from the BARBECUE area,
hawing	, preparation, transport, cold and hot holding, cooling of cooked FOOD, and service. Methods for preparing
	nd the kinds of FOOD to be cooked at a BARBECUE, shall be APPROVED by the HEALTH AUTHORITY.dining
	Proof of compliance with local building/fire codes, or ordinances shall be provided, in writing, to the
	TH AUTHORITY, before the Plan Review for a BARBECUE may be completed.
	L-13 Site Requirements
<del>(A)</del>	The HEALTH AUTHORITY shall consider whether to approve the location of a BARBECUE based on factors,
	including, but not limited to, the weather, existing or potential sources of CONTAMINATION, the ability of
	the facility to protect FOOD, and the presence of insects and vermin.
<del>(B)</del>	The BARBECUE shall be located on the property where the FOOD ESTABLISHMENT is located, and cannot
	be more than 50_from the structure housing the ESTABLISHMENT.
<del>(C)</del> –	The site of the BARBECUE shall drain properly to ensure that water will not pool, collect, cause a health
	HAZARD, or otherwise impair the environment. The walking surfaces within 25' of the BARBECUE shall be
	capable of being kept clean and free of organic materials.
<del>(D)</del>	—The area underlying the BARBECUE shall be a hard, cleanable surface.
<del>(E)</del>	The BARBECUE shall be located in an open area with no overhanging trees, wires, or other impediments
	above the BARBECUE.
<del>(F)</del>	A fixed in place, or permanent BARBECUE, shall not be located in a parking lot.
	L.14 Structure Requirements
<del>(A)</del>	All areas at an outdoor BARBECUE, with the exception of the BARBECUE cooking device, shall be provided
	with overhead protection.
<del>(B)</del>	In the area surrounding a BARBECUE, dust shall be minimized by using a device to block wind, or a type of
	ground cover that has been APPROVED by the HEALTH AUTHORITY.
15	EQUIPMENT Requirements
<del>(A)</del>	All FOOD service EQUIPMENT, with the exception of the BARBECUE unit, shall meet design, materials, and
	construction standards of NSF/ANSI or be equivalent to those standards. Metal or other materials meeting
	the FOOD ZONE material and construction requirements of <i>NSF/ANSI Standard</i> 2 may be used for FOOD
	preparation surfaces or transport containers. Metal framing shall be used for all structures under counter
	tops used for FOOD preparation or on, which FOOD EQUIPMENT is installed and/or plumbed.
	(4)(5) All BARBECUE units and EQUIPMENT, not otherwise certified, shall be non-toxic and easy to clean.
	EQUIPMENT, including the interior of a cabinet unit or compartment, shall be constructed so as to have
	SMOOTH and easily are accessible and EASILY CLEANABLE surfaces, with at least 1/8horizontal and
	vertical coves, free from channels, crevices, flanges, ledges, sharp or jagged edges, or other cleaning-
	obstructions. FOOD contact and splash surfaces shall be constructed of a solid material including but-
	not limited to stainless steel, granite, or corian like material. The surfaces shall be free of pits, cracks,
	rust, and other obstructions that could interfere with proper cleaning-without passing through the
	food establishment, and the patrons and staff operate in accordance with a signed Dogs in Outdoor
	<u>Dining Areas Agreement (Appendix C), and</u>

- (6) Caged animals or animals that are similarly confined, such as in a variety store that sells pets or a tourist park that displays animals in areas that are not used for food preparation, storage, sales, display, or dining.
- (B) <u>Live</u> There shall be no provision made at the outdoor BARBECUE area for pre-cooking preparation. The preparation of FOOD shall be completed in the FOOD ESTABLISHMENT before the FOOD is transported to the BARBECUE. Seasoning and sauces may be applied during the cooking process. Cooked product shall

be adequately separated from raw product on the grill. Any service, from the BARBECUE, to the customershall be direct and immediate.

<del>(C)</del>	- Proper protective storage of wood chips, bark, or other organic materials used for smoking and flavoring
	in the cooking process, shall be provided at the BARBECUE located to prevent CONTAMINATION of FOOD.
<del>(D)</del>	
	than 5'_by partitions, planters, walls, or similar means.

(C) All refrigerators intended for the storage of raw FOOD for a BARBECUE shall meet the applicable requirements of NSF/ANSI Standard 7. or dead fish bait must be stored where contamination of food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles cannot result.

<del>(E)</del>	Hot holding EQUIPMENT shall be properly powered, meeting the requirements of NSF/ANSI Standard 4,
	for holding and transporting cooked FOOD.
<del>6 601.16</del>	
( <u>A</u> )	Sufficient-refrigerated and dry storage for FOOD shall be provided for the BARBECUE unit.
(H) (B)	POISONOUS or TOXIC MATERIALS, cleaning materials, and EQUIPMENT shall be stored separately from
× 2	or FOOD contact items.
	17 Hand Wash Facilities
(A)	Shall be conveniently located, operational, and easily accessible all times while the BARBECUE unit is in-
	use.
<del>(B)</del>	BARBECUE units may have the HAND WASHING SINK installed on the unit.
íc)	The HAND WASHING SINK may be installed on an adjacent unit that is part of the same PERMIT.
	The HAND WASHING SINK shall be an NSF/ANSI APPROVED portable unit or,
(E)	The HAND WASHING SINK shall be permanently installed and plumbed on an adjacent wall.
(=) (F)	The HAND WASHING SINK shall be adequate in size, and so located as to permit convenient and expeditious
(-)	use by all employees. The minimum sink size is 10" x 10" x 6" with a 12" clearance above the sink.
<del>(G)</del>	Each HAND WASHING SINK is to be a unit with tempered, or hot and cold running water, with a soap and
(0)	paper towel dispenser, and at least 18 of separation between the sink and FOOD CONTACT SURFACEs.
Calific	
	Jards may be used in areas with limited space, if 18"_of separation are not available.
<del>(H)</del>	At the sole discretion of the HEALTH AUTHORITY, BARBECUE units that are used only to cook cuts of MEAT
	without processing or handling of the cooked product at the BARBECUE, and without service from the
	BARBECUE to the customer, and solely for the handling and processing of the cooked product inside the
	associated PERMITted FOOD ESTABLISHMENT, may be exempt from the requires of Section 6 601.17
	(A) of this Chapter.
601.18 Empl nolovee toile	loyee Toilet Facilities
(A)	
<del>(B)</del> —	Operators of outdoor BARBECUE shall maintain a permission letter from the owner of the facility allowing
	their employees use of the restrooms, during all hours of operation, unless operator and owner are the
	same.
6	5-601.19 Lighting
(A)	At least 50 foot candles of light are required on all work surfaces of EQUIPMENT.
<del>(B)</del>	BARBECUE units without overhead lighting shall cease operations when ambient lighting is
	sufficient to meet this requirement.
	FOOD Shields
	hall be required at all interface areas to provide a barrier between the CONSUMER and unPACKAGED, READY-
	NT FOOD, or FOOD service, FOOD display or FOOD processing areas not separated from the CONSUMER by a
minim	<del>um horizontal distance of 30" or more; and,</del>
<del>(A)</del>	- FOOD shields shall be mounted to intercept a direct line between customer's mouth and the FOOD display
	a <del>rea.</del>
<del>(B)</del>	FOOD shields, as installed, shall comply with the construction, materials, finishes, and formula-
	requirements established by NSF/ANSI Standard 2, Section 5.35.
602 Swap	
602.11	Conditions
	nay sell PRE PACKAGED FOOD, or other items regulated by the HEALTH AUTHORITY or AGENCY OF-
JURISE	DICTION, if the following conditions are met:
<del>(A)</del>	Non-PHF (TCS) items presented for sale in their original packaging may be sold in a booth which has-
	carpeted floors and plastic laminate shelves.

- (B) Refrigerated items for sale in the original package shall be displayed on a floor with a SMOOTH and EASILY CLEANABLE surface.
- (C) Exposed wood is not allowed in the walls, floors or shelving material.

### 7-201 Separation in Storage

7-201.11 Separation POISONOUS OR TOXIC MATERIALS shall

Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, <u>LINENlinens</u>, and single-service <u>ARTICLES</u> and single-use articles by:

(A) Separating the poisonous or toxic materials by spacing or partitioning., <sup>P</sup> and

- (A) Locating the poisonous or toxic materials in an areaa location that is not above food, equipment, utensils, LINEN, and SINGLE-SERVICE ARTICLESInens, and single-service and single-use articles. This paragraph does not apply to equipment, UTENSILS, and utensil cleaners and sanitizers that are stored in ware washingwarewashing areas for availability and convenience, if the materials are stored to prevent contamination of food, equipment, utensils, LINEN, and SINGLE-SERVICE ARTICLESInens, and single-USE ARTICLES.
- (B) Grouping POISONOUS OR TOXIC MATERIALS by the following categories:
- (B) Pesticides, including insecticidesservice and rodenticides.single-use articles.<sup>P</sup>

(1) Detergents, sanitizers, related cleaning and drying agents, caustics, acids, polishes, and otherchemicals.

(C) Pesticides shall be stored in locked cabinets which do not contain FOOD, FOOD UTENSILS, FOOD-EQUIPMENT, SINGLE SERVICE ARTICLES, etc., except as specified in Section 7 301.11 of this Chapter.

<del>(D)</del>		emicals that are directly used in the cleaning and operation of the FOOD ESTABLISHMENT shall be stored	
7-202	<del>in c</del>	a manner that will not contaminate FOOD or FOOD CONTACT SURFACEs. Presence and Use <del>7 202.11 RESTRICTion</del>	
7-202	1	Restriction	
(A)	Only t ESTAE equip	those poisonous or toxic materials that are required for the operation and maintenance of the FOOD- BLISHMENT, including but not limited toa food establishment, such as for the cleaning and sanitizing of ment and utensils, and for-the control of insects and rodents-shall, must be allowed in a food lishment. <sup>Pf</sup>	
(B)	Paragraph (A) of this section does not apply to packaged poisonous or toxic materials <del>, which <u>that</u> are for retail sale as specified in Section 7-301.11 of this Chapter</del> .		
POISOI Poison	NOUS C ous or	2 7-202.12 Conditions of Use OR TOXIC MATERIALS shall be: toxic materials must be:	
(A)	Used	according to:	
	(1)	Law and these regulations <sub>7</sub>	
	(2)	Manufacturer's use directions included in labeling, and, for a pesticide, manufacturer's statementlabel instructions that state that use is allowed in a food establishment $\frac{p}{r_{L}}$	
	(3)	The conditions of certification, if certification is required, for use of the pest control materials., P and	
	<u>(4)</u>	Additional conditions that may be established by the REGULATORY AUTHORITY.Health Authority, and	
(B)	Applied so that:		
	(1)	A hazard to employees or other persons is not constituted-, <sup>p</sup> and	
	(2)	Contamination, including the presence of, without limitation, toxic residues due to drip, drain, fog, splash, or spray on food, equipment, utensils, LINENJinens, and single-service ARTICLES and single-use articles is prevented. for a restricted USE PESTICIDE, this may-use pesticide, must be achieved by: $\frac{p}{2}$	
		<ul> <li>(a) Removing the items<sub>7</sub>,<sup>P</sup></li> <li>(a) <u>ProtectingCovering</u> the items with impermeable covers<sub>7</sub></li> <li>(b) <u>or</u> taking other appropriate preventive <u>measures.actions</u>, <sup>P</sup> and</li> <li>(c) Cleaning and sanitizing equipment<sub>7</sub> and utensils<sub>7</sub> after <u>pesticidethe</u> application.<sup>P</sup></li> </ul>	
(C)	<u>A rest</u> State	ESTRICTED USE PESTICIDE is used, it shall rricted-use pesticide must be applied <u>only</u> by <del>a certifiedan</del> applicator <del>as required in NAC</del> - <u>certified by the</u> of Nevada in accordance with NAC Chapter 555 and 40 CFR 152, or <del>a PERSONan individual</del> under the supervision of a certified applicator. <sup>Pf</sup>	
7-203		Poisonous or Toxic Material Container Prohibitions	

## 7-203.11 POISONOUS OR TOXIC MATERIAL Containers

A container previously used to store poisonous or toxic MATERIAL shallmaterials must not be used to store, transport, or dispense food.<sup>2</sup>

(A) A FOOD container shall not be used to store, transport or dispense POISONOUS OR TOXIC MATERIALS. 7-201 Chemicals

7-204 7-204.	1	7-204.11 <u>Chemicals</u> Sanitizers, Criteria			
		tizers, <u>including chemical sanitizing solutions generated on-site,</u> and other chemical antimicrobials <del>,</del> d-contact surfaces <del>shall must:</del>			
(A)	Meet the requirements as specified in 40 CFR 180.940, Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions), or				
<u>(B)</u>		<u>the requirements 7-204.12 as specified in 40 CFR 180.2020 Pesticide Chemicals Not Requiring a</u> ance or Exemption from Tolerance Non-food determinations. <sup>P</sup>			
7-204.	2	Chemicals for Washing, Treatment, Storage and Processing Fruits and Vegetables, Criteria			
(A)	meet_	icals <u>, including those generated on-site</u> , used to wash or peel raw, <del>and</del> whole fruits and vegetables <del>, shall</del> or used in the <del>requirements specified in 21 CFR 173.315, Chemicals Used in Washing or to Assist in the</del> gtreatment, storage, and processing of fruits and vegetables <del>, must:</del>			
	<u>(1)</u>	Be an approved food additive listed for this intended use in 21 CFR 173 Perfluorinated ion exchange membranes, <sup>P</sup> or			
	<u>(2)</u>	Be generally recognized as safe (GRAS) for this intended use, <sup>P</sup> or			
	<u>(3)</u>	<u>Be</u> the subject of an effective food contact notification for this intended use (only effective for the manufacturer or supplier identified in the notification), <sup>P</sup> and			
	<u>(4)</u>	Meet the requirements in 40 CFR 156 Labeling Requirements for Pesticides and Devices. <sup>P</sup>			
(A) (B)		one as an antimicrobial agent used in the treatment, storage, and processing of fruits and vegetables in a ESTABLISHMENT shall food establishment must meet the requirements specified in 21 CFR 173.368 2.			
7-204.	3	7-204.13 Boiler Water Additives, Criteria			
Chemi additiv		d as boiler water additives shall <u>must</u> meet the requirements specified in 21 CFR 173.310, Boiler water			
7-204.	4	7-204.14 Drying Agents, Criteria			
Drying	agents	used in conjunction with sanitization shallmust:			
(A)		in only components that are listed as one of the following: <del>ygnized as safe</del>			
Gener	(1)	GRAS for use in food as specified in 21 CFR 182 – <i>Substances Generally Recognized as Safe</i> , or 21 CFR 184, <i>Direct Food Substances Affirmed as Generally Recognized as Safe</i> . <sup>P</sup>			
	<del>Gener</del> (2)	ally recognized as safe <u>GRAS</u> for the intended use as specified in 21 CFR 186 –Indirect Food Substances Affirmed as Generally Recognized as Safe <sub>7</sub> . <sup>P</sup>			
	<u>(3)</u>	GRAS for the intended use as determined by experts qualified in scientific training and experience to evaluate the safety of substances added, directly or indirectly, to food as described in 21 CFR 170.30 Eligibility for classification as generally recognized as safe (GRAS), <sup>p</sup>			

	<u>(4)</u>	Subject of an effective Food Contact Notification as described in the Federal Food Drug and Cosmetic Act Section 409(h), <sup>P</sup>
	<del>(3)</del> (5)	_Approved for use as a drying agent under a prior sanction <del>specified in <i>21 CFR 181, Prior Sanctioned</i> Food Ingredients.as described in the Federal Food Drug and Cosmetic Act (FFDCA) § 201(s)(4), <sup>P</sup></del>
	<del>(4)<u>(6)</u></del>	_Specifically regulated as an indirect food additive for use as a drying agent as specified in 21 CFR Parts $\frac{175174}{175174}$ -178-, <sup>p</sup> or
	<del>(1)</del> <del>(5)<u>(7)</u></del>	Approved for use as a drying agent under the threshold of the-regulation process as specified in established by 21 CFR 170.39, Threshold of regulation for substances used in food Contact Articles <u>contact articles</u> , <sup>p</sup> and
(B)	<del>өғ<u>)(</u>5),</del>	sanitization is with chemicals, the approval required requirements under Paragraph Subparagraph (A) (3) (A) (5) (6), or (A)(7) of this section, or the Regulation as an indirect FOOD ADDITIVE required under aph (A) (4) of this Section, shall must be specifically for use with chemical sanitizing solutions. <sup>P</sup>
<mark>7-20</mark> 7-205	2	<u>Criteria for</u> Lubricants <del>7-205.11 with</del> Incidental Food Contact <del>, Criteria</del>
Lubrica	nts <del>sha</del>	Hmust meet the requirements specified in 21 CFR 178.3570 Lubricants with incidental food contact, if

Lub they are used on food-contact surfaces, on bearings and gears located on or within food-contact surfaces, or on bearings and gears that are located so that lubricants may leak, drip, or be forced into food or onto food-contact surfaces.

### 7-206 Pesticides

### RESTRICTED Restricted-Use Pesticides, Criteria 7-206.1 7-206.11

**RESTRICTED USE PESTICIDES, as** 

Restricted-use pesticides specified in Sectionunder ¶ 7-202.12-2(C) of this Chapter, shallmust meet the requirements specified in 40 CFR 152 Subpart I<sub>7</sub> Classification of Pesticides.<sup>P</sup>

Only pesticides APPROVED by the Nevada State Department of Agriculture for use in a FOOD ESTABLISHMENT shall be used.

6	A 3	16	1	and a state of the state of the	the second second
		If a gonor			
17	Υ.		n use	pesticide	15 useu.

Automatic spray dispensers shall be installed pursuant to the manufacturer's instructions, but in (1)no case directly above FOOD, and at least 15 linear feet from any PACKAGED or unPACKAGED FOOD, or from any surface which may come into contact with FOOD or UTENSILs.

- The active material dispersed through the automatic spray dispenser shall be limited to pyrethrins, (2)piperonyl butoxide, and MGK 264 (N octylbicycloheptene dicarboximide).
- (3)Pesticides may not be applied as a component of paint in an area where FOOD is exposed or an area which is subject to drips, drains, or splashes.
- -The operator of a FOOD ESTABLISHMENT, or a Certified Pest Operator, who engages in the regular (B)application of pesticides at the ESTABLISHMENT shall maintain a record of application. Such records shall be kept for 2 years and made available upon the request of the HEALTH AUTHORITY. A copy of each record shall include:
  - (1) The name of the applicator.
  - The name of the chemical(s) used, and the purpose for the application. (2)
  - (3)-The dates of application.
  - The method(s) used for the protection of FOOD, EQUIPMENT, and PERSONs. (4)
  - The method used for cleaning the ESTABLISHMENT after the application of the pesticide. (5)
- Keeping a copy of each report for 2 years. (6)

8-202	Confidentiality of Trade Secrets
8-203	Construction Inspection and Approval—Preoperational Inspections

8-201Facility and Operating Plans8-201.1When Plans are Required

A permit applicant or permit holder must submit properly prepared plans and specifications to the Health Authority for review and approval before:

(A) The construction of a food establishment, Pf

(B) The conversion of an existing structure for use as a food establishment, <sup>pf</sup> or

 (C)
 The remodeling of a food establishment or a change of type of food establishment or food operation as

 specified under 8-302 if the Health Authority determines that plans and specifications are necessary to ensure compliance with these regulations, <sup>pf</sup>

#### 8-201.2 Contents of the Plans and Specifications

The plans and specifications for a food establishment, including a food establishment specified under § 8-201.3, must include, as required by the Health Authority based on the type of operation, type of food preparation, and foods prepared, the following information to demonstrate conformance with these regulation provisions:

### (A) Intended menu,

(B) Anticipated volume of food to be stored, prepared, and sold or served,

- (C) Proposed equipment layout, mechanical and plumbing schematics, construction materials, and finish and lighting schedules,
- (D) Proposed equipment types, manufacturers, model numbers, locations, dimensions, performance capacities, and installation specifications,
- (E) Evidence that standard procedures that ensure compliance with the requirements of these regulations are developed or are being developed, and
- (F) Other information, such as approvals from the building department, fire prevention, and the sewer authority, that may be required by the Health Authority for the proper review of the proposed construction, conversion or modification, and procedures for operating a food establishment.
- 8-201.3 When a HACCP Plan is Required

- (A)Before engaging in an activity for which a HACCP plan is required by law, these regulations, or by the HealthAuthority, a permit applicant or permit holder must submit a properly prepared HACCP plan as specified<br/>under § 8-201.4 to the Health Authority for review and potential approval.
- (B) Before engaging in reduced oxygen packaging without a waiver, as specified under § 3-502.2, a permit applicant or permit holder must submit a properly prepared HACCP plan to the Health Authority.

### 8-201.4 Contents of a HACCP Plan

For a food establishment that is required under § 8-201.3 to have a HACCP plan, the permit applicant or permit holder must submit a properly prepared HACCP plan to the Health Authority that includes:

- (A) General information such as the name of the permit applicant or permit holder, the food establishment address, and contact information,
- (B) A categorization of the types of TCS foods that are to be controlled under the HACCP plan, Pf
- (C) A flow diagram or chart for specific food or category type that identifies:
  - (1) Each step in the process, <sup>Pf</sup> and
  - (2) The steps that are critical control points, Pf
- (D) The ingredients, recipes or formulations, materials and equipment used in the preparation of each specific food or category type and methods and procedural control measures that address the food safety concerns involved, <sup>pf</sup>
- (E) A critical control point summary for each specific food or category type that clearly identifies:
  - (1) Each critical control point, Pf
  - (2) The significant hazards for each critical control point, Pf
  - (3) The critical limits for each critical control point, Pf
  - (4) The method and frequency for monitoring and controlling each critical control point by the designated food handler or the PIC, <sup>Pf</sup>
  - (5) Action to be taken by the designated food handler or PIC if the limits for each critical control point are not met.<sup>Pf</sup>
  - (6) The method and frequency for the PIC to routinely verify that the food handler is following the approved operating procedures and monitoring critical control points, <sup>Pf</sup> and
  - (7) Records to be maintained by the PIC to demonstrate that the HACCP plan is properly operated and managed, <sup>pf</sup>
- (F) Supporting documents such as:
  - (1) Food handler and supervisory training plan that addresses the food safety issues of concern; Pf
  - (2) Copies of blank records forms that are necessary to implement the HACCP plan; Pf
  - (3) Additional scientific data or other information supporting the determination that food safety is not compromised by the proposal. <sup>Pf</sup>

#### (G) Any other information required by the Health Authority.

#### 8-202 Confidentiality of Trade Secrets

The Health Authority will not treat any information as confidential unless a request is made in writing identifying the information to be kept confidential, citations to relevant legal authority, and explanation why confidentiality outweighs the public interest in availability of information. A declaration outlining which information is intended to remain proprietary in nature must accompany the request for confidentiality and will be reviewed for compliance with Nevada law. A confirmation letter will be provided once it is approved.

### construction Inspection and Approval 8 201.11 PERMIT Requirements

8-203 <u>A PERSON shall</u>—Preoperational Inspections

- (A) The Health Authority must conduct one or more preoperational inspections to verify that the food establishment is constructed and equipped in accordance with the approved plans and approved modifications of those plans, has established standard operating procedures as specified under ¶ 8-201.2(E), and is in compliance with law and these regulations.
- (B) A stop work order may be issued by the Health Authority whenever work is being done contrary to the provisions of these regulations or proceeding in a manner not in accordance with approved plans. Once a stop work order is issued, such work must not resume until authorized by the Health Authority.

 8-303
 HEALTH AUTHORITY shall

 8-303.1
 Permit Issuance

o sosi i remit issuance

The Health Authority may issue a health-permit to the applicanta food establishment after the following requirements are met:

(A) A properly completed application is submitted. The application form is available on SNHD's Website.

(A) The required fees arefee is paid.

(B) The required plans, specifications, and information have been reviewed and APPROVED.

- (C) A pre-operational <u>final permitting</u> inspection as specified in Chapter 4-102.11 of these Regulationsshowingshows that the <u>ESTABLISHMENT is built</u>food establishment:
  - (1) Has designated a PIC with adequate food safety knowledge,
  - (2) Has the necessary equipment and infrastructure to support the intended menu and anticipated volume of food to be stored, prepared, and sold or served, and
  - (3) Is in substantial compliance with these regulations either by:

(a) <u>Being constructed, converted</u>, or remodeled in accordance with the approved plans-andspecifications, and that the ESTABLISHMENT is in compliance with these Regulations., or 8-203.12 Change of Ownership of an Existing EstablishmentReceiving 15 or fewer demerits during

An existing FOOD ESTABLISHMENT, at the time of change of ownership, shall meet the following requirements prior to issuance of a health PERMIT:

- (A) The HEALTH AUTHORITY may issue a health PERMIT to a new owner of an existing FOOD ESTABLISHMENT after a properly completed application is submitted, reviewed, APPROVED, fees are paid, and anfinal permitting inspection resulting in 10 DEMERITS or less of CRITICAL or MAJOR VIOLATIONS showing that the establishment is in substantial compliance with these Regulations.
- (B) The HEALTH AUTHORITY may require replacement of existing facilities and EQUIPMENT that are no longer serviceable, with facilities and EQUIPMENT that comply with these Regulations as specified in Paragraph 8-204.12 (H) of this Chapter.
  - (b) Facilities. Food establishments receiving more than 10 DEMERITS of violations shall 15 demerits during a final permitting inspection for change of permit holder must be closed until, if in operation. A reinspection may be conducted after applicable fees are paid, and areinspection is conducted resultingmust result in a total of 10 DEMERITS15 or less ofviolationsfewer demerits, with no identical CRITICAL repeat priority or MAJOR VIOLATIONSremainingpriority foundation violations occurring, for permit issuance.

8-303.18-303.2 8 203.13 Denial of Application for Permit, Notice

If an application for a health permit to operate is denied, the Health Authority shallmust provide the applicant with a notice whichthat includes: (A) The specific reasons and regulationregulatory citations for the permit\_denial-of the health PERMIT. The actions, if any, that the applicant must take to qualify for a health PERMIT.permit, and (B) Advisement of (A) \_\_\_\_Reference to the applicant's right of appeal and the process and time frames for appeal as specified in (C) provided in NAC 439.346. 8-304 **Conditions of Retention** Responsibilities of the Health Authority 8-304.1 204.11 Responsibilities of the HEALTH AUTHORITY esponsibilities of the HEALTH AUTHORITY include; At the time a health-permit is first issued, the Health Authority shallmust inform the permit holder where a (A) copy of these regulations may be obtained, and so that the permit holder is responsible fornotified of the compliance with these Regulations requirements and the conditions of retention, as specified under § 8-304.2, that are applicable to the permit. Failure to provide the above information specified in ¶ (A) of this section does not preventpreclude the Health (B) Authority from taking authorized action, or seeking remedies, if the permit holder fails to comply with these regulations or an order, warning, or directive of the Health Authority. 8-304.2 8-204.12 Responsibilities of the Permit Holder acceptance of the health PERMIT issued by the HEALTH AUTHORITY, the PERMIT HOLDER, in order to retain the health PERMIT shall: A food establishment must: Post the health PERMIT and most recent grade or pass card and health permit in a location in the FOOD (A)ESTABLISHMENT that is clearly conspicuous to the consumer upon entering the food establishment. Understand that Obscuring or unauthorized removal or obscuring of the grade or pass card by individuals, (A) other than the HEALTH AUTHORITY, may result in suspension of the health PERMIT.administrative action including, but not limited to the assessment of applicable fees, Ensure that all facilities which sell alcoholic BEVERAGEs for consumption on PREMISES, shall post health warnings (B) Post a health warning for drinking during pregnancy as specified in NRS 446.842-, (C) Comply with the provisions of these regulations including the conditions of a granted variance, approved waiver, or required HACCP plan, and APPROVED plans as specified in Chapter 4-101.11 and Chapter 4-101.14of these Regulations. (D) Immediately contact the Health Authority to report an illness of a food handler as specified in Chapter 2-201.111 of these regulations. -Immediately discontinue operations and notify the Health Authority if when an imminent health hazard (B)does or may might exist as specified in Section§ 8-304.11404.1 of this chapter. (E) Allow representatives of the Health Authority access to the food establishment as specified in NRS 446.890-(F) and § 8-402.1 of these regulations, Replace facilities and equipment, which are no longer serviceable, with facilities and equipment that comply (G) with these regulations if:when:

(1)	The Health Authority directs replacement because the existing facilities and equipment constitute a
	public health hazard, or because theythe facilities and equipment no longer comply with the criteria
	upon which the facilities and equipment were <del>accepted.approved</del> ,

- (2) The Health Authority directs the replacement of the facilities and equipment at a change of ownership.permit holder, or
- (3) The facilities and <del>/or</del> equipment have exceeded their useful service life and should be replaced in the normal course of operation<sub>r<sub>L</sub></sub>
- (H) (I) Comply with the requirements of NRS 202.2483, the Nevada Clean Indoor Air Act<sub>r</sub>, including posting required signage,
- (I) Comply with directives of the Health Authority, including, but not limited to, time frames for corrective actions specified in inspection reports, supervisory conferences, compliance schedules, notices, orders, warnings, and other directives issued by the Health Authority concerning the permit holder's food establishment or in response to community emergencies,
- (J) Comply with all applicable federal, state and local governmental requirements aslaws related to the operation of a food establishment. The responsibility of upholding these requirements falls solely on the <u>PERMIT</u> HOLDER, permit holder and failure to do so may result in health permit suspension or revocation;

### Accept

- (K) <u>Comply with</u> notices issued and served by the Health Authority<sub>=</sub> according to law,
- (L) Notify the Health Authority in writing no later than 30 calendar days after a business closure. Failure to do so will result in the permit holder being responsible for any fees incurred.
- (M) Notify the Health Authority in writing no later than 30 calendar days after establishment updates such as changes to mailing address or business name, failure to do so will result in the permit holder being responsible for any fees incurred, and
- (N) Maintain a valid health permit to operate by renewing the permit annually when applicable. Failure to pay the health permit fee within the established timeframes will result in late fees and permit suspension.
- (K) PermitsBe subject to the administrative, civil, injunctive, and criminal remedies as specified in NRS 446.940 945, for failure to comply with these Regulations or with a directive of the HEALTH AUTHORITY, including but not limited to time frames for corrective actions specified in inspection reports, supervisory conferences, and other directives.
  2020.2
- 8-304.3 8-204.13 PERMIT Modifications Not Transferable

Proposed modifications in the type of operations to be conducted by a FOOD ESTABLISHMENT, whether still at the health PERMIT application step or after a health PERMIT has been granted, shall not be allowed unless APPROVED by Plan Review. The modification process may include, but not be limited to, a construction application, complete with plans and information describing the proposed modifications in design, EQUIPMENT, and operations. Menu changes only, if they are shown to have no impact on EQUIPMENT, may not require a new Plan Review construction application.

