

# Clark County Health Status Report

2007 Supplement, Volume II

## Youth Health Risks and Behaviors

### About This Report

This report is the fourth in a series of reports produced by the Southern Nevada Health District on health-related statistics. It presents the most recent data available from the national and statewide Youth Risk Behavior Surveillance (YRBS), provides observations on the prevalence, patterns and trends of selected measures of youth health risks and behaviors in Clark County, and monitors changes in the selected measures over time. The report will inform those interested in the state of health of Clark County youth and support informed actions and planning to improve the health of our youth.

January, 2009

**Prepared by:**

Jing Feng, MS, Biostatistician

Office of Epidemiology, Division of Community Health

*Southern Nevada Health District*

**Editorial Review:**

Patricia Rowley, BS, CPH, Epidemiology Manager

Deborah Williams, MPA, MPH, CHES, Chronic Disease Prevention and Health Promotion Manager

John Middaugh, MD, Director of Division of Community Health

Lawrence Sands, DO, MPH, Chief Health Officer

## Executive Summary

The bulk of ill health and mortality in the United States and in Clark County today arises from long-term conditions often associated with advancing age. However, much of the burden of chronic diseases and conditions is avoidable, because many risk factors that contribute to their development and progression are highly preventable. Prominent among these modifiable risk factors are tobacco use, poor diet, physical inactivity, alcohol consumption, exposure to microbial and toxic agents, transportation accidents, firearm use, unsafe sexual practices, and illicit use of drugs.<sup>1</sup> These harmful health behaviors and risk exposures are major contributors not only to morbidity and mortality, but to diminished productivity, high rates of disability, and decreased quality of life. Given the considerable public health burden they impose, it is important to identify and monitor modifiable behavioral risk factors at younger ages. Health interventions must focus on areas that contribute significantly to morbidity and mortality, and can be changed for the better.

### ***Clark County at a glance***

- Population of 1.8 million in 2007 (subject to post-censal adjustment); ranked the 16th largest U.S. county by population in 2006
- Higher percent population increases between 2000 and 2007 in all five-year age groups when compared to the nation (see Box 1 in Appendix); ranked the 63rd fastest growing U.S. county in 2006
- Population younger relative to the rest of the nation; median age was 35 years in 2007 (34.4 for males and 35.5 for females), compared to 36.6 years for the nation (35.3 for males and 37.9 for females)
- Approximately 51% male and 49% female in 2007; higher male to female ratio when compared to the nation (county: 1.04 vs. U.S.: 0.97)
- Approximately 28% of residents were Hispanic in 2007, compared to 15% in the nation
- Regardless of Hispanic origin, approximately 78% of residents in 2007 were white alone (vs. 81% in 2000), 10% were black alone (vs. 9% in 2000), 1% were American Indian and Alaska Native alone (same as in 2000), 8% were Asian and Pacific Islander alone (vs. 6% in 2000), and 3% were of multiple races (vs. 2% in 2000)
- Birth rate was 15.9 births per 1,000 population in 2004, above the national level of 14.0 births per 1,000 population in the same year
- Average life expectancy at birth was 76.7 years (74.2 for males and 79.4 for females) in 2003-04, lower than the national average of 77.6 years in the same period
- 21.4% of residents aged 25 years and older had a bachelor's degree or higher in 2007 according to American Community Survey (ACS), below the national level of 27.5%
- Median annual household income of \$55,996 in 2007 according to ACS, compared to \$50,740 for the nation
- 5.5% of county civilian labor force unemployed in 2007 according to ACS, compared to 6.3% in the nation
- 10.4% of people in the county had income below the poverty level in 2007 according to ACS, compared to 13.0% in the nation

In July 2007 there were close to 400,000 young people aged 10 to 24 years in Clark County, about 19% of the total population, a slight decrease from the proportion in 2000 (20%). The white alone race made up a significant proportion (75%) of this group of young people, followed by the black alone race (13%), the Asian and other Pacific Islander alone race (6%), those of multiple races (4%), and the American Indian and Alaska Native alone race (1%). There were about 124,100 Hispanic residents aged 10 to 24 years in the county in 2007, representing around 35% of the total number of people in this age group. These young Hispanic residents also made up approximately one-quarter of the Hispanic population in the county (see Box 2 in Appendix).

<sup>1</sup> Mokdad AH, Marks JS, Stroup DF, and Gerberding JL. *Actual causes of death in the United States, 2000*. JAMA. 2004; 291:1238-1245.

As young people progress from adolescence to adulthood, a number of risk factors affect their health and wellbeing. Motor vehicle accidents, suicide, mental health and behavioral problems, pregnancy and substance abuse pose risks to many young people. In addition, the health effects of many risk and protective factors are cumulative throughout one's life, such as tobacco use, obesity, physical inactivity, and poor diet or nutrition.

Adolescents who are overweight have a greater likelihood of becoming overweight adults and of developing a range of health problems including diabetes, cardiovascular diseases, high blood pressure, certain cancers, osteoarthritis, psychological disorders and social problems. Based on body mass index (BMI) derived from self-reported height and weight, 26.4% of 9-12th grade students in the county (30.1% of males and 22.5% of females) were classified as overweight or obese in 2007. A comparatively higher proportion (29.4%) of students thought they were slightly or very overweight in an assessment of their own weight in the same year.

Physical activity is an important factor in reducing the risk of chronic diseases, particularly cardiovascular diseases. However, the majority of high school students in the county were not physically active. In 2007, just 42.8% of students (50.6% of males and 35.3% of females) met recommended levels of physical activity—at least 60 minutes of moderate-intensity physical activity per day on at least five days of the week. The proportion of students reporting sufficient physical activity was also lowest among Hispanics (33.5%).

Eating a diet rich in fruits and vegetables can help reduce the risk of many cancers and other chronic conditions. However, large sections of the county population are not consuming adequate amounts of fruits and vegetables, including our youth. In 2007, only 19.4% of high school students in the county (21.4% of males and 17.6% of females) usually ate fruits and vegetables five or more times per day.

Tobacco use is a major risk factor for respiratory diseases, loss of physical fitness, cancers, and cardiovascular diseases. In 2007, 12.2% of high school students in the county (11.8% of males and 12.6% of females) were current smokers, compared to 18.1% in 2003. Data from 2003 to 2007 also showed that the proportion of students reporting current use of tobacco was highest among non-Hispanic whites (19.6%).

Excessive alcohol consumption poses a high risk to public safety and to one's health, contributing to such morbidity as liver diseases and cancers. Consequences of youth alcohol use include unwanted and unsafe sex, violence, traffic accidents, self-harm and death. There was a slight decrease in current alcohol use by high school students in the county in recent years, from 39.5% in 2003 (35.9% of males and 43.3% of females) to 36.1% in 2007 (34.1% of males and 37.6% of females). About one in five students reportedly engaged in episodic heavy drinking from 2003 to 2007, with the highest prevalence rate seen among non-Hispanic whites.

Young people are at a great risk for illicit drug use and drug-related harm. Self-reported data from 2007 indicated that 35.9% of high school students in the county had used marijuana at least once in their lives, 7.7% used cocaine, 12.6% used inhalant to get high, 7.1% methamphetamines, 3.8% illegal steroid, 1.6% injecting drugs and 10.5% other illicit drugs.

## Report Highlights

The following are some highlights from analyses on the available national and local YRBS data. For more information, please refer to the main body of the report.

Overall, there are improvements in health behaviors among our students (Table 2). Compared with county students in previous years, students in 2007 were less likely to drink and drive, ride with a driver who had been drinking alcohol, belong to a street gang, smoke cigarettes, drink alcohol, or use drugs such as marijuana and methamphetamines. Among currently sexually active students, the prevalence of condom use has increased. The national data also indicate the same progress among high school students in reducing these risk behaviors.

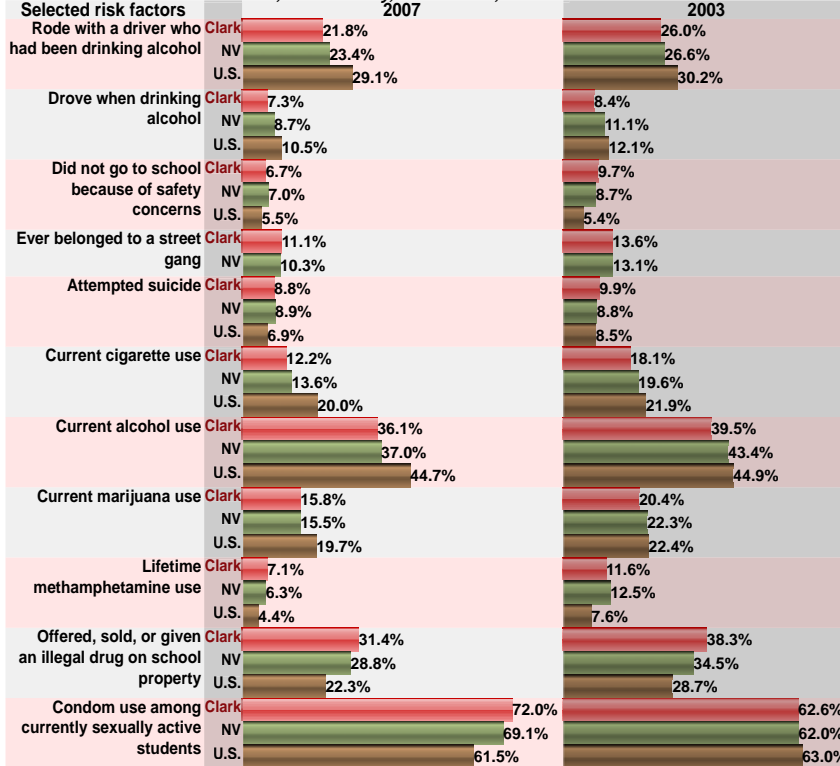

Despite the progress over time, we still have a higher-than-the-nation percentage of students reporting that they did not go to school on occasion because of safety concerns, a higher percentage of students attempting suicide, using methamphetamines, being offered or selling illegal drugs on school property (Table 2).

