SIZE:

This facility, as proposed, will consist of an interior area of approximately 26,000 square feet. There will be no exterior operations. The maximum storage capacity is approximately 950 cubic yards. The maximum processing rate is approximately 12 tons per day.

OPERATIONS:

This facility is seeking a permit from the Southern Nevada Health District (SNHD) to operate a recycling center. A recycling center includes a facility designed and operated to receive, store, or process recyclable materials which have been separated at the source of waste generation from other solid waste and for which there is an available market. This facility will accept catalytic converters with all associated metals, including ferrous and non-ferrous metals. This facility will NOT be open to the public.