#### 8-204.14 PERMIT Transfer Prohibited

health permit may not be transferred from one person to another <u>person</u>, from one food establishment to another, or from one locationtype of operation to another.

8-202 Enforcement

8-205.11 ACTIVE MANAGERIAL CONTROL

PERMIT HOLDER shall ensure ACTIVE MANAGERIAL CONTROL of the facility unless approved by meeting the

### requirements of Chapter 2-102.11 (A), (B), or (C) of these Regulations.

(A) Facilities with a history of multiple DOWNGRADEs within a year may be required to provide a certified FOOD protection manager during all hours of operation.

Facilities with a certified FOOD protection manager, and a history of frequent DOWNGRADEs and/or closures, may be referred to the HEARING OFFICER for possible suspension of PERMITHealth Authority.

8-203 Shared Facilities

#### 206.11 Violations

A violation of any provision of these Regulations, relating to facilities held in common or shared by more than one PERMIT HOLDER, shall be deemed a violation for each health PERMIT, unless separate distinct and designated areas exist.

#### 8-204 Compliance Schedule

207.11 Violations

The HEALTH AUTHORITY shall document observed violations, require corrective action dates, and may issue a compliance schedule as follows:

(A)	-The elements of a compliance schedule may include, but are not limited to, necessary training, pest control,
	structural modifications, EQUIPMENT upgrades, and/or temperature logs, WARE WASHING machine
	SANITIZATION, and/or cleaning logs.

(B) Facilities placed on a compliance schedule by the HEALTH AUTHORITY may be closed if corrective action dates or elements of a compliance schedule are not met. If closed, facilities shall remain closed until all compliance issues are resolved, applicable fees are paid, and a reopening inspection shows that the establishment has met the compliance schedule and achieves a score of 10 DEMERITS or less of CRITICAL or MAJOR VIOLATIONS. Guidance documents are provided in Appendices G 1 and G 2.

### 8-205 EQUIPMENT Defects

### -208.11 EQUIPMENT Taken Out of Service

QUIPMENT that constitutes a public HEALTH HAZARD shall be red tagged by the HEALTH AUTHORITY and required to be taken out of service. The EQUIPMENT shall not be placed back in service until APPROVED by the HEALTH AUTHORITY. If placed back in service without HEALTH AUTHORITY approval, the facility will be DOW/NGRADEd to the next lower grade and applicable fees assessed.

### Establishing Inspection Interval

- (A) The Health Authority shallmay inspect acad permitted food establishment at least once acvery year as requiredprovided by NRS 446.885, or as often as necessary to ensure compliance with these regulations.
- (B) <u>After Facilities DOWNGRADEd toreceiving a "B" or "C" shall be reinspected downgrade, a food establishment must accept reinspection to ensure correction of violations.compliance with these regulations. The food establishment must pay applicable fees shall be paid within 10 business no later than ten calendar days- after the reinspection to avoid permit suspension. Reinspection shall be conducted after may occur less than 15 businesscalendar days, as determined by the inspector, or may be scheduled sooner after the inspection resulting in the downgrade at the request of the operator.permit holder and at the discretion of the Health Authority. If the operatorPIC requests an inspection prior to 15 businesscalendar days, applicable fees shallmust be paid prior to the reinspection.</u>

8-401.2 Performance and Risk-Based

establis	the parameters specified in § 8-401.1, the Health Authority may conduct more frequent inspections of a food shment based upon the Health Authority's assessment of a food establishment's history of compliance with this tion and the establishment's potential as a vector of foodborne illness by evaluating:
(A)	Past performance, for nonconformance with these regulations or HACCP plan requirements that are priority or priority foundation items,
<u>(B)</u>	Past performance, for numerous or repeat violations of these regulations or HACCP plan requirements that are core items.
<u>(C)</u>	Past complaints investigated and found to be valid,
<u>(D)</u>	The hazards associated with the foods that are prepared, stored, or served,
<u>(E)</u>	The type of operation including the methods and extent of food storage, preparation, and service,
<u>(F)</u>	The number of people served, and
<u>(G)</u>	Whether the population served is a highly susceptible population.
<u>8-402.1</u>	Allowed at Reasonable Times after Due Notice
hours of Health in these outbrea	establishment must allow the Health Authority to inspect the food establishment during normal business or at any other reasonable time. After the Health Authority presents official credentials, the PIC must allow the Authority to inspect the food establishment and must provide information and records for review as specified e regulations and to which the Health Authority is entitled according to NRS 446.890. In the event of a disease ak or suspected disease outbreak, a food establishment must grant emergency access to the Health Authority equest.
<u>8-402.2</u>	Refusal, Notification of Right to Access, and Final Request for Access
<u>(A)</u>	If a person denies the Health Authority full access to inspect a food establishment, or refuses to provide requested information or documents, the Health Authority must inform the person that:
	(1)         The permit holder is required to allow access to the Health Authority as specified under § 8-402.1 of           these regulations, and
	(2) Access is a condition of the acceptance and retention of a food establishment permit to operate.
<u>(B)</u>	If access continues to be denied, the Health Authority may:
	(1) Contact law enforcement in accordance with NRS 446.940 to assist with entrance into the facility, or
	(2) Immediately suspend all food establishment permits, assess any associated fees, and take any further administrative action up to and including permit revocation.
8-402.3	
Intimid	ten- establishment and its employees and agents must not directly or indirectly intimidate a public employee ation of a public officer is a serious violation of these regulations and is grounds for administrative action up to luding permit revocation and food handler safety card revocation.
8-403	Report of Findings

8-403.1 8-302.11 DocumentingDocumentation Information and Observations

<u>After The HEALTH AUTHORITY shall document inspecting a food establishment, the Health Authority must document its findings</u> on an inspection report form, including:

- (A) Administrative information about the food establishment's legal-identity, street and mailing addresses, type of establishmentaddress, inspection date, and other information including but not limited to type of water supply and SEWAGE disposal, status of the health PERMIT, grade of the facility, and management certifications that may be required, and inspection result,
- (B) Specific factual observations of violations, conditions or other deviations from these regulations, which that require correction by the permit holder include, but are not limited to, including:
  - (1) Failure of the <u>PERSON IN CHARGEPIC</u> to demonstrate <u>the</u> knowledge of <u>FOOD BORNEfoodborne</u> illness prevention, application of HACCP principles, and the requirements <u>specified in Chapter 2</u> <u>102.11</u> of these regulations, as specified under § 2-102.1,
  - (2) Failure of food handlers-and, or the PERSON IN CHARGEPIC, to demonstrate their knowledge of their responsibility to report a symptom of a FOOD BORNE ILLNESS-disease or medical condition as specified in Chapterunder ¶¶ 2-201.11 of these Regulations.1(B) and (D).
    - (1) Non-conformance with CRITICAL OR MAJOR VIOLATIONS of these Regulations.
  - (3) Imminent health hazards, priority or priority foundation items, and core items of this regulation,
  - (3)(4) Failure of the appropriate food handlers to demonstrate their knowledge of, and ability to perform in accordance with, the procedural, monitoring, verification, and corrective action practices required by the Health Authority due to an APPROVED VARIANCE or WAIVER.as specified under § 8-103.3,
  - (4)(5) Failure of the <u>PERSON IN CHARGEPIC</u> to provide records required by the Health Authority for determining conformance with a HACCP plan<u>- as specified under Subparagraph 8-201.4(E)(7).</u>

(5)(6) Non-conformance with critical limits of a HACCP plan, and Non-conformance with non-CRITICAL VIOLATIONS of

(C) <u>Corrective actions for deviations from</u> these regulations-

8-403.2 Food Establishment Grades

- (A) Except for temporary food establishments, every food establishment must post its health permit and the current grade or pass card for each permitted area, received at the time of the most recent inspection, in an area that is conspicuous to the consumer upon entering the food establishment.
- (B) Food establishment grades must be determined as follows:
  - (1) A Grade; a demerit score of 0 to 10,
  - (2) B Grade; a demerit score of 11 to 20, and
  - (3) C Grade; a demerit score of 21 to 40.
- (C)
   When a food establishment receives more than 40 demerits in an inspection, the permit must be suspended

   immediately.
   The food establishment must remain closed until the permit holder has corrected the priority

   and priority foundation items, paid all applicable and outstanding fees, and an inspection is conducted that

   results in a score of ten or fewer demerits with no repeat violations of priority foundation items.

- (D) When a food establishment with a current B Grade receives 11 or more demerits or repeat violations of priority or priority foundation items on its reinspection, the food establishment will be placed on a C Grade even if it does not receive 21 or more demerits. A subsequent reinspection must be conducted as specified in ¶ 8-403.2(D) and the food establishment must pay all applicable and outstanding fees.
- (E)
   When a food establishment with a current C Grade receives 11 or more demerits or repeat violations of priority or priority foundation items on its reinspection, the food establishment's permit must be suspended even if it receives fewer than 41 demerits. The food establishment must remain closed until the permit holder has corrected the priority and priority foundation items, paid applicable and outstanding fees, and an inspection is conducted resulting in a score of 10 or fewer demerits with no repeat violations of priority or priority foundation items.
- (F)
   Notwithstanding the grade criteria of ¶ 8-403.2(B), whenever a repeat violation of a priority item is

   documented in the next routine inspection, the food establishment must be downgraded to the next lower grade.
- (G) Notwithstanding the grade criteria of ¶ 8-403.2(B), whenever the Health Authority orders a food establishment to take a piece of equipment out of service because it constitutes a public health hazard or is not approved, the equipment must remain out of service until approved. If a food establishment places the equipment back into service without approval, the food establishment must be downgraded to the next lower grade.
- (H)
   Food establishments such as, annual itinerants, farmers markets, and those undergoing a Change of Permit

   Holder will be inspected on a pass fail criteria which is determined as follows:

(1) Pass; a demerit score of 0 – 15,

(2) Fail; a demerit score of 16 or more.

 Image: Notwithstanding the Pass/Fail criteria of ¶ 8-403.2(H), whenever a repeat violation of a priority item is

 documented in the next routine inspection, the permit must be immediately suspended. The food

 establishment must remain closed until the permit holder has corrected the priority and priority foundation

 items, paid any applicable fees, and an inspection is conducted that results in a score of 15 or fewer

 demerits with no repeat violation of a priority or priority foundation item.

### 8-403.3 Refusal to Sign Acknowledgment.

- (A) When an individual declines to sign an acknowledgment of receipt of inspection findings as specified in § 8-403.3, the Health Authority must inform the individual that:
  - (1) Signing is for the sole purpose of acknowledging receipt of a copy of the report and does not signify agreement with findings,
  - Refusal to sign an acknowledgment of receipt will not affect the permit holder's obligation to correct the priority and priority foundation items noted in the inspection report within the time frames specified, and
  - (3)
     Refusal to sign an acknowledgment of receipt is noted in the inspection report and conveyed to the

     Health Authority's historical record for the food establishment, and
- (B) After informing the individual as specified in ¶ (A), the Health Authority must make a final request that the PIC sign an acknowledgment receipt of inspectional findings.

8-404 Imminent Health Hazard

### 8-404.1 Ceasing Operations and Reporting

 (A)
 Except as specified in ¶ (B) and (C) of this section, a permit holder must immediately discontinue operations

 and notify the Health Authority if an imminent health hazard may exist because of an emergency such as a
 fire, flood, extended interruption of electrical or water service, sewage backup, misuse of poisonous or toxic

 materials, pest infestation, onset of an apparent foodborne illness outbreak, gross insanitary occurrence or condition, or other circumstance that may endanger public health.<sup>P</sup>

<u>A permit holder need not discontinue operations in an area of an establishment that is unaffected by the</u> **302.12** Specifying Time Frames for Corrections

	ations as follows:
<u>(B)</u>	_ <del>To immediately cease and desist an operation if an IMMINENT HEALTH HAZARD exists. imminent health</del>
× 2	After DEMERITs are recorded a PERMIT HOLDER may at the time of inspection, correct a CRITICAL or IOR VIOLATION of these Regulations.
(C)	Considering the nature of the potential hazard of the CRITICAL or MAJOR VIOLATION involved and the
<u></u>	complexity of the corrective action needed, the Health Authority may agree to continuing operations in the
	event of an extended interruption of electrical or water service if:
	(1) A written emergency operating plan has been approved,
	(1) A written emergency operating plan has been approved,
	(2) Immediate corrective action is taken to eliminate, prevent, or control any food safety risk and
	imminent health hazard associated with the electrical or water service interruption, and
	(3) The Health Authority is informed upon implementation of the written emergency operating
	plan.
8-404.	2 Resuming Operations
7	
(A)	If a food establishment voluntarily ceases operation due to an imminent health hazard, the permit holder or
	PIC must notify the Health Authority when all items on the Checklist for Reopening After an Imminent Health
	Hazard, Appendix B are in compliance and, receive approval to reopen by the Health Authority, prior to
	resuming operations.
(B)	If food establishment operations are discontinued by the Health Authority due to an imminent health hazard,
1-1	as specified in ¶ 8-404.1 of this Chapter, the permit holder or PIC must pay applicable fees and when all items
	on the Checklist for Reopening After an Imminent Health Hazard, Appendix B, are in compliance and verified
	by the Health Authority, may be granted written permission to resume operation.
(C)	If food establishments operations are discontinued for excessive priority and priority foundation items as
101	specified in § 8-403.2(B) of this Chapter, the permit holder of PIC must pay applicable fees and pass a
	reopening inspection with 10 or fewer demerits, and no repeat violations of priority or priority foundation
	items.
(D)	A food establishment with a history of non-compliance, including repeat violations of priority or priority
<u>(D)</u>	foundation items, may be required to enter an administrative process such that required training, compliance
	plans, or other stipulations are placed on the permit to operate.
0.405	Defaulty there and Defaulty Foundation there.
<u>8-405</u> 8-405.	Priority Items and Priority Foundation Items Timely Correction
<u>0-403.</u>	<u>I Innery Correction</u>
<u>(A)</u>	Except as specified in ¶ (B) of this section, a permit holder must at the time of inspection correct a violation
	of a priority item or priority foundation item of these regulations and implement corrective actions for a
	HACCP plan provision that is not in compliance with its critical limit.
(A)(B)	Considering the nature of the notential bazard involved and the complexity of the corrective action
<del>(А)<u>(</u>В)</del>	<u>Considering the nature of the potential hazard involved</u> and the complexity of the corrective action needed, the Health Authority may agree to or specify a longer time frame, not to exceed 15 business days-
	after the inspection, for the PERMIT HOLDER to correct CRITICAL or MAJOR VIOLATIONS. Depending on the
	violation, the HEALTH AUTHORITY may impose additional RESTRICTions on the facility for the allotted time-
	frame <sup>pf</sup>

(1)	For priority items, correction is required within 72 hours after the inspection, or
(2)	For priority foundation items and HACCP plan deviations, correction is required within 10 calendar days after the inspection.
<u>8-405.2</u>	Verification and Documentation of Correction
	holder must notify the Health Authority within the timeframe specified in ¶ 8-405.1(B), unless specified, after corrections are made to priority or priority foundation items, or a HACCP plan deviation.
<u>8-406</u>	Time shall Frame for Correction of Core Items
ins	sept as specified in ¶ (B), the permit holder must correct non-CRITICAL VIOLATIONScore items by the next- pection or within a <u>a</u> date and time specified under the compliance scheduleby the Health Authority but no er than 90 calendar days after the inspection.
	02.13 Issuing Report and Obtaining Acknowledgment of Receipt Inclusion of the inspection:
(A)	The Health Authority shall provide the original of the completed inspection report, and the notice to- correct violations, to the PERMIT HOLDER or to the PERSON IN CHARGE. Request a signed acknowledgement of receipt on the voucher.
Post the ap cor	propriate grade, based upon the inspection findings and the condition of the facility, at <u>may approve a</u> npliance schedule that extends beyond the time of inspection.limits specified under ¶ (A)
4	State that an opportunity for appeal from any notice or inspection findings will be provided if a written request for a hearing is filed with the HEALTH AUTHORITY within the period established at the time of notice of correction.
8-302.14	I <mark>Refusal to Sign Acknowledgment</mark> ¡HORITY shall:
	RSON who declines to sign an acknowledgment of receipt of inspection findings as specified in Paragraph 8-
	his Chapter that:schedule of compliance
	(1) An-acknowledgment of receipt does not constitute an agreement with findings. (2) Refusal to sign an acknowledgment of receipt will not nullify the PERMIT HOLDER's obligation to- correct the violations noted in the inspection report within the time frames specified.
Ar	efusal to sign an acknowledgment of receipt shall be documented on the voucher and placed in the HEALTH- AUTHORITY's historical file for the EOOD ESTABLISHMENT.
Make a fina	A request that the PERSON IN CHARGE sign an acknowledgment receipt of inspection findings.
	Provide the original of the unsigned inspection voucher to the PERSON IN CHARGE.
N 1	- Public Information
The HEA	LTH AUTHORITY shall treat the inspection report as a public document and shall make it available for
	PERSON who requests it as provided in State statute or regulation.
8-302.16	Verification and Documentation of Correction of CRITICAL VIOLATIONS
	+ AUTHORITY shall:
	After observing at the time of inspection a correction of a CRITICAL or MAJOR VIOLATION or HACCP PLAN eviation, enter the violation and information about the corrective action on the inspection report.
	As specified in Paragraph 8 302.11 of this Chapter, after receiving notification that the PERMIT HOLDER has
N 2	corrected a CRITICAL or MAJOR VIOLATION, or corrected a deviation from their APPROVED HACCP PLAN,
	the HEALTH AUTHORITY shall verify the correction of the violation, document the information on an
	inspection report, and enter the report in the HEALTH AUTHORITY's records.
<del>8-302</del>	FOOD ESTABLISHMENT Grades
<del>8 303.11 G</del>	
	PERMIT categories that are on a Pass/Fail, or a non DEMERIT PERMIT APPROVED/PERMIT not APPROVED,
	every FOOD ESTABLISHMENT in the HEALTH AUTHORITY's jurisdiction shall post the health PERMIT and
	and, stating the grade received at the time of the most recent inspection, in an area that is clearly
conspicu	ious to the CONSUMER upon entering the FOOD ESTABLISHMENT.
( <u>A)</u>	FOOD ESTABLISHMENT grades shall be determined as follows:

(1) "A" Grade; an ESTABLISHMENT having a DEMERIT score of not more than 10.

- (3) "C" Grade; an ESTABLISHMENT having a DEMERIT score of more than 20 but not more than 40. If the score of the establishment is more than 40 DEMERITs, the health PERMIT shall be suspended immediately. Theestablishment shall remain closed until the operator has corrected the violations, paid any applicable fees, and an inspection is conducted that results in a score of 10 or less DEMERITs with no identical CRITICAL or-MAJOR VIOLATION remaining-submitted
  - (B) If upon reinspection of a "B" Grade the establishment is unable to achieve a score of 10 or less DEMERITs, with no identical repeat CRITICAL or MAJOR VIOLATIONS remaining, the establishment will be placed on a "C" Grade. A subsequent reinspection will be conducted as specified in Paragraph 8 301.11 (B) of this Chapter.

If upon reinspection of a "C" Grade the establishment is unable to achieve a DEMERIT score of 10 or less DEMERITs, with no identical repeat CRITICAL or MAJOR VIOLATION remaining, the establishment will be closed. The establishmentshall remain closed until the operator has corrected the violations, paid applicable fees, and an inspection is conductedresulting in a score of 10 or less DEMERITs with no identical repeat CRITICAL or MAJOR VIOLATION remaining.

(C) Notwithstanding the grade criteria of Paragraph 8-303.11 (A) of this Chapter, whenever an identical consecutive CRITICAL or MAJOR VIOLATION is documented, the establishment shall be DOWNGRADEd to the next lower grade with a reinspection required and associated fee paid as specified in Paragraph 8-301.11 (B) of this Chapter.

8-303 IMMINENT HEALTH HAZARD

#### 8-404.1 8 304.11 Ceasing Operations and Reporting

Except as specified in Paragraph (B) of this Section, a PERMIT HOLDER shall immediately discontinue operations and notify the HEATH AUTHORITY if an IMMINENT HEALTH HAZARD may exist because of an emergency, includingbut not limited to fire, flood, water service outage, interruption of power service for longer than two hours, lack of adequate refrigeration, SEWAGE backup, misuse of POISONOUS OR TOXIC MATERIALS, onset of asuspect FOOD BORNE ILLNESS outbreak, gross unsanitary occurrences or conditions, or other circumstance that may endanger public health.

(A) A permit holder need not discontinue operations in an area of an establishment that is unaffected by the IMMINENT HEALTH HAZARD.

#### 8-404.28-404.1-8-304.12 Resuming Operations

If operations are discontinued as specified in Paragraph 8 304.11 of this Chapter, or as specified in *NAC 446.100*, the PERMIT HOLDER shall obtain approval from the HEALTH AUTHORITY before resuming operations. Prior to resuming operations, the operator shall ensure that the IMMINENT HEALTH HAZARD has been corrected and that all items listed in the "Checklist for Re-Opening Inspection after an IMMINENT HEALTH HAZARD," are in service: A guidance document is provided in Appendix H.

(B) Facilities documented by the HEALTH AUTHORITY, to be operating under conditions of an IMMINENT HEALTH-HAZARD and that were issued an immediate CEASE AND DESIST ORDER, shall pay applicable fees and pass a reopening inspection, with 10 or less DEMERITS, and no identical repeat CRITICAL or MAJOR VIOLATIONSremainingpermit holder.

- (A) Facilities that voluntarily ceased operation shall notify the HEALTH AUTHORITY when all items on the "Checklist for Re Opening Inspection after an IMMINENT HEALTH HAZARD," are in service and, as determined by the HEALTH AUTHORITY, may reopen. Depending on the IMMINENT HEALTH HAZARD the HEALTH AUTHORITY shall determine if a re-opening inspection is required.
- (B) Operators of facilities closed for excessive violations as specified in Section 8 303.11(B) of this Chapter, or with a history of non compliance, including repeat CRITICAL or MAJOR VIOLATIONS, may be required to attend a supervisory conference prior to an inspection to reopen the facility taking place. Applicable fees shall be paid prior to a reopening inspection.

#### 8-304 Unsafe Food

### 8-407 8-305.11 — Examination and Condemnation of Food

(A) As specified in NRS 585.360 whenever the Commissioner or any of his authorized agents shall find in any room, building or other structure, or VEHICLE of transportation, any MEAT, seafood, POULTRY, vegetable, fruit or other perishable articles which are unsound, or contain any filthy, decomposed or putrid substance, or that may be poisonous or deleterious to health or otherwise unsafe, the same being hereby declared to be a nuisance, the Commissioner or his authorized agents shall forthwith condemn or destroy the same, or in any other manner render the same unsalable as human FOOD.

### (B) As specified in NRS 446.920:

(1) FOOD may be examined or sampled by the HEALTH AUTHORITY as often as may be necessary to determine freedom from adulteration or misbranding. The HEALTH AUTHORITY may, upon written notice to the owner or PERSON IN CHARGE, place a hold order on any FOOD which is determined, or has probable cause to believe, to be unwholesome or otherwise ADULTERATED or MISBRANDED.

- (2) Under a hold order, FOOD shall be allowed to be suitably stored. It shall be unLAWful for any PERSON to remove or alter a hold order, notice, or tag placed on FOOD by the HEALTH AUTHORITY. Neither such FOOD, nor the containers thereof, shall be relabeled, repacked, reprocessed, altered, disposed of, or destroyed without approval of the HEALTH AUTHORITY, except by order of a court of competent jurisdiction.
- (3) The owner or PERSON IN CHARGE may make a written request for a hearing as specified in NRS 446.895. On the basis of evidence produced at such hearing, or on the basis of an examination, if a written request for a hearing is not received within 10 business days, the HEALTH AUTHORITY may vacate the hold order, issue a written order, or direct the owner or PERSON IN CHARGE of the FOOD which was placed under the hold order, to denature or destroy such FOOD or to bring it into compliance with the provisions of these Regulations. Such order of the HEALTH AUTHORITY to denature or destroy such FOOD or bring it into compliance with the provisions of these Regulations shall be stayed if the order is appealed to a court of competent jurisdiction within three days.
- (4) When not on a hold order by the HEALTH AUTHORITY operators may voluntarily dispose of FOOD believed to be unwholesome or otherwise ADULTERATED or MISBRANDED.

### 8-602 Permit Suspension and Reinstatement

8-306.11 Suspension or Revocation of Permit, Reinstatement of Suspended Permit, Hearings

Permits issued under the provisions of these regulations may be suspended as specified in NRS 446.880.

- (A) Health-Permits issued under the provisions of these regulations may be suspended temporarily by the Health-Authority for failure of the permit holder to comply with the requirements of these regulations.
  - (A) Whenever a PERMIT HOLDER or operator has failed to comply with any notice issued under the provisions of these Regulations, the PERMIT HOLDER or operator shall be notified in writing that the PERMIT is, upon service of the notice, immediately suspended or that the establishment is DOWNGRADEd. The notice shall contain a statement informing the PERMIT HOLDER or operator that an opportunity for a hearing will be provided if a written request for a hearing is filed with the HEALTH AUTHORITY as soon as possible.
  - (B) Whenever the HEALTH AUTHORITY finds an unsanitary or other condition in the operation of a FOOD ESTABLISHMENT which, in its judgment, constitutes a substantial HAZARD to the public health, he may without warning, notice, or hearing issue a written order to the PERMIT HOLDER or operator citing the condition, specifying the corrective action to be taken, and specifying the time within which the action must be taken. The order may state that the PERMIT is immediately suspended and all FOOD operations shall be immediately discontinued. Any PERSON to whom such an order is issued shall comply with it immediately. Upon written petition to the HEALTH AUTHORITY, the PERSON shall be afforded a hearing as soon as possible.
- Any PERSON whose PERMIT has been suspended may, at any time, make application for reinspection for reinstatementof the PERMIT. Within 10 business days following receipt of a written request, including a statement signed bythe applicant that in his opinion the conditions causing suspension of the PERMIT has been corrected, the-HEALTH AUTHORITY shall make a reinspection. If the applicant is complying with the requirements of these-Regulations, the PERMIT shall be reinstated.
- (B)(A) For serious or repeated violations of any of the requirements of these regulations, or for interference with the Health Authority in the performance of their duties, the permit may be permanently revoked after an opportunity for a hearing has been provided by the Health Authority\_Before taking such an action the HEALTH-AUTHORITY shall notify the PERMIT HOLDER, in writing, stating the reasons for which the permit is subject torevocation and advising the permit holder of the requirements for filing a request for a hearing. A permit may be suspended for cause pending its revocation or a hearing relative thereto.
- Unless a request for a hearing is filed with the HEALTH AUTHORITY by the PERMIT HOLDER within five days, the HEALTH AUTHORITY may permanently revoke a PERMIT after five days following service of the notice.
- (C) The hearings provided for in this section shall be conducted at a time and place designated by the HEALTH AUTHORITY. Based upon the record of the hearing, the HEALTH AUTHORITY shall make a finding and may sustain, modify, or rescind any official notice or order considered in the hearing. A written report of the hearing decision shall be furnished to the PERMIT HOLDER by the HEALTH AUTHORITY.

602	
	Once the health PERMIT has been revoked, as specified in Section 8-306.11 of this Chapter, the PERMIT-
	operator is to discontinue all FOOD activity associated with the FOOD ESTABLISHMENT in question. Failure to
	do so may result in:
	(1) The Health Authority requesting an injunction from the District Court of Jurisdiction, against
	continued operation by the previous permit holder.
	(2)(1) The Health Authority referring the non-compliance to the District Attorney of Jurisdiction for-
	prosecution.
<del>(A)</del>	Once the timeframe for appeal has transpired any FOOD remaining at the location in question may be- confiscated and destroyed by the HEALTH AUTHORITY as specified in Section 8-305.11 of this Chapter.

(3)	Closing the food establishment by summarily-suspending a permit to operate in accordance with NRS
	446.935 <del>(2b).</del>

8 401.13

(B) Any such order must not be released to the public, except as required by law or by order of a court having jurisdiction, or after redacting out the name and any identifying information for the food handler.

#### 8-501.3 Restriction or Exclusion Order, Warning or Hearing Not Required, Information Required in Order

Based on the findings of the investigation as specified in Paragraph 8 401.11 of this Chapter¶ 8-501.1, and to control disease transmission, the Health Authority may issue an order of restriction or exclusion to a suspected food handler or the permit holder without prior warning, notice of a hearing, or a hearing. Any such order must:

- (A) State the reasons for the restriction or exclusion that is ordered,
- (B) State the evidence that the food handler or the permit holder must provide in order to demonstrate that the reasons for the restriction or exclusion are resolved,
- (C) State that the suspected food handler or the permit holder may request a hearing by submitting a timely request as provided in law, and
- (D) Provide 8 401.14 Release of the name and address of the Health Authority representative to whom a request for a hearing may be made.

8-501.4 Removal of Exclusions and Restrictions

#### The Health Authority must release a food handler from restriction or exclusion

The FOOD HANDLER shall remain RESTRICTed/EXCLUDEd until released to return to work by the HEALTH AUTHORITY in accordance with *NAC* 441ANRS 446.935 and the conditions specified under § 2- 201.3.

8-6	Administrative Process
Subparts	Administrative Dresses for Non Compliance
8-601	Administrative Process for Non-Compliance
<u>8-602</u>	Permit Suspension and Reinstatement
8-603	Appeal Process

#### 8-601 Administrative Process for Non-Compliance

Food establishments exhibiting a history of uncontrolled risk factors for foodborne illness and non-compliance with these regulations may enter the administrative process for non-compliance.

(A) Additional conditions may be placed upon the permit.

(B) Failure to gain control of risk factors for foodborne illness at the facility can lead to further administrative actions up to and including suspension of the permit to operate, pending permit revocation.

### 8-602 Permit Suspension and Reinstatement

8-602.28-602.1 Suspension or Revocation of Permit, Reinstatement of Suspended Permit, Hearings

Permits issued under the provisions of these regulations may be suspended as specified in NRS 446.880.

(A) Permits issued under the provisions of these regulations may be suspended temporarily by the Health Authority for failure of the permit holder to comply with the requirements of these regulations.