There are racial/ethnic variations in many health risk behaviors (Table 3). Hispanic students were more likely than both black and white students to attempt suicide, ride with a driver who had been drinking alcohol, describe themselves as overweight and try to lose weight. Hispanic students also remained at greater risk for physical inactivity. Both black and Hispanic students were more likely than white students to say that they didn't go to school on occasion due to safety concerns, and that they rarely or never felt safe at school or in neighborhood. Black students were more likely than both Hispanic and white students to say they had belonged to street gangs, to say they were sexually active, and to report dating violence. White students were more likely than both black and Hispanic students to smoke cigarettes, drink alcohol, use cocaine, heroin, methamphetamines, or over-the-counter drugs (to get high).

## Injuries and Violence

- Indicator 1:** Rarely or never wore a seat belt
- Indicator 2:** Rode with a driver who had been drinking alcohol
- Indicator 3:** Drove when drinking alcohol
- Indicator 4:** Carried a weapon
- Indicator 5:** Carried a weapon on school property
- Indicator 6:** Did not go to school because of safety concerns
- Indicator 7:** Threatened or injured with a weapon on school property
- Indicator 8:** In a physical fight
- Indicator 9:** In a physical fight on school property
- Indicator 10:** Rarely or never felt safe in neighborhood
- Indicator 11:** Rarely or never felt safe at school
- Indicator 12:** Rarely or never felt accepted at school
- Indicator 13:** Ever belonged to a street gang
- Indicator 14:** Reported gang activity in school
- Indicator 15:** Dating violence
- Indicator 16:** Forced to have sexual intercourse
- Indicator 17:** Felt sad or hopeless
- Indicator 18:** Seriously considered attempting suicide
- Indicator 19:** Made a suicide plan
- Indicator 20:** Attempted suicide
- Indicator 21:** Suicide attempt treated by a doctor or nurse

**INDICATOR 1:** Percentage of students who rarely or never wore a seat belt when riding in a car driven by someone else.

Rarely or never wore a seat belt, available years in 2003-07

**INDICATOR 1 continued**

In 2007, 8.8% of students in the county rarely or never wore a seat belt when riding in a car driven by someone else, compared to 10.3% in the state and 11.1% in the nation. The percentage of students reporting rarely or never wearing a seat belt when riding in a car driven by someone else was consistently higher among males than females in both the county and the nation. This risky behavior was also more frequently reported among students of lower grade levels.

**INDICATOR 2:** Percentage of students who rode one or more times during the past 30 days with a driver who had been drinking alcohol.

**Rode with a driver who had been drinking in past 30 days, available years in 2003-07**

**INDICATOR 2 continued**

Based on available data aggregated from 2003 to 2007, 23.9% of students in the county rode one or more times during the past 30 days with a driver who had been drinking alcohol, compared to 25.4% in the state and 29.3% in the nation. This risky behavior was more frequently reported among Hispanic students than non-Hispanic students in both the county and the nation, according to the aggregated data.

**INDICATOR 3:** Percentage of students who drove one or more times during the past 30 days when they had been drinking alcohol.

**Drove when drinking in past 30 days, available years in 2003-07**

### INDICATOR 3 continued

Based on available data aggregated from 2003 to 2007, 8% of students in the county drove one or more times during the past 30 days when they had been drinking alcohol, compared to 10% in the state and 10.9% in the nation. This risky behavior was more frequently reported among male students and among students of higher grade levels in both the county and the nation, according to the aggregated data.

**INDICATOR 4:** Percentage of students who carried a weapon such as a gun, knife, or club on one or more days of the past 30 days.

**Carried a weapon in past 30 days, available years in 2003-07**

**INDICATOR 4 continued**

Based on available data aggregated from 2003 to 2007, 13.8% of students in the county carried a weapon on one or more days during the past 30 days, compared to 15.9% in the state and 17.9% in the nation. The likelihood of carrying a weapon was significantly higher for males than females in both the county and the nation, according to the aggregated data.

**INDICATOR 5:** Percentage of students who carried a weapon such as a gun, knife, or club on school property on one or more days of the past 30 days.

**Carried a weapon on school property in past 30 days, available years in 2003-07**

**INDICATOR 5 continued**

Based on available data aggregated from 2003 to 2007, 5.1% of students in the county carried a weapon on school property on one or more days during the past 30 days, compared to 5.9% in the state and 6.2% in the nation. The likelihood of carrying a weapon on school property was significantly higher for males than females in both the county and the nation, according to the aggregated data.

**INDICATOR 6:** Percentage of students who did not go to school because of safety concerns on one or more days of the past 30 days.

**Didn't go to school on 1+ days in past 30 days for safety concerns, available years in 2003-07**

**INDICATOR 6 continued**

Based on available data aggregated from 2003 to 2007, 8.5% of students in the county didn't go to school on one or more days during the past 30 days because of safety concerns, compared to 8.3% in the state and 5.6% in the nation.

**INDICATOR 7:** Percentage of students who had been threatened or injured with a weapon on school property on one or more days during the past 12 months.

**Threatened or injured with a weapon on school property on 1+ days in past 12 months, available years in 2003-07**

**INDICATOR 7 continued**

Based on available data aggregated from 2003 to 2007, 7.4% of students in the county had been threatened or injured with a weapon on school property on one or more days during the past 12 months, compared to 7.3% in the state and 8.3% in the nation.

**Percent students threatened or injured with a weapon on school property on 1+ days in past 12 months, '03, '05 & '07 aggregated**

**INDICATOR 8:** Percentage of students who were in a physical fight one or more times during the past 12 months.

**In a physical fight 1+ times in past 12 months, available years in 2003-07**

**INDICATOR 8 continued**

Based on available data aggregated from 2003 to 2007, 32.7% of students in the county were in a physical fight one or more times during the past 12 months, compared to 33.6% in the state and 34.8% in the nation. The likelihood of being in a physical fight was higher for male students and for students of lower grade levels in both the county and the nation, according to the aggregated data.

**INDICATOR 9:** Percentage of students who were in a physical fight on school property one or more times during the past 12 months.

**In a physical fight on school property 1+ times in past 12 months, available years in 2003-07**

**INDICATOR 9 continued**

Based on available data aggregated from 2003 to 2007, 10.9% of students in the county were in a physical fight on school property one or more times during the past 12 months, compared to 12.7% in the state and 12.9% in the nation. The likelihood of being in a physical fight on school property was higher for male students and for students of lower grade levels in both the county and the nation, according to the aggregated data.

**INDICATOR 10:** Percentage of students who rarely or never felt safe and secure in neighborhood.

**Rarely or never felt safe in neighborhood, available years in 2003-07**

**INDICATOR 15 continued**

Based on available data aggregated from 2003 to 2007, 9.5% of students in the county reported dating violence, compared to 10% in the state and 9.3% in the nation. Dating violence was more frequently reported among non-Hispanic blacks than other racial/ethnic groups in both the county and the nation, according to the aggregated data.

**INDICATOR 16:** Percentage of students who had ever been physically forced to have sexual intercourse when they did not want to.

**Forced to have sexual intercourse, available years in 2003-07**

**INDICATOR 16 continued**

Based on available data aggregated from 2003 to 2007, 8.6% of students in the county reported having had forced sexual intercourse, compared to 9.3% in the state and 8.1% in the nation. A significantly higher rate of forced sexual intercourse was reported by female students in both the county and the nation, according to the aggregated data.

**INDICATOR 17:** Percentage of students who felt so sad or hopeless almost every day for two or more weeks in a row that they stopped doing some usual activities during the past 12 months.

**Felt sad or hopeless in past 12 months, available years in 2003-07**

## INDICATOR 17 continued

Based on available data aggregated from 2003 to 2007, 29.4% of students in the county reported having felt sad or hopeless for two or more weeks in a row in the past 12 months, compared to 27.9% in the state and 28.5% in the nation. Female students were more at risk for feeling sad or hopeless than male students in both the county and the nation, according to the aggregated data.

