No person may yield his or her time to another person. In those situations where large groups of people desire to address the Board on the same matter, the Chair may request that those groups select only one or two speakers from the group to address the Board on behalf of the group. Dr. Fildes advised the Board to review the minutes and handouts for detailed discussions of the (3) meetings that were listed. He stated he would be willing to answer any questions in any of the areas that are listed.

C. Review/Discuss Out of Area Trauma Transports for 2nd Quarter 2016

Ms. Palmer advised the Board that the out-of-area (OOA) transports for 2nd quarter 2016 was 6%. She explained that when the OOAs are over 5%, the Board has required that additional research occur to find out the reason why the patient had been transported outside of the catchment area. Most of the EMS agencies were able to research these calls and submit the following results:

- Time of day and traffic flow
- Education on trauma catchment areas
- Hospital declaring internal disaster
- Patient request

Ms. Palmer stated that time of day and traffic were the biggest deciding factors for the OOA and felt with the US95 and I15 construction this might continue.

It was brought to the Quality Improvement (QI) Committee to make sure the agencies are reminding their crews of the trauma catchment areas.