- (B) Whenever a permit holder or PIC fails to comply with any notice issued under the provisions of these regulations, the permit holder or PIC must be notified in writing that the permit and associated permits are, upon service of the notice, immediately suspended pending permit revocation. The notice must contain a statement informing the permit holder or PIC that an opportunity for a hearing will be provided if a written request for a hearing is filed with the Health Authority within five business days.
- (C) Whenever the Health Authority finds an insanitary or other condition in the operation of a food establishment which, in its judgment, constitutes an imminent health hazard to public health, it may without warning, notice, or hearing issue a written order to the permit holder or PIC citing the condition, specifying the corrective action to be taken, and specifying the time within which the action must be taken. The order may state that the permit is immediately suspended and all food operations at all associated permits must be immediately discontinued. Any person to whom such an order is issued must comply with it immediately. Upon written petition to the Health Authority, the person must be afforded a hearing as soon as possible.
- (D) Any person whose permit(s) has been suspended but is not pending revocation may, at any time, make application for reinspection for reinstatement of the permit. Within ten business days following receipt of a written request, including a statement signed by the applicant that in their opinion the conditions causing suspension of the permit have been corrected, the Health Authority may conduct a reinspection. If the applicant is in compliance with the requirements of these regulations, the permit must be reinstated.
- (E) For serious or repeated violations of any of the requirements of these regulations, or for interference with the Health Authority in the performance of their duties, the permit may be permanently revoked after an opportunity for a hearing has been provided by the Health Authority. Before taking such an action the Health Authority must notify the permit holder, in writing, of the reasons for which the permit is subject to revocation and advising the permit holder of the requirements for filing a request for a hearing. A permit may be suspended for cause pending its revocation or a hearing relative thereto.
- (F) Unless a request for a hearing is filed with the Health Authority by the permit holder within five business days following service of the notice, the Health Authority may permanently revoke the permit.
- (G)
   The hearings provided for in this section must be conducted at a time and place designated by the Health

   Authority. Based upon the record of the hearing, the Health Authority must make a finding and may sustain,
   modify, or rescind any previous official notice or order considered in the hearing. A written report of the

   hearing decision must be furnished to the permit holder by the Health Authority.
   Number of the

#### 8-602.2 Post Revocation Action

- (A) Once the permit has been revoked, as specified in § 8-602.1, the permit holder must discontinue all food activity associated with the food establishment in question. Failure to do so may result in:
  - (1) The Health Authority requesting an injunction from the District Court of Jurisdiction, against continued operation by the previous permit holder.
  - (2) The Health Authority referring the non-compliance to the District Attorney of Jurisdiction for prosecution.
- (B) Once the timeframe for appeal has transpired, any food remaining at the location in question may be denatured and destroyed by the Health Authority as specified in NRS 446.920.

	Definitions
	9-101 Applicability and Listing of Terms
<del>9 101.1</del>	
	The following definitions shall apply in the interpretation and application of this Chapter. 9-102 — Definitions
DISTRE	SSED FOOD means the quality of the FOOD product may have been reduced without compromising the safety of
	the FOOD.
	DOCK BOOT SEALS means the apparatus mounted around the receiving doors of the facility that eliminates air-
	gaps between the truck and the receiving dock.
	FLIPPER means a can with a bulged or swollen end which when depressed will force the opposite end of the can-
	to bulge or swell.
FIRST I	N FIRST OUT (FIFO) means a method of FOOD stock rotation that calls for use of the oldest FOOD products first-
	according to packing date.
	LEAKER means any container that shows evidence of leakage.
	RECONDITIONING means any sanitary process or procedure by which distressed merchandise can be-
	made suitable for consumption or use by the public.
SALVA	GEABLE FOOD MERCHANDISE means any damaged or DISTRESSED FOOD item or product from a manufacturer
	closeout, or distressed merchandise which can be reconditioned, provided it is not ADULTERATED, contaminated,
	or MISBRANDED.
	SPRINGER means a can with a bulged or swollen end which after depression returns to its bulged or swollen
	condition.
	SWELLER means a can that exhibits a bulged end.
	WAREHOUSE means any place, building, structure, room or portions thereof where bulk quantities of PACKAGED
	FOOD are stored. WAREHOUSE PERMITs may be required in other PERMITted facilities where bulk quantities of
	PACKAGED FOOD are stored in areas, not contiguous with and part of another health PERMIT, which is billed by
	square footage, including but not limited to casinos, retail grocery sales and/or processing plants, and stand alone
	wholesale refrigerated or dry storage facilities.

9-201 WAREHOUSES

9-201.11 Facility Plans

An applicant-for a PERMIT to operate a WAREHOUSE facility shall submit to the HEALTH AUTHORITY properly-prepared plans and specifications for review and approval, as specified in Chapter 4 of these Regulations.

	General WAREHOUSES
	Requirements
WAREH	OUSEs used for storage of PRE-PACKAGED, non-PHF (TCS) or canned product in original boxes or on pallets, with-
	m breakdown shall have:
	Walls that are SMOOTH and in good repair.
	-Floors that are SMOOTH, non-absorbent, cleanable, durable, and maintained in good repair.
<del>(C)</del>	Floor and wall junctures which are coved and closed to no larger than 1/32 . All base coving shall be made
	with the following materials:
	(1) Epoxy grout or concrete curbs with a 45° angle at the top.
	(2) Stainless steel.
	(3) Rubber/vinyl.
<del>(D)</del>	-20 foot-candles of artificial light at 30 <sup>"</sup> _above the floor.
<del>(E)</del>	Lights over open FOOD shall be shielded. Light fixtures, within reach of pallet moving EQUIPMENT and
	cleaning EQUIPMENT, shall be protected from accidental breakage by wire cages, metal, mesh, or equivalent.
<del>(F)</del>	Ceilings with no exposed insulation, with use of scrim sheeting as a minimum.
(F) (G)	-Overhead SEWAGE lines troughed with drainage to an APPROVED sanitary sewer.
(U) (H)	Air curtain(s), DOCK BOOT SEALS, doors with weather stripping, or other APPROVED method for control of
~ /	dust, rodents, insects, and birds at receiving doors and at all other openings into WAREHOUSE areas.
<del>(I)</del>	A restroom with a toilet and HAND WASHING SINK inside the facility serviced with hot and cold water,
(-)	APPROVED soap and disposable towels, adequate ventilation, and a self closing door. Restroom walls shall
	have a 4' wainscoting of SEALED, impervious material, a SEALED base cove, and SEALED impervious
	material.
<del>(J)</del>	WAREHOUSE facilities, built or substantially remodeled after the adoption of these Regulations, shall have
(3)	a mop sink or curbed floor unit serviced with hot and cold running water. Existing WAREHOUSE facilities,
	with only a hose bib, shall provide for filling a mop bucket and for disposing of mop water into a sanitary
	sewer. Hoses attached to a water source shall have as a minimum an atmospheric vacuum breaker.
<del>(K)</del>	-Except as specified in Section 9-202.12 of this Chapter, shelving or dunnage racks, where provided, shall be
(11)	ASE/ANSF or equivalent with a clearance from the floor as follows:
	(1) 6"minimum for up to 36" shelving depth, or
(L)	(2) <u>12"minimum for shelving&gt;36." depth.</u>
(L) (M)	Gondolas and removable kick plate type shelving are acceptable only in retail grocery areas. To facilitate rodent control, general cleaning, and inspection access, clear zones shall be maintained
(111)	between walls and pallets in WAREHOUSE storage areas and shall be:
	$\frac{(1)}{(2)} = \frac{12''_{\text{minimum if pallets are removed weekly.}}{(2)}$
	(2) 18 <sup>m</sup> minimum if pallets remain in place for more than a week. Facilities with an active infestation
	shall maintain 18"_minimum clear zone.
(N)	WAREHOUSEs shall be ventilated such that ambient room temperatures are maintained between 65°F±2°
	and 90°F±2°.
	12 Shelving
(A)	Metal frame pallet rack systems utilizing wooden planks are acceptable if maintained clean and in good
	repair.
× 2	UnSEALED wooden shelving in WAREHOUSE facilities shall be replaced when determined to be no longer
	and EASILY CLEANABLE.
<del>(C)</del>	Acceptable shelving materials/coatings shall be:
	(1) Metal.
	(2) Vinyl coated or CORROSION RESISTANT MATERIAL.
	(3) Heavy duty plastic, if cleanable.
	(4) Wood if maintained SMOOTH and EASILY CLEANABLE.
۱۸/	ADELICITIEs with portable shalving shall have a designated cleaning area that

eaning area that: <del>ing i</del>

Has a SMOOTH cleanable floor sloped to a sewer drain.

Is-properly contained. (5) Is-sufficient in size to accommodate the largest piece of EQUIPMENT to be cleaned

### 9-203 Refrigerated WAREHOUSEs

#### 9-203.11 Additional Requirements

In addition to the requirements in Sections 9-201 and 9-202, all refrigeration/freezer units shall:

(A) Meet applicable sections of NSF/ANSI Standard 7, Commercial Refrigerators and Freezers.

In cold storage units a thermometer or temperature gauge, accurate to 2 F, shall heconspicuously placed in the warmest area.

#### warmest area.

Have a minimum 20 foot-candles of light as measured 30"\_off the floor.

Have condensate lines properly drained to a floor sink or other method as APPROVED by the HEALTH AUTHORITY.

(B) Have pallets made of plastic or composite materials. Wooden pallets are prohibited for long term storage in refrigerated units.

9-204 Live Molluscan and Crustacean Storage 9-

#### 204.11 Additional Requirements

In addition to the requirements in Paragraphs 9 201, 9 202 and 9 203 of this Chapter, the following shall be required for live MOLLUSCAN SHELLSTOCK and crustacean storage when MOLLUSCAN SHELLSTOCK and crustacean are processed within the facility:

### (A) A three compartment sink and ADDITIONAL HAND WASHING SINKs in facilities storing live animal FOOD product, including but not limited to SHELLSTOCK, lobsters, or frogs which requires stock rotation and

#### handling.

50 foot candles of artificial light shall be provided in WARE WASHING areas.

- (B) Interior finishes shall meet the following minimum requirements:
  - (1) Wet areas shall have floor drains to sewer.

(2) Walls in wet areas shall have FRP panels to at least an 8<sup>t</sup> minimum height with SEALED base cove. 9 204.12 Holding Tanks and Related EQUIPMENT:

Holding tanks and stands shall be made of impervious, non toxic, non corrosive materials, and be constructed to allow regular cleaning and sanitizing. APPROVED materials include tempered glass, acrylic, polyester or epoxy gel coated fiber glass, or other material APPROVED by the HEALTH AUTHORITY.

- (A) Each-wet storage system shall have its own dedicated tank or aquarium, filter, pump, chiller, UV disinfection unit, and connecting piping.
- (B) Work tables shall meet the material and construction requirements of NSF/ANSI, Standard 2.
- (C) All plumbing for recirculation and filtration piping and EQUIPMENT shall meet the standards for contact with potable water and shall be certified to meet applicable sections of NSF/ANSI Standards 14, 42, 53, 60 and 61, and shall be compatible for use in salt water applications. All pumping and filtration EQUIPMENT shall be certified to meet NSF/ANSI Standard 50.
- (D) All components of a wet storage system shall be color-coded or numbered, and have arrows to indicate direction of water flow.
- (E) Filtration systems shall be designed for a minimum water turn over rate of six hours and shall be fitted with flow meters to monitor the turn over rates. Filtration and pumping systems shall be submitted to Plan Review for approval. The design shall ensure adequate oxygenation of the water.

Ultra violet disinfection systems shall:

Be-provided and sized for flow rate and be compatible with the pump.

Be-capable of producing 15910 Microwatt seconds/cm<sup>2</sup> minimum killing dose.

- (1) Have an indicator light for monitoring continuous operation while SHELLSTOCK, lobsters and/or crustacean are in the wet storage system.
- (G) Pumps shall meet UL Standard 1081.
- (H) If chiller systems are provided they shall be designed for use with potable water systems and be resistant to the corrosive effects of salt water. Chiller systems shall be installed before the disinfection unit and shall be capable of maintaining water at 45°F±2°or below.
- (I) The tank shall have an indicating thermometer accurate to ±2°F.
- (J) SHELLSTOCK, in spray type re circulating wet storage systems, shall be supplied with water that is sprayed in a fan shape and stored in APPROVED trays at a minimum of 3 off the bottom of the tank to prevent submersion of SHELLSTOCK.

(K) Adequate drainage to sewer shall be provided to accommodate backwashing of filter systems and tank

drainage. Drainage to sewer shall be indirect to a floor sink or trough drain. Floor sinks shall be provided

I

	with an appropriately sized mesh insert to prevent scales from clogging the drains.
<del>(L)</del>	- Potable water systems shall be protected from re circulated water systems using reduced pressure zone
	backflow prevention assemblies or air gaps. Hose bibs, and other connections to the potable water supply,
	shall be adequately protected using atmospheric vacuum breakers or pressure vacuum breakers.
<del>(M)</del>	Operational plans or HACCP PLANs shall be provided detailing the cleaning, sanitizing, and water testing
(111)	schedules.
<del>(N)</del>	The system shall be capable of disinfecting storage water to a non detectable coliform bacteria level
(14)	
	(<2MPN/100ml), using the APHA Recommended Procedures for the Examination of Seawater and SHELLSTOCK.
<del>(O)</del> —	A validation study of the systems' operation shall be performed prior to approval by the HEALTH
	AUTHORITY.
9_205	SALVAGEABLE MERCHANDISE WAREHOUSEs
205.11	Required Areas and EQUIPMENT
A salv	age processing facility that receives DISTRESSED FOOD products shall have clearly distinct and separate-
areas	to perform receiving, sorting, sanitizing, re-labeling, packaging, storing and discarding.
	Three-compartment sinks and additional HAND WASHING SINKs shall be required in all sanitizing areas.
	50 foot-candles of artificial lighting shall be provided in all sanitizing areas.
	VENDING MACHINES and WAREHOUSEs
	11 Applicable Requirements
	TENTIALLY HAZARDOUS FOOD (TCS) through a VENDING MACHINE, shall comply with the provisions of NRS
	and all the requirements of these Regulations. VENDING MACHINE WAREHOUSEs shall comply with the
	able construction requirements of this Chapter.
206.12	VENDING MACHINE FOOD Processing Operations
	CHINE WAREHOUSEs which engage in any type of FOOD processing, shall maintain a PERMIT issued by the-
	FH AUTHORITY and adhere to applicable construction requirements of these Regulations.
	13 Construction of Machine
	IDING MACHINEs shall be constructed as specified in NAC 446.870 through NAC 446.910.
	All VENDING MACHINE units used for the display or sale of POTENTIALLY HAZARDOUS FOOD shall be-
(A)	constructed and certified according to NSF/ANSI or NAMA, and may not be modified.
<del>(B)</del>	VENDING MACHINEs dispensing POTENTIALLY HAZARDOUS FOOD shall have automatic controls which, in
( <del>D</del> )	the event of a power failure, mechanical failure, or other condition resulting in unsafe temperatures.
	prevent it from dispensing POTENTIALLY HAZARDOUS FOOD (TCS) until it has been serviced and reset by
	the operator. The temperature specified for shut off activation may deviate from the temperature and for
	a time immediately after the machine is filled, serviced, or restocked as follows if:
:	The ambient air temperature of the cold holding VENDING MACHINE rises above 41°F±2° for not more than 3 minutes.
	(1) The ambient air temperature of the hot holding VENDING MACHINE falls below 135°F±2 for not
	more than 120 minutes.
<del>(C)</del>	VENDING MACHINEs shall have a thermometer that is accurate to ±2°F. located in the warmest part of cold
101	VENDING WRITEININGS Shall have a thermometer that is accurate to 12 if notated in the warmest part of cold
	FOOD machines, and in the coolest part of hot FOOD machines. The thermometer shall be easily readable

(D) The company name and telephone number of the operator of the VENDING MACHINE, the health PERMIT number, and the vending unit number shall be prominently displayed on the VENDING MACHINE.

- (1) Designated and clearly marked.
- (2) Away from FOOD handling/storage areas.
- (B) PERSONnel locker rooms/PERSONal item storage areas shall be maintained in a clean and sanitary condition.

#### 9 302.16 Chemical and Maintenance EQUIPMENT Storage

Chemicals, cleaning supplies and EQUIPMENT shall be stored separately from FOOD and FOOD handling-

### and storage areas.

9 302.17 Floor Maintenance

Floors shall be maintained clean, in good repair, non absorbent, and EASILY CLEANABLE.

9-302.18 Exterior Areas

(A) The exterior of the property shall be maintained free of debris, litter, and areas providing harborage to-

### <del>pest or vermin.</del>

(B) REFUSE containers and storage areas shall be maintained free of pest and vermin.

#### 9-302.19 Pest Control

Pest control in a WAREHOUSE facility shall include the following:

(A) A licensed commercial pest control service.

An integrated pest control plan available for review by the HEALTH AUTHORITY.  $(\mathbf{R})$ (C)-Dock doors that are kept closed when not in use. Air curtains that activate automatically when doors are opened.  $(\mathbf{D})$ Devices designed to trap and/or electrocute flying insects may be used in a WAREHOUSE if they are <del>(E)</del> designed and positioned so that dead insects, or insect parts, are prevented from falling on exposed FOOD, FOOD-CONTACT SURFACEs, or clean EQUIPMENT and UTENSILs. The trays or receptacles holding dead insects shall be emptied weekly or more frequently as needed. Indoor rodent control devices may include glue boards, covered tamper resistant bait stations, and mechanical traps. -Outdoor-rodent control devices may include bait stations and mechanical traps. (F)9-302.20 Transportation VEHICLEs used solely for the transport of FOOD shall be maintained in a clean, sanitary condition. If also used for transportation of toxic/poisonous materials or solid waste they shall be cleaned and sanitized prior to transporting FOOD. 9-303 -Refrigerated WAREHOUSEs 9-303.11 Temperature Requirements (A) Refrigerated WAREHOUSEs shall maintain PHF (TCS) at or below a temperature of 41°±2°F. (1)Every refrigerated area or freezer shall be equipped with a thermometer which is readily visible and accurate to ±2°F. The thermometer shall be located at least 4' above the floor, and not in the direct blast of refrigerated air, or near entrance doors. (2)Staging areas shall be maintained at a temperature which will not adversely affect the FOOD products. FROZEN FOOD shall be maintained frozen solid.  $(\mathbf{B})$ (C)- Defrost cycles shall not adversely affect the temperature of the FOOD product. 9 303.12 Pallet Use and Maintenance -Plastic pallets may be PERMITted provided they are removed for regular cleaning and maintained in good-(A)repair. Wooden pallets are not PERMITted except when goods are brought in on the pallets. Such pallets shall be (B)promptly removed when emptied of their original load. 9-303.13 Transportation -Prior to loading of refrigerated or FROZEN FOOD, the PERSON IN CHARGE shall verify that the VEHICLE's-(A)cold storage compartment is maintaining the required temperature. Facilities which transport refrigerated or FROZEN FOOD in non com (B)morcial VEHICLEs shall utilize insulated containers which meet the following requirements: Use only units APPROVED by an NSF/ANSI ACCREDITED certification program or are APPROVED by the HEALTH-ALITHORITY Maintain the FOOD storage units in a clean, sanitary condition. Provide a thermometer accurate to ±2°F in each storage unit. Maintain temperature logs on each unit every four hours, and verify that the units are capable of (1)maintaining the FOOD contained at required temperatures. 9.304 -Live Molluscan and Crustacean Storage 9-304.11 Certification Requirements facility storing or distributing MOLLUSCAN SHELLSTOCK shall obtain State of Nevada certification as requiredby NAC 583.548. 9 304.12 Operations SHELLSTOCK shall be protected from CONTAMINATION and maintained refrigerated or shall be stored on-(A)ice while awaiting placement in a wet storage system. The traceability of the SHELLSTOCK source shall be maintained while in the wet storage tanks until the  $(\mathbf{R})$ point of sale. Dead SHELLSTOCK or seafood shall be immediately removed from the storage tank and appropriately <del>(C)</del> discarded. Different species, SHELLSTOCK lots, and SHELLSTOCK from different harvest areas shall not be <del>(D)</del> COMMINGLEd. Different species of SHELLSTOCK shall not be COMMINGLEd within the same-water system.

(E) Access to shellstock and seafood tanks by CONSUMERs is prohibited unless an alternative operational procedure and a WAIVER to include a water sampling method is APPROVED by the HEALTH AUTHORITY.

(F) Water used in wet storage systems shall be potable and from an APPROVED SOURCE.

f 185

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

<del>(G)</del>	
	out of any sediment.
9-3	04.13 Cleaning/Maintenance
<del>(A)</del>	Properly trained wet storage tank manufacturer PERSONnel or facility PERSONnel shall maintain the
	system.
<del>(B)</del>	——The wet storage system water environment shall contain adequate dissolved oxygen to keep SHELLSTOCK alive.
<del>(C)</del>	
(0)	manufacturer's instructions for the specified purpose.
<del>(D)</del>	
(2)	(1) A reserve supply of UV bulbs shall be kept on site. The UV bulb shall be changed as specified by
	the manufacturer or more frequently if needed.
	(2) The plastic sleeve protecting the UV bulb shall be maintained clean.
<del>(E)</del>	
	AUTHORITY. Samples shall be taken after the UV disinfection system to confirm that absence of coliforms
	(<2MPN/100ml). If a single sample tests positive for coliforms, daily sampling shall be immediately
	instituted until the sample test have no detectable levels of coliforms. SHELLSTOCK in the affected tank
	shall not be sold to CONSUMERs.
Salt us	ed to produce artificial seawater shall be FOOD GRADE.
	Temperature of the storage water shall be at 45°F±2° or below.
(G)	
(-)	storage water shall be changed as necessary to prevent build-up of nitrates and turbidity.
9-3	05 SALVAGEABLE MERCHANDISE WAREHOUSEs
	ovement of DISTRESSED FOOD
(A)	
× /	due to a fire, flood, extended power outage, or other causative agent shall notify the HEALTH AUTHORITY
	within 24 hours. Such product shall not be removed from the site without authorization by the HEALTH
	AUTHORITY.
<del>(B)</del>	
	inform the HEALTH AUTHORITY of the extenuating circumstances and the proposed disposition of the
	FOOD.
<del>(C)</del>	The salvage facility shall provide the HEALTH AUTHORITY with a disposal receipt of the DISTRESSED FOOD.
9-3	05.12 Flow of Operations
A st	alvaging facility that receives PACKAGED DISTRESSED FOOD products shall have distinct and separate areas to
<del>per</del>	form receiving, sorting, sanitizing, re-labeling, assembling, and packaging of salvaged containers for shipping or
stor	ring in the WAREHOUSE.
<del>(A)</del>	All salvageable FOOD and distressed merchandise shall be protected from CONTAMINATION or-
	adulteration while being handled, processed, stored, or transported.
	All POTENTIALLY HAZARDOUS FOOD (TCS) shall be maintained at a temperature of 41°F±2° or below. All
	DZEN FOOD shall be maintained frozen solid.
	05.13 Receiving Area
	N CHARGE of receiving goods for salvaging shall:
<del>(A)</del>	Examine the VEHICLE loads to ensure that the temperature of the VEHICLE's storage compartment are-
	within the limits acceptable for the FOOD products being received.
<del>(B)</del>	
<del>(C)</del>	
	sources of CONTAMINATION.
	05.14 Segregation of Merchandise
	EABLE MERCHANDISE shall be promptly sorted and segregated from non SALVAGEABLE MERCHANDISE in the
	owing designated areas:
<del>(A)</del>	Sorting Area. A PERSON IN CHARGE shall supervise the thorough inspection of each container, can, package,
	bottle, and box containing a FOOD product to determine whether the product is salvageable and shall sort

- the lot accordingly. (B) Discarding Area. A PERSON IN CHARGE shall arrange for the immediate segregation and removal of
- unsalvageable FOOD products to trash receptacles for appropriate disposition. Prior to such disposition all f **185**

unsalvageable FOOD products shall be identified and recorded. The discarding area shall not be located within an area where other operations occur.

### 305.15 Disposition of Non-SALVAGEABLE MERCHANDISE

-PACKAGED non-salvageable FOOD shall include, but is not limited to, the following: (A)

- (1)FOOD ADULTERATED by chemicals or pesticides.
- PHF (TCS) not maintained at required temperature. (2)
- (3) FOOD PACKAGED in paper or other porous material which has been subject to CONTAMINATION.
- (4)Infant formula and baby FOOD packages bearing expired or beyond use dates.
- -LEAKER, SPRINGER, FLIPPER, and SWELLER cans are deemed unfit for human consumption. Class I (5)and Class II can defects, as specified in the AFDO Pocket Guide to Can Defects.
- Containers, including glass containers with press caps, screw caps, pull rings or other types of (6)openings, which have been in contact with foam or other deleterious substances as a result of fire fighting efforts, flood, sewer backups, or similar mishaps.
- FOOD products in plastic or glass containers with screw caps, snap-lids, crimped caps, twist caps, (7)snap open and similar closure types shall not be reconditioned if the containers have been submerged in water or subjected to smoke CONTAMINATION.
- (8) Glass containers which have been subjected to a sudden impact, including but not limited to a collision or a VEHICLE turn-over.
- (9)FOOD PACKAGED in plastic, paper, cardboard, cloth, or similar packaging material that has sustained water damage or has been exposed to foam.
- (10)A container of FOOD without the appropriate label or mandatory information that cannot be identified and relabeled correctly.
- Non-SALVAGEABLE MERCHANDISE shall not be sold or distributed as human FOOD, and shall be disposed of in a manner APPROVED by the HEALTH AUTHORITY. Receipts of disposal shall be maintained and made available to the HEALTH AUTHORITY upon request.

### 305.16 RECONDITIONING and SANITIZATION Area

ECONDITIONING of merchandise shall take place in the SANITIZATION area. A PERSON IN CHARGE of these operations shall perform or supervise the SANITIZATION of all salvageable cans in accordance with an APPROVED SANITIZATION process. FOOD containers not requiring RECONDITIONING shall be dusted or wiped clean prior to relabeling.

### -305.17 RECONDITIONING of Canned FOOD Products

(A) Cans may be reconditioned if:

- The product is not contaminated. (1)

Metal cans of FOOD shall be free from pitted rust, with no rust remaining after buffing, electrolysis, or suitablemeans of rust removal.

- (2) There are no dents on the rim or double seal, and no V-shaped creases in the metal in other areas.
- (2)-Cracking has not compromised the can's corrugations.
- (4)The ends of the can are not bulged.
- (5)Cans soiled by dirt, smoke, non-potable water, or in any other manner may be reconditioned if
- the product is not contaminated and the container can be cleaned by an APPROVED method.

FOOD product, in a HERMETICALLY SEALED CONTAINER, exposed to fire and smoke but not excessive heat may becleaned and reconditioned

Hermetically Sealed salvageable cans of FOOD product that have been exposed to non potable water-<del>(B)</del> shall be reconditioned using the following procedure:

- (1)Remove labeling.
- (2)Inspect cans for pinholes.
- (3)Wash cans in soapy solution.
- (4)Rinse cans in potable water.
- (5)Buff cans to remove surface rust.
- (6)-Sanitize cans by immersing for 20 seconds in a solution containing not less than 100 ppm ofchlorine.
- (7)Dry.
- (8)Re-labeled as specified in Paragraph 9-305.20 of this Chapter.

9-305.18 RECONDITIONING of Screw Top, Crimped Cap or Similar Closure Packages (A) These containers may be reconditioned if:

- (1) The product is not contaminated.
- (2) The soil can be removed without affecting the closure mechanism or the contents.
- (3) The closure mechanism is free of rust, and buffing removes any surface rust.
- (4) Indentations on the cap or crown have not damaged the seal.
- (5) All labels and tax stamps are in place.
- (6) Cans with flip tops can be sanitized provided a careful examination of the area under the flip top is performed. All exposed 6-pack units shall be separated from their plastic binding prior to being

# wiped clean.

----Containers of FOOD shall be deemed unsuitable for RECONDITIONING if:

The product is contaminated.

- (1) There is evidence that the container has been exposed to extreme pressure or temperature.
- (2) Soil surrounds the closure mechanism.
- (3) Rust surrounds the closure mechanism.
- (4) The cap or crown has dents affecting the rim seal.
- (5) The product was submerged in water or chemicals.

# 9-305.19 RECONDITIONING of Plastic, Paper, Cardboard, Cloth or Similar Containers

- (A) Containers exposed to minor fire and/or smoke damage may be reconditioned, if the labels are intact and the contents have not been affected. Containers may be reconditioned if:
  - (1) The product is not contaminated.
  - (2) The external container or package is compromised, but the interior liner/container or remainsintact-
  - (3) The container can be cleaned without contaminating or otherwise affecting the product.
- (B) Containers shall be deemed unsuitable for RECONDITIONING if the package integrity has been
- compromised and the FOOD product may have been exposed to CONTAMINATION.

### 9 305.20 Labeling Distressed Merchandise

- (A) Re labeling Area: At the re labeling area, the PERSON IN CHARGE shall ensure that the label applied contains all the necessary and pertinent information contained on the original FOOD product label. If relabeling is not required the product salvage date shall be added to the container's label.
- (B) Salvaged FOOD product containers shall meet the labeling requirements of the NRS and the Fair Packaging and Labeling Act in the Federal Food, Drug, and Cosmetic Act and the following:
  - (1) Salvageable cans shall be cleaned in accordance with Paragraph 9 305.17 prior to re-labeling.

(2) Re-labeling or over labeling shall:

Contain all information from the original label.

- (a) Not-be misleading in any way.
  - (b) Show the label codes and "sell by" or "use by" dates given on the original packaging, plus the date of product RECONDITIONING. The word "Salvaged", in a minimum1/4 "\_inch letters, and the salvage repackaging facility's name and address shall be on the label.
- (C) All labels shall be submitted to the HEALTH AUTHORITY for approval.
- (D) Salvaged FOOD shall not be sold, offered for sale or distributed after the "sell by" or "use by" date on the label of the original container unless the manufacturer assures, in writing to the HEALTH AUTHORITY, the continued safety of the product. The written assurance shall specify a "sell by" or "use by" date to be shown on the new label.

### 9 305.21 Storage and Shipping Area

- (A) Storing in WAREHOUSE Area: a PERSON IN CHARGE shall perform or supervise the transfer of all salvaged FOOD product containers to a clean and controlled area and shall prepare a manifest or inventory identifying the date and place where the FOOD products were put in storage. If at any time during storage a FOOD product becomes contaminated, or a container becomes distressed, it shall be deemed unsalvageable and disposed of properly.
- (B) Shipping Area: A PERSON IN CHARGE shall record, on a manifest or similar report, all FOOD products shipped or distributed, and shall inspect the cargo area and transport VEHICLE for cleanliness and required temperature control prior to loading.

9-305-22 Salvage Processing Facilities and Distributors Outside of Clark County, Nevada

Ilvaged FOOD product from salvage processing facilities and distributors located outside of Clark County, Nevada, may be sold or distributed within Clark County if it originates from an APPROVED SOURCE PERMITted by its local HEALTH AUTHORITY or AGENCY OF JURISDICTION. The HEALTH AUTHORITY may request PERMIT verification or copies of inspection reports from the local jurisdiction.

9-306 VENDING MACHINE and Processing WAREHOUSEs

### 9-306.11 Operational Requirements

vidual VENDING MACHINEs shall be operated as specified in NAC 446.870 through NAC 446.910. VENDING MACHINE WAREHOUSEs shall meet applicable requirements of these Regulations and of State Statute, including but not limited to:

(A) Milk and fluid milk products and fluid non dairy products, or creaming agents may not be dispensed in VENDING MACHINEs as additional ingredients in hot liquid BEVERAGEs or other FOOD.