**INDICATOR 18:** Percentage of students who seriously considered attempting suicide during the past 12 months.

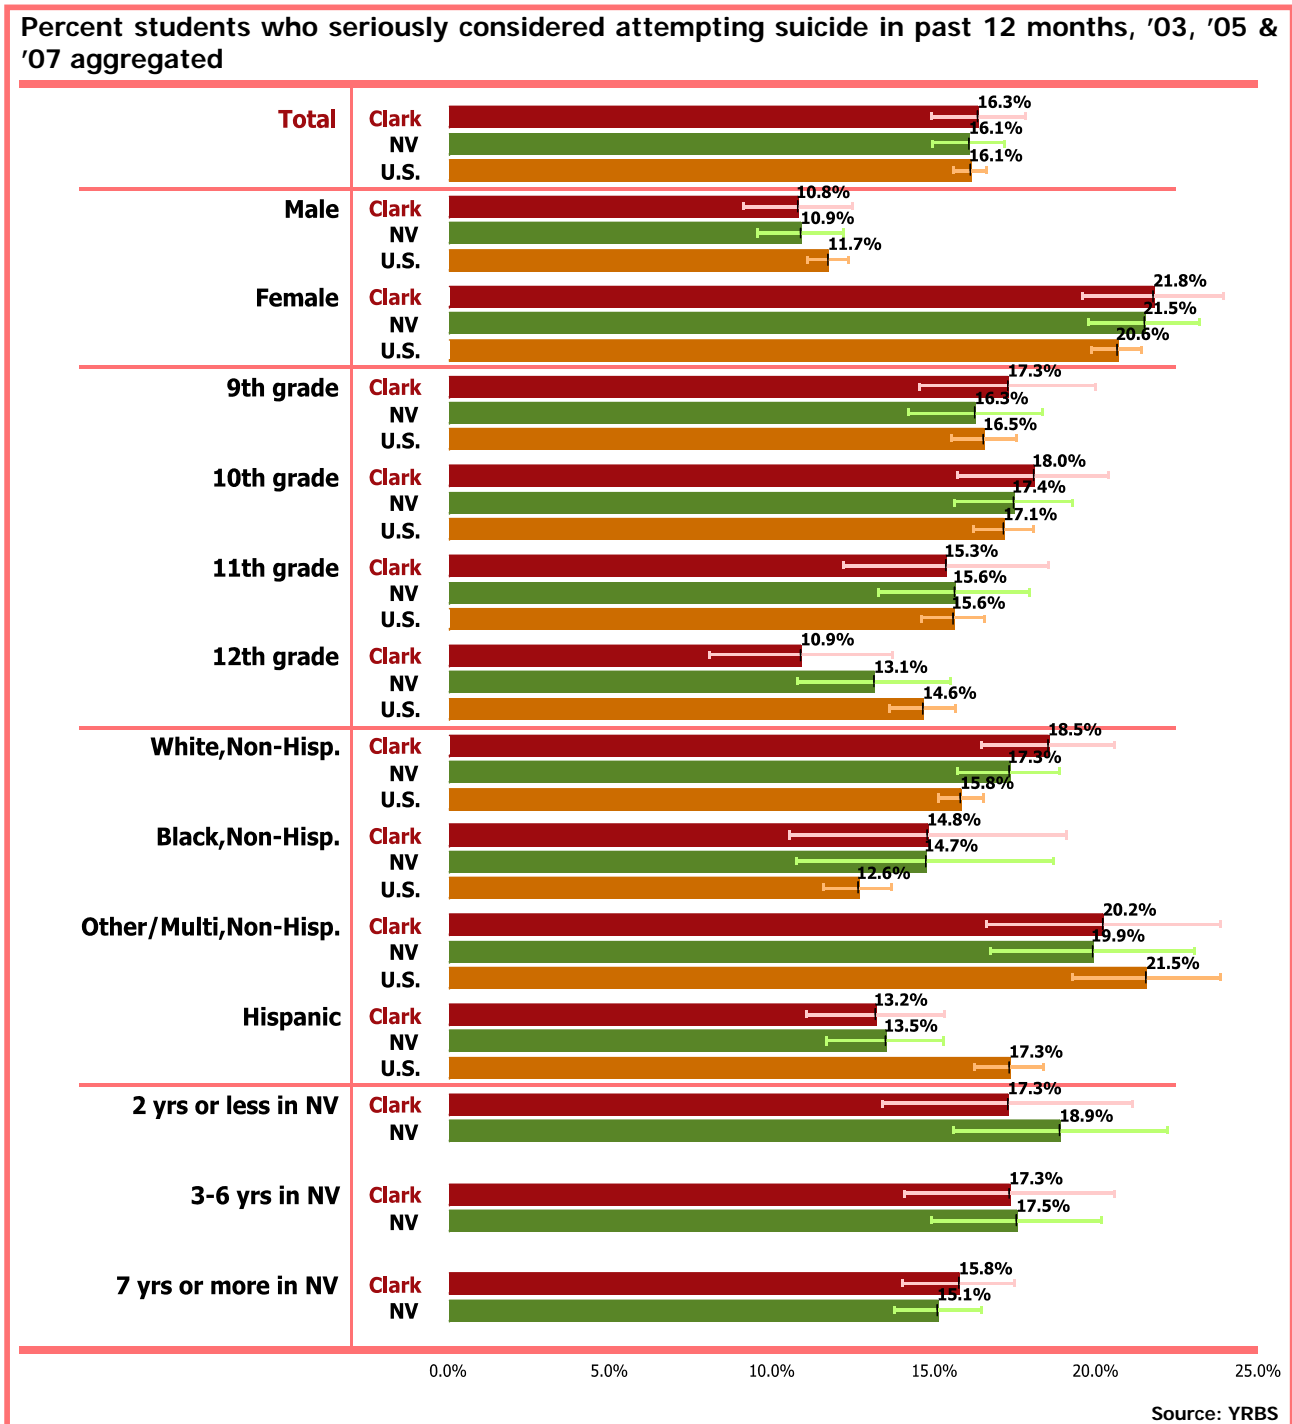

Seriously considered attempting suicide in past 12 months, available years in 2003-07

**INDICATOR 18 continued**

Based on available data aggregated from 2003 to 2007, 16.3% of students in the county have seriously considered attempting suicide in the past 12 months, compared to 16.1% in both the state and the nation. Female students were more likely to consider attempting suicide than male students in both the county and the nation, according to the aggregated data.

**INDICATOR 19:** Percentage of students who made a plan about how they would attempt suicide during the past 12 months.

**Made a suicide plan in past 12 months, available years in 2003-07**

**INDICATOR 19 continued**

Based on available data aggregated from 2003 to 2007, 14.6% of students in the county have made a plan in the past 12 months about how they would attempt suicide, compared to 14.8% in the state and 13.7% in the nation. Female students were more likely to make a suicide plan than male students in both the county and the nation, according to the aggregated data.

**INDICATOR 20:** Percentage of students who attempted suicide one or more times during the past 12 months.

**Attempted suicide in past 12 months, available years in 2003-07**

**INDICATOR 20 continued**

Based on available data aggregated from 2003 to 2007, 9.1% of students in the county have attempted suicide one or more times in the past 12 months, compared to 8.8% in the state and 7.9% in the nation. Female students and students of lower grade levels were more at risk for attempting suicide in both the county and the nation, according to the aggregated data.

**INDICATOR 21:** Percentage of students who made a suicide attempt that resulted in an injury, poisoning, or an overdose that had to be treated by a doctor or nurse during the past 12 months.

**Suicide attempt treated by a doctor or nurse in past 12 months, available years in 2003-07**

## Tobacco Use

**Indicator 22:** Lifetime cigarette use

**Indicator 23:** Smoked a whole cigarette before age 13 years

**Indicator 24:** Current cigarette use

**Indicator 25:** Current frequent cigarette use

**Indicator 26:** Smoked more than 10 cigarettes per day (among current smokers)

**Indicator 27:** Bought cigarettes in a store (among current smokers <18 years)

**Indicator 28:** Gave someone else money to buy cigarettes (among current smokers <18 years)

**Indicator 29:** Borrowed or bummed cigarettes from someone else (among current smokers <18 years)

**Indicator 30:** Smoked cigarettes on school property

**Indicator 31:** Current smokeless tobacco use

**Indicator 32:** Used smokeless tobacco on school property

**INDICATOR 22:** Percentage of students who have ever tried cigarette smoking, even one or two puffs.

### Lifetime cigarette use, available years in 2003-07

**INDICATOR 22 continued**

Based on available data aggregated from 2003 to 2007, 48.3% of students in the county have tried cigarette smoking in their lifetime, compared to 51.1% in the state and 54.4% in the nation. Students of higher grade levels were more likely to try cigarette smoking in both the county and the nation, according to the aggregated data.

