

Pediatric Early Warning Sentinel Surveillance (PEWSS) Weekly Bulletin Southern Nevada Health District

October 29, 2014

Data through October 25, 2014

Overview About PEWSS

For the week ending 10/25/2014, the following pathogens were detected with a moderate volume of testing: Adenovirus, Coronavirus NL63, Parainfluenza 1, 2, and 3, Rhinovirus/Enterovirus. Although an increase in rhinovirus/enterovirus has occurred, EV-D68 has not yet been identified in Southern Nevada through additional testing.

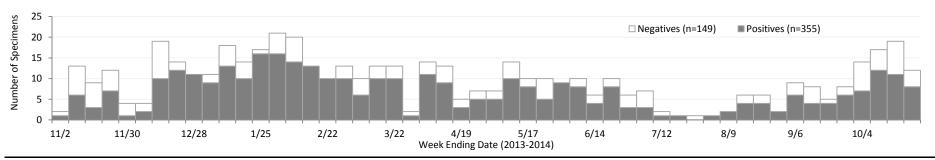

For additional information about PEWSS, please contact Brian Labus, MPH at the SNHD Office of Epidemiology at 702.759.1299. PEWSS program description, methodology, and weekly bulletins can be viewed at http://www.southernnevadahealthdistrict.org/stats-reports/influenza.php

Table 1. Current Testing results

Testing Category	Last Week	Four Weeks	Trend	Comment
Adenovirus	Detected	Detected*		
Chlamydophila pneumoniae	_	_		
Coronavirus HKU1	_	_		
Coronavirus NL63	Detected	Detected*		
Coronavirus 229E	_	_		
Coronavirus OC43	_	_		
Human metapneumovirus	_	_		
Influenza A	_	_		
Influenza B	_	_		
Mycoplasma pneumoniae	_	_		
Parainfluenza 1	Detected	Sporadic	\rightarrow	
Parainfluenza 2	Detected	Detected*		
Parainfluenza 3	Detected	Detected*		
Parainfluenza 4	_	_		
Respiratory synctial virus (RSV)	_	_		
Rhinovirus/Enterovirus	Detected	Detected*		EV-D68 would be detected, but cannot be differentiated from other enteroviruses or rhinovirus
Specimen Volume	Moderate	Moderate	\rightarrow	

^{*} Insufficient historical data exists to determine the level of detection