- (B) POTENTIALLY HAZARDOUS FOOD (TCS) offered for sale in VENDING MACHINEs shall be dispensed to the CONSUMER in the individual, original container or package into which is was placed at:
  - (1) A FOOD ESTABLISHMENT having a PERMIT issued by the HEALTH AUTHORITY or AGENCY OF
    - IURISDICTION or
  - (2) The plant of the manufacturer or processor.
- C) VENDING MACHINEs which dispense POTENTIALLY HAZARDOUS FOOD (TCS) shall be provided with adequate refrigerating or heating units and thermostatic controls which ensure the maintenance of refrigerated FOOD at a temperature of 41°F±2° or below, and hot FOOD at a temperature of 135°F±2° or above, or 10°F±2° or below if frozen.
- The FOOD products shall be properly labeled as required by these Regulations.
  - (D) Ready to eat POTENTIALLY HAZARDOUS FOOD (TCS) held for more than 24 hours shall be labeled with the preparation date by when the FOOD shall be consumed, which shall be seven days or less from the date of preparation. Ready to eat POTENTIALLY HAZARDOUS FOOD (TCS) shall be discarded if not consumed within seven days from the date of preparation
  - (E) Refrigerated READY TO EAT PHF (TCS) prepared in a FOOD ESTABLISHMENT, and dispensed through a VENDING MACHINE with an automatic shut off control, shall be discarded if it exceeds a temperature and time combination as specified if Chapter 3 501.17 (A) of these Regulations.
  - (F) Receptacles for trash shall be provided in the vicinity of each VENDING MACHINE or group of VENDING MACHINEs, but not within the VENDING MACHINE. The receptacles shall close automatically, shall be leak proof, EASILY CLEANABLE, insect and rodent proof, and shall be cleaned daily to prevent the attraction of insects and rodents.

### 9-306.12 Compliance

II VENDING MACHINE companies that provide VENDING MACHINEs that dispense POTENTIALLY HAZARDOUS FOOD (TCS), including novelty frozen desert products, shall have a PERMIT for their place of business where the POTENTIALLY HAZARDOUS FOOD (TCS) is stored, prepared, and stocked. The operator of the VENDING MACHINE company shall maintain a record of all VENDING MACHINEs that dispense POTENTIALLY HAZARDOUS FOOD. This record shall include the VENDING MACHINE's physical location, its serial or identification number, and the type of FOOD dispensed.

### 9-306.13 Transportation

- (A) The FOOD storage compartment of all VEHICLEs used for the transport of refrigerated or FROZEN FOOD for use in a VENDING MACHINE shall be maintained in a clean and sanitary condition.
- (B) Prior to loading of refrigerated or FROZEN FOOD for use in VENDING MACHINES, the PERSON IN CHARGE of the transport VEHICLE shall verify that the storage compartment is maintaining required temperature.
  (C) Facilities which utilize insulated containers with cooling inserts shall:
- Use only units APPROVED by an NSF/ANSI ACCREDITED certification program.

Maintain the FOOD storage units in a clean, sanitary condition.

- (1) Provide a thermometer accurate to ±2°F in each storage unit.
  - (2) Maintain temperature logs on each unit every four hours, and verify that the units are capable of maintaining the FOOD contained at required temperatures.

### Applicability and Listing of

**Terms Definitions** 

-Applicability and Listing of Terms

101.11 Interpretation and Listing of Terms

The following definitions shall apply in the interpretation and application of this Chapter.

10-102 **Definitions** 

10-101

OOD SERVICE TRAILER means a MOBILE FOOD UNIT designed to be towed on public roads, and having an enclosed are for storage, handling, or preparation of FOOD, and PERMITted as MOBILE FOOD UNITs as a FULL SERVICE COACH.

ROZEN PRODUCT SALES/DELIVERY MOBILE UNIT means a pick-up truck or similar VEHICLE with either a built- on or slidein prefabricated freezer unit, or a canopy with a freezer inside for the delivery of PRE-PACKAGED FOOD to designated addresses. No open FOOD handling or door to door sales is allowed.

ULL SERVICE COACH means a MOBILE UNIT, including FOOD SERVICE TRAILERs, in which FOOD, including PHF (TCS), may be stored, prepared, cooked, and/or served.

MOBILE UNIT means any properly enclosed VEHICLE in which FOOD, BEVERAGEs, frozen desserts or dairy products and mixes are prepared, processed, or converted for human consumption, and which is used to sell and dispense FOOD and BEVERAGEs to customers. The term includes full service "hot" trucks and limited service "ice cream" trucks. The term does not include a pushcart or any portable unit for the service of FOOD.

RE-PACKAGED FROZEN NOVELTY TRUCK means a MOBILE UNIT in which APPROVED menu items are RESTRICTed to LOW-RISK FOOD that may include PRE PACKAGED, non PHF (TCS) or LOW RISK FOOD, including but not limited to frozen confections, sodas, chips, and candies.

ELF SERVICE PRE-PACKAGED FOOD TRUCK means a MOBILE UNIT from which customers serve themselves

0-201 **11 PERMIT Requirements** 

All COMMISSARY facilities operating within Clark County, Nevada, are required to maintain a health PERMIT ued by the HEALTH AUTHORITY.

0-201.12 EQUIPMENT and Structural Requirements

COMMISSARY shall meet the EQUIPMENT and structural requirements for a FOOD ESTABLISHMENT as provided in FOOD Service Establishment Plan Review Requirements for EQUIPMENT and facilities, and as specified in these Regulations.

### 10-202 SERVICING DEPOT

0-202.11 PERMIT Requirements

f 185

All SERVICING DEPOT facilities operating within Clark County, Nevada, are required to maintain a health PERMIT ued by the HEALTH AUTHORITY.

10-202.12 EQUIPMENT AND Structural Requirements

addition to a valid health PERMIT, SERVICING DEPOTs shall meet the following requirements:

(A A room large enough to accommodate a MOBILE UNIT, with properly constructed walls, ceiling and floors,

and proper ventilation and lighting shall be provided at a SERVICING DEPOT for cleaning MOBILE UNITs. (B) Floors shall be properly sloped and drained to a sanitary sewer.

SERVICING DEPOTs are required to have EQUIPMENT commensurate with the type of FOOD that is being stored during the MOBILE UNIT's servicing. FOOD holding areas shall be separated from cleaning areas with partitions or other distinguishable barriers.

# Chapter 9 Commissaries

- There shall be a hose sufficient for washing a MOBILE UNIT at a SERVICING DEPOT, and a facility to store (C)the hose off the ground, to prevent CONTAMINATION.
- There shall be a sufficient amount of steam or hot water, at a temperature of at least 170°F±2°, to properly  $\oplus$ sanitize the MOBILE UNIT and EQUIPMENT that is not sanitized with chemical disinfectants.
- <del>(E)</del> There shall be adequate ventilation to prevent the accumulation of vapors, fumes, or mists during the cleaning and SANITIZATION processes.
- There shall be an APPROVED three compartment sink. <del>(F)</del>
- (G) There shall be adequate drainage and grease collection capacities, as required by the AGENCY OF JURISDICTION and the HEALTH AUTHORITY, to prevent FOOD debris and excessive grease from entering the sanitary sewer system or storm drains.
- -There shall be a restroom, with at least one toilet and one HAND WASHING SINK, plumbed with hot and <del>m</del> cold running water, stocked with toilet paper, liquid soap, paper towels, and a covered trash receptacle as specified in Chapter 6 202.14 of these Regulations. This restroom shall be accessible to anyone working within the COMMISSARY or SERVICING DEPOT.

## 10-203 MOBILE UNIT Plans

### 10-203.11 Plan Submission

lans shall be submitted to the HEALTH AUTHORITY, Environmental Health Plan Review, for all VEHICLES that are to be used as MOBILE UNITS.

### 10-203.12 Third Party PERMITting

No MOBILE UNIT shall be rented or sub leased to a third party without the renter or lessee obtaining a separate health PERMIT.

### 10-203.13 General Requirements

The following information shall be provided at the time the plans for MOBILE UNITs are submitted:

- -The VEHICLE identification number (VIN) of the VEHICLE used for the MOBILE UNIT. (A)
- The license plate number and State of issuance of the VEHICLE used for the MOBILE UNIT.

A description of markings specific to each MOBILE UNIT. The VEHICLE shall have the name, along with either the address or the phone number, of the vendor visible from both sides of the unit.

# (B) A letter of intent which describes:

# (1) The menu for the MOBILE UNIT.

- (2) The methods and EQUIPMENT to be used for cooking, cooling, and holding of FOOD.
- (3)
- A signed letter of agreement with the COMMISSARY or SERVICING DEPOT outlining the services provided (C)to the MOBILE UNIT which shall include a copy of the COMMISSARY or SERVICING DEPOT's health PERMIT. An address for the location of the VEHICLE, when not parked at the COMMISSARY or SERVICING DEPOT, shall be provided to the HEALTH AUTHORITY.
- Any other information requested by the HEALTH AUTHORITY, during the Plan Review process, which is-(D)necessary to determine the scope of the FOOD ESTABLISHMENT operations.

### 0 203.14 Structure and EQUIPMENT

ZEN PRODUCTS SALES/DELIVERY MOBILE UNITs shall be equipped with an NSF/ANSI Standard #7 freezer unit. The unit compressor shall be capable of operating from a converter, or other APPROVED method of mechanical refrigeration, at all times when the VEHICLE is running. The freezer unit shall be enclosed with an APPROVED thermometer readable from outside the unit.

### 0-203.15 PRE-PACKAGED FROZEN NOVELTY TRUCKS

PRE-PACKAGED FROZEN NOVELTY TRUCKs shall meet the following structural, EQUIPMENT, and Plan Reviewrequirements:

 An individual shall be able to stand upright inside of the unit. (A)

f 185

<del>(B)</del>	The service shall be from the inside to the outside via service openings with a maximum of two opening	σc
(D)	The service shall be from the inside to the outside via service openings with a maximum of two opening	5-
	no larger than 18 <u>" square, with either hinged or slider windows.</u>	
	no larger than 10yatare, with either hinged of silder windows.	

- (C) The inside finishes of the VEHICLE shall be light in color, and SMOOTH and EASILY CLEANABLE. Walls and ceilings shall be light in color with SMOOTH and EASILY CLEANABLE surfaces. Floors shall be of metal or commercial grade linoleum.
- A description of the type of ventilation and/or air conditioning system(s) used within the VEHICLE. These systems shall be able to maintain the interior ambient temperature within the testing limit temperature range of the refrigeration EQUIPMENT.
- (D) <u>An-NSF/ANSI-STANDARD #7, or equivalent freezer unit, with a compressor capable of operating off appropriately sized converter, or other APPROVED method of mechanical refrigeration, at all times when the VEHICLE is running. Dry ice is prohibited from use in a MOBILE UNIT.</u>

### 10-203.16 SELF-SERVICE PRE-PACKAGED FOOD TRUCK

# SELF-SERVICE PRE-PACKAGED FOOD TRUCKs shall meet the following structural, EQUIPMENT, and Plan Review

- (A) Doors/covers shall be tight fitting to protect the unit from inclement weather and effectively EXCLUDE dust. dirt. and vermin.
- (B) A description of the location where FOOD, EQUIPMENT, UTENSILs, paper products, water tanks, and cleaning supplies will be stored on the unit.
- (C) The outside of the unit shall be of metal or fiberglass construction equivalent to or exceeding NSF/ANSI standards for construction and materials.
- (D) The interior of cabinet units or compartments shall be constructed to have SMOOTH, easily accessible and EASILY\_CLEANABLE\_surfaces, with at least 1/8-"\_.horizontal and vertical coves, free from channels, crevices, flanges, ledges, sharp or jagged edges, or other cleaning obstructions.

Surfaces shall be constructed of a solid material including but not limited to stainless steel. The surfaces shall be free of pits, cracks, rust, and other obstructions that would interfere with proper cleaning. Wood surfaces are not allowed.

- (E) Newly PERMITted units shall have mechanical refrigeration for all POTENTIALLY HAZARDOUS FOOD, with ice used only as a supplement to refrigeration.
- (F) Coffee prepared at APPROVED establishments PERMITted by the HEALTH AUTHORITY, as the base of operations, may be sold from an APPROVED commercial NSF/ANSI dispenser.
- (G) A description of the type of EQUIPMENT that will be used to dispense paper cups, stirring sticks, spoons, straws, sugar, dried creamer, or PRE PACKAGED CONDIMENTS. Paper cups used at a MOBILE UNIT shall be contained in an APPROVED dispenser that effectively protects the interior and the lip of the cup from dust and handling.
- (H) Provisions for proper disposal and storage of solid waste within the MOBILE UNIT and outside of the MOBILE UNIT for customer use.
- (I) Receptacles shall be maintained clean so as not to create a nuisance.
- (J) Receptacles shall be lined with properly sized disposable plastic liners.
- 0-203.17 Supplemental Service from a SELF SERVICE PRE PACKAGED FOOD TRUCK

In addition to the above requirements, FOOD handling outside, of the VEHICLE, shall be limited to the preparation of espresso, specialty coffees, and related BEVERAGEs provided that:

- (A) The unit contains an NSF/ANSI certified HAND WASHING SINK serviced with tempered or hot/cold water under pressure, and soap and towels with splash guards, as specified in Section 10-203.18 (J) of this Chapter.
- (B) The unit contains an NSF/ANSI certified three compartment sink with integral drain boards and serviced with hot and cold water under pressure.
- (C) The unit contains adequate safeguards to protect FOOD from CONTAMINATION during service and while in transit.
- (D) The unit has 35 foot candles of light on the preparation, HAND WASHING SINK, and three compartment sink surfaces.
- (E) The unit contains a 15-gallon fresh water supply, a water heater that provides no less than 10 gallons per hour of 120°F±2° hot water, and a waste water tank that is at least 15% larger than the combined capacity of fresh and hot water tanks, and meets the requirements as specified in Section 10 203.18 (K) of this Chapter.
- (F) The COMMISSARY for such a unit shall meet the requirements of a full service kitchen and shall meet all

requirements as specified in these Regulations. 10 203.18 FULL SERVICE COACHES

& Fac	<i>ilities,</i> including hot and cold water sources, HAND WASHING SINKs, three-compartment sinks, cooking,
	g and refrigeration EQUIPMENT, ventilation, and interior finishes. These MOBILE UNITS shall comply with all
	able requirements of these Regulations. Specific requirements are:
<del>(A)</del>	-The unit shall be fully enclosed and tall enough on the inside to stand upright, 6'
	minimum height.
<del>(B)</del>	-Service openings shall be no larger than 18 "_square and located away from open FOOD to protect the
(12)	FOOD from CONTAMINATION. Service openings shall be hinged or designed to slide open, and remain open
	only while FOOD and BEVERAGEs are being served. If service openings are not self closing fly fans shall be
	installed.
(C)	Doors to the outside shall be self-closing.
(-)	There shall be a partition or dividing wall between the FOOD preparation and the driver's cab areas of the
× 2	E UNIT.
	Floors shall be of impervious material, SMOOTH and EASILY CLEANABLE, with coved, watertight junctures.
(12)	Walls and ceilings shall be light colored, with SMOOTH, EASILY CLEANABLE material.
<del>(F)</del>	Ventilation shall be sufficient to prevent the unnecessary opening of doors and service windows. Cooking
(1)	appliances generating grease-laden vapors shall have an NSF/ANSI or equivalent ducted, grease- baffle
	hood with an ansul system.
<del>(G)</del>	- 50 foot candles of light shall be provided on FOOD CONTACT SURFACEs with all light fixtures properly
(0)	shielded.
<del>(H)</del>	-Refrigeration, cooking, and hot-holding EQUIPMENT shall be NSF/ANSI or equivalent. Plan submissions
(11)	-Kerngeration, cooking, and not-noiding EQUIPMENT shall be <i>instrictives</i> or equivalent. Plan submissions shall include:
	shall include: (1) The type, number, and location(s) of refrigeration and/or hot holding display units placed on the
EHICLE.	(1) The type, number, and location(s) of reingeration and/or not notaing display units placed on the
ETHICLE.	(2) An adequate number of units large enough to store safely all cold PHF (TCS) at a temperature of
	(2) An adequate number of units large enough to store safely all cold PHF (TCS) at a temperature of 41°F±2° or below.
hacour	( <del>3) The type and location of cooking EQUIPMENT.</del>
	EQUIPMENT may be powered using either VEHICLE electrical power or propane.
ooking I	(a) Hot-holding units may be operated using either VEHICLE electrical power or propane.
<del>(I)</del>	A three compartment sink is required and shall have integral drain boards. The three compartment sink
(1)	shall be large enough to accommodate all UTENSILs and KITCHENWARE and shall have hot and cold water
	under adequate pressure. Hot water shall be maintained at 120°F±2°. The faucets shall reach all bays of the
	sink.
<del>(J)</del> —	- A separate HAND WASHING SINK is required with hot/cold, tempered/cold, or tempered only DRINKING
()	
	WATER that is delivered through a mixing faucet. The minimum size is 10 ×10 ′′ with a minimum depthof
	6 <u>"and a 12 </u> clearance above the sink. If the HAND WASHING SINK is located within 18 <u>of a FOOD</u>
	preparation surface, or the dish washing area, there shall be a 12 "_high waterproof splash guard installed
	between the HAND WASHING SINK and the dish washing sink and/or FOOD preparation area. At all times
	the HAND WASHING SINK shall be fixed in place, accessible and uncovered. No cutting board or drain board
	shall be placed or permanently installed over the HAND WASHING SINK. The HAND WASHING SINK shall be
	located between 30 <sup>"</sup> _and 42 <sup>"</sup> _above the floor in the FOOD preparation area.
	all be a minimum 40 gallon fresh water tank. The water heater shall provide no less than 22 gallons per hour of
1	20°F±2° hot water. Water supply shall be protected from CONTAMINATION and back-siphonage, and shall fill
	nd drain via RV type fixtures. There shall be a minimum of a 46 gallon waste water tank that is 15% larger-
	han the combined capacities of the tanks holding the water supply. Water fixtures and tanks shall meet the
	ollowing requirements:
	Water pumps must activate automatically when water is dispensed from a fixture. Manually operated-
	water pumps are prohibited.
	(1) The water and waste water tanks shall be rigid, durable, and EASILY CLEANABLE. Collapsible tanks
	are not allowed.
	(2) Tanks shall be sloped to drain and shall have capacity indicators.
	(2) Tarks share be supped to train and share tare targetry indicators. (3) The MOBILE UNIT is not allowed to hook up to water or sewer anywhere except at their APPROVED COMMISSARY or SERVICING DEPOT.

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

f **185** 

(4) The inlet for water shall be removable, made of flexible copper pipe or other APPROVED tubing, and equipped with an APPROVED vacuum breaker or nozzle for connecting a potable water-grade hose.

(5) There shall be a cap available so the tank may be capped when not in use.

- 6) The filler hoses shall be clearly and permanently identified, used only for their intended purposes, and hung with the ends connected or covered when stored. Hoses connected to potable water shall meet the requirements as specified in Chapter 5 302.16 of these Regulations. A vacuum breaker shall be installed on the water tap at the COMMISSARY or SERVICING DEPOT.
- (7) If compressed air is used to pressurize the water tank system, a filter that does not pass oil or oil vapors shall be installed in the air supply line between the compressor and DRINKING WATER system.
- (8) The inlet and outlet shall be located to prevent CONTAMINATION from the discharge of waste, dust from the road, oil, or grease.
- (9) The waste water tank drain shall be at least 1<sup>"</sup>\_in diameter with a shut-off valve.
- (10) Waste water tanks with an outlet for overflow are prohibited.
- (K) The type and location of any pressurized tanks or cylinders used in the VEHICLE, including but not limited to carbon dioxide for BEVERAGEs, or propane for heating or cooking require that:
  - (1) All tanks and cylinders fasten securely to the units.
  - (2) Liquid petroleum be installed and maintained to meet local fire department standards and other applicable LAWs.
  - (3) Pressurized cylinders be installed in a compartment separate from the burner and be vented to the outside.
- (L) The type and location of ventilation EQUIPMENT require that:
  - (1) Ventilation shall be sufficient to climinate the need to have the service window open for cooling when not otherwise in use to serve FOOD or BEVERAGES.
  - (2) Cooking appliances generating grease laden vapors shall have an NSF/ANSI or equivalent ducted, grease baffle hood with a fire suppression system.
  - (3) A ventilation and/or air conditioning system within the MOBILE UNIT shall be capable of maintaining the internal ambient temperature within the testing limits of the refrigeration EQUIPMENT.

(M) Provisions shall be made for proper disposal and storage of solid waste, both within and outside of the MOBILE UNIT, for customer use ensuring that:

- (1) Receptacles are maintained clean so as not to create a nuisance.
- (2) All receptacles are lined with properly sized disposable plastic liners.
- 10-204 Facility and EQUIPMENT

### 10-204.11 Modifications

f 185

Any proposed changes in EQUIPMENT or the operation of the MOBILE UNIT shall be submitted to, and APPROVED by, the HEALTH AUTHORITY prior to the proposed changes being made.

# Food Protection ts D1 Food Purchasing and Receiving 10-302 — Food Packaging 10 303 — Food Storage and Transportation 10-304 — Food Preparation, Holding, Display, and Service 10 301 — FOOD Purchasing and Receiving 0 301.11 FOOD from an APPROVED SOURCE (A) — All ingredients used in FOOD, including ice, prepared in a mobile FOOD vendor COMMISSARY or MOBILE UNIT shall be from an APPROVED SOURCE. (B) — The source of the FOOD, whether in the state of Nevada or offered in interstate commerce, shall meet or exceed all federal, state, and local regulations in the jurisdiction in which the ingredient or FOOD was initially prepared, as well as all of the standards in the HEALTH AUTHORITY's jurisdiction. When FOOD or

- initially prepared, as well as all of the standards in the HEALTH AUTHORITY's jurisdiction. When FOOD or novelty items are prepared or manufactured outside the jurisdiction of the United States of America, that particular FOOD or novelty item may be evaluated at the discretion of the HEALTH AUTHORITY.
- (C) FOOD determined to be in unacceptable condition cannot be used as ingredients in FOOD offered for sale in the MOBILE FOOD UNIT and shall be discarded or returned to the provider for credit.
- (D) No FOOD prepared or stored in a private residence or house may be used, stored, served, offered for sale, sold, or given away in a MOBILE UNIT.