**INDICATOR 23:** Percentage of students who smoked a whole cigarette for the first time before age 13 years.

**Smoked a whole cigarette before age 13 years, available years in 2003-07**

**INDICATOR 23 continued**

Based on available data aggregated from 2003 to 2007, 14.1% of students in the county have smoked a whole cigarette for the first time before age 13 years, compared to 15.6% in the state and 16.2% in the nation.

**INDICATOR 24:** Percentage of students who smoked cigarettes on at least one day during the past 30 days.

**Current cigarette use, available years in 2003-07**

**INDICATOR 24 continued**

Based on available data aggregated from 2003 to 2007, 15.6% of students in the county smoked cigarettes on one or more days during the past 30 days, compared to 17% in the state and 21.6% in the nation. Non-Hispanic white students were more at risk for cigarette smoking than non-Hispanic black and Hispanic students in both the county and the nation, according to the aggregated data.

**INDICATOR 25:** Percentage of students who smoked cigarettes on 20 or more days during the past 30 days .

**Current frequent cigarette use, available years in 2003-07**

**INDICATOR 25 continued**

Based on available data aggregated from 2003 to 2007, 5.4% of students in the county smoked cigarettes on 20 or more days during the past 30 days, compared to 6.9% in the state and 9.1% in the nation. Non-Hispanic white students were more at risk than non-Hispanic black and Hispanic students for frequent cigarette use in both the county and the nation, according to the aggregated data.

**INDICATOR 26:** Among students who currently smoked cigarettes, the percentage of students who smoked more than 10 cigarettes per day on the days they smoked during the past 30 days.

**Smoked more than 10 cigarettes per day (among students who currently smoked cigarettes), available years in 2003-07**

**INDICATOR 30 continued**

Based on available data aggregated from 2003 to 2007, 5.6% of students in the county smoked cigarettes on school property on one or more days during the past 30 days, compared to 6.3% in the state and 6.8% in the nation.

**Percent students who smoked cigarettes on school property in past 30 days, '03, '05 & '07 aggregated**

**INDICATOR 31:** Percentage of students who used chewing tobacco, snuff, or dip on at least one day during the past 30 days.

**Current smokeless tobacco use, available years in 2003-07**

**INDICATOR 31 continued**

Based on available data aggregated from 2003 to 2007, 2.9% of students in the county used smokeless tobacco during the past 30 days, compared to 4.7% in the state and 7.5% in the nation. Males were more likely than females to use smokeless tobacco in both the county and the nation, according to the aggregated data.

**INDICATOR 32:** Percentage of students who used chewing tobacco, snuff, or dip on school property on at least one day during the past 30 days.

Used smokeless tobacco on school property in past 30 days, available years in 2003-07

**INDICATOR 32 continued**

Based on available data aggregated from 2003 to 2007, 1.9% of students in the county used smokeless tobacco on school property during the past 30 days, compared to 3.1% in the state and 5.3% in the nation. Males were more likely than females to use smokeless tobacco on school property in both the county and the nation, according to the aggregated data.

**Percent students who used smokeless tobacco on school property in past 30 days, '03, '05 & '07 aggregated**

Overall Prevalence by Indicator

Source: YRBS

## Alcohol Use

**Indicator 33:** Lifetime alcohol use

**Indicator 34:** Drank alcohol before age 13 years

**Indicator 35:** Current alcohol use

**Indicator 36:** Episodic heavy drinking

**Indicator 37:** Bought alcohol in a store (among current drinkers)

**Indicator 38:** Gave someone else money to buy alcohol (among current drinkers)

**Indicator 39:** Someone gave alcohol to me (among current drinkers)

**Indicator 40:** Took alcohol from a store or family member (among current drinkers)

**Indicator 41:** Drank alcohol on school property

**INDICATOR 33:** Percentage of students who had at least one drink of alcohol on one or more days during their life.

**Lifetime alcohol use, available years in 2003-07**

**INDICATOR 33 continued**

Based on available data aggregated from 2003 to 2007, 71.7% of students in the county have had one or more drinks of alcohol in their lifetime, compared to 73.6% in the state and 74.8% in the nation. Females were more at risk for alcohol use than males in both the county and the nation, according to the aggregated data.

**INDICATOR 34:** Percentage of students who had their first drink of alcohol before age 13 years.**Drank alcohol before age 13 years, available years in 2003-07**

**INDICATOR 34 continued**

Based on available data aggregated from 2003 to 2007, 27.8% of students in the county had their first drink of alcohol before age 13 years, compared to 28.9% in the state and 25.7% in the nation. Males were more likely than females to have their first drink of alcohol before age 13 years in both the county and the nation, according to the aggregated data.

**Percent students who had first drink of alcohol before age 13 years , '03, '05 & '07 aggregated**

**INDICATOR 35:** Percentage of students who had at least one drink of alcohol on one or more days during the past 30 days.

**Current alcohol use, available years in 2003-07**

### INDICATOR 35 continued

Based on available data aggregated from 2003 to 2007, 38% of students in the county had at least one drink of alcohol on one or more days during the past 30 days, compared to 40.5% in the state and 44.3% in the nation. Female students, students of higher grade levels, and non-Hispanic white students were more at risk for current alcohol use in the county, according to the aggregated data.

**INDICATOR 36:** Percentage of students who had five or more drinks of alcohol in a row, that is, within a couple of hours, on one or more days during the past 30 days.

**Episodic heavy drinking, available years in 2003-07**

**INDICATOR 36 continued**

Based on available data aggregated from 2003 to 2007, 21.6% of students in the county engaged in episodic heavy drinking or had at least five drinks of alcohol in a row on one of more days during the past 30 days, compared to 24.4% in the state and 26.7% in the nation. Non-Hispanic whites were more likely than other racial/ethnic groups to engage in episodic heavy drinking in both the county and the nation, according to the aggregated data.

**Percent students who had 5+ drinks of alcohol in a row in past 30 days, '03, '05 & '07 aggregated**

Source: YRBS

**INDICATOR 37:** Among students who currently drank alcohol, the percentage of students who usually obtained the alcohol they drank by buying it in a store such as a liquor store, convenience store, supermarket, discount store, or gas station during the past 30 days.

<b>Bought alcohol in a store (among students who currently drank alcohol), available years in 2003-07</b>

## INDICATOR 42 continued

Based on available data aggregated from 2003 to 2007, 39.2% of students in the county used marijuana one or more times in their lifetime, compared to 40.1% in the state and 39% in the nation. Non-Hispanic blacks in both the county and the state were more likely than other racial/ethnic groups to have used marijuana in their lifetime, according to the aggregated data.

**INDICATOR 43:** Percentage of students who tried marijuana for the first time before age 13 years.

**Tried marijuana before age 13 years, available years in 2003-07**

## INDICATOR 43 continued

Based on available data aggregated from 2003 to 2007, 10.3% of students in the county tried marijuana for the first time before age 13 years, compared to 11% in the state and 9% in the nation. Males were more likely than females to have tried marijuana before age 13 years in both the county and the nation, according to the aggregated data.

**INDICATOR 44:** Percentage of students who used marijuana one or more times during the past 30 days.

**Current marijuana use, available years in 2003-07**

## INDICATOR 44 continued

Based on available data aggregated from 2003 to 2007, 17.9% of students in the county used marijuana one or more times in the past 30 days, compared to 18.2% in the state and 20.8% in the nation. Males were more at risk than females for current marijuana use in both the county and the nation, according to the aggregated data.

**INDICATOR 45:** Percentage of students who used marijuana on school property one or more times during the past 30 days.

**Used marijuana on school property in past 30 days, available years in 2003-07**

## INDICATOR 46 continued

Based on available data aggregated from 2003 to 2007, 9.3% of students in the county used some form of cocaine one or more times in their lifetime, compared to 9.9% in the state and 7.8% in the nation. Females were more likely than males to have used cocaine in their lifetime in both the county and the state, according to the aggregated data.

**INDICATOR 47:** Percentage of students who used any form of cocaine, including powder, crack, or freebase one or more times during the past 30 days.