10-301.12 FOOD Receiving and Storage

I

<del>(A)</del>	During receiving the PERSON IN CHARGE of the COMMISSARY shall inspect all FOOD for proper
	temperature and storage.
<del>(B)</del>	-FOOD shall be transported and stored in a manner that maintains its required temperature, and to-
~~~~~	prevent
	-CONTAMINATION during transport.
<del>(C)</del> —	FOOD shall comply with all requirements listed in Chapter 3 1 and 3 2 of these Regulations during receiving and storage.
10_303	Constant agent
	Imercially PACKAGED FOOD
(A)	
(11)	but not limited to ice cream novelties, candy, potato chips, PACKAGED cookies, JUICE boxes, half pints of
	milk, etc., shall remain in their individual packaging for sale to the CONSUMER. PRE_PACKAGED FOOD
	stating "Not Labeled for Individual Sale" shall not be sold.
<b>(D)</b>	Commercially PACKAGED FOOD for daily use:
<del>(B)</del>	(1) Syrups used to make sundaes, milkshakes, and similar items shall be kept in the original containers
	(1) Syrups used to make sundaes, miksnakes, and similar items shall be kept in the original containers which shall not be refilled.
	(2) The container shall have a non-corrosive cover with an integral ladle.
	(3) Multi use pumps for syrup or milk shall be washed, rinsed, and sanitized, at least daily or more
	frequently if needed, in the three compartment sink located on the VEHICLE, or at the
	COMMISSARY/SERVICING DEPOT, and as specified in Chapter 4 404.11 of these Regulations.
10-302.1	2 FOOD Packaging and Storage Prior to Transport
	and prepared FOOD items shall be properly stored, prior to transport on the intended sales route, in-
	lowing ways:
	Any commercially PRE-PACKAGED FOOD offered for sale from a MOBILE UNIT, including but not limited to
()	ice cream, soda, potato chips, and candy shall be stored in their original packaging prior to and during
	transport in the MOBILE UNIT.
<del>(B)</del>	—Prepared FOOD to be offered for individual sale at self service MOBILE UNITs, including but not limited to
(D)	sandwiches, fresh cookies, bagels, or donuts shall be individually wrapped in FOOD GRADE plastic wrap,
	aluminum foil, butcher paper, or other appropriate FOOD container. This does not include intact raw fruits
	or vegetables.
	(1) Prepared READY TO EAT FOOD, which is individually wrapped for sale, shall be labeled with a listing
	of ingredients and the location of the FOOD ESTABLISHMENT or COMMISSARY where the FOOD
	was prepared.
	(2) READY TO EAT, PHF (TCS) shall be labeled and dated as required by Chapter 3 501.17 of these
	Regulations.
	(3) No FOOD, once placed and offered for sale on a MOBILE UNIT, shall be re wrapped or re dated.
<del>(C)</del>	FOOD sold from a FULL SERVICE MOBILE UNIT shall be containerized or otherwise PACKAGED to prevent
× 2	CONTAMINATION or damage during transport.
<del>(D)</del>	FOOD items, which will be loaded on the MOBILE UNIT for transport, shall be stored at the COMMISSARY
	in a manner that will protect the FOOD from CONTAMINATION.
<del>10-303</del>	FOOD Storage and Transportation
	L1 EQUIPMENT
( <u>A</u> )	All cold holding EQUIPMENT shall be capable of maintaining refrigerated FOOD at 41°F±2° or below during
()	storage, transport, and service. All FROZEN FOOD shall remain frozen solid. These units shall have
	thermometers installed in a visible location. At least 1 of the thermometers shall be integral with the
	Entrometers instance in a visible location. At least 1 of the thermometers shall be integral with the
(B)	All hot holding EQUIPMENT shall be capable of maintaining FOOD at 135°F±2° or above during storage,
	transport, and service.
<del>(C)</del> —	All EQUIPMENT shall be properly maintained, operated, and kept in good condition. Any EQUIPMENT that
× /	becomes dysfunctional or in disrepair shall be removed from service immediately or otherwise replaced.
	The introduction of domestic EQUIPMENT is prohibited.
10-303	12 Storage and Transportation
	All FOOD and SINGLE SERVICE ARTICLES or SINGLE USE ARTICLES shall be stored at least 6 above the floor
()	or ground in cabinets, on shelves, or in containers during storage, transportation, and service.

θ.

f **185** 

(B) Storage of PACKAGED FOOD in contact with water or un drained ice is prohibited.

(C) Direct contact of FOOD with cloth towels is prohibited.

(D) No FOOD, SINGLE SERVICE ARTICLES or SINGLE USE ARTICLES shall be stored under sinks or plumbing connections.

-Chemicals shall be stored separate from ECOD. SINGLE SERVICE ARTICLES or SINGLE USE ARTICLES, and (E)FOOD CONTACT SURFACES. FOOD shall be loaded in a manner that prevents excessive shifting within the MOBILE UNIT. (F)The driver shall ensure that the FOOD is not left unattended where tampering may occur. Except when associated with a special event, the MOBILE UNIT shall be readily movable at all times. Additional PERMITting is required if the operation expands outside of the MOBILE UNIT. When the MOBILE UNIT is in transit, all windows and doors shall be closed, and all FOOD, SINGLE-SERVICE ARTICLES AND SINGLE USE ARTICLES shall be protected from CONTAMINATION. SINGLE SERVICE ARTICLES and SINGLE USE ARTICLES, CONDIMENTS, UTENSILS, and TABLEWARE shall be <del>(H)</del> placed in clean containers to protect from CONTAMINATION during storage and transport. 10 303.13 Storage and Transportation Temperature Requirements (A) Immediately prior to loading PHF (TCS) into the MOBILE UNIT, the temperatures shall be taken and recorded. - Cold PHF (TCS) shall be 41°F±2° or below when placed into the MOBILE UNIT's refrigeration or-(1)cold holding. Hot PHF (TCS) shall be 135°F±2° or above when placed into the MOBILE UNIT's hot holding. (2)(3)Perishable and shelf stable FOOD may be stored at ambient temperature in a MOBILE UNIT thathas working environmental controls.  $(\mathbf{R})$ -FOOD temperatures of PHF (TCS) shall be taken and recorded at least every two hours. PHF (TCS), notmaintained at required temperatures shall be discarded after four hours. FOOD found out of temperature may be rapidly reheated to 165°F±2° or cooled to 41°F±2° only once.  $(\mathbf{C})$  $(\mathbf{D})$ FROZEN FOOD that has been thawed shall not be refrozen. 10-304 FOOD Preparation, Holding, Display, and Service All FOOD preparation, holding, display, and service shall be in compliance with Chapters 1-8 of these Regulations. 10-304.11 Operational RESTRICTions Except when operating at a special event, a MOBILE UNIT shall not operate from any single location for (A)more than half an hour. <del>(B)</del> A MOBILE UNIT may not operate later than 7:00 p.m. or half an hour after sunset, whichever occurs first, unless they are at a special event. A MOBILE UNIT may not sell products on a street where the posted speed limit is above 25 mph. (C) (D) A MOBILE UNIT may not operate within 250\_of another vendor. (E) A MOBILE UNIT may not operate within 1,000 ' of a school less than one hour after the school's dismissal time. A MOBILE UNIT may not play music when parked. (F)0 304.12 PERSON IN CHARGE PERSON IN CHARGE or a designated FOOD HANDLER shall be in attendance at all times when the MOBILE UNIT is open for business. 10-304.13 FOOD Preparation uring special events, preparations including grilling, barbecuing, cooking, displaying, serving, and storage may occur outside of the MOBILE UNIT if the PERSON IN CHARGE obtains, prior to operating, a temporary FOOD facility PERMIT from the HEALTH AUTHORITY. 0-304.14 Preparation of Raw POTENTIALLY HAZARDOUS FOOD (TCS) reparation of raw PHF (TCS) is limited to FULL SERVICE COACHES as APPROVED by the HEALTH AUTHORITY or AGENCY OF JURISDICTION. No FOOD preparation may be conducted on limited service novelty MOBILE UNITS or CONSUMER. self service MOBILE UNITS. 10 304.15 Open Prepared FOOD Open prepared FOOD in the MOBILE UNIT shall be discarded at the end of the shift or the day. Only SINGLE-USE ARTICLESand PRE-PACKAGED, non-PHF (TCS) may be returned to the COMMISSARY. 10-20/ 16 Display n display FOOD offered for self-service to the CONSUMER shall be protected from CONTAMINATION. 10-304.17 FOOD Service Temperatures (A)- PHF (TCS) shall be maintained at required temperatures, as specified in Chapters 3-4 and Chapter 3-501.19 of these Regulations, until served to the CONSUMERs.

(B) The PERSON IN CHARGE shall ensure that all hot and cold holding EQUIPMENT continues to function as-

f 185

designed during the FOOD service period. 10-304.18 Bare Hand Contact with READY-TO-EAT FOOD

FOOD t	-	iits and vegetables, FOOD HANDLERs shall eliminate bare hand contact with READY TO EAT

11-101 Applicability and Listing of Terms

1 101.11 Interpretation and Application of Terms

The following definitions shall apply in the interpretation and application of this Chapter.

11-102 Definitions

CCESSORY UNIT means an EASILY MOVABLE item, or a permanently mounted fixture, that is utilized adjacent to the operational location of a PORTABLE UNIT FOR SERVICE OF FOOD.

FOOD SERVICE TRAILER means a mobile FOOD ESTABLISHMENT designed to be towed on public roads, and having an enclosed area for storage, handling, or preparation of FOOD. Such units shall be PERMITted as PORTABLE UNITS FOR SERVICE OF FOOD under the category FOOD SERVICE TRAILER.

OLF CART STYLE FOOD UNIT means a very small, motorized VEHICLE, including golf carts and similar VEHICLEs, used to transport and serve FOOD or BEVERAGES at various locations inside large buildings or on large tracts of land including but not limited to golf courses. Such units shall be PERMITted as PORTABLE UNITS FOR SERVICE OF FOOD under the category GOLF CART STYLE FOOD UNIT, and shall only sell PRE PACKAGED, non PHF (TCS) which includes SEALED BEVERAGES, except that PHF ordered from an APPROVED kitchen may be immediately transported to a customer

NDOOR FOOD SERVICE CART means a PORTABLE UNIT FOR SERVICE OF FOOD operated only at locations clearly identified in the PERMIT application, and shall be within a building having restroom facilities that are accessible during all hours of operation. INDOOR FOOD SERVICE CARTs may serve only LOW RISK FOOD, individually PRE PACKAGED PHF (TCS), or hot dogs which are heated to at least 135°F±2° and held at no less than 135°F±2° until served.

NON-POTENTIALLY HAZARDOUS FOOD (TCS) means FOOD that is incapable of supporting the rapid and progressive growth of infectious, toxigenic, or other harmful microorganisms. Examples include but are not limited to bread, roasted nuts, beef jerky, candy, potato chips, popcorn, and other snack FOOD not requiring refrigerated storage.

UTDOOR/INDOOR FOOD SERVICE CART means a PORTABLE UNIT FOR SERVICE OF FOOD operated only at

prations clearly identified in the PERMIT application. An OUTDOOR/INDOOR FOOD SERVICE CART may be operated inside or outside of buildings and shall have restroom facilities that are accessible during all hours of operation. OUTDOOR/INDOOR FOOD SERVICE CARTs may serve only non PHF (TCS) FOOD and/or hot dogs which are heated to at least 135°F±2° and held at no less than 135°F±2° until served.

PORTABLE BANQUET BAR means a PORTABLE UNIT FOR SERVICE OF FOOD that serves only BEVERAGEs and drink garnishes. PORTABLE UNIT FOR SERVICE OF FOOD means a FOOD ESTABLISHMENT on wheels, easily conveyed from a SERVICING DEPOT or COMMISSARY to one or more APPROVED locations where FOOD is served, and clearly identified in the

**PERMIT** application.

O5 Miscellaneous Design and Construction Criteria 11 406     Sinks, Water Systems, and Waste Water Handling		
Design, Construction, and Identification		
9-1 11 401.11 Application Submission and Requirements		
Commissaries must operate within the parameters set forth in Chapters 1-8 of these regulations unless spe	cified	
otherwise in this chapter. This chapter describes additional requirements specific to Commissaries.		
9-101 Prerequisite for Operation		
9-101.1 Commissaries		
Commissaries must:		
<ul> <li>(A) Limit the number and type of permit holders contracted based on their equipment capabilities, spa service capacity,</li> </ul>	ice, and	
(B) Designate an easily identifiable area for each contracted permit holder that is large enough to acco storage of their food and equipment,	mmodate_	
(C) Have a three-compartment sink and handwashing sink that is conveniently located and easily access use by contracted permit holders,	sible for	
(D) <u>Provide access to restrooms stocked with handwashing soap and disposable hand towels during all operation for use by contracted permit holders.</u>	hours of	
(E) Have an area for filling freshwater tanks with drinking water that meets Section 5-202, and		
(F) If the commissary contracts with Mobile Unit permit holders, it must:		
(1) <u>Have</u> an area for washing equipment and vehicles. Hoses used for washing must be pressu enough to reach all parts of the equipment or vehicle and be stored off the ground.	rized, long	
(2) Construct the premises with curbs and proper slopes which direct wastewater to drains as by the agencies having jurisdiction, and	approved_	
(3) <u>Provide an area for mobile units to dump wastewater into an exterior drain with adequate</u> capture as approved by the sewer agency having jurisdiction.	grease_	
9-101.2 Support Kitchens		
(A) Support Kitchens may be utilized by a temporary event vendor if such use will not cause a nuisance unmanageable food safety risk and is approved.	<u>e or</u>	
(B) A support kitchen must not be used as a commissary for a food establishment with an annually ren permit unless approved.	<u>ewable</u>	
9-2 Operational Requirements		
Subparts9-201Responsibilities of the Commissary Manager9-202Commissary Service Agreement		

f **185** 

9-201 Responsibilities of the Commissary Manager	
A Commissary Manager, or designated PIC, must:	
(A) <u>Be on the premises during all hours of operation</u> ,	
(B) Prohibit the use of the commissary by unpermitted operators,	
Provide       A PERMIT applicant or PERMIT HOLDER shall submit to the HEALTH AUTHORITY properly prepared plans and specifications for review and approval of all PORTABLE UNITS FOR THE SERVICE OF FOOD as required in Chapter 4 101.11 of these Regulations. In addition, PORTABLE UNITS FOR SERVICE OF FOOD shall be designed and constructed as follows: <ul> <li>(A) — A FOOD SERVICE TRAILER shall be designed and constructed to conform to the interior specifications for MOBILE VENDORs as specified in Chapter 10 of these Regulations, and;</li> </ul>	
(C) Operate only on sites for which written approval from the property ownersnotification within five business days to the Health Authority:	
(1) When a contracted permit holder no longer has been obtained a valid agreement to use the commissary, or	
(2) <u>When Hasa contracted permit holder's agreement or lease is changed in any way,</u>	
<ul> <li>(1) <u>Provide written permission notification to each contracted permit holder when an imminent health hazard exists and prohibit them</u> from <u>utilizing the property owner for use of restroom facilitiescommissary until such time</u> that are accessible during all hours of operation.</li> <li>(A)(D) <u>A PORTABLE BANQUET BAR shall be designed and constructed to meet or exceed</u> the specifications of hazard is mitigated.</li> </ul>	
(E) Provide an up-to-date list of contracted permit holders upon request of the Health Authority,	
Maintain       NSF/ANSI Standard 2, as well as the criteria listed in this Section.         (B)       A PORTABLE UNIT FOR SERVICE OF FOOD, except a FOOD SERVICE TRAILER and a PORTABLE BANQUET BAR, shall be designed and constructed to meet or exceed the specifications of NSF/ANSI Standard 59 for Mobile Food Carts, as well as the criteria listed in this Section.         General       Design       and       Construction       11 402.11         Requirements       (F)       A PORTABLE UNIT FOR SERVICE OF FOOD shall be designed a sign in/sign out attendance log for all contracted permit holders. The attendance log must be true and accurate, updated daily, and made available upon.	
request. The attendance log must include the following information:	
(1) The commissary business name, address, phone number, and permit number, he contracted permit holder's business name and <del>constructed to:</del>	
<ul> <li>(A) Prevent entry by rodentsthe name and other vermin.</li> <li>(B) EXCLUDE dirt, splashes, and spills from areas used to store FOOD, UTENSILS, FOOD contact EQUIPMENT, or LINEN.</li> </ul>	
<ul> <li>(C) Facilitate servicing operations, including cleaning and inspections.</li> <li>(1)(2) Minimizesignature of the potential for CROSS-CONTAMINATION.PIC,</li> <li>(D) Provide convenient facilities for hand washing and disposal of wastes.</li> <li>Materials</li> </ul>	
1 403.11 Requirements Aaterials used in construction of a PORTABLE UNIT FOR SERVICE OF FOOD shall meet or exceed the following criteria:	
(A) Materials used in construction of a PORTABLE UNIT FOR SERVICE OF FOOD shall meet of exceed the following criteria. (A) Materials used in construction of a PORTABLE UNIT FOR SERVICE OF FOOD shall be resistant to wear, penetration by rodents and other vermin, and repeated application of cleaning agents and sanitizers. f 185 Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010	

<del>(B)</del> —	- Materials used in a FOOD ZONE of a PORTABLE UNIT FOR SERVICE OF FOOD shall not impart color, taste,
	odor, or toxic chemicals to FOOD.
$(\mathbf{C})$	Exposed surfaces in a FOOD ZONE or a SPLASH ZONE of a PORTABLE LINIT FOR SERVICE OF FOOD shall be

SMOOTH, EASILY CLEANABLE, resistant to corrosion, and free from harmful levels of toxic chemicals including but not limited to lead.

(D) The inside surfaces of drawers, cabinets, or containers, that may be used for storage for UTENSILs used for FOOD preparation or serving, shall be SMOOTH, EASILY CLEANABLE, and resistant to corrosion.

(E) Exposed surfaces in a non FOOD ZONE shall be SMOOTH and corrosion resistant.

(F) Wood shall not be used in a PORTABLE UNIT FOR SERVICE OF FOOD, except that:

(1) Hardwood cutting boards or other APPROVED hardwood UTENSILs may be used for FOOD preparation or serving.

Wooden construction materials, including composites, but not limited to particle board, shall not be used:

# The vehicle

(a) For construction of units to be stored or used outdoors.

(b) Adjacent to, or below, a FOOD CONTACT SURFACE or SPLASH ZONE.

- e) Under a sink, ice bin, BEVERAGE dispenser, refrigeration EQUIPMENT, heating
- EQUIPMENT or in any other area that may be exposed to accumulation of moisture.
   Wooden construction materials may be used for units that will be stored and used only in indoor locations, if the wooden materials are completely encased by a SMOOTH and durable material
  - such as plastic laminate or FRP, with SEALED seams and radiused internal angle treatments.
- (3) Decorative or ornamental wooden structures may be used in non-FOOD ZONE areas, including overhead signs, if the wood is SEALED to prevent damage from exposure to humidity or moisture.

	similar components used only for water, coffee, or tea.
	fication and Display of Required Documents
.11 Ider	ntification Plate, PERMIT, and Grade Card Placement
	A PORTABLE UNIT FOR SERVICE OF FOOD APPROVED after the adoption of these Regulations shall
<del>(A)</del>	Have an identification plate(s), or other durable marking, permanently affixed in a location that is readily
	accessible for inspection, which includes:
	(1) The name and address of the cart's manufacturer;
	<ul> <li>(2) The manufacturer's model and serial numbers; and,</li> <li>(2) The approximation of the series of the serie</li></ul>
	(3) The specific NSF/ANSI standards that the unit_number, if applicable, when there is certified as- being in compliance with, unless such information is provided elsewhere on the unit.
<del>(B)</del>	—Display the Grade Card, issued by the HEALTH AUTHORITY, where it is readily visible to customers.
	Carts designated to be PERMITted as an outdoor FOOD service cart must be certified to meet-
	NSF/ANSI
	Standard 59.
	Carts designated to be PERMITted as an INDOOR FOOD SERVICE CART must be certified to meet NSF/ANS/
	Standard 2.
	Ilaneous Design and Construction Criteria 11-405.11
	and Ground Cover Requirements
-	BLE UNIT FOR SERVICE OF FOOD shall:more
	Provide all FOOD preparation areas, including those in a COMMISSARY, with a lighting intensity of at least 50-
	oot candles.
	Provide overhead protection, as APPROVED by the HEALTH AUTHORITY, for outdoor operation.
	Provide-appropriate ground cover to minimize dust, sand, or other possible CONTAMINATION from the-
(11)	ground.

Sanitizers and Other Poisonous or Toxic Substances

#### ts

# 01 Sanitizers

# 02 Miscellaneous Poisonous or Toxic Substances

### 11-601 Sanitizers

11-601.11 Requirements

- nly a chemical sanitizer listed in 21 CFR 178.1010, Sanitizing Solutions, and used in accordance with the EPA APPROVED manufacturer's label instructions shall be used in a sanitizing solution for a PORTABLE UNIT FOR SERVICE OF FOOD. APPROVED sanitizers shall be stored and utilized as follows:
  - (A) A clean wiping cloth shall be stored in APPROVED sanitizer for immediate use.
  - (B) Containers of sanitizers, properly labeled as "sanitizers," shall be stored only in locations where accidental spill or drips cannot contaminate FOOD or BEVERAGES.
  - (C) A FOOD-CONTACT SURFACE, to which an APPROVED sanitizer has been applied, shall be air dried before use.
  - (D) Sanitizer test strips, a test kit, or other device that accurately measures the concentration in ppm of chemical sanitizers shall be provided and readily accessible for frequently measuring of the concentration of chemical sanitizing solutions.

# 11 602 Miscellaneous POISONOUS OR TOXIC MATERIALS

### 11-602.11 RESTRICTions

ERSONal medications, first aid supplies, chemical cleaning agents, sanitizers not APPROVED for use on FOOD CONTACT SURFACEs, and other POISONOUS TOXIC OR MATERIALs shall, if present, be stored securely in covered containers in a storage clearly designated as "Not for storage of FOOD, BEVERAGE, or supplies used for handling or serving FOOD or BEVERAGE."

# Compliance and

# Subparts

# **1** Portable Units for Service of Food

### 1-701 PORTABLE UNITS FOR SERVICE OF FOOD

# 11-701.11 Requirements

ORTABLE UNITS FOR THE SERVICE OF FOOD shall meet the requirements of Chapter 8 of these Regulations. Additionally: (A) A TEMPORARY FOOD ESTABLISHMENT PERMIT will be required if the portable unit participates in a-

- special event at a location other than the location specified on their health PERMIT.
- (B) A CEASE AND DESIST ORDER operation shall be issued by the HEALTH AUTHORITY to any PORTABLE UNIT-FOR SERVICE OF FOOD found-operating at a location not specified on its health PERMIT.
  - (2)(3) FOOD that is not APPROVED under the health PERMIT shall not be served same business name, and
  - (4) The date, time in, and time out of each visit, or,
  - (5) Other approved time tracking system.
- (G) Flush and sanitize pumps and hoses used to supply drinking water before being placed into service following construction, repair, modification, or periods exceeding 14 calendar days during which they were not used. The Health Authority may require water testing to verify the safety of the water supply.

## 9-202 Commissary Service Agreement

A commissary service agreement must contain:

(A) The commissary name, address, phone number, health permit number, and signature of the PIC,

- (B) The service(s) that the commissary will provide,
- (C) The number of hours per week/month that services are available to the contracted permit holder, and

A clause that indicates

Chapter 10 Mobile Units

<u>(H)</u>	Menu,
<u>(I)</u>	The commercial business address where the mobile unit will be stored when not in use,
<u>(J)</u>	A commissary service agreement that complies with 9-202 and provides the number of hours and services necessary for the operation, and
<u>(К)</u>	Site-specific mobile units must also provide:
	(1) <u>A letter of permission to the Health Authority for access to restrooms that are conveniently located</u> and accessible for use by food handlers during all hours of operation, and
	(2) A lease agreement granting permission to operate on premises.
<u>10-102</u> 10-102	
<u>(A)</u>	Restrooms must not be built as an integral part of a Mobile Unit.
<u>(B)</u>	Freshwater and wastewater tanks must be built as an integral part of a Mobile Unit and are prohibited from being on the ground.
<u>(C)</u>	Permanent utility hook up is prohibited. The unit must be easily conveyable from place to place and return to the commissary whenever necessary for dumping wastewater and filling freshwater.
<u>10-102</u>	2 Mobile Unit Equipment and Structure
<u>Mobile</u>	units must comply with the following when applicable:
<u>(A)</u>	The mobile unit must be fully enclosed and tall enough on the inside to stand upright, 6-foot minimum height.
<u>(B)</u>	A maximum of two service openings that are no larger than 18 inches square, with either hinged or slider windows located in a manner to protect the food from contamination. Service openings must either be self- closing or protected by mechanical air curtains.
<u>(C)</u>	Screens must be limited to ventilation windows, service openings and doors.
<u>(D)</u>	Cooling and ventilation must be sufficient to maintain the interior ambient air temperature of the mobile unit below 100°F.
<u>(E)</u>	<ul> <li>The freshwater holding tank connected to the 3-compartment sink and hand sink must be no less than 40 gallons in capacity, unless specified otherwise, and comply with Part 5-3 of these regulations and wastewater tanks must comply with Subpart 5-401 of these regulations. Water supplying more than one 3-compartment sink or handwashing sink may require increased water holding capacity. Water fixtures and tanks must meet the following requirements:</li> <li>(1) Water pumps must activate automatically when water is dispensed from a fixture. Manually operated water pumps are prohibited.</li> <li>(2) Shut off valves on wastewater tanks must be recreational vehicle waste valves.</li> <li>(3) Tanks must be fitted with an electronic capacity indicator easily visible to the operator.</li> </ul>

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

gallon freshwater tank.
Mobile Units must comply with all fuel gas and fire codes including, but not limited to, having an approved
liquefied petroleum gas system with a leak detection alarm device installed when applicable.
Food equipment located on exterior attached patios of mobile units must be limited to a single unit of
equipment that is inaccessible to the public.
Liquified petroleum gas piping systems, tanks, valves, connectors, appliances, and related parts must be
installed according to current regulations of the Nevada Board for the Regulation of Liquified Petroleum Gas by
properly licensed and certified individuals.
Electrical service, wiring, connections, panels, and associated parts of equipment must be installed by properly
licensed individuals and be compliant with manufacturer installation specifications.

There must be no outlet(s) for overflow on wastewater tanks. Wastewater tanks may be vented as

Mobile units that are low-risk food establishments may be approved to have a minimum of a 15-

outlined in 5-302.4 or by use of an air admittance valve.

### 10-103 Mobile Unit Markings

(4)

(5)

(F)

(G)

(H)

<u>(I)</u>

- (A) The mobile unit must have the business name and business address or business phone number clearly visible on the back, left and right sides of the mobile unit.
- (B) The name on the mobile unit must be the same as the fictitious business name filed with business licensing.
- (C) Each mobile unit having the same business name must provide markings to include a unique vehicle number for each unit.

# 12-102 The lettering Definitions

**ATERING FOOD ESTABLISHMENT** means an APPROVED FOOD ESTABLISHMENT that is serving or preparing FOOD at a location other than its PERMITted location for a contracted FOOD service event. This also includes a place of business or organization that routinely contracts with a CATERING FOOD ESTABLISHMENT to provide FOOD items for individual sale to employees or members of that business, if the FOOD was prepared in a COMMISSARY and transported, displayed, handled and offered for sale as specified in these Regulations.

**\TERING FOOD ESTABLISHMENT** does not include:

- (A) FOOD ordered as take out or delivery from the FOOD ESTABLISHMENT that prepared the FOOD, where the FOOD is given to the CONSUMER for self service, including but not limited to pizza delivery or fried chicken delivery. FOOD delivered by a third-party FOOD DELIVERY SERVICE is not exempt from these Regulations.
- (B) FOOD that is brought from home and presented pot-luck style in a place of business for consumption by the employees of that business, without payment, as long as the business does not offer the FOOD to the public.
- (C) FOOD that is prepared and offered for free distribution to feed the needy, whether done by a charitable organization, a private citizen, citizen group, or a business.

**EVENT LOCATION** means an unPERMITted location that is not owned by the caterer where FOOD is distributed to guests at a contracted private event.

**FOOD DELIVERY SERVICE** means a business that picks up prepared FOOD from a PERMITted FOOD ESTABLISHMENT including but not limited to a full service restaurant for immediate delivery to the end user. The business solely transports the FOOD and is prohibited from preparing or handling open FOOD. This term does not include delivery drivers who work for the FOOD ESTABLISHMENT from which the FOOD originates or delivery of FOOD from retail grocery stores.

f **185** 

**PERMANENT CATERING SUPPORT PANTRY/BANQUET SUPPORT PANTRY** means a facility that is owned or leased by a caterer and serviced by, but remote from, the CATERING FOOD ESTABLISHMENT, for the purpose of conducting banquet service at the remote location, and that maintains at the remote location permanently installed FOOD service EQUIPMENT and or FOOD storage.

**REMOTE SERVICE SITE** means a PERMITted location that is not owned by the caterer where FOOD items, provided by the caterer, are sold by the piece to individual CONSUMERs for a limited period of time in any one 24-hour period.

~	
	ir vendors must operate within the parameters set forth in Chapters 1-8 of these regulations unless specified
for Ope	ise in this chapter. This chapter describes additional requirements specific to open-air vendors. Prerequisite
<u>101 Opc</u>	
The fol	lowing must be submitted and approved prior to operating an open-air vendor permit:
<u>(A)</u>	A lease agreement granting permission to operate on premises,
(-)	
<u>(B)</u>	Equipment specifications, plans, and menu,
(C)	A commissary service agreement that complies with Subpart 9-202 and provides the number of hours and
	services necessary for the operation, and
<u>(D)</u>	A letter of permission to the Health Authority for access to restrooms that are conveniently located and
	accessible for use by food handlers during all hours of operation.
<u>11-101</u>	
<u>11-102</u>	.1 Open-Air Vendor Equipment and Design
Open_/	vir Vendors must:
openi	
<u>(A)</u>	Be limited to 100 square feet,
_	
<u>(B)</u>	Provide an adequate number of handwashing sinks for open-food handling that meet the following criteria:
	(1) A handwaching sink must be stocked with liquid hand seen in a sume discessory single was assess
	(1) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
	The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior
	to any open food handling.
	(2)
	(a) Provide a continuous flow of hot and cold running water without the use of a manual pump,
	(b) be self-contained, and
	(c) Be equipped with an integral five gallon minimum potable water supply tank and a
f 185	<u>wastewater storage tank that is at least 15% greater than the potable water supply,</u> Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by
1 100	Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

<u>(C)</u>	Provide overhead protection for food preparation areas unless prohibited by fire code.		
<u>(D)</u>	If located outside:		
	(1) Operate on a surface such as asphalt or concrete and provide adequate groundcover to prevent environmental contamination from excessive food debris and grease buildup on the ground,		
	Submit an outdoor control plan which describes how food will be protected from pests and during inclement weather conditions such as high wind or rain,		
	(3) Provide covers, lids, or doors for outdoor cooking equipment to protect food from contamination when it is left unattended, and		
	(4)         Have equipment that is designed and capable of operating when the ambient temperature exceeds           100°F.		
<u>(E)</u>	<u>Be easily identifiable and have conspicuous name plates or other durable markings which match the permit</u> name and number.		
<u>(F)</u>	Have equipment which is portable and easily conveyed to the commissary for cleaning and maintenance,		
<u>(G)</u>	Have no connections to a permanent utility such as water, sewer, gas, or power without approval from the agency of jurisdiction and the Health Authority, and		
<u>(H)</u>	Have a physical separation between patrons and open food preparation areas using partitions, food shields, planters, walls, or similar means.		
<u>11-102</u>	.2 Barbecue Equipment and Design		
<u>A barb</u>	ecue must comply with §11-102.1 for open-air vendors and must:		
<u>(A)</u>	Have barbecue cooking equipment that is commercially manufactured and made from non-toxic, durable, cleanable, and rust -resistant materials. All other equipment associated with the barbecue permit must meet the requirements of section 4-205,		
<u>(B)</u>	Be located within 50 feet of:		
	(1) A food establishment under the same permit holder that is capable of supporting the operation of the barbecue, or		
	(2) A mobile unit under the same permit holder that is capable of supporting the operation of the barbecue.		
<u>(C)</u>	Limit cooking equipment to commercially manufactured barbecue grills, smokers, rotisserie ovens, pizza ovens, or similar types of equipment,		
<u>(D)</u>	Provide protective storage for wood chips, bark, or other organic materials used for smoking and flavoring to prevent contamination, and		
<u>(E)</u>	Have a grease collection container or system for smokers and grills that prevents grease accumulation on the ground.		

<u>11-2</u>	Operational Requirements
<u>Subpa</u>	
<u>11-201</u> 11-202	
11-202	
<u>11-201</u>	Operational Requirements for Open-Air Vendors
Open-Air	<u>Vendors must:</u>
<u>(A) (</u>	Operate only at sites specified in the permit issued by the Health Authority,
	Operate as a low-risk food establishment, unless approved to operate as a barbecue as described in 11-102.2 or a seasonal permit as described in 11-202 (B),
<u>(C)</u>	Conduct minimal food preparation on site,
1 (D)	Not conduct complex food processes such as cooling,
<u>(E)</u>	Not hold open TCS food for next-day service,
<u>(F)</u>	ubmit menu changes to the Health Authority for approval prior to implementation,
<mark>(G)</mark> F	Provide the Health Authority access to transportation or food storage vehicles utilized by the open-air vendor
	o ensure that the vehicle is maintained clean, free of trash, food debris, spills, insects, or any other source of
<u>(</u>	contamination to the food or equipment, and
<u>(H)</u>	Provide a means to store and convey trash generated by the open-air vendor and consumers.
<u>11-202</u>	Operational Requirements for Seasonal Permits
<u>(A)</u>	easonal permits are only valid for periods up to 8 consecutive months of operation.
	easonal permits must comply with all applicable sections of this regulation and once expired, must not be enewed until 12 months have elapsed from the start date of the previous operating period.
<u>(C)</u>	Seasonal permit must operate as a low-risk food establishment unless it is located within 50 feet of:
(	1) The contracted commissary, or
(	2) A food establishment under the same permit holder that will provide the necessary support services
	to the seasonal operation.
<u>11-3</u>	Required Records
<u>Subpa</u> <u>11-301</u>	
<u>11-301</u>	Required Records for Open-Air Vendors

Open-Air Vendors must provide the following records to the Health Authority upon request:

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

# (A) Temperature logs for:

- (1) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
- (2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vendor is in operation,
- (B) A valid commissary agreement letter,
- (C) Permission letters, operational plans, or waivers associated with the permit, and
- (D) Same-day receipts for food when applicable.

# Restroom Facilities.

(1) Outdoor FARMER's MARKETs:

- (a) Portable toilets shall be provided, adequate in number and located in an easily accessible area, for vendors and the public.
- (b) The HEALTH AUTHORITY may approve conveniently located plumbed restroom facilities, which are available for use by the vendors and the public, if their use has been assured in writing by the facility owner.
- (c) Toilet facilities, including the toilet room and fixtures, shall be kept clean, in good repair, and free of objectionable odors.

An adequate supply of toilet tissue shall be provided at each toilet at all times. The FARMER's MARKET manager shall maintain, ON-SITE, a surplus supply of toilet paper.

- (d) When portable toilets are used, one portable HAND WASHING SINK with running water which drains to an enclosed integral waste water tank, integral liquid soap, a disposable paper towel dispenser, and a trash receptacle shall be provided for every five portable toilets. The FARMER's MARKET manager shall maintain, ON\_SITE, a surplus supply of liquid soap and disposable paper towels.
- (e) Hand sanitizer may be mounted in the vicinity of the portable toilets for public use, however, shall not be used in place of a portable HAND WASHING SINK for FOOD HANDLERs after using the toilet.
- 2) Indoor FARMER's MARKET:

(a) Indoor toilet facilities shall meet all local building and fire codes.

- (b) HAND WASHING SINKs plumbed with hot and cold running water, tempered by a mixing valve or combo faucet shall be available in each restroom. The FARMER's MARKET manager shall maintain, ON-SITE, a surplus supply of liquid soap.
- (c) A HAND WASHING SINK shall be equipped to provide water at a temperature of at least 100°F±2° through a mixing valve or combination faucet. A self-closing, or metering faucet shall provide a flow of water for at least 20 seconds without the need to reactivate the faucet.
- (d) A wall hung liquid soap dispenser shall be available at each HAND WASHING SINK in the restroom and kept adequately stocked with liquid soap.
- (c) A supply of sanitary, disposable paper towels for drying hands shall be conveniently located near each HAND WASHING SINK. Shared common towels are prohibited at HAND WASHING SINKS. The FARMER's MARKET manager shall maintain, ON SITE, a surplus supply of disposable paper towels.
- (f) Toilet facilities, including the toilet room, sinks, and all fixtures shall be kept clean, in good repair, and free of objectionable odors.
- (g) A supply of toilet tissue shall be provided at each toilet at all times. The FARMER's MARKET manager shall maintain, ON SITE, a surplus supply of toilet paper.
- (h) EASILY CLEANABLE, covered receptacles with plastic trash liners shall be provided for waste materials. Such receptacles shall be emptied at least once a day and more frequently when necessary.

Waste disposal:

- (3) Each-market manager shall ensure there is a minimum of one waste container every 75' to hold waste that accumulates during the FARMER'S MARKET hours of operation. Individual vendors may help satisfy this requirement by providing an appropriate trash container in front of their booth.
   (1) All waste containers, used for EOOD waste, shall be constructed of durable metal or other.
- All waste containers, used for FOOD waste, shall be constructed of durable metal or other durable materials that does not leak or absorb liquids.

All waste containers shall be of adequate size and provided with plastic trash liners.

(5) Each waste container shall be emptied and cleaned daily or more often as needed.

All waste shall be disposed of in an APPROVED manner. (7)-- Wash water, rinse water, or waste water generated at a FARMER's MARKET shall be properly handled and disposed of into a public sewer system. -Lighting: (C)The FARMER's MARKET manager shall ensure: (1) A minimum of 20 foot-candles in public areas within the perimeter of the FARMER's MARKET. A minimum of 35 foot candles, during all nighttime FOOD operations, in all FOOD handling areas. (2)Shielding to contain broken glass shall be used for all artificial light fixtures that are located over, by, or within all FOOD handling areas. 13-202 FOOD HANDLER Requirements 13-203.11 Health Card Requirements PERSONS, working as FOOD HANDLERS in PERMITted FOOD ESTABLISHMENTS at a FARMER'S MARKET, shall posses a valid FOOD HANDLER's HEALTH CARD as issued by SNHD as specified in Chapter 2-104.11 of these Regulations. 3-203.12 Health and Disease Control FOOD HANDLERs shall maintain a high degree of PERSONal cleanliness and conform to good hygienic practices whileworking. -When the HEALTH AUTHORITY has reasonable cause to suspect the possibility of a FOOD BORNE ILLNESS <del>(A)</del> transmission from any FOOD HANDLER, the HEALTH AUTHORITY shall secure a morbidity history of the suspected FOOD HANDLER or make other investigations as may be indicated and take appropriate action, including but not limited to any or all of the following: **(1)** (2)The immediate closure of the FARMER's booth, or ANCILLARY FOOD ESTABLISHMENT, until no further danger of disease outbreak exists and is APPROVED by the HEALTH AUTHORITY to reopen. (3) — Require appropriate medical and/or laboratory examination of the FOOD HANDLER, of other FOOD HANDLERs and/or of their bodily discharges. 13-203--FOOD ESTABLISHMENT PERMIT Requirements 11 Application for a PERMIT by FARMERs Involved in Non Exempt Activities, and LOW and HIGH-RISK ANCILLARY FOOD ESTABLISHMENTS he FOOD ESTABLISHMENT applicant shall: Make written application for the type of PERMIT in question on forms provided by the HEALTH (A)-**AUTHORITY. Information shall include, but is not limited to:** (1) Location. (2) Day(s) of FARMER'S MARKET. (3) Hours of FARMER'S MARKET. (4)-Contact name, address, and phone number. (5)COMMISSARY location, if applicable. (B) Provide a sample menu or a listing of the FOOD to be handled, processed, or PACKAGED. All FOOD shall be prepared and stored in a PERMITted FOOD ESTABLISHMENT or COMMISSARY. -Provide a description of the EQUIPMENT that will be used. <del>(C)</del>-Provide any label for packaging which has been proposed for a FOOD product. <del>(D)</del> -Provide a description of all the steps required to process each PHF (TCS) product to include: (1) The amount of time required for each step. (2) The amount of time required between each step.

(3) Proposed temperatures of the FOOD product.

(4) The amount of time to heat the FOOD product.

(5) The process for handling FOOD by employees of the FOOD ESTABLISHMENT.

changes.

Pursuant to NAC 446.050, no FOOD prepared or stored in a private home may be used, stored, served, offered for sale, sold, given away, or offered to the public in a FOOD ESTABLISHMENT.

### 3 204.17 Access to Establishments, Inspection Records, DEMERIT Values and Scores

- (A) The HEALTH AUTHORITY, after they have properly identified themselves, shall be allowed to enter during any operational times any FOOD ESTABLISHMENT within the HEALTH AUTHORITY's jurisdiction for the purpose of making an inspection to determine compliance with these Regulations. Records of the FOOD ESTABLISHMENT shall be made available for examination to obtain pertinent information pertaining to FOOD and supplies purchased, received, or used, and PERSONs employed.
- (B) Whenever the HEALTH AUTHORITY makes an inspection of a FOOD ESTABLISHMENT, a record of the findings shall be documented on an inspection report form provided for this purpose. The HEALTH AUTHORITY shall furnish a copy of the inspection report form to the PERMIT HOLDER or PERSON IN CHARGE. The form shall summarize the requirements of these Regulations and shall set forth DEMERIT point values for each such requirement. Upon completion of an inspection, the HEALTH AUTHORITY shall total the DEMERIT point values for all requirements in violation and this total will constitute the DEMERIT score for the FOOD ESTABLISHMENT. Based upon the DEMERIT score, the FOOD ESTABLISHMENT at the FARMER'S MARKET will be given a "pass" or "fail" status.

#### 13 204.18 Issuance of Notices

- (A) Except as otherwise provided in Subsection 3, NRS 446.880, whenever the HEALTH AUTHORITY makes an inspection of a FOOD ESTABLISHMENT and discovers that any of the requirements of these Regulations have been violated, the PERMIT HOLDER or PERSON IN CHARGE shall be notified of the violations by means of an inspection report form or other written notice. The notice shall:
  - (1) Set forth the specific violations found, together with the DEMERIT score of the establishment.
  - (2) Establish a specific period of time for the correction of the violations.
  - (3) State that failure to comply with the requirements of any notice issued in accordance with the provisions of these Regulations may result in immediate suspension of the PERMIT.
  - (4) State that an opportunity for appeal, from any notice or inspection findings, will be provided if a written request for a hearing is filed with the HEALTH AUTHORITY within the period established in the notice of correction.

#### 3-204.19 Status of FOOD ESTABLISHMENTs at FARMER's MARKETs

#### Health PERMIT requirements are as follows:

- (A) Certified PRODUCERs of FARM PRODUCTS are exempt from health PERMITting when sampling is limited to whole intact fruits or vegetables and no PROCESSED FARM PRODUCTS aresold.
- (B) Certified PRODUCERs of FARM PRODUCTS who offer samples of a farm product, other than FARM PRODUCTS that are whole and intact, or who sell PROCESSED FARM PRODUCTS at a FARMER'S MARKET, shall obtain a health PERMIT prior to operation. These FOOD ESTABLISHMENTs will be subject to inspection by the HEALTH AUTHORITY. A pass/fail status will be determined by the HEALTH AUTHORITY. Failure to provide information concerning FARM PRODUCTS obtained from APPROVED SOURCES, or FARM PRODUCTS that are determined to be unwholesome or ADULTERATED, will result in immediate suspension of the health PERMIT. A PERMIT will not initially be issued if the score is greater than 10 DEMERITS. Any CRITICAL or MAJOR VIOLATIONS shall be corrected before a PERMIT is issued. When such periodic routine operational inspections take place for these FOOD ESTABLISHMENTs, a passing score is a DEMERIT score ranging from 0 to

15. During an inspection of these FOOD ESTABLISHMENTs, the facility shall fail the inspection when more than. 15 DEMERITs are found. At that time, these FOOD ESTABLISHMENTs' PERMIT will be suspended and a closure fee assessed. These FOOD ESTABLISHMENTs will not be allowed to reopen until all violations are corrected, aclosure fee has been paid, or documented arrangements have been made for payment of the closure fee, and areinspection is conducted, and a passing score is received. A passing score is 15 DEMERITs with no repeat-CRITICAL or MAJOR VIOLATIONS. Any FOOD ESTABLISHMENT which demonstrates a pattern of repeatedlyfailing inspections shall be subject to health PERMIT revocation.

(C) HIGH-RISK and LOW-RISK ANCILLARY FOOD ESTABLISHMENTs shall be deemed to pass its initial PERMITting inspection with a DEMERIT score of 10 DEMERITs or less. A PERMIT will not be issued if the score is greater than 10 DEMERITs. Any CRITICAL or MAJOR VIOLATIONS shall be corrected before a PERMIT is issued. When such periodic routine operational inspections take place, for the HIGH RISK and LOW RISK ANCILLARY FOOD ESTABLISHMENTs, a passing score is a DEMERIT score ranging from 0 to 15. During an inspection of a HIGH-RISK and/or LOW-RISK ANCILLARY FOOD ESTABLISHMENTs, are found. At that time, the HIGH RISK and LOW RISK ANCILLARY FOOD ESTABLISHMENTS are found. At that time, the HIGH RISK and LOW RISK ANCILLARY FOOD ESTABLISHMENTS' PERMIT will be suspended and a closure fee assessed. The HIGH RISK and LOW RISK ANCILLARY FOOD ESTABLISHMENTS' PERMIT will be suspended and a closure fee assessed. The HIGH RISK and LOW RISK ANCILLARY FOOD ESTABLISHMENTS' PERMIT will not be allowed to reopen until all violations are corrected, a closure fee has been paid, or documented arrangements have been made for payment of the closure fee, and a reinspection is conducted, and a passing score is received. A passing score is 15 DEMERITs with no repeat

#### **CRITICAL or MAJOR VIOLATIONS.**

- (D) Whenever the HEALTH AUTHORITY finds an unsanitary or other condition in the operation of a FOOD ESTABLISHMENT which in its judgment constitutes an IMMINENT HEALTH HAZARD to the public's health, the HEALTH AUTHORITY may without warning, notice or hearing, issue a written order to the PERMIT HOLDER or PERSON IN CHARGE citing the condition, specifying the corrective action, and compliance time frame within which the corrective action shall be taken. The order may state that the PERMIT is immediately suspended and all FOOD operations shall be immediately discontinued. Any PERSON to whom such an order is issued shall comply with it immediately. Upon written petition to the HEALTH AUTHORITY, the PERSON shall be afforded a hearing as soon as possible.
- (E) Health PERMITs shall be revoked for any IMMINENT HEALTH HAZARDs, or repeated violations of any of the requirements of this chapter, or for interference with the HEALTH AUTHORITY in the performance of their duties. The PERMIT may be permanently revoked after an opportunity for a hearing has been provided by the HEALTH AUTHORITY. Before taking such an action, the HEALTH AUTHORITY shall notify the PERMIT HOLDER in writing stating the reasons for which the PERMIT.

#### may be suspended for cause pending its revocation or a hearing.

- (I) The HEALTH AUTHORITY may permanently revoke a PERMIT five days following initial service of the notice unless a request for a hearing is filed with the HEALTH AUTHORITY by the PERMIT HOLDER within those five days.
- (2) The hearings provided for in this chapter shall be conducted by the HEALTH AUTHORITY at a designated time and place. Based upon the record of the hearing, the HEALTH AUTHORITY shall make a finding and may sustain, modify, or rescind any official notice or order considered in the hearing. A written report of the hearing decision shall be furnished to the PERMIT HOLDER by the HEALTH AUTHORITY.

#### 3 204.20 Examination and Condemnation of FOOD

#### s specified in NRS 446.920:

(A) FOOD may be examined, or sampled by the HEALTH AUTHORITY, as often as may be necessary to determine freedom from adulteration or misbranding. The HEALTH AUTHORITY may, upon written notice to the owner or PERSON IN CHARGE, place a hold order on any FOOD which is determined or has probable cause to believe to be unwholesome or otherwise ADULTERATED or

#### **MISBRANDED.**

(B) Under a hold order, FOOD shall be allowed to be suitably stored. It shall be unLAWful for any PERSON to remove or alter a hold order, notice, or tag placed on FOOD by the HEALTH AUTHORITY. The FOOD and/or the containers shall not be re labeled, re packed, re processed, altered, disposed of, or destroyed without approval of the HEALTH AUTHORITY, except by order of a court of competent jurisdiction.

(C) After the owner or PERSON IN CHARGE has had a hearing, as specified in NRS 446.895, and on the basis of evidence produced at such hearing, or on the basis of his examination in the event a written request for a hearing is not received within 10 business days, the HEALTH AUTHORITY may vacate the hold order, or may by written order direct the owner or PERSON IN CHARGE of the

- FOOD, which was placed under the hold order, to denature or destroy such FOOD or to bring it into compliancewith the provisions of these Regulations. Such order of the HEALTH AUTHORITY to denature or destroysuch FOOD, or bring it into compliance with the provisions of these Regulations, shall be stayed if theorder is appealed to a court of competent jurisdiction within three days.
- (D) When not on a hold order by the HEALTH AUTHORITY, the PERSON IN CHARGE may voluntarily dispose of FOOD believed to be unwholesome or otherwise ADULTERATED or MISBRANDED.

#### 13 204.21 Service of Notices:

he HEALTH AUTHORITY shall properly serve notice by any or all of the below methods:

- (A) Delivering it to the FOOD ESTABLISHMENT owner.
  - (B) Delivering it to the PERSON IN CHARGE of the FOOD ESTABLISHMENT.
    - (C) Sending it by registered or certified mail, return receipt requested, to the last known address of the FOOD ESTABLISHMENT owner. The HEALTH AUTHORITY shall file a copy of the notice in the records of the FOOD ESTABLISHMENT's file.

# Chapter 14 Special Events and Temporary Food Establishments

<u>Parts</u> 14-1

#### Special Event Requirements and Associated EQUIPMENT

- (A) A HAND WASHING SINK shall be readily accessible within the FOOD ESTABLISHMENT, and not more than 10 '\_away from the FOOD preparation area. The HAND WASHING SINK shall be in place, properly equipped, and ready for use prior to any open FOOD handling. Each ANCILLARY FOOD ESTABLISHMENT that handles open FOOD shall have an operable HAND WASHING SINK at its place of business, properly equipped, and ready for use prior to any open FOOD handling. A HAND WASHING SINK is not required if the only FOOD items offered are commercially PRE PACKAGED FOOD and BEVERAGEs that are dispensed in their original unopened containers, without sampling. All facilities requiring a HAND WASHING SINK shall have, at a minimum:
  - (1) A portable HAND WASHING SINK provided with tempered, 90°F±2° 110°F±2°, running water which drains to an enclosed integral waste water tank, or if a portable or plumbed HAND WASHING SINK is not available, a container with a hands free pressurized flow of tempered water into a wash basin. Such hand washing set ups must have a sufficient amount of hot water generating or holding capacity of no less than 5 gallons of potable water.

	(2) Liquid hand soap, in a pump dispenser, as well as single use paper towels dispensed in a sanitary
	manner, shall be available at the HAND WASHING SINK.
	(3) Waste water from the hand washing process shall drain into a designated container large enough,
	but no less than 5-gallon capacity, to prevent splash or overflow. The waste water container shall
	be emptied as needed into a sanitary sewer.
	(4) A waste receptacle shall be located near the HAND WASHING SINK for disposal of paper towels.
	(5) Hand sanitizers and single service gloves may be used, but are not a substitute for hand washing.
<del>(B)</del>	As a minimum, FOOD service workers shall wash their hands:
	(1) Before entering FOOD preparation and FOOD service areas.
	(2) Immediately before engaging in any FOOD preparation.
	(3) Before and after glove use, if gloves are used.
	(4) After smoking, eating, handling raw FOOD, or using the toilet.
	(5) As often as necessary to remove soil and CONTAMINATION and to prevent CROSS
	CONTAMINATION
<del>(C)</del>	
(0)	eliminate bare hand contact with READY TO EAT FOOD and minimize bare hand contact with other open
	FOOD by suitable means including but not limited to deli paper, spatulas, tongs, single use gloves, or
	dispensing EQUIPMENT. The use of single use gloves or UTENSILs is not a substitute for required hand
	washing. A guidance document is provided in Appendix K.
(D)_	Eating in the FOOD ESTABLISHMENT shall be RESTRICTed to designated areas away from all FOOD
(1)	preparation and storage areas.
	(1) FOOD HANDLERS' BEVERAGEs shall be in a closed container, with a spout or straw, and stored away
	from FOOD and FOOD CONTACT SUBFACES.
<del>(E)</del>	All FOOD HANDLERS shall wear clean clothing or provide an adequate supply of clean aprons when handling
(L)	open FOOD.
<del>(F)</del>	Any PERSON not directly involved in the operation of a FOOD ESTABLISHMENT shall be RESTRICTed from
	preparation and FOOD service areas.
	aning and Sanitizing of UTENSILs and EQUIPMENT
	An APPROVED sanitizing solution, in a labeled container, shall be available prior to any open FOOD
(11)	handling.
	(1) APPROVED sanitizer solutions in water include 50 100 ppm chlorine (bleach), or at a concentration
	specified by the manufacturer, quaternary ammonium compound applied at a concentration
	specified by the manufacturer, or 12.5 ppm iodine, or at a concentration specified by the
	manufacturer.
	(2) Appropriate test strips shall be available and used to measure the concentration of the sanitizer.
	(3) Clean wiping cloths shall be used for frequent sanitizing of FOOD CONTACT SURFACES and
	EQUIPMENT, and shall be stored in the sanitizing solution when not in use.
	ENT and UTENSILs shall be washed, rinsed, and sanitized at least once every four hours, or replaced after four-
iours.	
ours.	(4) When-available ON-SITE, a three-compartment sink or a commercial dishwashing machine
	plumbed with hot and cold water shall be used to wash, rinse, and sanitize FOOD service UTENSILs
	and EQUIPMENT.
	(5) As a minimum, a WARE WASHING facility shall have:
	(3) As a minimum, a write write tacility shall have: (a) -3 basins, large enough for ½ immersion of the largest EQUIPMENT and UTENSILS.
	(a) -3 basins, large enough for 2 immersion of the largest EQUIPMENT and UTENSIES. (b) An adequate supply of potable water.
	(c) An APPROVED disposal system for waste water.
	(c) All APPROVED disposal system for waste water. (6) Sequence for manual WARE WASHING shall be to:
	temperature of 110°F±2°.
	(b) Rinse in the second basin filled with clean water.
	(c) Sanitize in the third basin by immersion for a minimum of one minute, or as directed by the merger features in an ADDROVED excitivity colution.

f 185

I

- (B) The HEALTH AUTHORITY shall RESTRICT FOOD at an event if adequate facilities are not available and functioning properly to maintain FOOD at required temperatures.
- (C) An appropriately sized calibrated stem thermometer, with a range of 0-220°F±2°, shall be available and used to monitor the temperature of POTENTIALLY HAZARDOUS FOOD (TCS).
- (D) Adequate EQUIPMENT shall be provided to maintain hot FOOD at a temperature of 135°F±2°, or above, during storage, display, and service. APPROVED EQUIPMENT includes, but is not limited to, steam tables, hot boxes, grills, and chafing dishes.
- (E) Adequate EQUIPMENT shall be provided to maintain cold FOOD at a temperature of 41ºF±2°, or below, during storage, display and service. In cold storage units, a thermometer or temperature gauge, accurate to ±2°F, shall be conspicuously placed in the warmest area. APPROVED EQUIPMENT includes but is not limited to mechanical refrigeration units and ice chests with a drain.

(F) Stored FROZEN FOOD shall be maintained frozen solid.

13-402.14 Cooking, Reheating and Hot Holding of PHF (TCS)

- (A) Unless requested by a customer, and unless a CONSUMER advisory is properly posted, raw animal FOOD including but not limited to EGGs, FISH, MEAT, POULTRY, and FOOD containing these raw animal FOOD shall be cooked to heat all parts of the FOOD to a temperature and for the time as listed below:
  - (1) Raw animal FOOD, including but not limited to POULTRY, BALUTs and wild GAME ANIMALs, shall be cooked to at least 165°F±2° for at least 15 seconds, except:
    - (a) COMMINUTED and ground MEAT including but not limited to hamburger, shall be cooked to at least 155°F±2° for at least 15 seconds.
    - (b) COMMINUTED FISH products, commercially raised GAME ANIMALs, RATITEs and porkshall be cooked to at least 155°F±2° for at least 15 seconds.
    - (c) INJECTED and MECHANICALLY TENDERIZED MEAT, shall be cooked to at least 155°F±2°for at least 15 seconds.
    - (d) Raw EGGs, not cooked for immediate use, shall be cooked to at least 155°F±2° for at least 15 seconds.
    - (e) Raw EGGs, cooked for immediate service, shall be cooked to at least 145°F±2° for at least 15 seconds.
    - (f) FISH, seafood, and MEAT including commercially raised GAME ANIMALs, shall be cookedto at least 145°F±2° for at least 15 seconds.

Stuffed FOOD shall be cooked to at least 165°F±2° for at least 15 seconds.

- (B) Whole beef roasts, corned beef roasts, pork roasts, and cured pork roasts, including but not limited to ham, shall be cooked in a pre-heated oven and to an internal temperature of 145°F±2°, or held at 130°F±2° for at least 112 minutes, or to a temperature as provided in the guidance document provided in Appendix C.
- (C) If raw or undercooked FOOD of animal origin is offered in a READY TO EAT form as a deli menu, or other item, or as a raw ingredient in another READY TO-EAT FOOD, the PERMIT HOLDER shall inform CONSUMERs by brochures, labels, table tents, placards, deli case or menu advisories, or other effective written means of the significantly increased RISK associated with consumption by certain vulnerable CONSUMERs. Such FOOD shall be marked by an asterisk or described on the menu. This Section does not apply to APPROVED smoked or cured animal FOOD. The following language will satisfy the CONSUMER advisory requirement: Thoroughly cooking FOOD of animal origin, including but not limited to beef, EGGs, FISH, lamb, milk, POULTRY, or SHELLSTOCK reduces the RISK of FOOD BORNE ILLNESS. Young children, the elderly, and individuals with certain health conditions may be at a higher RISK if these FOODs are consumed raw or undercooked.
- (D) POTENTIALLY HAZARDOUS FOOD shall be held at 135°F±2° or above.

f 185

(E) PHF (TCS) that is cooked, cooled, and reheated for hot holding shall be reheated so that all parts of the FOOD reach a temperature of at least 165°F±2° for 15 seconds.

<sup>(</sup>F) Reheating for hot holding shall be done rapidly with the time the FOOD is between the temperatures of 41°F±2° and 135°F±2° not to exceed two hours.

<sup>(</sup>G) READY TO EAT FOOD taken from a commercially processed, HERMETICALLY SEALED CONTAINER, or froman intact package from a FOOD PROCESSING ESTABLISHMENT that is inspected by the HEALTH-

AUTHORITY

I

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

(B) Provide properly developed plans as applicable to the location.

# 14-202 COMMISSARY

# 14-202.11 Requirements

Commissaries shall meet the EQUIPMENT and structural requirements for a FOOD ESTABLISHMENT as provided in FOOD Service ESTABLISHMENT Plan Review Requirements for EQUIPMENT and Facilities and as specified in these Regulations.

### 14-203 Seasonal permits

# 14-203.11 Types

easonal FOOD service PERMITs are subcategorized by location and FOOD type, including but not limited to; indoor, outdoor, pool deck area, PACKAGED non\_PHF (TCS), PACKAGED PHF (TCS), open non\_PHF (TCS) and open PHF (TCS). 14-203.12 General Requirements

All Seasonal PERMITs shall:

- (A) Meet all applicable requirements of these Regulations.
- (B) Be site specific and have written authorization from the property owner.
- (C) Have NSF/ANSI or equivalent EQUIPMENT, wares, and FOOD CONTACT SURFACEs where applicable.
- (D) Have access to an approvable restroom with hot and cold water under pressure, dispenser fed soap and towels, and where applicable be ventilated with a self closing door. The applicant shall have written permission from the property owner for use of restroom facilities that are accessible during all hours of operation.
- (E) Have a written use agreement with a PERMITted COMMISSARY or a support kitchen.
- (F) Have FOOD transport EQUIPMENT that is NSF/ANSI or equivalent and capable of maintaining the required temperatures.
- (G) Have a minimum of 35 foot candles of natural or artificial light in all FOOD handling areas. Shielding to contain broken glass shall be used for all artificial light fixtures that are located over, by, or within all FOOD handling areas.
- 14 203.13 Seating

ASONAL FOOD PERMITs shall not provide seating for the consumption of FOOD purchased at the

#### SEASONAL FOOD ESTABLISHMENT.

#### 14-203.14 Specific Requirements

(A) PACKAGED non-PHF (TCS) may be exempt from Plan Review. An operational inspection shall be conducted to verify that:

- (1) Packages remain SEALED and sampling of product does not occur.
- (2) Procedures are in place to maintain FOOD off the ground or floor.
- (B) PACKAGED PHF (TCS) requires Plan Review in addition to a field inspection. Requirements include:
  - (1) Packages shall remain SEALED and sampling of product does not occur.
    - (2) Procedures are in place to maintain FOOD off the ground or floor.
  - (3) NSF/ANSI or equivalent refrigeration or hot-holding EQUIPMENT with an APPROVED power source. Open non PHF (TCS) requires Plan Review and a field inspection. Requirements include:
  - (1) Procedures are in place to maintain FOOD off the ground or floor.
    - (2) That NSF/ANSI or equivalent refrigeration or hot holding EQUIPMENT with an APPROVED power source to be used.