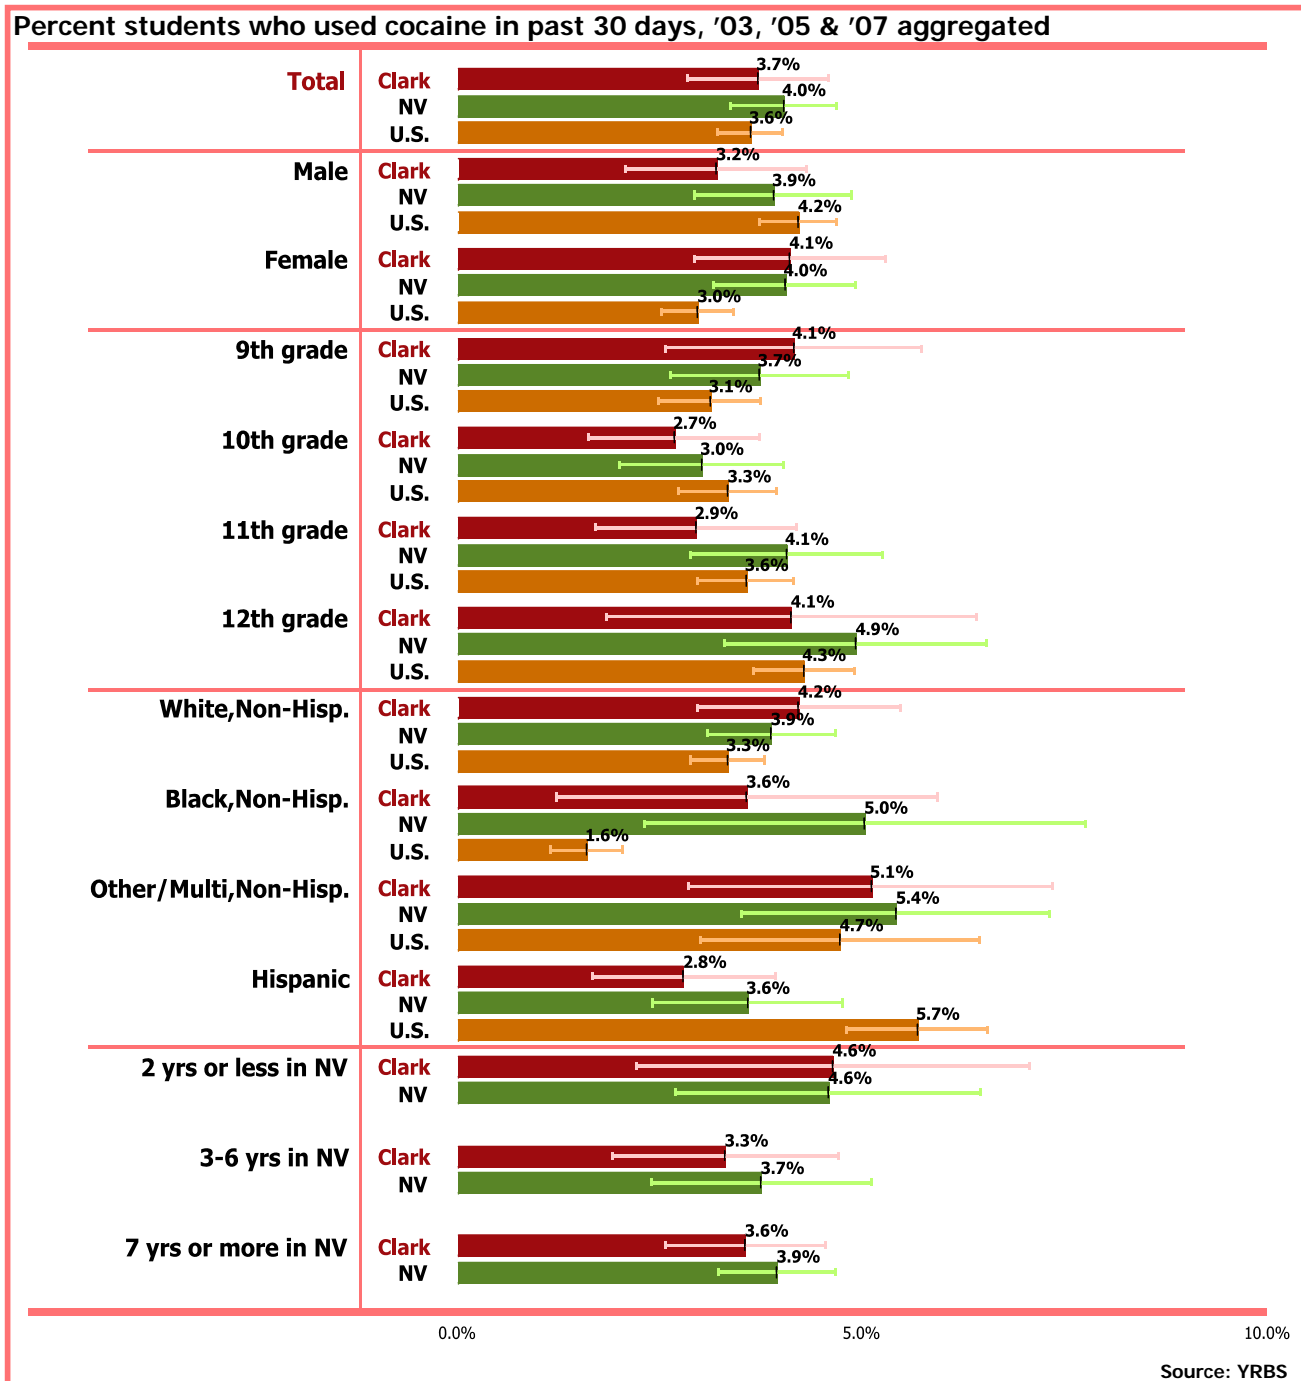

Current cocaine use, available years in 2003-07

## INDICATOR 47 continued

Based on available data aggregated from 2003 to 2007, 3.7% of students in the county used some form of cocaine one or more times in the past 30 days, compared to 4% in the state and 3.6% in the nation.

**INDICATOR 48:** Percentage of students who sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high one or more times during their life.

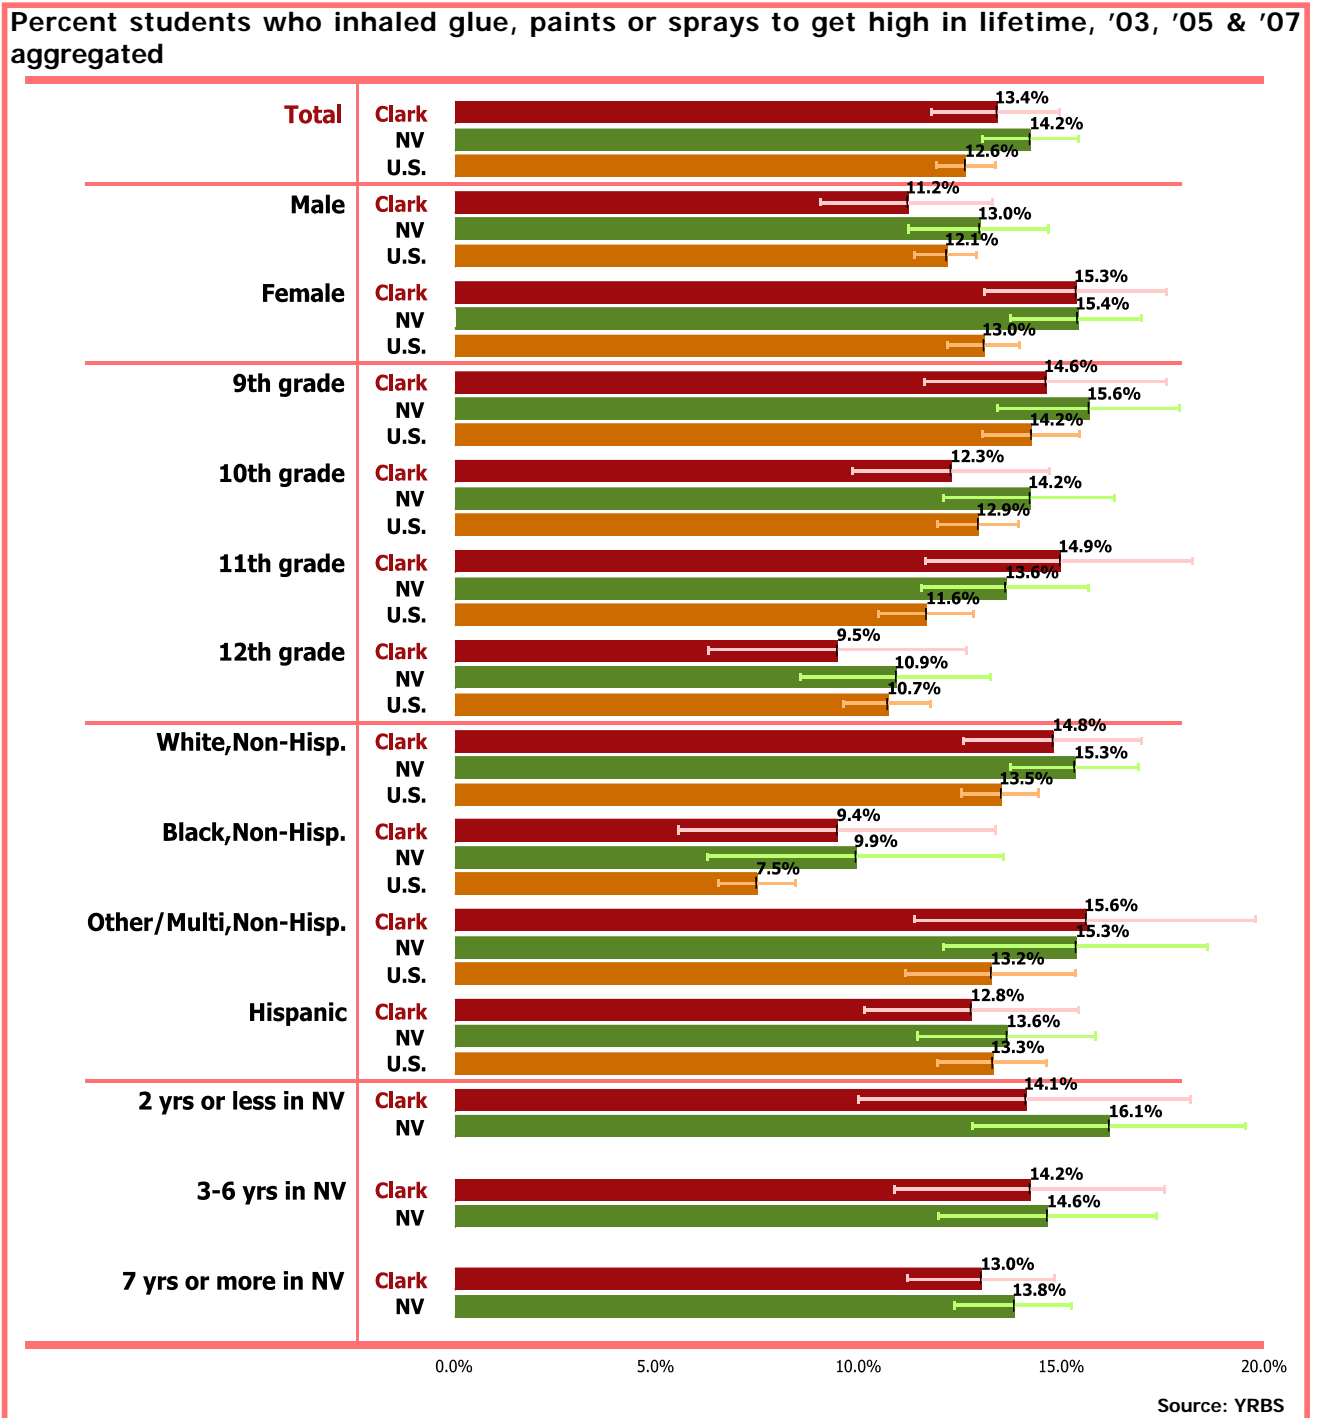

Lifetime inhalant use, available years in 2003-07

**INDICATOR 48 continued**

Based on available data aggregated from 2003 to 2007, 13.4% of students in the county sniffed glue, breathed the contents of aerosol spray cans, or inhaled paints or sprays to get high one or more times during their lifetime, compared to 14.2% in the state and 12.6% in the nation. Females were more at risk than males for inhalant use in both the county and the nation, according to the aggregated data.

**INDICATOR 49:** Percentage of students who sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high one or more times during the past 30 days.

Current inhalant use, available years in 2003-07

## INDICATOR 50 continued

Based on available data aggregated from 2003 to 2007, 9.8% of students in the county and 10% in the state used methamphetamines one or more times in their lifetime, compared to a significantly lower national prevalence estimated at 6.1%. Female students and non-Hispanic white students were more at risk for methamphetamine use in both the county and the state, according to the aggregated data.

**INDICATOR 51:** Percentage of students who took steroid pills or shots without a doctor's prescription one or more times during their life.

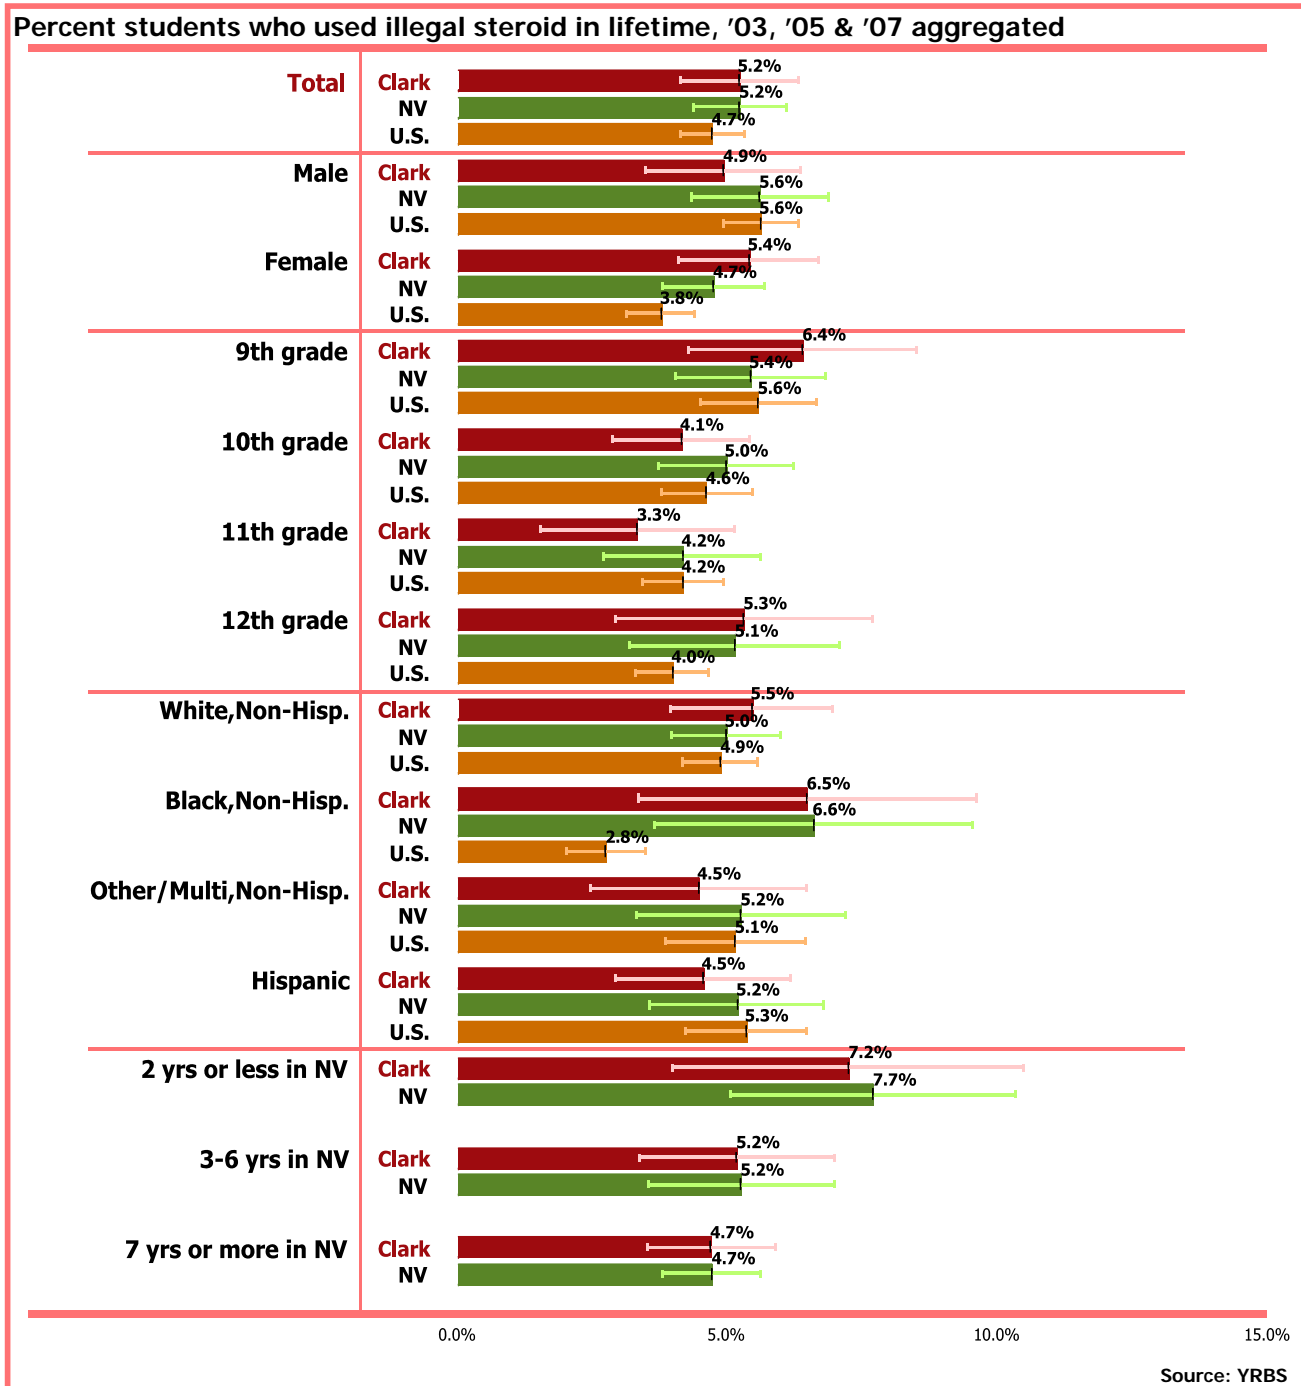

Lifetime illegal steroid use, available years in 2003-07

## INDICATOR 51 continued

Based on available data aggregated from 2003 to 2007, 5.2% of students in both the county and the state took steroid pills or shots without a doctor's prescription one or more times in their lifetime, compared to 4.7% in the nation.