    - (3) A self-contained or permanently plumbed HAND WASHING SINK with hot and cold water service under pressure. The self contained HAND WASHING SINK shall be NSF/ANSI or equivalent and shall be capable of containing at least 5 gallons of potable water, 2.5 gallons of hot water and 7.5 gallons of waste water.
    - (4) Outdoor operation shall have overhead protection.
- Both indoor and outdoor operations shall provide APPROVED shielding of the FOOD from customers.
  - (D) Open PHF (TCS) require preliminary plan review and a field inspection. Requirements include:
    - (1) Procedures are in place to maintain FOOD off the ground or floor.
    - (2) That NSF/ANSI or equivalent refrigeration or hot holding EQUIPMENT with an APPROVED power source to be used.
    - (3) A self contained or permanently plumbed HAND WASHING SINK with hot and cold water service under pressure. The self-contained HAND WASHING SINK shall be NSF/ANSI or equivalent and shall be capable of containing at least 5 gallons of potable water, 2.5 gallons of hot water, and 7.5 gallons of waste water.
    - (4) A comprehensive operational FOOD handling plan for all the steps required to process each PHF (TCS) product may be required to include:
      - (a) The amount of time required for each step.
      - (b) The amount of time required between steps.
      - (c) Proposed temperatures of the FOOD product.
      - (d) Length of time required to heat a FOOD product.
      - (e) The details of handling the FOOD by FOOD HANDLERs of the FOOD ESTABLISHMENT.
    - (5) Outdoor operations shall have overhead protection.
    - (6) Both indoor and outdoor operations shall provide APPROVED shielding of the FOOD from
    - customers.

f 185

(7) EQUIPMENT and UTENSILs shall be washed, rinsed, and sanitized or replaced at least once every four hours, or more often if necessary. WARE WASHING facilities, if provided, shall be maintained

as specified in Chapter 4 of these Regulations. The sink shall have hot water at a minimum temperature of 110°F±2°, and cold running water which drains to an APPROVED method of waste water disposal. If a three compartment sink is not available on site, a WARE WASHING facility shall be available that has:

(a) Three basins, large enough for 1/2 immersion of the largest EQUIPMENT and UTENSILS.

- (b) An adequate supply of hot and cold potable water.
- (c) An APPROVED disposal system for waste water.
- (E) Pool deck SEASONAL FOOD ESTABLISHMENT PERMITs shall also meet the requirements of NAC 444.288. The following requirements shall be met for all operations on pool decks and within pool barriers:
  - (1) No glass or breakable items shall be allowed except that glass liquor and mixer bottles under the control of a FOOD HANDLER are acceptable.
  - (2) Bar/FOOD units shall be located remotely from the edge of the pool on the raised rear deck areaif available.
  - (3) Work stations shall not obstruct access to the pool deck, or to necessary fixtures, including butnot limited to showers and water fountains.
    - not innited to showers and water foundans.
  - (4) Work stations shall not be placed in any location where there is standing water.
  - (5) Work stations shall be broken down, covered, protected, and stored when not in use.
     (6) All electrical connections for work stations shall be GFCI protected and testable, and temporary.
  - electrical runs shall not pass across walkways used by bathers or in wet areas such deck drains. (7) An operational plan shall be completed and shall address all of the above including a statement-
  - that management will not permit FOOD or drink to be consumed within 4' of any pool or spa.

#### 14-204 Menu 204.11 RESTRICTions

For profit and non profit applicants not fulfilling the facility and EQUIPMENT requirements, as specified in Paragraph 14-2 of this Chapter, shall be subject to menu or category RESTRICTions as determined by the HEALTH AUTHORITY.

rte

- 14-301 Food Source
- 14-302 Food Storage and Transportation

14-303 Food Preparation, Holding, Display, and Service

14-301 FOOD Source

#### 4-301.11 FOOD

(A) All ingredients used in FOOD, including water and ice, prepared in a SEASONAL FOOD ESTABLISHMENT shall be from an APPROVED SOURCE.

(B) FOOD found to be in unacceptable condition cannot be used as ingredients in FOOD offered for sale by a SEASONAL FOOD ESTABLISHMENT and shall be either discarded or returned for credit to the provider.

- (C) No FOOD prepared or stored in a private residence or house may be used, stored, served, offered forsale, sold, or given away in a SEASONAL FOOD ESTABLISHMENT as prohibited by NRS 446.870.
- 14-302 FOOD STORAGE and Transportation

#### 14 302.11 FOOD

(A) Shall be stored in an APPROVED COMMISSARY or PERMITted FOOD ESTABLISHMENT.

(B) Shall comply with all storage requirements listed in Chapter 3 of these Regulations.

(C) Shall be transported in a manner that maintains the correct temperature of the FOOD and prevents CROSS CONTAMINATION during transport.

14-303 FOOD Preparation, Holding, Display, and Service

14-303.11 Requirements

FOOD preparation, holding display, and service shall meet all requirements in Chapter 3 of these Regulations. 14 - 303.12 Menu Changes

on menu approval from the HEALTH AUTHORITY, during the Plan Review process, any subsequent menu/EQUIPMENTchanges shall be submitted and APPROVED by the HEALTH AUTHORITY prior to implementation.

f **185** 

#### 14-303.13 Records

#### When a Seasonal PERMIT HOLDER is required to have a COMMISSARY which is owned by another operator, a Service Log outlining the following information shall be maintained:

#### (A) The business name of the Seasonal PERMIT HOLDER.

- (B) The health PERMIT number.
- (C) The business name, address, phone number, and health PERMIT number of the COMMISSARY.
- (D) The log shall include:
  - (1) Date.
  - (2) Time In.
  - (3) Time Out.

(4) Name and signature of the PERSON IN CHARGE at the COMMISSARY.

- (5) Name and signature of the PERSON IN CHARGE of the Seasonal PERMIT.
- (E) All information shall be completed and logged at each visit. All of the information shall be complete. A legible log shall be maintained at the COMMISSARY and be made available upon request of the HEALTH AUTHORITY.

#### 14-303.14 Non-PHF (TCS) PACKAGED FOOD Handling

# OOD shall be purchased the day of the event unless a PERMITted COMMISSARY is provided. Receipts of purchase shall-

be maintained and available for review by the HEALTH AUTHORITY.

# 4-303.15 PACKAGED PHF (TCS) Handling

- (A) FOOD shall be purchased the day of the event unless a PERMITted COMMISSARY is provided. Receipts of purchase shall be maintained and available for review by the HEALTH AUTHORITY.
- (B) All PHF (TCS) shall be maintained at required temperatures in NSF/ANSI or equivalent refrigeration or hot holding EQUIPMENT.
- (C) Sampling of FOOD products is prohibited.

#### 4 303.16 Open Non PHF (TCS) Handling

(A) A COMMISSARY shall be required.

(B) The location, transportation, EQUIPMENT for transportation, and procedures shall be APPROVED by the HEALTH AUTHORITY.

(C) HAND WASHING SINKs, as required in Paragraph 14 203.14(C) (3) of this Chapter, shall be located in the immediate vicinity of any FOOD handling, preparation, or WARE WASHING areas.

#### 4-303.17 Open PHF (TCS) FOOD Handling

(A) A COMMISSARY shall be required. Complex FOOD preparation shall be completed at the COMMISSARY.

- (B) Immediately prior to transport all PHF (TCS) temperatures shall be taken and recorded on a service log to ensure that the FOOD is maintained at temperatures as specified in Chapter 3-401 through 3-403 of these Regulations. These logs shall be made available to the HEALTH AUTHORITY upon request.
- (C) Upon arrival at the APPROVED site the PERSON IN CHARGE shall take, and record on a service log, temperatures of the PHF (TCS).
- (D) FOOD that is not within the required temperature range at delivery, as specified in these Regulations, shall be consumed or discarded within four hours. If effective rethermalization and/or cooling EQUIPMENT are available, FOOD shall be reheated or cooled as specified in these Regulations
- (E) Only minimal FOOD preparation or FOOD handling shall be allowed on-site. Minimal FOOD preparation includes but is not limited to dish-up, packaging, reheating, assembly and/or garnishing.
- (F) HAND WASHING SINKs, as required in Paragraph 14-203.14(D) (3) of this Chapter, shall be located in the immediate vicinity of any FOOD handling or preparation area.

(A) The EVENT COORDINATOR is operating the SPECIAL EVENT, including TASTING EVENTs, on their own property with outside FOOD or BEVERAGE vendors participating.

(B)	The EVENT COORDINATOR is conducting the SPECIAL EVENT on property other than their own, with outside
S. 7	
	vendors providing FOOD or BEVERAGE services. If the event takes place on private property, a permission
	letter from the property owner shall be obtained and submitted to the HEALTH AUTHORITY as part of the
	application process.

(1) <u>or Annual Itinerants</u> and mobile vendors are included in the total vendor count. If mobile vendors setup additional facilities outside of their unit, the vendor shall apply for a TEMPORARY FOOD-ESTABLISHMENT PERMIT., or

(2) Two or more tasting booths.

(B) An event coordinator permit willis not be required if <u>either of</u> the following requirements are met<u>conditions</u> apply:

(A) The EVENT COORDINATOR is the sole vendor associated with the SPECIAL EVENT. If the event is not operating on its own property, a permission letter from the property owner shall be obtained and submitted to the HEALTH AUTHORITY as part of the application process.

(B) A non profit organization operating on their own property, as stated in NRS 446.870, is exempt from these Regulations. If the event is to be held off the PREMISES of the non profit organization, an EVENT COORDINATOR PERMIT will be required.

#### 5 201.12 EVENT COORDINATOR

ne SPECIAL EVENT SPONSOR shall designate an EVENT COORDINATOR.

15-202 EVENT COORDINATOR PERMIT

#### 15 202.11 Application

f 185

e EVENT COORDINATOR shall make written application for an EVENT COORDINATOR PERMIT on forms provided by the HEALTH\_AUTHORITY\_to\_include\_a\_description\_of\_support\_services, and a list\_of\_FOOD\_vendors\_with\_contact information.

- (A) The application for the EVENT COORDINATOR PERMIT shall be accompanied by payment of a fee as established by the DISTRICT BOARD OF HEALTH.
- (B) A late fee will be assessed if the PERMIT application and fee is not submitted to the HEALTH AUTHORITY a minimum of seven days prior to the start date of the event. Additional fees will be incurred if the PERMIT application is submitted less than 24 hours prior to the event.
- (C) A map of the event shall accompany the application, or be provided no less than 48 hours prior to the start of the event.
- Once submitted the application shall be updated as required in Section 15-203.11(B) of-
  - (1) Except as required in 14-101.1(A)(2), temporary food establishments or food vendors are owned and operated by the same person and the event is not a tasting event.

The special event does not meet the definition of a food establishment as described in these regulations.

(D) Failure to submit an EVENT COORDINATOR application as required by this Section may result in a CEASE AND DESIST ORDER being issued prohibiting the preparation, display, service, and sale of any FOOD items at the SPECIAL EVENT.

### 14-101.114-101.2 15-202.12 Application ReviewSubmission

- (A) The event coordinator <u>must submit the following items with the event coordinator</u> permit application-shall be reviewed by:
  - (1) A letter of permission or other legally executed document from the HEALTH AUTHORITY and property owner granting permission to operate the proposed plan shall be APPROVED or denied. If denied, the applicant shall be notified event at the site address,
  - (2) A list of food vendors and their contact information,
  - (3) A site map of the reason(s) forevent indicating the location of food vendors, toilet and handwashing facilities, trash receptacles, parking, lighting, electrical access, and support service areas, and

(4) <u>A description of denial. Incomplete applications shall be denied.support services.</u>

#### (B) The Health Authority may deny an Event Coordinator Permit if:

- (1) The application is not submitted at least one business day prior to the event start date,
- (2) The application is incomplete, or there are missing supporting documents, and resubmission does not occur at least three business days prior to the event start date, or
- (3) Other authorities or agencies having jurisdiction do not authorize the event.

#### 14-101.214-101.3 Responsibilities of the Event Coordinator

### 15-203.11 Responsibilities

The event coordinator shall:

- (A) Ensure compliance as specified in Section 15 205 of this Chapter.
- (B) Inform the HEALTH AUTHORITY of any changes or additions made after the original application wasreviewed.
- Coordinate all services required as specified in Section 15-205 of this Chapter.
  - (C) Notify all TEMPORARY FOOD ESTABLISHMENTs that will be associated with the SPECIAL EVENT that:
    - (1) They are required to make advance application for a PERMIT to operate as specified in Section-15-301 of this Chapter.
    - (2) Failure to make application for a PERMIT and pay any applicable fees may result in a CEASE AND-DESIST ORDER being issued.

(D) Have a designated representative available to the HEALTH AUTHORITY during the event.

15-203 EVENT COORDINATOR Permission to Operate

#### 15-204.11 Issuance of PERMIT

IN EVENT COORDINATOR PERMIT shall be issued once it has been determined by the HEALTH AUTHORITY that applicablerequirements have been met.

#### 15-204.12 Time Limit for PERMIT

An EVENT COORDINATOR PERMIT to operate shall not exceed 14 consecutive days.

The EVENT COORDINATOR shall be responsible for all as specified on the EVENT COORDINATOR PERMIT application which may include, but is not limited to, potable water supply, disposal of waste water, disposal of solid waste, restroom facilities including associated HAND WASHING SINKs, power supply, and central refrigeration services. 15-204 General Requirements for Special Events-15-205.11 Compliance with Requirements

SPECIAL EVENTs shall comply with the requirements specified in this Section and may be subject to other applicable chapters of these Regulations. As provided in *NRS 439.410 and NRS 446.865*, the HEALTH AUTHORITY may impose additional requirements to prevent potential health HAZARDs related to the operation of such events. A guidance documents is provided in Appendix I.

# 15 205.12 Support Services Responsibilities

f 185

The EVENT COORDINATOR shall be responsible for all items as specified on the event coordinator permit application which may include, but is not limited to,such as potable water supply, disposal of waste waterwastewater, disposal of solid waste, restroom facilities including associated handwashing sinks, power supply, central warewashing facilitiesincluding associated HAND WASHING SINKs, power supply, and central refrigeration services. - (C) Non potable water supplies including but not limited to water trucks for dust control shall not be used at SPECIAL EVENTs where spray or flow may contaminate FOOD. All non potable water connections and service containers shall be clearly labeled.
- (D) Hoses connected to potable water sources shall meet the requirements as specified in Chapter 5-302.16 of these Regulations.

#### 15-205.17 Waste Water

The EVENT COORDINATOR shall ensure that all waste water generated at an event is discharged to a sanitary sewer. The dumping of waste water into a storm drain or directly onto the ground is strictly prohibited. Improper disposal may be subject to citations and/or penalties.

#### 15-205.18 Solid Waste

- (A) The EVENT COORDINATOR shall ensure proper disposal of garbage as specified on the EVENT COORDINATOR PERMIT application.
- (B) The EVENT COORDINATOR shall ensure the presence of an adequate number of leak proof trash receptacles in common areas for public use.
- (C) Trash receptacles shall be emptied as often as necessary to prevent excessive accumulation of solid waste so as not to create a public health nuisance.
- (D) The EVENT COORDINATOR shall provide for the removal of any solid waste scattered on the event PREMISES as a result of event activities, including the removal of such waste during and at the conclusion of the event.
- (E) Grease and waste cooking oil shall be disposed of in a manner APPROVED by the HEALTH AUTHORITY. Disposal of grease or waste cooking oil to the sanitary sewer system in a storm drain or on the ground is prohibited and may be subject to citations and/or penalties.
- (F) Improper disposal of solid waste may be subject to citations and/or penalties as specified in NRS 444.630.
- (G) The SPECIAL EVENT COORDINATOR is responsible for developing and implementing a resource recovery plan at any event where attendance is expected to exceed 5,000 PERSONs per day. Cardboard, glass, plastic bottles, and aluminum generated at an event of this size shall be collected and recycled.

### <del>15 205.19</del>

f 185

(D) A waste receptacle must be located at the handwashing sink for the disposal of paper towels.

(E) Handwashing sinks for customer use must be placed at the exit to any animal attraction associated with the event.

#### 14-102.214-102.3 Animal Attractions

Animal attractions shallmust not create nuisances, odors, or fly pest problems that impact food service operations. The Health Authority may impose additional restrictions and requirements to ensure the health of the public. <u>All</u> animal attractions must be set at least 50 feet away from any food operation.

### 14-103 Trade Shows, Conventions, Chili Cook-Offs, and FOOD and BEVERAGE Tasting Events 15-206.11 PERMIT Application

he EVENT COORDINATOR shall apply for an EVENT COORDINATOR PERMIT as specified in Sections 15 201 and 15 202 of this Chapter.

#### 5-206.12 Responsibilities of the EVENT COORDINATOR

In addition to the responsibilities specified in section 15-203 of this Chapter 14-101.3, the event coordinator of a trade show, convention, chili cook-off, or tasting event shall:

Inform "for profit" and "non profit" boothmust inform all food vendors, with a point of sale, or similarother arrangement for direct compensation for food or beverage, that they must make advance application for a PERMIT tooperate a TEMPORARY FOOD ESTABLISHMENT and that failure to do so may result in a CEASE AND DESIST ORDER being issued have a valid health permit to participate in the event.

<del>(A)</del>	-Provide the criteria for proper set-up to vendors who do not accept monetary compensation as described
	in Section 15-303 of this Chapter and ensure that they are ready to operate at the time specified in the
	EVENT COORDINATOR application. Inspection of these booths shall be documented on the EVENT
	COORDINATOR PERMIT inspection report.

(B) Ensure that the general requirements for SPECIAL EVENTs, as specified in Section 15-205 of this Chapter, are in place prior to the opening time of the event as indicated on the EVENT COORDINATOR PERMIT application.

# (F) The permit holder of the temporary food establishment must provide proof of payment of the permit application invoice upon request.

Except as otherwise specified in Section 15 303 of this Chapter, FOOD that is prepared in a private home shall not be sold, offered or displayed for sale, or offered for compensation or contractual consideration of any kind.
 14-202 Temporary Food Establishment Permit Exemptions

#### 15-303.11 Exemptions

ccordance with NRS 446.870, the following FOOD ESTABLISHMENTs are exempt from obtaining a PERMIT:

- (A) Any PERSON that prepares FOOD in a private home and gives it away free of charge or for consideration of any kind unless it is given to a PERMITted FOOD ESTABLISHMENT.
  - (B) A religious, charitable, or other non-profit organization may, without possessing a PERMIT from the HEALTH AUTHORITY, sell FOOD occasionally to raise money, whether or not the FOOD was prepared in a private home, provided the sale occurs on the PREMISES of the organization. If the sale is to occur off the PREMISES of the organization, a PERMIT shall be required.

The Health Authority may exempt a temporary food establishment from obtaining a PERMIT the provisions of these regulations if the Health Authority determines that the food which is sold, offered, or displayed for sale, or served at the establishment does not constitute a potential or actual hazard to the public health. Exemptions may include, but are not limited to:

Commercially bottled or

(A) Bottled water, canned BEVERAGEs, including water, that do not require refrigeration, and soft drinks,

- (B) Customer self-service coffee or tea. This exemption does not include TCS or open-food handling except brewing coffee or tea,
- (A)(C) Commercially prepared acidic beverages (such as orange juice, lemonade, and other similar beverages) that are served from the SEALED-original properly labeled container without the addition of consumer ice or other regulated food product-

SEALED, commercially PACKAGED non-PHF (TCS)-(D) Hermetically sealed and unopened containers of non-TCS beverages, which do not require refrigeration, (E) Hot chocolate prepared for immediate service without the use of TCS foods, -Non-TCS prepackaged baked goods with proper labeling from an approved source with proper (1)labeling including but not limited to potato chips, candy, popcorn, and other similar FOOD. (B)(F) Booths which sample FOOD, but do not receive compensation or sell the product sampled at thebooth. Although a TEMPORARY FOOD ESTABLISHMENT PERMIT is not required, the booth may besubject to requirements of these Regulations and may be inspected under the EVENT COORDINATOR-PERMIT.requiring no on-site preparation, 15-303 General Requirements for TEMPORARY FOOD ESTABLISHMENTs 15 304.11 Compliance with Requirements TEMPORARY FOOD ESTABLISHMENTs shall comply with the requirements specified in this Chapter and other applicable portions of these Regulations. The HEALTH AUTHORITY may impose additional requirements to protect the public from potential (A)HAZARDs related to the operation of these establishments. The HEALTH AUTHORITY may RESTRICT or limit menu items, and may prohibit the sale of any PHF (TCS) (B)that may put the public at RISK of disease or injury. The HEALTH AUTHORITY: - If necessary to protect the public health, specific requirements in addition to the requirements (1)specified in this Chapter and as specified by NRS 439.410 and NRS 446.865, may be imposed. Shall document the conditions that necessitate the imposition of additional requirements and shall (2)state the underlying public health concerns. TEMPORARY FOOD ESTABLISHMENTs, and all other operations which sell alcoholic BEVERAGEs for consumption on PREMISES, shall post health warnings for drinking during pregnancy as specified in NRS 446.847 5 304.12 PERSON IN CHARGE ch TEMPORARY FOOD ESTABLISHMENT shall have a designated PERSON IN CHARGE responsible for knowledge of, and compliance with, these Regulations, Such PERSON shall be on site and accessible during all hours of operation of the TEMPORARY FOOD ESTABLISHMENT. Facilities without such PERSON IN CHARGE shall not be APPROVED to open or operate. 5-304.13 FOOD Source All FOOD shall be obtained (A) <u>Non-TCS foods and unopened prepackaged food</u> from an approved source acceptable to the HEALTH AUTHORITY. Home canned FOOD is prohibited. As per NRS 446.870, no preparation or storage shall occur at a private residence or anywhere other than at a PERMITted FOOD ESTABLISHMENT for any PHF (TCS) or perishable FOOD intended to be sold, offered, or displayed for sale at a TEMPORARY FOOD ESTABLISHMENT. In the absence of an APPROVED COMMISSARY, same day receipts for FOOD shall be available on-site for review by the HEALTH AUTHORITY upon request. Receipts and/or invoices shall be maintained at the booth for all FOOD obtained outside of Clark County.  $(\mathbf{D})$ Nevada. (E)lce, which is intended for human consumption or cooling purposes, shall be obtained from an APPROVED SOURCE. Packages of FOOD, including packages of FOOD rePACKAGED from bulk that was prepared within Clark County, that are for sale in a TEMPORARY FOOD ESTABLISHMENT shall have a label which has been APPROVED by the HEALTH AUTHORITY. The label shall meet the requirements as specified in Chapter 3 of these Regulations. 304.14 FOOD Cooking, Holding and Service EQUIPMENT (C)(G)\_\_All FOOD cooking, holding, and service EQUIPMENT shall be constructed of non-toxic materials.including but not limited to those specified in Chapter 4-201.11 of these Regulations and shall bemaintained clean, in good repair, and in with proper labeling, such condition as not to present a RISK topublic health.as honey, jerked meats, potato chips, popcorn, and other similar foods,

f **185** 

- EQUIPMENT and UTENSILs shall be thoroughly cleaned and sanitized, as specified in Section 15-304.19 of this Chapter, between being used for raw animal products and READY TO EAT\_FOOD.
   (3) When WARE WASHING facilities are not available, an adequate supply of clearly identified
- (3) When WARE WASHING facilities are not available, an adequate supply of clearly identified EQUIPMENT and UTENSILs shall be provided for use on raw animal products.

(H) FOOD dispensing UTENSILs shall be stored in a manner that protects UTENSILs and FOOD from CONTAMINATION. UTENSILs may be stored:

(1) In the FOOD product with the handle extended above the FOOD.

(2) On a FOOD CONTACT SURFACE including but not limited to a clean portion of a FOOD preparation table or cooking EQUIPMENT that has been properly cleaned and sanitized at an APPROVED frequency.

In a clean, protected location if the UTENSILs addition to compliance with Chapters 1-8 of these regulations, temporary food establishments are subject to the additional operational requirements in this section.

#### 14-203.1 Equipment

Temporary food establishments must operate using equipment, which is in good condition, easily cleanable, and does not pose a food safety risk.\_\_\_\_

#### 14-203.2 Operational Requirements

Temporary food establishments must:

(A) Conduct minimal food preparation on site,

- (3) <u>Not conduct complex food processes</u>, including but not limited to ice scoops, are used only with a FOOD that is non-PHF (TCS).
- In a container of water, if the water is maintained at a temperature of 41°F±2°, or below, or 135°F±2°, or above, and the UTENSILs and the container are cleaned at least every four hours or at a frequency necessary to preclude accumulation of FOOD residues.
- (I) Ice intended for use in BEVERAGEs shall be stored separately from ice used for all other purposes, and shall be dispensed as directed in Section (G) above using an APPROVED scoop with a handle.

(A)(B) Ice used for cooling shall not be used for consumption. Ice used for cooling purposes:, at the event location,

(C) Prohibit use or sale of reduced oxygen packaged foods which were packaged at a retail food establishment unless prior approval has been granted by the Health Authority

(D) Prohibit TCS food served or displayed at an event from being re-served or held over for future service,

(E) Operate only at sites which written approval from the property owner has been obtained,

(F) Submit menu changes to the Health Authority for approval prior to implementation,

- (G) Ensure that transportation vehicles are maintained clean, free of trash, food debris, spills, pests, or any other source of contamination to the food or equipment, and
  - (1) In the absence of Shall not come in direct contact with FOOD.
  - (2) Shall have adequate drainage to prevent pooling of water.

(K) BEVERAGEs stored in cooling ice are not allowed for self-service to the general public and shall be dispensed by the TEMPORARY FOOD ESTABLISHMENT operator.

(L) Chemicals shall be stored separate from, and below, all FOOD, SINGLE SERVICE ARTICLES, SINGLE USE ARTICLES, and FOOD EQUIPMENT.

- (M) FOOD preparation and cooking EQUIPMENT shall not be stored in areas accessible to the public.
- (N) All open FOOD preparation, storage, and display surfaces shall be SMOOTH and EASILY CLEANABLE.

(O) Cloth towels shall not come in direct contact with FOOD.

04.18 Hygienic Practices Requirements and HAND WASHING SINKs

f 185

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010  
 (H)
 A HAND WASHING SINK shall be readily accessible inside or directly adjacent to, but not more than 10'\_from, the preparation area of a TEMPORARY FOOD ESTABLISHMENT. The HAND WASHING SINK shall be in place, properly equipped, an approved commissary or permitted support kitchen, provide same day receipts for all TCS foods and/or open prepared food upon request to the Health Authority.

#### 14-203.3 Handwashing Facilities

- (A) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
- (A)(B) The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.
  - (1) <u>An</u> When a portable or plumbed HAND WASHING SINK is not available, a container with a spigot or other means that will allow gravity flow of tempered water, at temperatures of 90°±2° to 110°±2°, with a minimum capacity of two gallons shall be provided. At least five gallons of potable water shall be available on-site for the purpose of washing hands.
  - (2) Liquid hand soap in a pump dispenser, and single-use paper towels dispensed in a sanitary manner, shall be available at the HAND WASHING SINK.
  - (3) Waste water from the hand washing process shall drain into a designated container large enough to prevent splash or overflow. The waste water container shall be emptied as needed into a sanitary sewer.
  - (4) A waste receptacle shall be located near the HAND WASHING SINK for the disposal of paper towels.
  - (5) Hand sanitizers and single service gloves may be used, but are not a substitute for hand washing. An employee of a FOOD ESTABLISHMENT shall not use a pair of gloves intended for a single use for more than one purpose, and shall discard the gloves after they are damaged or soiled, or after the process of preparing FOOD has been interrupted.
  - (6) When using gloves for working with FOOD, hands shall be washed before donning gloves for working with FOOD and after removing gloves when handling raw animal products.
  - (7) A HAND WASHING SINK is not required if the only FOOD items offered are commercially PRE-PACKAGED FOOD and BEVERAGEs that are dispensed in their original unopened containers.
  - (B) FOOD service workers, as a minimum, shall wash their hands:
    - (1) Before entering FOOD preparation and service areas.
    - (2) Immediately before engaging in any FOOD preparation.
    - (3) Before donning gloves for working with READY TO EAT FOOD and after removal of gloves when working with raw animal product.

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010  $(\Lambda)$ A £4. . . . 1.1 .....

		(4) After using the toilet, smoking, eating, or handling raw FOOD.
		(5) As often as necessary to remove soil and CONTAMINATION and to prevent CROSS-
		CONTAMINATION:
	<del>(C)</del>	Unless prior operational procedures are APPROVED by the HEALTH AUTHORITY, FOOD HANDLERs shall
		eliminate bare hand contact with READY TO EAT FOOD by suitable means including but not limited to deli
		paper, spatulas, tongs, single-use gloves, or dispensing EQUIPMENT. The use of single-use gloves or
		UTENSILs is not a substitute for required hand washing. A guidance document is provided in Appendix
		K.
	<del>(D)</del>	Eating in the TEMPORARY FOOD ESTABLISHMENT shall be RESTRICTed to designated areas away from all
	<del>(D)</del>	FOOD preparation and storage areas.
	<del>(E)</del>	- Employee BEVERAGEs shall be in a closed container and stored away from FOOD and FOOD CONTACT
	<del>(E)</del>	SURFACES.
	$(\mathbf{E})$	
	<del>(F)</del> <del>(G)</del>	All FOOD HANDLERs shall wear clean clothing.
	× 2	Any PERSON not directly involved in the operation of a TEMPORARY FOOD ESTABLISHMENT shall be
		RICTed from FOOD preparation and service areas.
15-3(		ea <mark>ning and Sanitizing of UTENSILs and EQUIPMENT</mark> An APPROVED sanitizing solution in a labeled container shall be available prior to any open FOOD
	<del>(A)</del>	
		handling taking place.
		(1) APPROVED sanitizer solutions in water include 50-100 ppm chlorine (bleach), or at a concentration
		specified by the manufacturer, quaternary ammonium compound applied at a concentration
		specified by the manufacturer, or 12.5 ppm iodine or at a concentration specified by the
		manufacturer,
		(2) Appropriate test strips shall be available and used to measure the concentration of the sanitizer.