**INDICATOR 52:** Percentage of students who used a needle to inject any illegal drug into their body one or more times during their life.

**Lifetime illegal injection drug use, available years in 2003-07**

**INDICATOR 53 continued**

Based on available data aggregated from 2003 to 2007, 11.6% of students in the county have used heroin, hallucinogens, depressants, tranquilizers or other illegal drugs in their lifetime, compared to 12.4% in the state. Female students and non-Hispanic white students were more likely to report this risky behavior in both the county and the state, according to the aggregated data.

**Percent students who used heroin, hallucinogens, depressants, tranquilizers or other illegal drugs in lifetime, '03, '05 & '07 aggregated**

**INDICATOR 54:** Percentage of students who have taken over-the-counter drugs to get high.

**Lifetime over-the-counter drug use, available years in 2003-07**

# Illicit Drug Use

## Overall Prevalence by Indicator

Source: YRBS

## Sexual Behaviors

**Indicator 56:** Ever had sexual intercourse

**Indicator 57:** Had first sexual intercourse before age 13 years

**Indicator 58:** Had sexual intercourse with 4+ persons during their life

**Indicator 59:** Currently sexually active

**Indicator 60:** Drank alcohol or used drugs before last sexual intercourse (among currently sexually active students)

**Indicator 61:** Condom use (among currently sexually active students)

**Indicator 62:** Birth control pill use (among currently sexually active students)

**Indicator 63:** Were taught in school about AIDS or HIV infection

**INDICATOR 56: Percentage of students who have ever had sexual intercourse.**

**Ever had sexual intercourse, available years in 2003-07**

**INDICATOR 56 continued**

Based on available data aggregated from 2003 to 2007, 43.8% of students in the county reported having had sexual intercourse, compared to 44.3% in the state and 47.1% in the nation. The percentage of students reporting having had sexual intercourse was significantly higher among non-Hispanic blacks than other racial/ethnic groups in both the county and the nation, according to the aggregated data.

**INDICATOR 57:** Percentage of students who had sexual intercourse for the first time before age 13 years.

**Had first sexual intercourse before age 13 years, available years in 2003-07**

**INDICATOR 57 continued**

Based on available data aggregated from 2003 to 2007, 7.1% of students in the county have had sexual intercourse before age 13 years, compared to 6.9% in both the state and the nation. The percentage of students reporting having had sexual intercourse before age 13 years was higher among males than females, and among non-Hispanic blacks than other racial/ethnic groups in both the county and the nation, according to the aggregated data.

**INDICATOR 58:** Percentage of students who had sexual intercourse with four or more persons during their life.

**Had sexual intercourse with 4+ persons in lifetime, available years in 2003-07**

**INDICATOR 59 continued**

Based on available data aggregated from 2003 to 2007, 31.3% of students in the county had sexual intercourse with at least one person during the past three months, compared to 31.2% in the state and 34.4% in the nation. The percentage of sexually active students was significantly higher among non-Hispanic blacks than other racial/ethnic groups in both the county and the nation, according to the aggregated data.

**Percent students who had sexual intercourse with 1+ persons in past 3 months, '03, '05 & '07 aggregated**

**INDICATOR 60:** Among students who were currently sexually active, the percentage of students who drank alcohol or used drugs before last sexual intercourse.

**Drank alcohol or used drugs before last sexual intercourse (among students who were currently sexually active), available years in 2003-07**

**INDICATOR 61 continued**

Based on available data aggregated from 2003 to 2007, 65.5% of sexually active students in the county reported condom use during their last sexual intercourse, compared to 64.6% in the state and 62.4% in the nation.

**Percent students reporting condom use (among students who were currently sexually active), '03, '05 & '07 aggregated**

Source: YRBS

**INDICATOR 62:** Among students who were currently sexually active, the percentage of students who reported that either they or their partner had used birth control pills to prevent pregnancy before their last sexual intercourse.

**Birth control pill use (among students who were currently sexually active), available years in 2003-07**

## Overall Prevalence by Indicator

Source: YRBS

## Weight Status, Dietary Behaviors and Physical Activity

**Indicator 64:** Overweight according to BMI

**Indicator 65:** Obese according to BMI

**Indicator 66:** Described themselves as overweight

**Indicator 67:** Were trying to lose weight

**Indicator 68:** Exercised to lose weight or to keep from gaining weight

**Indicator 69:** Ate less food, fewer calories, or low-fat foods to lose weight or to keep from gaining weight

**Indicator 70:** Did not eat for 24+ hours to lose weight or to keep from gaining weight

**Indicator 71:** Took diet pills, powders, or liquids to lose weight or to keep from gaining weight

**Indicator 72:** Vomited or took laxatives to lose weight or to keep from gaining weight

**Indicator 73:** Ate fruits and vegetables 5+ times per day

**Indicator 74:** Drank soda or pop 1+ times per day

**Indicator 75:** Met recommended levels of physical activity

**Indicator 76:** Watched television 3+ hours per day

**Indicator 77:** Used computers 3+ hours per day

**INDICATOR 64:** Percentage of students who were overweight but not obese (i.e.,  $\geq$  85th percentile but  $<$  95th percentile for BMI, by age and sex, based on reference data).

Overweight but not obese, available years in 2003-07

**INDICATOR 66 continued**

Based on available data aggregated from 2003 to 2007, 29.9% of students in the county described themselves as slightly or very overweight, compared to 29.5% in the state and 30.1% in the nation. Prevalence of self-described overweight status was significantly higher among females than males in both the county and the nation, according to the aggregated data.

**Percent students who described themselves as slightly or very overweight, '03, '05 & '07 aggregated**

**INDICATOR 67: Percentage of students who were trying to lose weight.**

**Were trying to lose weight, available years in 2003-07**

**INDICATOR 68 continued**

Based on available data aggregated from 2003 to 2007, 64.1% of students in the county and 63.7% in the state exercised to lose weight or to keep from gaining weight during the past 30 days, compared to a significantly lower national prevalence estimated at 59.3%. A significantly higher percentage of females than males exercised to loss or control weight in both the county and the nation, according to the aggregated data.

**Percent students who exercised to lose weight or to keep from gaining weight in past 30 days, '03, '05 & '07 aggregated**

Source: YRBS

**INDICATOR 69:** Percentage of students who ate less food, fewer calories, or low-fat foods to lose weight or to keep from gaining weight during the past 30 days.

Ate less food, fewer calories, or low-fat foods to lose weight or to keep from gaining weight in past 30 days, available years in 2003-07

**INDICATOR 70 continued**

Based on available data aggregated from 2003 to 2007, 12.3% of students in the county went without eating for 24 hours or more to lose or control weight during the past 30 days, compared to 11.5% in the state and 12.5% in the nation. A significantly higher percentage of females than males engaged in this practice in both the county and the nation, according to the aggregated data.

**Percent students who did not eat for 24+ hours to lose weight or to keep from gaining weight in past 30 days, '03, '05 & '07 aggregated**

**INDICATOR 71:** Percentage of students who took any diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight during the past 30 days.

**Took diet pills, powders, or liquids to lose weight or to keep from gaining weight in past 30 days, available years in 2003-07**

**INDICATOR 71 continued**

Based on available data aggregated from 2003 to 2007, 8.4% of students in the county took diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight during the past 30 days, compared to 8.3% in the state and 7.2% in the nation. The percentage of students reporting this practice was higher among females than males, and among Hispanics than other racial/ethnic groups in both the county and the state, according to the aggregated data.

**Percent students who took diet pills, powders, or liquids to lose weight or to keep from gaining weight in past 30 days, '03, '05 & '07 aggregated**

**INDICATOR 72:** Percentage of students who vomited or took laxatives to lose weight or to keep from gaining weight during the past 30 days.

**Vomited or took laxatives to lose weight or to keep from gaining weight in past 30 days, available years in 2003-07**

**INDICATOR 72 continued**

Based on available data aggregated from 2003 to 2007, 6.8% of students in the county vomited or took laxatives to lose weight or to keep from gaining weight during the past 30 days, compared to 6.3% in the state and 4.9% in the nation. A significantly higher percentage of females than males engaged in this practice in both the county and the nation, according to the aggregated data.

**Percent students who vomited or took laxatives to lose weight or to keep from gaining weight in past 30 days, '03, '05 & '07 aggregated**

Source: YRBS

**INDICATOR 73:** Percentage of students who ate fruits and vegetables (100% fruit juices, fruit, green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables) five or more times per day during the past 7 days.

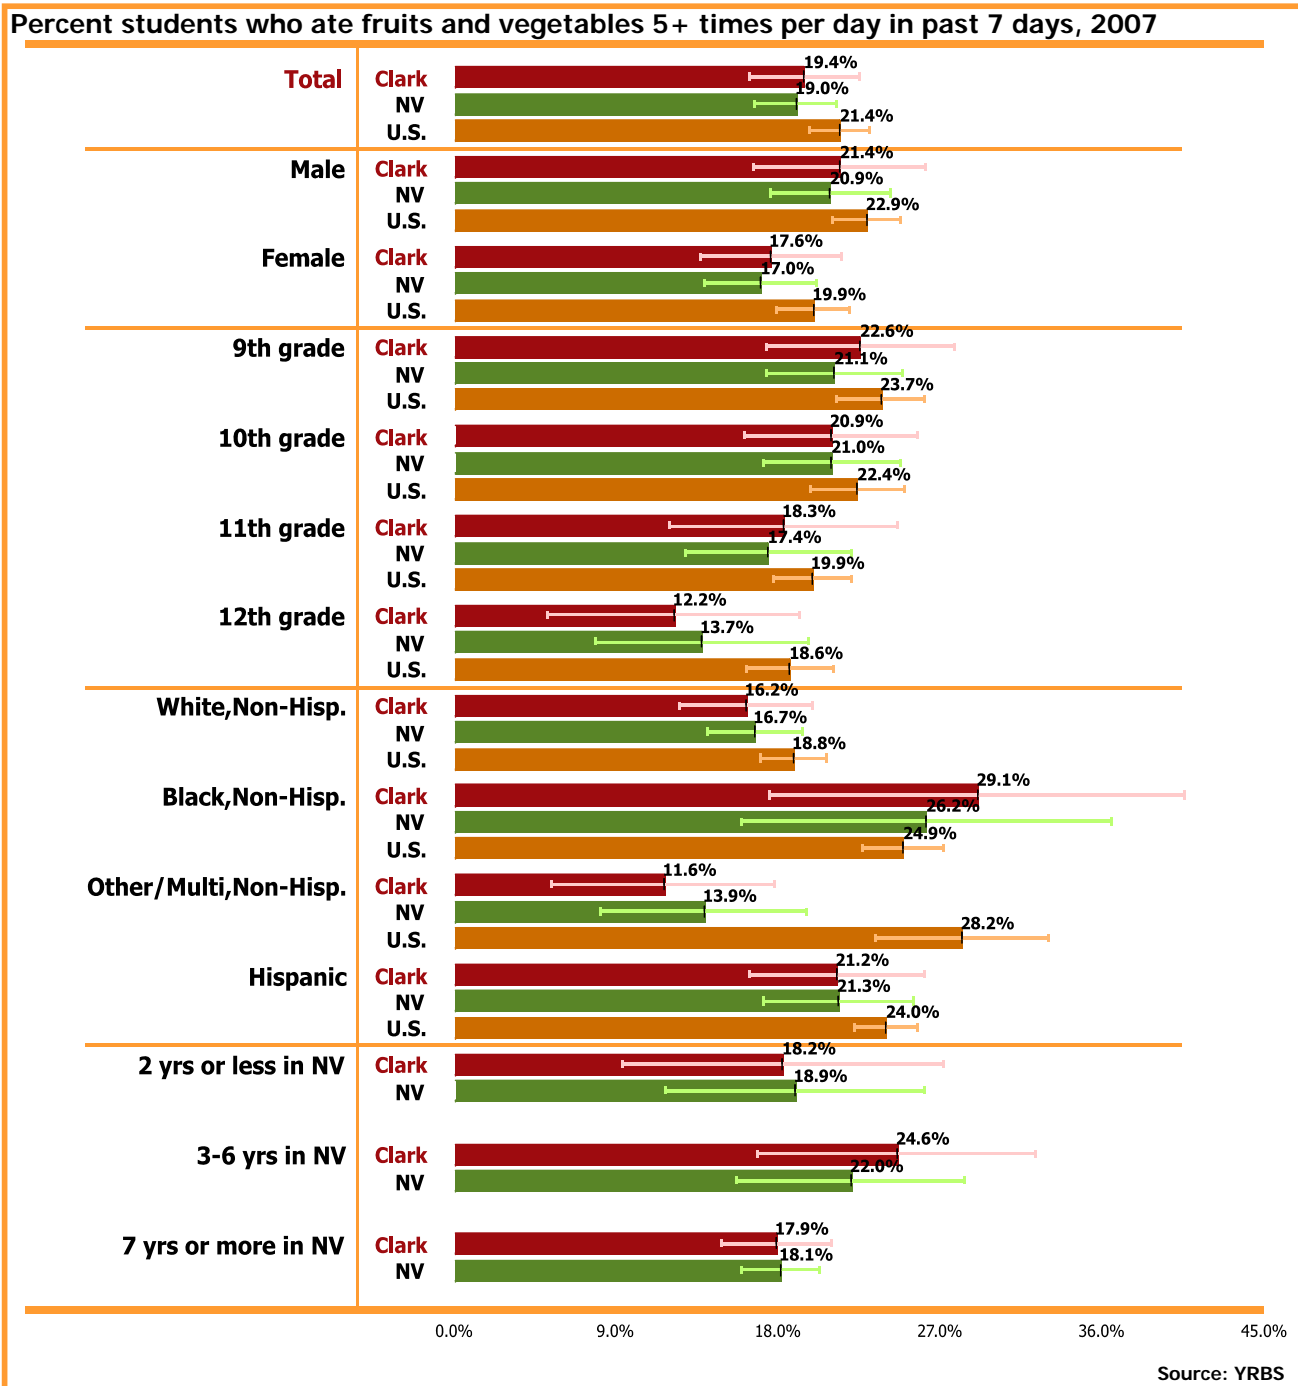

Ate fruits and vegetables 5+ times per day in past 7 days, available years in 2003-07

**INDICATOR 75 continued**

In 2007, 42.8% of students in the county met recommended levels of physical activity, compared to 46.2% in the state and 34.7% in the nation. A significantly higher percentage of males than females met recommended levels of physical activity in both the county and the nation. The percentage of students meeting recommended levels of physical activity was much lower among Hispanics than non-Hispanics in both the county and the state, according to the same year's data.

**INDICATOR 76:** Percentage of students who watched television three or more hours per day on an average school day.

Watched television 3+ hours per day, available years in 2003-07

**Youth Risk Behavior Surveillance (YRBS)**

<http://www.cdc.gov/HealthyYouth/yrbs/index.htm>

The YRBS system was developed by CDC in 1990 to monitor priority health risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. The YRBS includes national, state, and local school-based surveys of representative samples of 9th through 12th grade students. These surveys are conducted every two years, usually during the spring semester. The national survey, conducted by CDC, provides data representative of high school students in public and private schools in the United States. The state and local surveys, conducted by state and local agencies, provide data representative of high school students in each state or local school district. Of note is that the national data from YRBS are not the aggregate of state or local datasets. Data used to calculate the prevalence of selected youth risk behaviors in this report were from both the local and national YRBS. The information gathered from YRBS can be used to measure progress and changes in youth risk behaviors, help determine the health and educational needs of our youth, and guide activities to address these needs.

**Weighting and Data Aggregation**

Statistical analyses were conducted on weighted YRBS data using SAS software to account for the complex sampling designs. Prevalence estimates computed from the YRBS data are therefore, weighted estimates. Weighting of the national, state and local YRBS data adjusts for student nonresponse and the distribution of students by grade, gender and race/ethnicity in each jurisdiction, and thus corrects for the differences between the sample and the population from which the sample is taken. In addition to presenting annual prevalence estimates, available YRBS data from 2003 to 2007 were aggregated to produce more reliable estimates of prevalence.

**Prevalence and Confidence Interval**

All YRBS indicators were reported in terms of prevalence, a measure of the extent of a condition in a population at a given point in time. In this report, prevalence estimates from weighted data were expressed in the form of percentages. The number of survey respondents with the condition of interest (denoted by "N.O.I" in the tabulated data), the number of all respondents (denoted by "N.Res." in the tabulated data), and the standard error of the prevalence estimate (denoted by "S.E." in the tabulated data), were also provided. Since rates and percentages based on small numbers may fluctuate dramatically from year to year, or differ considerably across areas and demographic groups even when there is no meaningful difference, confidence interval (C.I.) was reported to provide a means of assessing the precision of a point estimate (e.g. a prevalence estimate). Although data aggregation helps provide relatively stable estimates, the provision of C.I. helps ensure that small differences will not be exaggerated. This report has used the standard 95% confidence level. This means that in 95 out of 100 cases, the estimated range between the lower and upper confidence limits contains the unknown population parameter (e.g. the true prevalence) which is never obtainable and can only be estimated. Computation of C.I. for prevalence estimates took into account the weighting of complex survey designs.

**Race and Ethnicity**

Race and ethnicity are two different concepts and are often recorded separately in data collection. Commonly recognized racial groups in the U.S. include "white", "African American or black", "Asian, Native Hawaiian and other Pacific Islander", "American Indian, Alaska Native or Native American", etc. Most public health data also collect a minimum of two ethnicities: "Hispanic or Latino" and "not Hispanic or Latino". Unless otherwise indicated, this report adopted a racial/ethnic classification based on the combined status of race and ethnicity.