		(3) Clean wiping cloths shall be used for frequent sanitizing of FOOD-CONTACT SURFACEs and
		EQUIPMENT and shall be stored in the sanitizing solution when not in use.
	<del>(B)</del>	EQUIPMENT and UTENSILs shall be washed, rinsed, and sanitized at least once every four hours, or replaced
		after four hours.
		(1) When available, a three compartment sink or commercial dish washing machine, plumbed with
		hot and cold water, shall be used to wash, rinse, and sanitize FOOD service UTENSILs and
		EQUIPMENT.
		(2) As a minimum, a WARE WASHING facility shall have:
		(a) Three basins large enough for immersion of UTENSILs and EQUIPMENT.
		(b) An adequate supply of potable water.
		(c) An APPROVED disposal system for waste water.
		(3) Sequence for manual WARE WASHING:

- $(\mathbf{n})$
- Wash in the first basin with a clean solution of detergent and water with a minimum temperature of 110°F±2°.
- Rinse in the second basin filled with clean water. (b)
- -Sanitize in the third basin by immersion for a minimum of 1 minute, or as directed by the (c)manufacturer, in an APPROVED sanitizing solution as listed in Chapter 4-402.11(B) (3) of these Regulations.
- (d) Air dried in a sanitary manner.
- (e) Water shall be changed as necessary.
- Those TEMPORARY FOOD ESTABLISHMENTs, at SPECIAL EVENTs with common WARE WASHING facilities, <del>(C)</del> shall maintain a sufficient supply of clean and sanitized UTENSILs and/or EQUIPMENT, within the establishment, to provide for the required replacement at least every four hours or more often as needed. All dirty UTENSILs shall be returned to the common WARE WASHING area for cleaning and sanitizing. <del>(D)</del> Clean UTENSILs shall be stored in a sanitary manner.

15-304.20 TEMPORARY FOOD ESTABLISHMENT adequate number of handwashing sinks that meet the <u>(C)</u> following criteria must be provided:

Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

f 185

- (1) If portable, the handwashing sink must be self-contained and equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply, and
- (2) Provide a continuous flow of hot and cold running water.

#### 14-20314-204 Site Requirements

(A) TEMPORARY FOOD ESTABLISHMENTs shall be constructed and located to minimize the RISK of FOOD CONTAMINATION from external sources including but not limited to SEWAGE, flooding, dust, insects, and vermin.

> Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

<del>(B)</del> —	The floor, ground, or ground cover shall be maintained to minimize CONTAMINATION from dust, insects,
	and water, and be graded to drain away from the TEMPORARY FOOD ESTABLISHMENT.
<del>(C)</del>	-Where a temporary structure is provided it shall be constructed in a manner to prevent CONTAMINATION

of FOOD, and FOOD-CONTACT SURFACEs. (D) Heating EQUIPMENT, and cooking and storage EQUIPMENT shall be located in an area inaccessible to the public.

#### Outdoor open FOOD operations shall have

(A) <u>Provide</u> overhead protection <u>for food preparation areas</u> unless <u>otherwise specified prohibited</u> by <u>the local fire</u> <u>authority-code</u>, and

(E) TEMPORARY FOOD ESTABLISHMENTs may not be closer than 50 \_ from any non-sewered toilets and/or animal pens. The 50 \_ setback requirement may be waived by the HEALTH AUTHORITY if public health concerns are not compromised by such WAIVER.

#### 15-304.21 Water Supply

An adequate supply of potable water shall be available for cooking purposes, hand washing, and cleaning and SANITIZATION of EQUIPMENT, UTENSILs, and FOOD CONTACT SURFACES. A public water supply shall be protected with the appropriate backflow prevention device. Non-GRADE or garden hoses shall not be used for delivery of water for human consumption or FOOD preparation.

#### 15-304.22 Waste Water

Waste water shall be disposed into a sanitary sewer system. Waste water shall not be dumped onto the ground surface, into waterways, or into storm drains. Waste water shall be collected in watertight containers until properly disposed. A TEMPORARY FOOD ESTABLISHMENT shall cease all FOOD operations if waste water spills occur.

#### 15 304.23 Solid Waste

Frequent disposal of solid waste is required to prevent excessive accumulation and-

(B) Operate on a smooth surface such as asphalt or concrete, or provide adequate groundcover, to prevent dust or debris from becoming airborne.

03 Examination and Condemnation of Food

04 Food Borne Illness Reporting and Investigation 15-405

Enforcement Actions

96 Interference with Performance of Duties

5 401 Operation of TEMPORARY FOOD ESTABLISHMENT Without a PERMIT

5 401.11 TEMPORARY FOOD ESTABLISHMENT Operators

EMPORARY FOOD ESTABLISHMENT operators who are found operating without a valid health PERMIT shall be required to cease FOOD operations immediately until a valid health PERMIT is APPROVED and obtained. Failure to comply will result in a written notice of violation and possible subsequent legal action taken by the HEALTH AUTHORITY.

> Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

#### 15.402 Inspections 15-

#### 402.11 Credentials

After presenting official credentials, the HEALTH AUTHORITY shall be allowed to inspect, at any reasonable time, any FOOD ESTABLISHMENT within Clark County to determine-compliance with <u>Chapters 1-8 of</u> these regulations. The HEALTH AUTHORITY shall be allowed to examine any applicable information pertaining to FOOD and supplies purchased, received, or used, and PERSONs employed.

15-402.12 Findings

henever the HEALTH AUTHORITY makes an inspection of a FOOD ESTABLISHMENT, the findings shall be recorded on an inspection report form. The HEALTH AUTHORITY shall furnish the original of the inspection report form to the PERMIT HOLDER, operator, or the designated PERSON IN CHARGE.

15-403 Examination and Condemnation of FOOD

5-403.11 ADULTERATED FOOD or RISK to Public Health

OOD which upon inspection of a TEMPORARY FOOD ESTABLISHMENT by the HEALTH AUTHORITY, is determined to have been potentially ADULTERATED or for any reason may present a substantial RISK to public health shall be

> Southern Nevada Health District Regulations Governing the Sanitation of Food Establishments Approved by Board of Health; March 25, 2010

condemned. FOOD that has been condemned may be voluntarily destroyed and discarded by the establishment operator in the presence of the HEALTH AUTHORITY or otherwise placed on hold as specified in *NRS 446.920*.

#### 15-404 FOOD BORNE ILLNESS Reporting and Investigation

#### 15-404.11 Notification

When a FOOD BORNE ILLNESS or FOOD related injury is reported to any employee of a TEMPORARY FOOD ESTABLISHMENT, the employee shall notify the operator of the ESTABLISHMENT immediately of the report. The operator shall immediately report the incident to the HEALTH AUTHORITY and remove from sale, and refrigerate, any suspect FOOD until release by the HEALTH AUTHORITY.

#### 15-404.12 Investigation

When the HEALTH AUTHORITY suspects that a SPECIAL EVENT, TEMPORARY FOOD ESTABLISHMENT, or its employees may be the source of a FOOD borne illness, appropriate action shall be taken to controltransmission of the FOOD borne illness. Such action may include, but is not limited to, any or all of the following:, Annual Itinerants are subject to the

Secure-records that may enable identification of PERSONs potentially exposed to the illness, and/orrequiring-additional assistance in locating such PERSONs. This includes records of hotels, motels, or anyother facilities on whose PREMISES the TEMPORARY FOOD ESTABLISHMENT is operating.requirements in this section. Annual Itinerants must:

(A) Only operate at sites for which prior notice was given to the Health Authority,

- (B) Notify the Health Authority by submitting an Annual Itinerant Notification at least three business days prior to operating at a special event or farmers market. Updates to the schedule must be provided at least two business days prior to the start of each special event or farmers market. Failure to notify the Health Authority within the required timeframe will result in administrative action up to and including permit revocation,
- (C) Operate only at sites that meet the requirements in Subpart 14-204 and which written approval from the property owner has been obtained,
- (D) Submit menu changes to the Health Authority for approval prior to implementation,
- (E)
   Provide access to transportation or food storage vehicles utilized by the food vendor to ensure

   that the vehicle is maintained clean, free of trash, food debris, spills, insects, or any other source
   of contamination to the food or equipment, and

#### (F) Not exceed 100 square feet in size.

14-302Operational Requirements14-302.1Operational Restrictions

#### Annual Itinerants must:

- (A) Conduct minimal food preparation on site,
- (B) Not conduct complex food processes, including but not limited to cooling, at the event location,

<u>(C)</u>	Prohibit TCS food served or displayed at an event from being re-served or held over for future
	service, and

(D) Prohibit use or sale of reduced oxygen packaged foods which were packaged at a retail food establishment unless prior approval has been granted by the Health Authority.

#### 14-302.2 Handwashing Facilities

- (A) A handwashing sink must be stocked with liquid hand soap in a pump dispenser, single-use paper towels, and maintained throughout the duration of the event.
- (B) The handwashing sink must be located within 10 feet of the open-food handling area and ready for use prior to any open food handling.
- (C) An adequate number of handwashing sinks that meet the following criteria must be provided:
  - (1) If portable, the handwashing sink must meet the requirements of Subpart 4-205,
  - (2) Provide a continuous flow of hot and cold running water without the use of a manual pump,
  - (3) Be self-contained, and
  - (4) Be\_equipped with an integral five gallon minimum potable water supply tank and a wastewater storage tank that is at least 15% greater than the potable water supply.

#### 14-303 Required Records

The Annual Itinerant permit holder must provide the following records to the Health Authority upon request:

- (A) Temperature logs for:
  - (1) The internal temperature of each TCS food immediately prior to loading into the hot or cold holding equipment, and
  - (2) The ambient air temperature of each refrigeration unit prior to loading TCS food, and every four hours that the vendor is in operation,
- (B) A valid commissary agreement letter,
- (C) Permission letters, operational plans, or waivers associated with the permit, and
- (D) Same-day receipts for food when applicable.

#### 14-304 Annual Event Venue Permit Requirements

Annual Event Venues must comply with Subpart 14-101 and:

- (A) Provide permanently plumbed restrooms that meet the requirements of Chapters 5 and 6 of these regulations and are conveniently located and available for use by food vendors during all hours of operation,
- (B) Designate an area where food vendors may refill potable water and dump wastewater in an approved manner, and
- (C) Provide sufficient area lighting if the event operates after sundown.

14-4 Severability Clause

Subparts 14-401 Severability Clause

#### 14-401 Severability Clause

- (A) Should any section, paragraph, sentence, clause, or phrase of these regulations be declared unconstitutional or invalid for any reason the remainder of these regulations. Obtain samples of any suspect FOOD for laboratory examination.
- (B) Require the destruction of suspect FOOD, or preventing the suspect FOOD being served until such time as the FOOD has been deemed safe for human consumption.
- (C) Require implementation of environmental controls to reduce the potential exposure of the public to environmental contaminants or injuries resulting from existing conditions at a SPECIAL EVENT or in a TEMPORARY FOOD ESTABLISHMENT.

#### 15-405

Enforce

#### ment Actions 15-

405.11 Notice of

Violation

Whenever the HEALTH AUTHORITY finds an unsanitary condition, or an IMMINENT HEALTH HAZARD at a SPECIAL EVENT or in the operation of a TEMPORARY FOOD ESTABLISHMENT, the HEALTH AUTHORITY may issue a written Notice of Violation (NOV) to the PERMIT HOLDER or operator citing the condition, and specifying the time in which the corrective action must be taken. The HEALTH AUTHORITY may suspend an operation or a portion thereof for a critical or major violation until such time as the violation has been corrected.

#### 15-405-12 Cease and Desist

The HEALTH AUTHORITY may issue a CEASE AND DESIST ORDER of all operations until the IMMINENT HEALTH HAZARD has been abated and a reinspection has been conducted to ensure compliance. The TEMPORARY FOOD ESTABLISHMENT PERMIT will be reinstated only after the violations have been corrected.

15-406 Interference with Performance

#### of Duty 15-406.11 UnLAWful

As per NRS 446.885(3), it is unLAWful for any PERSON to interfere with the HEALTH AUTHORITY in the performance of his or her duties. must not be affected thereby.

I

#### Appendix A— Communicable Disease Protocol

The purpose of this Protocol is to assist the Person in Charge of a food establishment to take appropriate measures when dealing with an employee ill with pathogens that may be spread in food as required by Nevada Administrative Code (NAC) 441A-Communicable Diseases

Communicable Diseases that have the potential to cause Foodborne illness and are reportable to the Health Authority include but are not limited to: Amebiasis, Campylobacteriosis, Cryptosporidiosis, *E.coli* 0157:H7, Giardiasis, Hepatitis A, Salmonellosis, Shigellosis, Typhoid Fever and any extraordinary occurrence of illness or foodborne disease outbreak such as that associated with Norovirus (a more extensive list can be found in NAC 441A).

Food and beverage handlers are considered to be employed in sensitive occupations (NAC 441A.170) which enhance the potential for transmission of a communicable disease to other persons if a person who is infected with the communicable disease is working while in a contagious stage.

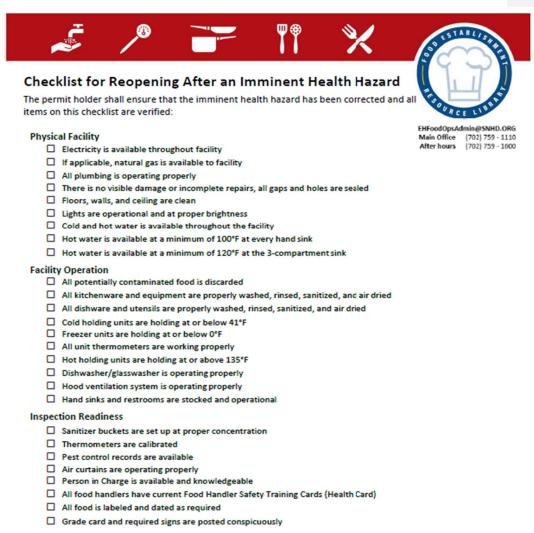

The Person in Charge of a food establishment must:

- Report known or suspect communicable disease to the Health Authority (NAC 441A.255).
- Prohibit a food handler from working with:
  - 1. Symptoms of gastrointestinal illness such as abdominal cramping, diarrhea, or vomiting until symptom free for at least 24 hours.
  - Jaundice until laboratory results indicate the individual is not currently infected with Hepatitis A.
  - 3. A lesion(s) that cannot be effectively covered until such time as the wound has healed or a physician's note is provided indicating the lesion(s) is not infectious.
  - 4. Sore throat with fever. Note: A worker experiencing active symptoms caused by seasonal allergies or hay fever (persistent cough, running nose, and/or sneezing) shall be prohibited from open food service until symptoms are controlled.
- Cooperate with the Health Authority during an epidemiological investigation and carry out measures for the prevention, suppression, and control of a communicable disease (NAC 441A.280 and 441A.530) including:
  - 1. Providing information, including names and addresses of patrons and employees, work schedules of employees, illness histories of employees, menus and any other information necessary to complete the investigation.
  - 2. Providing access to employees for interviewing and obtaining clinical specimens.
  - 3. Providing food, beverage and environmental samples for laboratory analysis.
  - 4. Exclusion of an employee as required by NAC 441A specific to the diagnosis until cleared to return to work by the Health Authority.
  - 5. Institute infection control, and hygienic and sanitation measures as required by the Health Authority.
  - More information can be found on the FDA website: Employee Health and Personal Hygiene Handbook

#### Appendix C—Dogs in Outdoor Dining Areas Agreement By initialing next to each box below, I attest that I understand and agree to enforce the following conditions when allowing dogs in an outdoor dining area located on the premises of my food establishment. Initials Other than service animals and security/police dogs, dogs will not be allowed inside the food establishment at any time and dogs will not be permitted to pass through the food establishment to access the outdoor dining area. Signage will be posted conspicuously at the outdoor dining area with the following minimum requirements listed: Patrons must keep their dogs on a leash, in a carrier, or otherwise restrained, Dog waste must be cleaned up by the dog owner using disposable bags and/or clean up kits provided, and discarded in the designated covered trashcans, Dogs must remain on the ground, and are not allowed on seats, benches, tables, or other furniture, and Dogs must not eat off of reusable tableware or utensils. If a cup or bowl is needed, please ask an employee for a disposable container. Each outdoor dining area where dogs are permitted: Will have a covered trashcan and disposable trash bags conveniently and conspicuously located for use by patrons. The trashcan(s) will be emptied on a frequent basis, into an outdoor dumpster, to prevent nuisance conditions, and Will be deep cleaned on a frequent enough basis to prevent pests, the buildup of soil, and odors. Mops, brooms, and other tools used to clean the outdoor dining area will not be used for other purposes and will be stored separately from any food storage or handling area. The Person in Charge will enforce, and employees will be trained, on the following: Prohibiting dogs from eating or drinking from reusable kitchenware (i.e. by offering disposable wares to the patron). Preparation of a waste clean-up kit, when to provide it to a patron, and how to block off or clear an area that requires clean-up, Proper handwashing techniques, and Avoiding cross-contamination by prohibiting touching, serving, or cleaning up after dogs while working in a food handling capacity. Waste clean-up kits will be provided by the food establishment to patrons as needed. The kit will contain disposable gloves, liquid absorbent, a scoop, and a scraper to be used by patrons to remove waste. I understand and agree that: The Americans with Disability Act takes precedence if there is a conflict with an interpretation of this agreement, and The permit holder is responsible for mitigating nuisance conditions created by allowing dogs on the outdoor premises of the food establishment. Damage to persons and/or animals related to animal interactions on premises are the sole responsibility of the permit holder and/or dog owner or handler. Print Name: Title/Position: Signature: Date:

### Obesity Update Public Health Advisory Board October 3, 2022 Nicole Bungum Office of Chronic Disease Prevention & Health Promotion Southern Nevada Health District

## Obesity

- Common, serious and costly chronic disease resulting from multiple environmental, behavioral and genetic factors and requires long-term medical management.
- Recognized as chronic disease by American Medical Association in 2013; Nevada in 2015.
- Obesity is associated with more than 60 comorbidities including type 2 diabetes, hypertension, high cholesterol, arthritis, etc. (2)
- Most commonly assessed using BMI (Body Mass Index) or the ratio of weight to height.
- Adults with obesity typically have a BMI of 30.0 or higher. Obesity is frequently subdivided into categories:
  - Class 1: BMI of 30 to <35
  - Class 2: BMI of 35 to <40
  - Class 3: BMI of 40 or higher; sometimes categorized as severe obesity
- For children/youth BMI at or above 95<sup>th</sup> percentile of the CDC sex-specific BMI-for-age-growth charts
- BMI is easy to measure, inexpensive, and provides standardized cutoff points. It is strongly correlated with body fat levels and studies show that a high BMI predicts higher risk of chronic disease and early death.
- BMI is a screening tool but does not diagnose body fatness or health. It is an imperfect measure as it does not distinguish between body fat and lean body mass. It has been less accurate as a predictor of body fat in older adultsy.

## Factors That Contribute to Obesity

## Projections

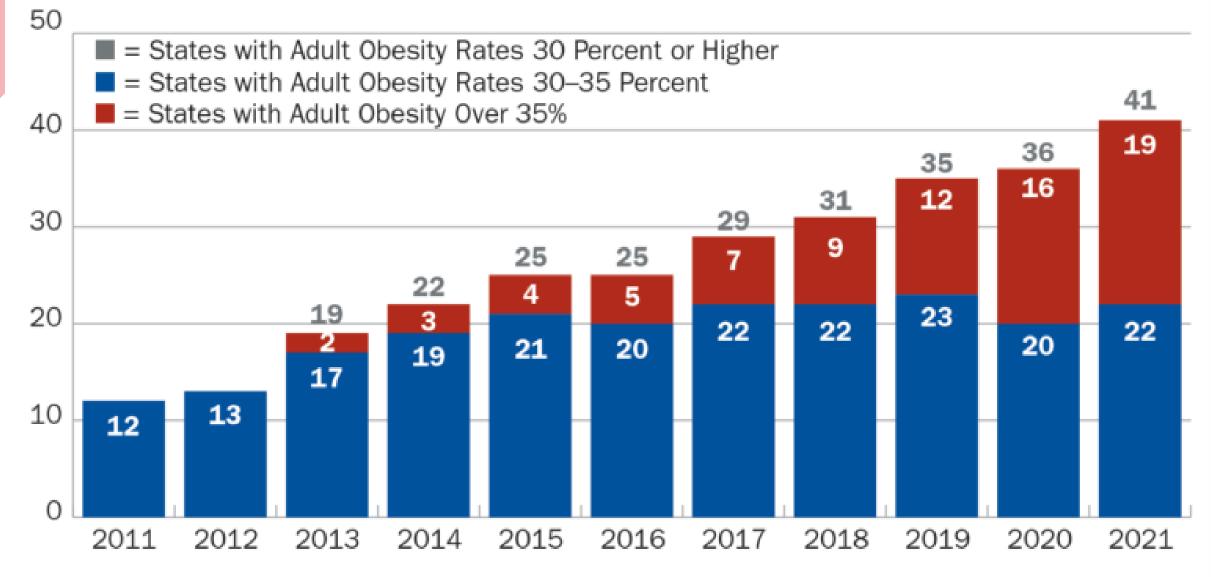

• By 2030, nearly 1 in 2 adults in the United States will have obesity and nearly 1 in 4 of those are projected to have Class 2 or Class 3 obesity (2)

# Pandemic Impacts on Obesity

- The pandemic led to school closures, disrupted routines, increased stress and less opportunity for physical activity and proper nutrition which contributed to weight gain among children and adults
- Children gained weight at a faster rate during a COVID-19 pandemic period (June – Nov. 2020) versus a pre-pandemic period (Jan. 2018 – Feb. 2020) (4)
- Younger school-aged children (6-11) experienced a rate of BMI change that was 2.5 times higher than before the pandemic. (4)
- Survey conducted in 2021 found that 42% of Americans had gained more weight than they intended during the pandemic; an average of about 30 pounds in extra weight (5)
- Most recent data is from 2021, so we are likely not yet seeing the full impact of the pandemic on obesity rates

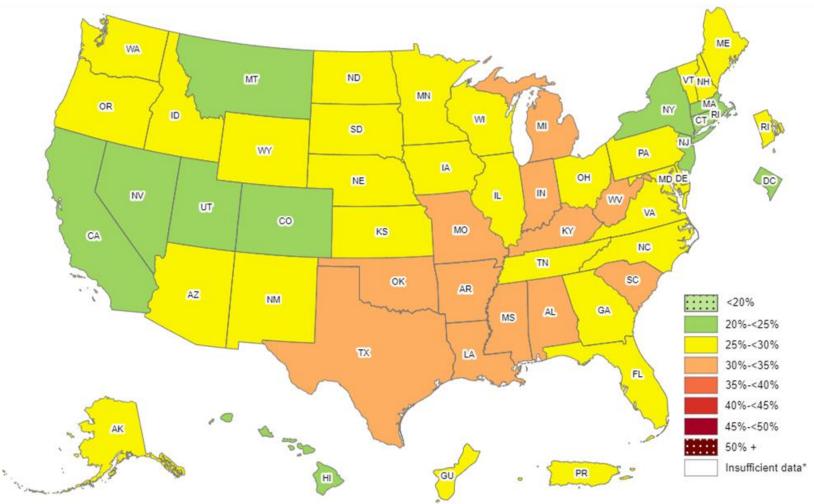

## Number of States with Adult Obesity Rates Above 30 Percent, 2011–2021

Framework Nutrition & Physical Activity Goals

## Among Southern Nevadans:

- Increase physical activity levels
- Increase health equity by reducing and eliminating physical activity-related health disparities in priority populations
- Increase fruit and vegetable consumption
- Increase the percentage of people who are at a healthy weight
- Reduce sugar-sweetened beverage consumption
- Increase health equity by reducing and eliminating nutrition-related health disparities in priority populations

	Implement	Implement, promote and/or expand programs that make physical activity easy, safe and accessible
Physical	Facilitate	Facilitate access to safe, accessible and affordable places for physical activity
Activity Strategies	Support	Support community design, plans, and policies that encourage active transportation
	Increase	Increase health equity by disseminating and implementing culturally and linguistically appropriate, evidence-based programs and practices in priority populations
	Establish	Establish new or improved pedestrian, bicycle or transportation systems that are combined with new or improved land use or environmental design

# Programs: Physical Activity

- Slam Dunk Health Challenge: School based physical activity and nutrition program in partnership with CCSD and the Las Vegas Aces
- Walk Around Nevada Program: Online and app-based virtual walking/physical activity program available in English & Spanish
- Neon to Nature App: Connects users to 1000 miles of trails in Southern Nevada
- Move Your Way Initiative: Physical activity opportunities in specific populations and connect people with Move Your Way Resources (English & Spanish)
- Faithful Families Program: Physical activity and nutrition program in places of faith (English and Spanish)
- Safe Routes to Schools and Youth Sports/Physical Activity Programs: Sponsor and provide support for programs in priority schools/zip codes
- Communication & Community Outreach

## Policy, Systems & Environmental Change Activities: Physical Activity

Reduced Fare Bike Share passes for SNAP users Policies and plans to incorporate physical activity and active transportation

Expanding Bike Share network in priority zip codes Development of Decision Support Tool for traffic and public works professionals

Enhancing cross walks, sidewalks, & adding lighting and signage to multi-use trails

Installing bicycle parking facilities

Facilitate and support coalitions and taskforces

PSE changes at places of faith and schools

Increase opportunities for physical activity at parks and recreation areas

## **Ride at a discount!**

SNAP cardholders qualify for discounted annual and monthly passes.

itade persetta with Antibut from the Context for Disease Context and Prevention.

	Make	Make healthy food choices available, affordable, and recognizable in places where people, live, learn, work, play and worship (F/V focus)	
	Implement	Implement and support development of nutrition standards and policies that prioritize healthier foods	
Nutrition Strategies	Increase	Increase access to healthy and affordable foods	
	Collaborate	Collaborate with partners and communities to improve the food system	
	Support	Support chest/breastfeeding programs and services and provide training opportunities	
	Help	Help people recognize and make healthy beverage choices	
	Improve	Improve dissemination and implementation of culturally and linguistically appropriate, evidence-based programs and practices	

# Nutrition: Programs

- Nutrition Challenge Program: Online program to increase fruit and vegetable consumption (English & Spanish)
- Soda Free Summer (Verano Sin Soda) Initiative: Encourage reduction or elimination of sugarsweetened beverages during summer months
- Virtual Cooking Program for Kids: In partnership with 100 Black Men of Las Vegas (Ingredients Included)
- Faithful Families Program: Physical activity and nutrition program in places of faith (English and Spanish)
- Mobile Apps: Half My Plate and SNAP Cooking App (SNAP app available in English & Spanish)
- Communication & Community Outreach

## Policy, Systems & Environmental Change Activities: Nutrition

Supporting Wellness at Pantries (SWAP) program at faithbased food pantries Policies and plans that support increased access to healthy foods

Nutrition Standards Policies at faithbased food pantries Policies and support for Farmers Markets that accept SNAP benefits

Healthy Convenience Store Pilot Project Pop Up Produce Markets that accept SNAP benefits Facilitate and support coalitions and taskforces

Training and

Lactation

Certification

**Scholarships** 

Enhance

Breast/Chest Feeding

Support Groups

# Obesity

- In addition to the Nutrition and Physical Activity strategies above:
- Facilitate obesity coalition (Partners for a Healthy Nevada)
  - Support advocacy efforts
- Communication & Outreach
- 5-2-1-0 Initiative

## 5-2-1-0 Initiative

- 5 Fruits and Vegetables
   2 Hours or Less of Screen Time
   1 Hour of Physical Activity
   0 Sugary Beverages
- Promoted by American Academy of Pediatrics
- Evidence-base tested by CDC
- Effective in helping to build healthy habits
- Childhood Obesity Awareness Month

## 5-2-1-0 Initiative

# Raise Awareness

- Social marketing campaign in English and Spanish & Chinese directed towards priority populations (print, billboard, digital and social media)
- Updated webpages with 5-2-1-0 flyers, posters, resources and information in English and Spanish
- Communications Toolkits (English and Spanish)
- Engaged partners in sharing messages and conducting activities and programs to promote 5-2-1-0 messages

Partnerships to Reach Priority Populations: 5-2-1-0 Initiative

- YMCA of Southern Nevada
- Regional Transportation Commission
- Nevada Office of Minority Health & Equity
- UNLV NV Institute for Children's Research & Policy
- Nevada Minority Health & Equity Coalition
- 100 Black Men of Las Vegas
- UNR Southern Extension
- Promotoras Las Vegas
- Together We Can
- Blacks in Nature
- Nevada Chapter of the American Academy of Pediatrics
- Greater Youth Sports Association
- Special Olympics of Southern Nevada
- Girl Scouts of Southern Nevada
- CCSD Safe Routes to Schools & School Nutrition Councils
- University Medical Center Healthy Living Institute

# Reduce Stigma

- Diet and physical activity alone do not determine body size
- Obesity is a complex medical condition influenced by numerous factors, many of which are outside of an individual's control
- Structural and societal determinants significantly influence the rates of obesity among adults and youth. These factors include structural racism, discrimination, poverty, food insecurity, housing instability and lack of access to healthcare
- Drivers of weight stigma are primarily based around a misunderstanding of the complex causes of obesity with people attributing weight gain to personal responsibility alone. This can feed into biases that having obesity is the result of lack of self-discipline and self-control
- Weight stigma can lead to decreases in health-seeking behaviors and can increase a person's risk for mental health problems, disordered eating, decreased physical activity, health care avoidance and weight gain.

# Recommended Policy Approaches

- Increase funding for evidence-based obesity prevention, breastfeeding and chronic disease programs that prioritize communities where the need is greatest
- Support strong school wellness policies. Make healthy school meals accessible to all students and increase physical activity and physical education throughout the school day
- Resources to address social determinants of health to address upstream and structural drivers of obesity and other chronic diseases
- Decrease food insecurity by increasing funding for and participation in SNAP, WIC, CACFP and other federal programs
- Invest in built environment changes to make active transportation accessible and safe in all communities
- Expand access to healthcare and require insurance coverage with no cost sharing for evidencebased obesity prevention and weight management programs

# Data Sources

- 1. Simulation of Growth Trajectories of Childhood Obesity into Adulthood. New England Journal of Medicine (2017)
- 2. Projected U.S. state-level prevalence of adult obesity and severe obesity. New England Journal of Medicine (2019)
- 3. Direct and Indirect Costs of Obesity Among the Privately Insured in the United States. JOEM (2019)
- 4. Longitudinal Trends in Body Mass Index Before and During the COVID-19 Pandemic Among Persons Aged 2-19 Years. MMWR (2021)
- 5. One year on: Unhealthy weight gains, increased drinking reported by American coping with pandemic stress. American Psychological Association (2021)
- 6. Youth Risk Behavior Survey (YRBS): 2013 2019
- 7. Behavioral Risk Factor Surveillance System (BRFSS): 2011 2019

# Thank You

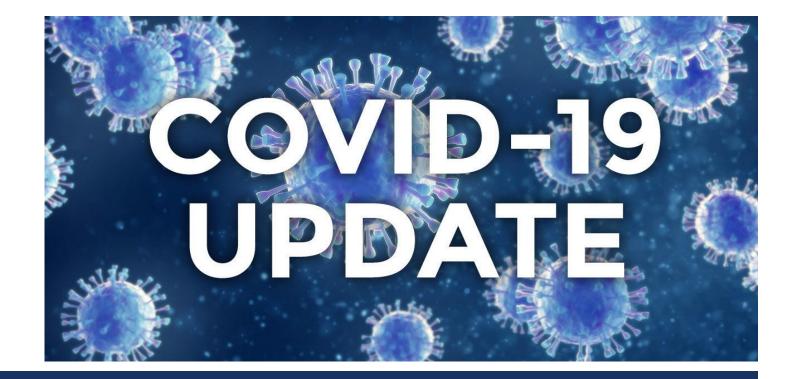

#### PROPOSED 2023 PUBLIC HEALTH ADVISORY BOARD MEETING SCHEDULE

All Public Health Advisory Board meetings are proposed to occur on the second Monday of the designated month at 8:30 a.m.:

DATE	TIME
January 9, 2023	8:30 a.m.
April 10, 2023	8:30 a.m.
July 10, 2023	8:30 a.m.
October 9, 2023	8:30 a.m.

\*Special meetings, as required, shall be called by the Chair.

#### CASSIUS LOCKETT, PHD

**Director of Disease Surveillance & Control** 

October 3, 2022

#### **Community Transmission**

	09/22/2022	09/23/2022	09/24/2022
COVID Positive Test Rate (7-Day Average)	10.0%	9.8%	10.4%
New cases per 100,000 population per 7 days	18.0	17.0	16.7

#### **Testing and Vaccination Status**

	09/22/2022	09/23/2022	09/24/2022
Persons tested per 1,000 population per 7 days	2.9	2.9	2.9
% Population 16 Yrs and Older that Initiated Vaccination	84.8%	84.8%	84.8%

#### Community Level

	09/22/2022	09/23/2022	09/24/2022
New COVID admissions per 100,000 population per 7 days	3.3	3.1	3.2
% Inpatient beds used by COVID patients (7-Day Average)	1.2%	1.2%	1.2%
% ED visits due to COVID (7-Day Average)	2.1%	2.2%	2.2%

## **RISK METRICS**

### SNHD COVID-19 DASHBOARD: CASES

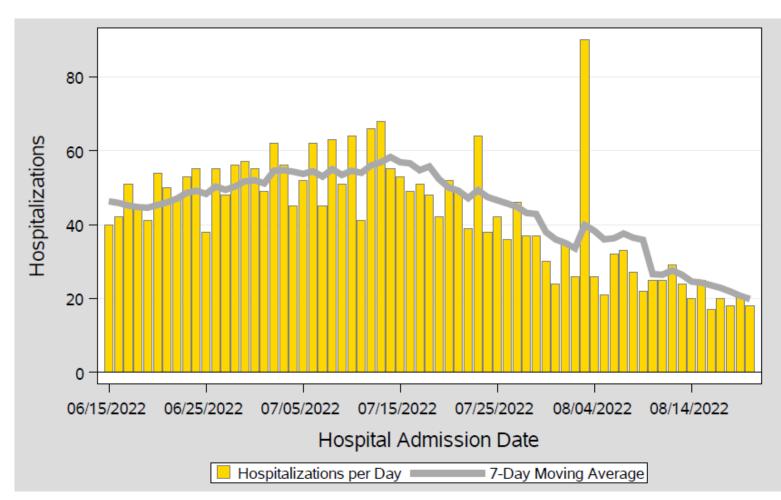

COVID-19 **Cases** per Day, Clark County, Nevada

## COVID-19 CASES

## **RECENT TRENDS**

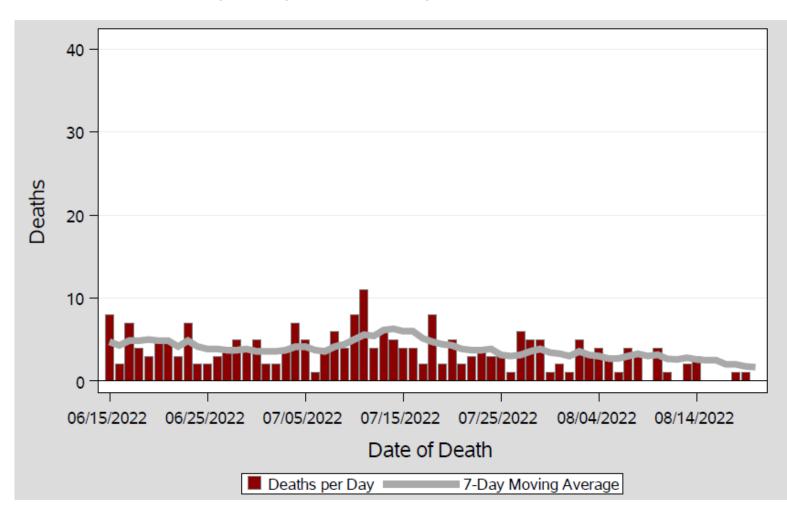

COVID-19 Hospitalizations, Clark County NV

## COVID-19 HOSPITALIZATION

**RECENT TRENDS** 

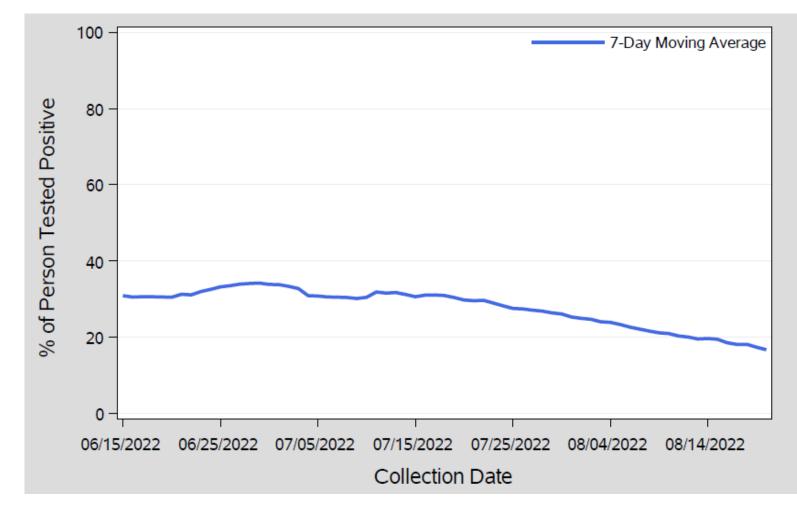

COVID-19 **Deaths** per Day, Clark County, NV

## COVID-19 DEATHS

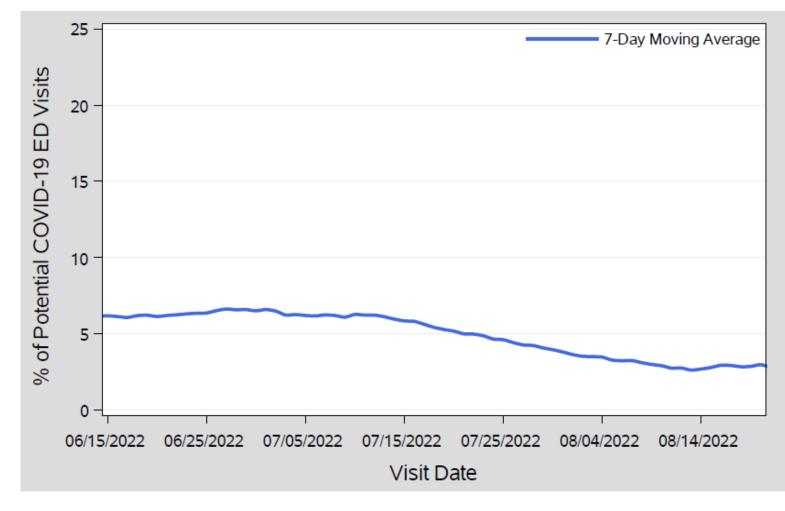

## RECENTTRENDS

Percent of People Receiving COVID-19 Viral Tests Who Have Positive Results

COVID-19 VIRAL TESTS

Syndromic Surveillance: Percent of ED Visits Potentially Related to COVID-19

## SYNDROMIC SURVEILLANCE

## INVESTIGATORS, CONTACT TRACERS, CALL CENTER STAFF

#### Case Investigations and Contact Tracers

#### ELC CT Staff: 36 in house

- Priority COVID investigations including outbreaks and school support team
- Conduct COVID-19 testing and sample collection:
  - Community testing sites
  - Facilitating Covid Rapid Antigen Test kit distribution to CBO's serving the underserved and minority populations.
  - Three CSN testing sites
  - METS clinic at SNHD (I CT)
  - Strike team response for onsite testing for suspected clusters or outbreaks as needed

100 contracted CTs on original team; contract extended through September 2022 (extension through March 2023 pending).
